As more and more nations go into space, and particularly as private companies enter space activity, there will be a need to resolve a number of legal problems, some international and some domestic. There is the problem of whether and how to define outer space, particularly its lower limit, so as to distinguish it from airspace. This is an issue because airspace is subject to the sovereign claim of the territory below it, but outer space is not. Related to this are claims by equatorial nations that the geostationary orbit, the band of space approximately 23,000 miles above earth that is the perfect location for most communication satellites, is a sovereign resource. The United States and other industrialized nations have rejected this claim, but it persists as a legal issue.

There is also the claim by some developing nations that remote sensing of conditions on Earth by satellite should not occur without some form of prior consent and without some rights by the sensed State concerning access to and distribution of the information.

Other problems include the lack of international law to control space pollution. There are, at present, more than 5,600 manmade objects circling the Earth that are tracked. These tracked objects are growing in number by about 300-500 per year.

But untracked objects can be dangerous also. For instance, by one estimate, there may be 40,000 marble-sized objects and from 10 to 100 billion paint flakes in orbit, and collisions with them are beginning to occur. In July 1983, the shuttle orbiter Challenger was hit by a 0.2 mm paint flake that damaged the Challenger's window. Similarly, in April 1984, the shuttle crew brought back to Earth some malfunctioning electronics boxes from the Solar Max satellite. The outer surfaces of those boxes were pitted with 160 holes created by flying paint chips.

Large amounts of ASAT testing by the Soviet Union and United States could seriously exacerbate this problem if such tests explode satellites at other than very low orbits. A small piece of debris created at 800 kilometers would stay in orbit for 30 years, and at 1200 kilometers would stay in orbit for 300 years. Obviously, the use of the most popular orbits will become diminished if pollution control in space does not become reality.

International law is also deficient when it comes to dealing with objects that fall back to earth from space. In 1978, when a nuclear powered satellite owned by the Soviet Union crashed in Northern Canada, the Soviets initially claimed they were not liable for the $14 million tab to clean up the radioactive debris since no one was injured and no property was damaged. After years of negotiation, they finally paid $3 million.

Finally, there are legal questions arising from the Outer Space Treaty, done in 1967. Article II of the Treaty mandates that space, including the moon and other celestial bodies, "is not subject to national appropriation by claim of sovereignty, by means of use or occupation, or by any other means." This provision conflicts with the right of a State to maintain jurisdiction and control over objects it launches into outer space. Since it is conceivable that in the 21st century, we may wish to build space structures encompassing large volumes of space or surface areas of the moon, it may be necessary to address and resolve whether the exercise of control and jurisdiction over an enclosed portion of the lunar surface or over an enclosed or utilized portion of some well defined orbital plane above the earth constitutes national appropriation "by means of use or occupation."

In addition to all these issues concerning international law and activities, there are many areas in which domestic law and regulations will have to be formulated or extended, particularly if we wish to encourage the private commercialization of space. It is important to bear in mind that Article VI of the Outer Space Treaty makes States responsible for activities carried out in outer space (including on the moon and other celestial bodies) by any of their private nationals or firms, even if the State does not exercise any direct or indirect control over such activities. If the Bhopal incident were to have taken place on the moon, the U.S. Government would have been liable, not just the company. That is why we must require liability insurance to be carried by any company engaged in privately-sponsored space-related activity.

But some legal issues are not amenable to such simple solutions. As space activity becomes more diverse in the 21st century, and ownership, financing, and participation, whether public or private, becomes more multinational, it will become more difficult to ascertain what laws apply to diverse actions, and who is to make that determination. For example, will specific criminal offense treaties be necessary as has been prompted by crimes committed aboard aircraft?

And speaking of crimes in space, we have not even sorted out the applicability of our own laws. For instance, it is illegal to murder someone in the space shuttle but there is no law prohibiting it on the moon or in a space station.

Some people have suggested that on long space voyages in the future, we will have to have legal counselors on board to arbitrate disputes.

The point of all this is that as we move further into space in the 21st century, we will also be moving into some uncharted legal territory as well. As a matter of prudence and common sense, we must develop the legal structure and machinery for resolving disputes in space before they occur.

Mr. Chairman, the issues I have raised today are not the only ones that will have to be addressed if we are to move forward with confidence to new heights, both figuratively and literally, in our space program. But they represent, in my view, the core of concerns and problems that we must face and resolve if our future is to be as bright as our hopes. Some of the issues I have raised are a matter of American will and determination alone. But some can only be addressed through international cooperation.

In the larger scheme of things, that may be a blessing. A world that sees the need for common endeavor for high purpose is less likely to be torn apart and possibly destroyed by national rivalries and tensions.

Anyone who has orbited the earth, as I was privileged to do more than two decades ago, cannot view the Earth from that distance and not see it for what it is—a small sphere, in a gigantic heavens, with a fragile ecosystem that spawned the miracle of life. It is hard, under such circumstances, to understand why the inhabitants of this planet cannot resolve their differences peacefully. Perhaps the space program can be one of the elements in bringing greater vision to the outlook of man.●

WOMEN FOR A SECURE FUTURE SUPPORT THE PRESIDENT'S STRATEGIC DEFENSE INITIATIVE

● Mr. ARMSTRONG. Mr. President, earlier today, I attended a press conference by the Women for a Secure Future, a group of women's organizations expressing their support of the President's strategic defense initiative. I have long held the organizations in attendance in very high regard, but today's statement in support of SDI served to further my respect for them. Representing Concerned Women for American, Renaissance Women, National Pro-Family Coalition, Daughters of the American Revolution, the Eagle Forum, and the National Association of Pro-American, these organizations are primarily concerned with profamily issues such as crime, pornography, and other threats to children and families. But today, they expressed the belief that all those concerns are meaningless unless we, as a nation, are prepared to defend ourselves through the strategic defense initiative, and remove the mutual assured destruction threat.

I ask that these statements made earlier today be printed in the RECORD.

The statements follow:

WOMEN FOR A SECURE FUTURE

(Joint Statement by Colleen Parro, Nov. 5, 1985)

We are mothers and workers, professionals, students and grandmothers. We share a concern for and interest in the protection and nurturing of human life.

The present and dangerous reign of nuclear terror caused by large numbers of nuclear weapons threatens the futures and very lives of us and our families, and millions of families around the world. We are particularly fearful because no measures have been taken to protect our children and families from nuclear attack.

This lack of defense against nuclear weapons is an irrational, irresponsible and immoral condition which must be changed if we and people everywhere are to have any hope for a secure future.

We refuse to continue to be held hostage by the threat of nuclear attack by the Soviets or other terrorist nations or the possibility of accidental nuclear war. We want America's children to be able to grow up with a sense of security and optimism, not fear, hopelessness and despair. The Strategic Defense Initiative offers a new era of hope, discovery and achievement to the youth of America.

Therefore, we commend and endorse the efforts of the President and the Congress to devise strategic defense systems—SDI—to intercept and destroy incoming nuclear missiles, whether launched deliberately or by accident—that is, the deployment of weapons designed to "save lives rather than to avenge them."

We have the technology today to build a defense for our country if only we have the will to do so. Such a defense will provide the opportunity for the peaceful, commercial and economic development of outer space. We urge the President to call for the deployment of a non-nuclear defense in space before he leaves office. Any treaties preventing such action should be revised or terminated in the supreme interest of the American people.

We want a future, secure and free, for ourselves and our families. This Strategic Defense Initiative offers the best and most realistic hope for achieving that goal. America's women are taking the lead in encouraging President Reagan to make his vision a reality.

STATEMENT BY CONNAUGHT MARSHNER, CHAIRMAN

Dr. Bernard Lown, American leader of the International Physicians for the Prevention of Nuclear War, on learning that the group had been awarded the 1985 Nobel Peace Prize for its antinuclear campaign, is quoted as saying, "We have to live together or die together, as the alternative to coexistence is no existence." We wholeheartedly agree with Dr. Lown's statement, but we also believe that the United States and the Soviet Union coexist on this globe because we DO have a strong defense system.

In order to maintain that strong defense, the National Pro-Family Coalition supports the Reagan Administration's position in accomplishing research and feasibility studies on the Strategic Defense Initiative. As President Reagan has stated, the Soviet Union has already done research in the area, a fact that they do not readily broadcast.

The Soviets would like to maintain an advantage in that area and they would hope that SDI would be used as a bargaining chip at the Geneva Summit, however, we believe that the SDI program should continue on its own merits. The United States needs to continue research and development efforts to preclude a possible breakthrough by the Russians which would place us in a grave strategic disadvantage and with inadequate time to develop a counter system.

The possibility of a U.S. operational SDI system is abhorrent to the Russians. We must be alert to their all out propaganda program to sway world opinion to the position that a U.S. SDI development system is a threat to world peace. We agree with the Reagan Administration's position that development of an SDI system would instead be a stabilizing factor in deterrence and thus bring a positive influence toward world peace.

SDI could very possibly be the cornerstone of peace in the out years. The National Pro-Family Coalition is confident that a strong defense is the foundation of a strong America with the undergirding of opportunities to build strong families and a strong society and thus cement the ideals of freedom in the twenty-first century.

STATEMENT OF MRS. WALTER HUGHEY KING, PRESIDENT GENERAL, NATIONAL SOCIETY OF THE DAUGHTERS OF THE AMERICAN REVOLUTION

Thank you for the opportunity to speak today. As President General, I officially represent the National Society of the Daughters of the American Revolution, a non-political organization whose membership is approximately 213,000 in the 50 States, the District of Columbia, England, France, Mexico, Australia and Canada, comprising 3,146 local chapter groups.

The National Society has a three-fold objective which the members have zealously promoted in the 95 years of its history. These objectives are Historic Preservation, Promotion of Education and Patriotic Endeavor. One of our most consistent endeavors has been to promote patriotism and love of country by supporting a strong United States National Defense posture.

At its annual Continental Congresses, the DAR adopts 14 resolutions which are national in scope. In 1985, one of these resolutions was on the Strategic Defense Initiative. I would like to read the two Resolves:

"That the National Society Daughters of the American Revolution support President Reagan's proposal that the current nuclear theory of MAD (Mutual Assured Destruction) be replaced by MAS (Mutual Assured Safety), guaranteed by the proposed Strategic Defense Initiative; and

"That the National Society Daughters of the American Revolution affirm that the Strategic Defense Initiative (STAR WARS) is a necessary strategy, and call for development and deployment of defensive technologies that can permit the Nation to intercept deliberately or accidentally fired strategic ballistic missiles before they reach the boundaries of the United States, and that this system not be negotiable in any arms control discussions."

The theme for my administration has been Duty, Honor, Country. For the year 1985-1986, we are using a statement by Daniel Webster which is most appropriate today: "Let our objective be our country, our whole country, and nothing but our country."

The family is important to the National Society. We believe in the education of our children and the protection of their rights. The present reign of nuclear terror caused by a large number of nuclear weapons and a corresponding lack of defensive systems for protection from nuclear attack threatens the future and very lives of our families, and millions of families around the world.

This lack of any defense against nuclear weapons is an intolerable condition which must be changed if we and the families of the world are to have any secure hope for the future. We want America's children to be able to grow up with a sense of security and optimism, not fear and despair.

We are most fortunate to have the Strategic Defense Initiative in our hands and not in the hands of those who have proven to be our bitter enemy in times past. The appalling fact at the present time is that we have NO defense against incoming missiles. That situation must NOT be allowed to continue.

We view with great alarm the efforts of the media to influence the President of the United States of America to bargain away the SDI at the Geneva Summit meeting. This Officer will go to Geneva, accompanying other women who represent our fellow Americans. Our objective is to support the President of the United States of America and what we know to be his will to preserve a defense mechanism which is approved by 81 percent of the people of this country.

PHYLLIS SCHLAFLY STATEMENT ON SDI

Public opinion surveys show that 90% of Americans believe that our nation should be defended against nuclear missiles. Yet, America has no defenses today. If the Soviets fire any or all of their missiles at us, the United States has no way to shoot them down before they destroy us with blast and fallout.

Our present policy for dealing with this vulnerable situation is a policy of revenge—a promise to retaliate and kill as many millions of Russians as we can. This is a policy of Mutual Assured Destruction, known as MAD.

President Reagan has asked, Isn't there a better way? We know there is. That better way is his Space Shield, known as SDI (Strategic Defense Initiative). It is non-nuclear, purely defensive, and cannot kill anyone.

Soviet leader Gorbachev doesn't like this idea because it would deprive 90% of his expensive ICBMs of their ability to destroy their targets. Since Gorbachev and his friends are against SDI, we are proud to stand with President Reagan. We are sure that the big majority of Americans will stand with him, too.

President Reagan is saying to the world, Let's turn the arms race in offensive weapons into a race in defensive systems. That's the one sure way to achieve real arms control and to make nuclear weapons obsolete.

RENAISSANCE WOMEN STATEMENT

In the interest of peace and freedom, the Renaissance Women wish to encourage President Reagan to remain firm in his resolve to support development and deployment of the Strategic Defense Initiative.

We realize that military parity shifted to military superiority by the Soviets around 1972 and that the concept of Mutually Assured Destruction is wholly unacceptable as a proper deterrent to military aggression.

We also realize that the ABM treaty, which was the implementation of the MAD concept has been broken on numerous occasions by the Soviets, yet the United States feels morally compelled to comply with it. The SDI research program is comparable with the ABM treaty and is compatible to research the Soviets have been conducting for years.

The SDI research offers the hope that we can enhance U.S. and Allied security through greater reliance on non-nuclear defenses which protect, rather than on offensive nuclear weapons which could kill millions.

Our Nation and our allies face a number of challenges to our security. Each of these challenges imposes its own demands and presents its own opportunities. Preserving peace and freedom is our fundamental goal. The essential purpose of our military forces, and our nuclear forces is to deter aggression and coercion based upon the threat of military aggression.

In addition, the SDI offers the possibility of reversing the dangerous military trends of the Soviet Union by moving to a better, more stable basis for deterrence and by providing new and compelling incentives to them for seriously negotiating reductions in existing offensive nuclear arsenals. In effect, their offense nuclear weapons would be rendered obsolete by the presence of non-nuclear defensive systems.

Because Renaissance Women are committed to preserving peace and freedom, and believe that the SDI system, if deployed can offer hope for the that goal . . . we support development and deployment for the Strategic Defense Initiative.

CONCERNED WOMEN FOR AMERICA URGES SUPPORT FOR STRATEGIC DEFENSE INITIATIVE

Concerned Women for America, a Christian women's organization which advocates protecting the rights of the family through prayer and action, urges the President and the Congress to fully support efforts to develop the Strategic Defense Initiative. We also urge the President not to restrict or negotiate away the ability of the United States to develop the SDI program at the upcoming Geneva summit meeting.

As women who have particular interest in families, we are concerned that the dangers of a nuclear war threaten the lives of our children and children throughout the world. We believe that the development of the SDI research program will help ensure peace and security for future generations.

The focus of the SDI program is on defensive measures which help protect against nuclear attacks rather than on the retaliatory measures inherent in the current doctrine of mutually assured destruction. A defensive system would also help protect us from the accidental launching of nuclear missiles.

We believe that the SDI research program offers the best military strategy to reduce the dangers of nuclear war. We urge Congress to fully fund the SDI program and we urge the President to protect our right to continue with SDI research and development at the upcoming Geneva summit meeting.

STATEMENT OF JOAN L. HUETER

The United States' vital strategic defense initiative [SDI] must not—under any circumstances—be negotiated away in Geneva—neither its research, development nor deployment.

It is purely defensive, non-nuclear and will kill no one, but—in protecting the United States from Soviet missiles by harmlessly destroying them in space, it will render the huge Soviet missile superiority ineffective.

As long ago as 1983 Pro America's No. 1 resolution called for replacing the failed strategy of Mutual Assured Destruction [MAD] by adoption of a strategy of Mutual Assured Survival [MAS] through a non-nuclear, space-borne defense such as advanced by the high frontier organization to counteract the Soviet nuclear threat by destroying nuclear missiles harmlessly in space.

Since the Soviets have been and continue to be in flagrant violation of all disarmament agreements, as documented recently by Secretary of Defense Caspar Weinberger, continued adherence to such agreements (treaties) or negotiation of more treaties with the same untrustworthy Government is surely not in the best interests of the United States and a very dangerous course to follow—putting in jeopardy our very national survival.

Past adherence by the United States to the violated Anti-Ballistic Missile [ABM] Treaty, the expired Strategic Arms Limitation Treaty [SALT I] and the unratified SALT II Treaty, while the Soviet Union—flagrantly violating those treaties—embarked upon the greatest military buildup in history, has now left us seriously endangered by that Soviet missile build-up.

Need we remind our President and his negotiators that their primary constitutional responsibility is the defense of our Nation—that past agreements with the Soviet Union have failed to reduce the nuclear threat—and that now there is the opportunity to protect lives and property of U.S. citizens from Soviet missiles through implementation of the defensive system being developed under the SDI's existing technology and the immediate embarking upon the vital research, development and deployment of the strategic defense initiative—which must under no circumstances be negotiated away at Geneva or elsewhere.

Disarmament agreements with the Soviet Union (especially those which would ban or limit the SDI's vital defense) in the face of Soviet aggression, military build-up, terrorist conduct, duplicity and violation of past agreements, could be considered tantamount to betrayal of our Nation.●

TRIBUTE TO ROBBIE LYLE

● Mr. PRYOR. Mr. President, this year marks the 20th anniversary of Upward Bound, the federally funded program which provides academic and motivational support to low-income high school students across the Nation. While each of the Upward Bound Programs in Arkansas has enjoyed a high rate of success, the program at Arkansas State University [ASU] in Jonesboro is deserving of special recognition.

Under the direction and dynamic leadership of Mrs. Robbie Lyle, ASU's Upward Bound Program continues to be one of the most successful in the country. Robbie Lyle remains the driving force behind the program, and her sterling reputation in the special services arena of higher education is nationally recognized. In recent months, Robbie has testified before the Senate Labor and Human Resources Subcommittee on Education, Arts, and Humanities, in support of the TRIO Programs, and brought a group of Upward Bound participants to Washington to meet with Members of the Arkansas congressional delegation. Her indefatigable energy and enthusiasm is all the more refreshing in these times of criticism of our Nation's educators.

Robbie will continue her dynamic pace this year as she assumes the presidency of the National Council of Educational Opportunity Association [NCEOA], an organization dedicated to the continuation and improvement of Special Services programs throughout the Nation. I have no doubt that under Robbie's helm the NCEOA will have a banner year.

Robbie Lyle's dedication to and love for her students should serve as an example to educators across the country. I know my colleagues join me in wishing her sincere congratulations and continued success.●

FOREIGN LANGUAGE STUDY IN OUR SCHOOLS

● Mr. SIMON. Mr. President, I have long been an advocate of foreign language training at all levels of education from elementary through graduate school. The reasons are compelling: we live in an international marketplace, our military and diplomatic corps do not function in an English-speaking oasis in other nations, our researchers compete against Swiss physicists, Japanese computer experts and Soviet biochemists.

An Illinois high school senior makes the case for more foreign language study in the schools in a recent letter to me. Amy Heinz, a 17 year old from Peoria tells me:

I believe a second language is a vital advantage to everyone's knowledge, as well as an advancement in society. In Europe and other countries, schools require students to take English in order to pass each grade. Yet in America, less than half of all high school students actually participated in all four years of a foreign language.

People may ask why kids should be forced to study another language, since most will never use it after they finish school I'll tell you why a second language is important. It is widely recognized that students from abroad excel in their studies. Thus they have a better chance of working up to their potential and succeeding in their goals. When the possibilities of careers involving a foreign language are examined, the numbers seem endless. Besides the establishment of financial security by one of these careers, there is also the satisfaction of being one of the few who are able to communicate with another person who speaks a different language.

I think a bilingual America might help our country compete more with other nations.

I think Amy is right, and I thank her for her insights on this important topic. I commend her comments to my colleagues now and during debate on education legislation as it moves through the Senate in the next year.●

VETERANS DAY

● Mr. RIEGLE. Mr. President, the solemn and peaceful ceremonies that mark Veterans Day bear a striking contrast to the experiences of those brave men and women who risked their lives in the pursuit of freedom. The quiet reflections of today were not possible during the heat of battle for those who fought in distant wars. Whether in the jungles of Vietnam, or the infamous trenches of World War I, decisions and lives were made and given within but brief moments. Veterans Day is a time for Americans to reflect on those who comprise our Armed Forces; past and present.

The original intent of Veterans Day, first known as Armistice Day, was to commemorate "the war to end all wars." It was on November 11, 1918, that the Allies and the Central Powers ended the fighting of World War I. The spirit in the world after the armistice was one of hope and optimism for a world which it prayed had suffered its last debilitating war. With over 10 million dead, and vast areas of Europe in ruins, lofty dreams of a better tomorrow floated freely as people sought to encourage peace between nations.

Soon though, these dreams were to be shattered. Another war, of even greater destruction, enveloped the world in the late 1930's. This Second World War resulted in more than twice as many deaths as the World War I, and a holocaust of destruction beyond imagination.

On June 1, 1954, Congress renamed Armistice Day to Veterans Day in order to honor all of those in our armed services. Gone was the optimism for a world free of the perils of war. A new age had dawned with the dropping of the atomic bomb on Hiroshima and never since has the world been able to enjoy long periods of real tranquility.

It is never the wish of a government to send its young to war. They are our future and hope for a more enlightened and peaceful world. But, within this great Nation's history the need for these very difficult sacrifices has called our youth away from stable homes into the treacherous and controversial places of conflict.

A visit to the memorial commemorating our most recent large-scale conflict, the Vietnam war, moves me deeply when confronted with the

memory of those whose potential our country will never fully realize. My heart goes out to the families whose hopes and aspirations for their youth were relinquished in this most controversial of wars.

Words prove inadequate to our feelings of loss when young people are killed. It is important that we continue to provide veterans and their dependents with programs that demonstrate our immense gratitude for their efforts on our behalf. My State of Michigan has over 1 million veterans. This amounts to over 100 veterans per 1,000 civilians. Veterans, dependents, and survivors of deceased veterans make up almost one-third of our Nation's population. It is only fitting that we as a society display our appreciation and continue to maintain and improve the quality of life for them.

While it is impossible to fully repay those brave veterans who have, and who continue to give of themselves, we can show them our gratitude throughout the year. It must forever be remembered that without their immense dedication and valor to our country's ideals, the United States, as we know it would not exist.●

ORDERS FOR WEDNESDAY

RECESS UNTIL 10 A.M. TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. on Wednesday, November 6, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators not to exceed 15 minutes: Senators GLENN, PROXMIRE, and GORE.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS UNTIL 11 A.M.

Mr. DOLE. Mr. President, following the special orders just identified, I ask unanimous consent that there be a period for the transaction of routine morning business not to extend beyond the hour of 11 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following routine morning business, it will be our intention to turn to the nominations on the Executive Calendar, but specifically the nominations of Vance L. Clark, of California, to be Administrator of the Farmers Home Administration, and Orson G. Swindle III, of Georgia, to be an Assistant Secretary of Commerce.

Following the disposition of those nominations, if they can be disposed of by 1 o'clock, but in any event at 1 o'clock, the Senate will turn to House Joint Resolution 372, the debt limit. I believe there may only be two amendments, one will be an amendment by Senator MOYNIHAN, which will be offered and withdrawn, and the other will be an amendment by Senators DOMENICI and CHILES, which I believe we can agree to. Final passage would follow that at about 2 o'clock.

It is also my hope that, following the disposition of House Joint Resolution 372, the Senate will turn to H.R. 3327, the military construction appropriations bill. I understand that process is being cleared. There is a report waiver that is being checked out.

If we can dispose of that tomorrow afternoon, then we can turn to the nomination of Alex Kozinski, under a time agreement. He has been nominated to be U.S. circuit judge for the ninth circuit. Hopefully we can finish that in the early evening.

We are also attempting to reach some arrangement on civil service retirement for Thursday morning. As I have indicated earlier, unless Senator ZORINSKY indicates he wants us to proceed, we will defer any action on the agriculture bill for the balance of the week. That would leave us with reconciliation pending. We will be meeting tomorrow, I believe at least Senator DOMENICI wants to meet, all of us, to see if we can find some resolution to that.

So it is possible, with a little luck, we might be able to finish our business this week by late Thursday evening.

RECESS UNTIL TOMORROW AT 10 A.M.

Mr. DOLE. Mr. President, if there be no further business to come before the Senate, I move that the Senate stand in recess until 10 a.m., on Wednesday, November 6, 1985.

The motion was agreed to; and, at 7:32 p.m., the Senate recessed until Wednesday, November 6, 1985, at 10 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 5, 1985:

DEPARTMENT OF STATE

Winston Lord, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of China.

James W. Spain, of California, a career member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Socialist Republic of Sri Lanka, and to serve concurrently and without additional compensation as Ambasssador Extraordinary and Plenipotentiary of the United States of America to the Republic of Maldives.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

NICARAGUA'S STATE OF EMERGENCY/CONFUSION MORE OR LESS THAN MEETS THE EYE?

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. BROOMFIELD. Mr. Speaker, I was gratified to see press reports on October 31, indicating that the Sandinista regime in Nicaragua restored a few of the fundamental civil rights it suspended in its sweeping state-of-emergency announcement on October 15, 1985. According to those reports, the rights to a jury, counsel, and protection from self-incrimination were restored, as well as a limited right to habeas corpus, not including those charged under the broad and frequently invoked categories of national security and public order.

Naturally I would like to think that this laudable action, taken by the legislative assembly, which regrettably ratified all of the other suspensions of basic civil rights at the same time, was a response to the introduction of House Concurrent Resolution 222 by Mr. YATRON, Mr. LAGOMARSINO, Mr. MURTHA, and myself 2 days before. That legislation condemns the egregious suspension of Nicaraguans' rights and the increasing official repression of the Catholic Church by the Sandinistas. Many of us believe that the Sandinistas' public relations representatives in the United States closely follow U.S. public and congressional opinion, to include monitoring the CONGRESSIONAL RECORD, and I feel certain the Sandinistas were aware of House Concurrent Resolution 222 soon after its introduction.

Of course, the Sandinistas have denied that the very limited restoration of a few suspended rights was in any way a concession to widespread criticism of the state-of-emergency decree. Instead, the official Sandinista explanation is that the reinstated rights to a jury, counsel, and so forth, were accidentally suspended due to what they described as a "technical error" in the state-of-emergency decree. Frankly, it would seem a little difficult for even the most gullible to accept that anyone could inadvertently suspend the right to trial by jury, for example. But, perhaps under the Sandinista regime practically no one noticed because of the marginal difference between being tossed in the slammer for so-called counterrevolutionary crimes by one Sandinista judge or by 12 Sandinista jurors.

Another hypothetical explanation is suggested by some, presumably more favorably disposed toward Sandinista rule. That theory suggested that it was not until El Presidente Daniel Ortega had acquired a premium pair of eyeglasses, with designer frames, to the reported tune of some $3,500 possibly charged on his Diners Club card, that the Sandinista chief was able to discover the little drafting oversight which unintentionally suspended an accused's rights to a jury, counsel, and protection from self-incrimination, et cetera. I suppose proponents of this hypothesis will blame Contra activities for the apparent low state of revolutionary optometry in Nicaragua which caused Mr. Ortega to miss the relevant little nuance in the original decree.

Whatever the real explanation, I suppose we should be grateful for any improvement in the desperately bad human rights situation in Nicaragua, however insubstantial it might be in practice.

100,000 DEAD IN ETHIOPIA

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. ROTH. Mr. Speaker, up to 100,000 Ethiopians have died this year as a result of Ethiopia's Forced Resettlement Program. According to evidence provided by a Harvard University research group, international relief agencies, and Western Government sources in Addis Ababa, thousands of men, women, and children have died in transit to so-called resettlement camps. Tens of thousands more have died from malaria contracted in the camps.

The Sunday Times of London reports that relief agencies refuse to publish evidence of the deaths "because they fear that Ethiopia's Marxist Government will expel them and that such horrific news may dry up donations from the West."

Cultural Survival, Inc., a research group associated with Harvard University, will soon publish the results of its interviews with 250 Ethiopian refugees who have escaped from the resettlement camps. Jason Clay, director of research at Cultural Survival, Inc., recently gave members of the Foreign Affairs Africa and Human Rights Subcommittees a preview of his findings. It is the most scientifically conducted research done by any government or private agency into the causes of the present famine.

Jason Clay's findings are corroborated by the State Department and AID in their report to Congress on Ethiopia last month. The French organization, Medicins Sans Frontieres, has described the resettlement compaign, alleging that "thousands of people were forced to move by Ethiopian militiamen. They were herded like cattle into trucks and buses at feeding centers and villages in the north." A secret report by the League of the Red Cross shows that "conditions in the resettlement areas of southern Ethiopia have been appalling. The peasants have lacked food, housing, tools, seeds, and medical facilities."

Just last week, the Associated Press reported that trucks from a British relief agency, Save the Children Fund, were commandeered by the Ethiopian local authorities. These trucks were used along with others to take about 600 people from the feeding camp in Korem to transit points south. Rumors of the impending resettlement prompted most of Korem's 20,000 residents to flee into the surrounding mountains. Nonetheless, the Ethiopian Marxist Government continues to describe the resettlement program as voluntary. And it intends to find close to 1.5 million volunteers over the next several months.

There is a scourge of death in Ethiopia, perpetrated by the regime of Chairman Mengistu Haile Mariam. Because of the ramification his work has for us in this Congress, I am reprinting below Jason Clay's entire testimony.

PREPARED STATEMENT OF DR. JASON W. CLAY, DIRECTOR OF RESEARCH, BEFORE THE SUBCOMMITTEES ON AFRICA AND HUMAN RIGHTS, COMMITTEE ON FOREIGN AFFAIRS

My name is Jason Clay. I am a Doctor of Social Anthropology representing Cultural Survival, Inc., a non-profit, human rights organization located in Cambridge, Massachusetts. Cultural Survival's activities—assistance projects, research and publications—address both the urgent and chronic problems confronting indigenous peoples throughout the world.

Five years ago, as Director of Research at Cultural Survival, I began to systematically interview refugees from Ethiopia about the persecution and discrimination that caused them to flee the country. Cultural Survival's intent was to document the human rights violations that were occurring in areas of Ethiopia where outsiders were not allowed free access. Restrictions on the movements of diplomats, journalists and relief workers as well as the presence of government officials or official translators has made it difficult to find out what is happening in these areas.

Since 1980, our interviews with refugees from each of the major ethnic groups in Ethiopia indicate that the present government is attempting to systematically destroy the culturally distinct groups within the country. This systematic destruction appears to be based on the goal of creating a strong central state upon which each community is dependent. By confiscating land, moving dissident peoples from their own areas onto the land or even into the villages of others and imposing, under the guise of state socialism, local organizations which destroy the ability of communities to remain self-sufficient in food production, the government is attempting to achieve their goal. As we have seen in the past year, even though the state has succeeded in making these communities dependent by re-

ducing their productive capacity, it cannot provide food for them. This is the context within which Western humanitarian assistance is being used.

The Ethiopian government's public statements indicate that regional variation in its policies results from the different administrative units' relative autonomy. Our research suggests, however, that while there is considerable difference in government policies, these differences result from the central government's assessment of which policies are necessary to fundamentally undermine the cohesion of the different cultures in Ethiopia's many provinces. Since the nineteenth century, the Amhara ethnic group has dominated Ethiopia's governments. Representation in high government positions by non-Amharas was reduced even further after the present government came to power. The reduced representation by non-Amhara in future government decisions was further ensured by Ethiopia's new workers party which contains an even smaller proportion of people from other ethnic groups.

The government's policy to create communities dependent upon the state has exacerbated the present famine in the northern administrative regions. Even though rainfall and agricultural production in 1984 were high in the southwest—a region overwhelmingly dominated by the Oromo, the largest group in Ethiopia accounting for more than half of the country's population—as a result of the government's resettlement policies, famine spread to this area. The government has diverted many Western, famine relief programs to help ensure a socially and economically dependent Ethiopia.

My testimony today is based on information collected in the Sudan by Cultural Survival in February and March 1985. The objectives of this research were to investigate the causes of famine in Ethiopia by interviewing those directly affected. This research was undertaken by three people—myself, anthropologist Bonnie K. Holcomb and Swiss journalist Peter Niggli. Each of us interviewed Ethiopian refugees in Sudan. I talked with refugees from contested areas of Tigray. Peter Niggli spoke with people from Tigray and Wallo who had been forcibly resettled in the Asosa region and later escaped to Sudan.[1] Bonnie Holcomb also interviewed escapees from the resettlement sites as well as local residents who had been displaced or forced to leave the area due to the taking of their land and the financial hardships they faced as a result of the resettlement program. Nearly 250 interviews were conducted in person or with independently hired translators. Interviews were conducted privately away from Sudanese officials or representatives of the various liberation fronts. People who were interviewed were selected on the basis of a mathematically calculated random sample at each location.

The results of this research are important for two reasons. First, it is the most scientifically conducted research on the largest sample by any government or private agency into the causes of the present famine. Second, it challenges assumptions on which most humanitarian assistance from the West has been based.

While the information collected from these refugees, I have no doubt, is reliable, it is not clear how representative it is for populations still in Ethiopia. Independent sources, however, have increasingly corroborated our data. Clearly, there is a need for reliable, systematically collected information from inside Ethiopia which is independent of the government. Our data, because it draws into question the political purposes of many government famine programs, indicates that the collection of such information would be a responsible course of action for any government or organization considering further famine or development assistance in the area.

With regard to the first question before the subcommittees, "Is the Government of Ethiopia engaging in a policy of deliberate starvation of its own people, particularly in dissident regions of the country?" The answer is complicated, but unequivocably yes. Government representatives carrying out several different policies have destroyed food supplies, disrupted normal commerce which would have allowed individuals to acquire food, prevented people from reaching food, withheld food from those in need, forcibly relocated people well away from their own ample food supplies, forcibly cleared areas of indigenous occupants to make room for settlers, and imposed crushing tax and contribution levels on peasant producers which force them to sell their food and productive assets such as oxen or even seed for the next year.

The present government is centralizing state authority to an extent that was not even projected under previous Amhara-dominated governments. Peasant producers in the southwest, for example, insist that they now pay more to the Amhara-dominated central government than they ever did to landlords and tax collectors combined in the past. In addition, by allowing local peasant associations to rid dissidents by volunteering them for resettlement, resettling them on lands belonging to homogeneous cultural groups and then promising them positions in the local militia and using 15 percent to infiltrate communities in the south and southwest, the government is establishing a dependent, but loyal, local leadership which will keep most people in the country under surveillance.

I will present only a few of the findings of our research. The full report will be available at the end of the month. In order to demonstrate how government policies vary from area to area I will present our findings in four sections—the contested areas of Tigray, the government-held areas of Tigray and Wallo, the resettlement program, and those in southwestern Ethiopia displaced by the resettlement program.

THE CONTESTED AREAS OF TIGRAY

People from contested or TPLF (Tigrayan People's Liberation Front) areas did not believe that they could safely go to government feeding centers and receive food without being resettled.

Some people from these same areas indicated that they were denied food at government feeding centers because they did not have the required peasant association or kebele identification cards.

Seventy-seven percent of the famine victims interviewed in Sudan who came from contested areas of Tigray indicated that in 1982, 1983 and 1984, the Army burned houses in their village as well as crops standing in the field, piled ready for threshing or stored in granaries or houses.

Twenty-five percent of those interviewed indicated that the army had stolen their oxen (essential for plowing), their farm equipment and food from their farm within the past 3 years.

Everyone from the contested areas indicated that the army attacked during periods of planting and harvesting. They said that this was done to reduce agricultural production and make the areas more dependent on the central government. Delays in planting, for example, do not allow farmers to take advantage of early rains, a critical factor when rains end early as they did in 1983 and 1984. Delays in planting also allow both weeds (striga) and insects (armyworms) to become established in fields before crops have been sprouted. Some 90 percent of those who first fled to Sudan reported that armyworms were the major cause of famine. According to agricultural experts in the United States, the parasitic weed striga, which attacks the roots of crops, can cause crop losses of up to 90 percent. In many cases the farmers would not even be aware of its existence. In the course of the interview, they also indicated that army attacks had delayed planting in their villages.

Twenty percent of those from contested areas indicated that civilians in their village had been killed by the Ethiopian army in the past three years.

Most interviewees indicated that the favorite bombing targets were collections of civilians—schools, churches, weddings, funerals and markets. The purpose of the attacks, they said, was to demoralize the population and disrupt commerce. Many individuals, for example, reported that they had lived through far worse droughts without suffering, but now they cannot even travel from town to town to trade because most markets must be held at night.

GOVERNMENT-HELD AREAS OF WALLO AND TIGRAY

Peasant associations are required to "nominate" their quota for resettlement before they are given relief grain to be distributed to their remaining members. For example, 75 percent of those interviewed who had resettled from Wallo indicated that they had been told by their peasant association to go to nearby government centers to get food rations. Instead they were arrested and taken for resettlement.

Those identified by their peasant associations for resettlement often included young men who were thought to be potential TPLF recruits, or individuals who were suspected or out of favor with local officials. Moslem areas of Wallo also appear to have had more people taken for resettlement.

Many from Wallo indicated that production from their land can be high but erratic; many years it yields very little. In the past farmers always saved grain from the good years to tide them over when production was poor. Now, the government takes all surplus production so there is famine.

THE RESETTLEMENT PROGRAM

The death rates reported for the resettlement sites ranging between 33 and 270 per 10,000 per day are extraordinarily high, especially considering few children or old people are in these sites.

Contrary to government reports, none of those we interviewed voluntarily resettled. They all claim to have been "captured" for the program. They were guarded throughout the move as well as in the new sites. Ten percent reported seeing people killed who tried to escape.

More than 86 percent said that they had been forcibly separated from some or all of their family.

[1] Many of Peter Niggli's interviews are reprinted in German in his report, Athiopien: Deportationen und Zwabgsarbeitslager, Frankfurt, May 1985, 80 pages.

As many as 20 percent of the people taken from the same villages died before they arrived at the resettlement camps. Relatives who attempted to bring food to those in holding camps before their trip to the southwest were denied entry to the camps and even beaten.

More than 60 percent of those resettled from Tigray reported that they had been imprisoned at least once during the resettlement process.

Some 60 percent of those interviewed reported that they saw people die en route to the resettlement sites.

Those resettled were given one or two small rolls of bread per day. They were also given very little water. The lack of bread and water, people suspected, was to weaken them so they would offer little resistance and not attempt to escape.

In the resettlement sites people were given from 5 to 25 kg. of grain per month and expected to work 11-hour days, 6.5 days per week.

More than 40 percent of those resettled from Tigray and Wallo reported that they had been beaten either during the resettlement or at the sites. An additional 20 percent reported that they only witnessed beatings. They reported that people were beaten if they asked for more food, complained about conditions, urinated without permission or did not fulfill their work quota.

The number of militia present at the resettlement sites varied from 1 per 12 colonists to 1 per 100 colonists. The ratio varied depending on whether the site was fenced and how far the site was from the Sudan border. Militia who allowed too many colonists to escape were hung or made to work in the fields.

PEOPLE DISPLACED IN SOUTHWESTERN ETHIOPIA

A number of distinct peoples in southwestern Ethiopia have been deliberately displaced by the government since it took power. Prior to 1979, Gittan speakers were displaced by the implementation of the original land reform. They moved into the Begi region where they reestablished their agricultural systems independently of the central government. Between 1979 and 1982, the Anuak, Dungula/Barta and Komo were all displaced from their traditional lands in southwestern Ethiopia as the government sought to incorporate "uninhabited" lands into its resettlement program. From 1983 to the present, the government has tightened government tax and "voluntary" contribution programs, increased settlement in the area and forced a wave of Oromo refugees to flee to contested areas along the border or into Sudan.

Half of those who fled Ethiopia to Yabuus, indicated that the government had taken the land that they had used for generations. It is the land being used for the resettlement programs, but most of it is not used now.

Nearly three-quarters of those interviewed in Yabuus indicated that required attendance at peasant, women and youth association and literacy campaign meetings during key periods of agricultural labor significantly reduce production. Crops are not planted at the appropriate time because the land is not prepared. Weeds choke crops and wild animals (pigs and primates) destroy crops.

Twenty-five percent of those at Yabuus indicated that serving their required time in the militia or in roles appointed by peasant association officials kept them from working in their fields.

More than 63 percent said that the disarming of the local population left them defenseless to protect their crops from wild pigs and primates.

More than 40 percent of those in Yabuus reported that high taxes and "voluntary" contributions force farmers to sell oxen or even seed and reduce their productivity. Nearly 15 percent reported that their oxen were forcibly taken by the state as part of collectivization programs or for those resettled in the area.

More than a third reported that all their production, even seed, had been taken by the government in taxes.

More than 95 percent reported that the four to five days per week of work required on communal peasant association plots during key periods left them little time to work on their own plots. Contrary to the government's stated policy, interviewees claimed that they never received any payment for the production from communal plots. They could, however, buy the grain at the regular market price.

More than 86 percent of those interviewed indicated that their imprisonment for such crimes as missing meetings, not paying taxes, fees or contributions, refusing to arrest a friend or neighbor, speaking up at meetings, questioning the local officials' decisions, being Oromo, being accused of assisting the OLF (Oromo Liberation Front) or being suspected in general keeps them from their fields. If an individual misses a peasant association meeting he is punished by ten days in prison. If imprisonment comes during the planting or weeding periods, it can seriously reduce total production.

In response to the second question put to me by the two sub-committees, "What is the general human rights situation in Ethiopia?" I think the above examples are sufficient indicators of the human rights conditions in Ethiopia of both individuals and groups. Internationally, there is little agreement about the human rights of individuals, even less about those of groups. At this time, Americans must seriously consider the kinds of conditions they want to perpetuate in Ethiopia through either famine or development assistance programs funded either by the American government or PVOs. The Ethiopian government has made it clear that it is less concerned about the negative impact of its programs on specific cultural groups in the country than it was with imposing its rigid programs to reorganize production and society.

INTRODUCTION OF LOCAL TELEPHONE RATEPAYER PROTECTION ACT

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. WYDEN. Mr. Speaker, in the October 29, 1985 edition of the Wall Street Journal, reporter Jeanne Saddler tells the story of John Weyrick, an Orlando, FL, small businessman who was able to obtain more work, thanks to a new, high-technology phone gadget that kept track of the telephone numbers of everyone who called him—even when they didn't leave a message.

To me, this story was good news. I'm all for John Weyrick having access to whatever new whizbang phone gadgetry he can afford. It helps his business and it helps the phone company's business.

But it's not right to make senior citizens and small corner grocery store owners subsidize John's new high-technology service.

That's why I'm introducing a bill which will make sure that all the parties—John, the phone company, the senior citizen, and the grocer—come out ahead.

Here's how my bill—which I'm calling the Telephone Ratepayer Protection and Technology Promotion Act—works.

State utility commissions will be given the authority to allow local Bell operating companies to provide new information services and to manufacture telecommunications equipment. In exchange, the commissions must first set up regulations which prevent the phone companies from using any of the revenues derived from the provision of basic local phone service or other regulated services to help pay the costs of these new services.

Everybody wins under this bill. The elderly woman pays only for what she gets—basic phone service. John Weyrick pays for what he gets—access to new technologies that improve his business prospects. And the local phone company gets what it needs—the ability to develop new technologies and new services so that they can compete in the emerging telecommunications market.

No one pretends that this bill will singlehandedly solve all of the problems that have arisen in the wake of the divestiture of AT&T. We have a long way to go to ensure that all Americans have access to affordable phone service, and that all of the players in the telecommunications marketplace have the ability to compete on a level playing field.

I do believe, however, that this legislation symbolizes what we need more of if we are to solve those problems: Approaches that promote competition in those sectors where the market will bear it but provide basic protection in those areas where it will not.

In sum, this bill recognizes that the goals of universal service and technological innovation are not incompatible. We can have affordable service for everyone. And we can foster the technological explosion in telecommunications. I believe that's why this bill has the support of the Consumer Federation of America and why I am optimistic that it will also be favorably received by the local operating companies.

The text of the bill follows:

H.R. 3687

A bill to permit the Bell operating companies to provide information services and to manufacture telecommunications equipment so long as such services and manufacturing are not subsidized with the proceeds from the provision of local exchange telephone service or other regulated telecommunications services

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Telephone Ratepayer Protection and Technology Promotion Act of 1985".

SEC. 2. AUTHORITY TO PROVIDE INFORMATION SERVICES SUBJECT TO STATE REGULATION TO PREVENT CROSS-SUBSIDIZATION.

Notwithstanding any other provision of law, a Bell operating company may engage in the provision of information services or in the manufacture in the United States of telecommunications equipment, or both, to the extent permitted by regulations that—

(1) are prescribed by the State commission in each State in which such operating company, or any entity controlling such operating company, provides local exchange telephone service or any other telecommunications service;

(2) prevent such operating company from using the revenues it derives from the offering of local exchange telephone service or any other regulated telecommunications service or product to defray any costs associated with engaging in the provision of information services or the manufacture of telecommunications equipment, or both; and

(3) ensure that a reasonable portion of the joint and common costs of plant, equipment, and other resources is allocated to the provision of information services or the manufacture of telecommunications equipment, or both.

SEC. 3. DEFINITIONS.

For purposes of this Act—

(1) the term "Bell operating companies" has the same meaning as such term has in the Modification of Final Judgment entered August 24, 1982, in *U.S. v. Western Electric*, Civil Action No. 82-0192 (United States District Court, District of Columbia), except that such term does not include any centralized organization for the provision of engineering, research, and administrative services, the costs of which are shared by such operating companies or their affiliates;

(2) the term "information services" has the same meaning as such term has in such Modification;

(3) the term "telecommunications equipment" has the same meaning as such term has in such Modification, except that such term includes customer premises equipment (as defined in such Modification); and

(4) the term "regulated communications service or product" means a telecommunications service or product for which the rates are subject to review and approval or disapproval by a State commission.

SEC. 4. EFFECTIVE DATE.

This Act shall take effect on September 1, 1986.

GIVING SUPERFUND A CHANCE

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. EDGAR. Mr. Speaker, here we are a year after the House overwhelmingly approved a strong Superfund bill by a vote of 323–33, yet we still have not reauthorized Superfund. Instead we are caught up in an internal political squabble that is stalling the drive to pass a rigorous toxic cleanup program, a program that is in dire need of improvement in light of the Environmental Protection Agency's pathetic record of five cleanups in 5 years. How long do the people of Pennsylvania and all Americans have to wait before they feel safe in their own neighborhoods?

I have been joined by over 100 of my colleagues in sending a letter to the House leadership to show our concern for the passage of a credible Superfund bill, one that incorporates minimum provisions on such matters as citizens suits, community right-to-know, and cleanup standards. Citizens around the country have spoken out for a expended, more effective Superfund Program.

The Philadelphia Inquirer has joined this call for the strongest possible Superfund bill. This past Saturday, the Inquirer specifically endorsed the Superfund bill reported by my Committee on Public Works and Transportation; as I have repeatedly said, the Public Works version is the appropriate vehicle for floor action on Superfund. I commend this editorial to my colleagues, and I urge them to support the Public Works bill when the full House takes up Superfund. The editorial follows:

[From the Philadelphia Inquirer, Nov. 2, 1985]

GIVING SUPERFUND A CHANCE

Last year the House of Representatives voted to reauthorize a strong Superfund program by an overwhelming margin of 323–33. The enormity of that bipartisan vote was attributed generally to the fact that members faced re-election and knew the voters at home wanted get-tough programs that would clean up hazardous wastes.

Something's changed this year. The legislation that in 1984 whizzed through the House (only to die in the Senate) has been stalled by a few House members who assert that there isn't broad-based public support for a rigorous chemical cleanup program.

Nothing could be further from the truth.

In a recent Time magazine survey, 79 percent of the Americans polled said that "not enough" has been done to clean up toxic-waste sites, and 64 percent said they would be willing to pay higher state and local taxes to fund cleanup programs in their communities. With each new discovery of an abandoned toxic-waste site, contaminated groundwater supply, or polluted river, the constituency for strong cleanup regulations grows. Chemical contamination is so pervasive that the health of millions of Americans already is being endangered.

They hardly would be protected by the bill that emerged from the Energy and Commerce Committee, chaired by Rep. John D. Dingell (D., Mich.). Many of the components vital to making Superfund do the job it was intended to do had been removed, including cleanup schedules and standards. Fortunately, a second bill that contains those provisions and others was approved by the Committee on Public Works and Transportation, chaired by Rep. James J. Howard (D., N.J.).

Members of both committees have begun meeting in an attempt to work out an agreement on the two bills. The extent of differences between the bills—and the strong feelings that exist on both sides—make observers less than optimistic that a compromise can be reached. It will then rest with the House Rules Committee to decide which measures goes to a vote.

The Superfund program, which officially expired at the end of September after five years of existence, has not lived up to the expectations of those who enacted it. No one in 1980 understood the magnitude of the problem, or the complexities of cleaning up this witches' brew of chemicals. The EPA grossly mismanaged the program during the first years of its life, and the success stories wrought by Superfund efforts are few.

But those are precisely the reasons that a strong, fully funded Superfund program must be enacted. If House members question whether there is a groundswell of support for a Superfund that will do the job, they ought to talk to their constituents. Better yet, their constituents ought to tell them.

A RETURN TO THE GOLD STANDARD

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. GINGRICH. Mr. Speaker, at a recent townhall meeting a constituent, Mr. Kent Kelly, read a statement that he had carefully prepared. In it Mr. Kelley calls for a return to the gold standard. He raises some interesting points that I think would be of interest to my colleagues.

A PUBLIC STATEMENT OF CERTAIN HISTORICAL FACTS AND A CALL FOR RESOLUTE ACTION IN THE CONGRESS OF THE UNITED STATES IN OUR FINANCIAL CRISIS

(By Kent E. Kelley)

Whereas the Governor of the largest private bank in the United States, the Farm Credit System, did on September 6th, past, admit the serious financial condition of that Bank and confess that an infusion of billions of dollars of public monies would be needed in the future to avert collapse of our Nation's farm industry, and, Whereas, also, the third largest bank, the Bank of America is in serious financial straits at this moment, and,

Whereas the Federal Emergency Powers Act is still in force and that such powers may be invoked in a national financial crisis—which powers include provision for the control of the citizens of this Nation in manners never before known in this land of the free, and,

Whereas member banks of the privately owned Federal Reserve System are daily creating their own form of private money which credit-basis money is neither legal tender nor lawful money of the United States of America, and

Whereas this fiat money almost ruined this Naton in the decade following the Declaration of Independence and that few among our citizens are aware of the root cause of our present dilemma which is that which faced our founding Fathers as they gathered together in the Constitutional Convention. President Andrew Jackson reminded the Congress in the eighth annual message, on December 5, 1836, of the "purpose of the Convention" as we quote from his text:

"It is apparent from the whole context of the Constitution as well as the history of the times which gave birth to it, that it was the purpose of the Convention to establish a currency consisting of the precious metals. These were adopted by a permanent rule excluding the use of a perishable medium of exchange, such as of certain agricultural commodities recognized by the statutes of some States as tender for debts, or the still more pernicious expedient of paper currency."

President Jackson knew what his predecessor, President Madison, had recorded in his notes earlier as a member of the Convention when the "purpose of the Convention" was being debated on August 28, 1787: Article I, Section 10 of our Constitution. Madison recorded in his notes of that day the sentiment of the majority as expressed by the senior Statesman in the Assembly, Roger Sherman: "Mr. Sherman thought this a favorable crisis for crushing paper money." As an astute scholar in and a teacher of History, Congressman Gingrich, you most assuredly know of these historical facts. And as our Representative, you are also fully aware of the fact that this "purpose of the Convention" according to President Jackson as a "permanent rule" still manifests the Supreme Law of the Nation in the currency of the realm and is the means of resolving our crisis today as it was then. I read now, in open assembly that specific, unamended, portion of our Constitution which Mr. Sherman pressed "for crushing paper money", Article I, Section 10:

No State shall . . . make any thing but gold and silver coin a tender in payment of debts;

Mr. Representative, we call upon you to exert all of your best effort in re-inforcing this Law by providing to the States that which only Congress has the power to do as set forth in Section 8 of the same Article:

To coin money, and crush unlawful paper money. Use only lawful silver or gold certificates which are redeemable in lawful coin per the Coinage Act of 1792.

And in conclusion, Congressman Gingrich, we do invite your attention to a corollary of equal importance—of which we trust that your careful scrutiny will yield the introduction of proper legislation.

Whereas the Supreme Court of the United States did in that landmark decision of May, 1895, the Pollock vs. Farmers' Loan & Trust case, which decision still stands to this day, in substance said that an income tax, being a direct tax, and not according to the rule of apportionment, is unconstitutional, null and void, and, Whereas the advocates to such an income tax did seek to circumvent this non-reversed decision by Constitutional Amendment, and, Whereas the whole framework of our present system of income taxation "without apportionment among the several States" is based upon this supposedly lawful, supposedly ratified Amendment, and, Whereas on June 6, 1985 certified evidence from the archives of the forty-eight States (c.1913) was introduced into the Record of the United States District Court, Northern District of Georgia, in Case No. CR 85-215A, being the United States vs Terry Lyle, which brief, in excess of 500 pages, purports to show that the aforementioned Amendment XVI has never been ratified, and, Whereas this citizen (and many others) have studied the saliently significant documents submitted and have come to the opinion that this Case is worthy of most careful study—not of the procedures but of the substance of the brief—by our esteemed Representative and in turn by the Congress itself. Mr. Representative, we consider that our opinion—that Amendment XVI has never been ratified by the States—is an equally most serious matter to the prior subject and that your immediate, undivided attention ought to be given to both to the end that our Nation might be preserved in this present crisis. To this end this citizen and scores of others are willing to give our assistance and our resources.

NEW SUPPLEMENTARY EXTRADITION TREATY CRITICIZED BY FORMER NOBEL PEACE PRIZE WINNER SEAN MacBRIDE, S.C.

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. BIAGGI. Mr. Speaker, this past Saturday, the distinguished founder of Amnesty International and former Nobel Peace Prize winner Sean MacBride was in Washington to address the third annual convention of the Irish American Unity Conference. Sean MacBride used the occasion to present his criticisms of the proposed Supplementary Extradition Treaty between the United States and the United Kingdom of Great Britain and Northern Ireland.

As chairman of the Ad Hoc Congressional Committee for Irish Affairs, I share the same concerns that Sean MacBride raised in his speech. Perhaps the most accurate statement he made charged that the proposed supplementary treaty "will be discriminatory against Irish people."

I also had the pleasure of addressing the board of directors of the Irish American Unity Conference while they were in Washington. I commended them and especially their president, James Delaney, for their hard work against this treaty which has helped delay it in the Senate Foreign Relations Committee. I continue to oppose the treaty in its present form and have authored House Resolution 271 which calls upon the Senate Foreign Relations Committee to end their consideration of the proposal. Earlier today, the Senate Judiciary Subcommittee on the Constitution held a hearing on the treaty and additional concerns were raised.

I urge my colleagues to carefully review Sean MacBride's speech and then join as a cosponsor of House Resolution 271. This Supplementary Extradition Treaty is legally, morally, and politically flawed. It is nothing more than a blatant attempt by the British Government to overturn several recent U.S. court decisions which recognize a political offense exemption to extradite in the current United States-United Kingdom Extradition Treaty. This supplementary treaty seeks to virtually eliminate the political offense exception and furthermore would be retroactive upon ratification.

Mr. Speaker, the address by Sean MacBride follows:

ADDRESS BY MR. SEAN MacBRIDE, S.C., TO THE NATIONAL PRESS CLUB LUNCH AND DINNER, NOVEMBER 2, 1985

It is a great privilege for me to have been invited as your guest to this Annual Convention by your President James A. Delaney. It enables me to keep in touch with the work you are doing and also to convey to you the gratitude of the people in Ireland for the initiative you have taken on their behalf. Freed of the slave mentality which was caused in Ireland by centuries of oppression and by subservience to the conquerors of our island, the Irish-Americans have a much clearer perspective on Anglo-Irish relations. For these reasons, I welcome the directness and constructive nature of the advices which you can give to us.

The advisers of the British Government, both in London and in Washington, are themselves fully conscious that Irish-American influence could be a decisive factor in the re-unification and independence of Ireland. Their diplomats, their foreign service agents, their secret service and their press services have a long and wide ranging experience of how best to exert influence through the American establishment and press. It has become an occupational tradition, and it would be quite a mistake to underestimate either their skill or their vigilance. While the 42 million Americans of Irish origin do represent potentially a powerful force in American life, so far, they have lacked the organisation, resources and experience of the British services in the United States. It is in this field that the Irish American Unity Conference, and the other Irish American organisations represented here, have a most important role to play.

Availing of the natural public indignation arising from the hijacking of planes and ships, the taking of hostages, and the murder of American citizens in the present wave of international terrorism, the British Government very adroitly, urged the U.S. Administration to amend its existing Extradition Treaty with Great Britain, in such a way as to involve the United States on the side of Great Britain in the Anglo-Irish conflict. A conflict which has been raging since Ireland was partitioned by Great Britain in the year 1920. Under the cloak of wishing to stamp out international terrorism, the British administration in fact, is seeking to secure the support of the United States in Britain's claim to exercise sovereignty over the North-East corner of Ireland, known as "Northern Ireland".

For centuries, Britain has sought to claim sovereignty over, and to rule Ireland, a claim which has been steadfastly rejected by the Irish people. In the course of the nineteenth century, as a result of British rule, oppression and famine, the population of Ireland was halved. It was only in the course of this century, following upon the Rising of Easter 1916, that in 1921, Britain had to relinquish her military and political occupation of the greater part of Ireland. However, in 1920, before relinquishing her occupation of Ireland, Britain partitioned Ireland into two states; one consisting of six counties, now known as "Northern Ireland", and the other consisting of twenty-six counties, which form the "Republic of Ireland" today.

The partitioning of Ireland was never sanctioned or accepted by the people of Ireland. The imposition of Partition and of the Anglo-Irish Treaty of 1922, led to a bitter Civil War in Ireland. The imposition of Partition created an on-going insurrectionary situation which has disrupted the whole political and economic life of the country and has caused a great many casualties. According to official statistics for the 1969-1983 period, there have been over 43,000 separate bombing and shooting incidents, causing over 2,500 deaths. Casualties from 1983 to date have been on the same scale. While no official statistics of casualties are available for the period 1920-1969, some statistics are available for the years 1920-1921. In those two years it has been clearly established that 428 Catholics were murdered, and 1,766 were wounded. During the same period of two years, 9,000 Catholics were driven out of

their work places and 23,000 were driven from their homes. During the years 1921-1923 at least 4,000 Catholics had to leave the six county area and seek shelter as refugees in the Republic. Regular refugee camps had to be provided for them until they could be resettled.

From these somewhat disjointed statistics one impression can be gathered as to the extent of the persecution of Catholics, and of the insurrectionary situation which has developed as a result in the area known as Northern Ireland. In addition to these particular statistics, it will be appreciated that at least 30,000 people have been imprisoned, as a result of partition on one side of the border or the other. Having regard to the fact that the population of Northern Ireland comprises not more than one and a half million people, it will be appreciated that the insurrectionary situation in Northern Ireland has caused proportionately more destruction and more casualties than most of the local wars that have been taking place since World War II.

In Northern Ireland, unarmed Civil Rights demonstrators have been killed by British Military forces, in the course of peaceful demonstration. Unarmed republican suspects have been shot at sight by British Forces; many sectarian and political assassinations have been carried out either directly by the British Forces, or have been instigated by British secret service agents. British appointed judges have justified the operation of police and military assassination squads in Northern Ireland. As a result of this situation, some Irish republicans have sought shelter from harrassment or from an unjust judicial system in the United States.

None of these events were in any way connected with the international conflicts which have given rise to a number of proposals to combat international terrorism.

It is to the credit of the United States and of its judicial system that ever since the Eighteenth century, the United States Courts have steadfastly refused to extradite Irishmen by reason of their political activities in Ireland. The United States have always boasted, with justice, that it was the land of freedom in which those who were politically oppressed elsewhere would receive asylum and shelter. For close on 200 years at least, Irishmen charged with offences arising from the insurrectionary situation in Ireland have never been extradited. This has also been the universal rule in every civilised country ever since the middle of the last century. Many famous Irish leaders such as Wolfe Tone, James Stephens, John O'Mahoney, John Mitchell, John Boyle O'Reilly, Thomas Francis Meagher, Liam Mellowes, and President Eamon de Valera benefited from the protection of the American legal system both in regard to extradition and asylum. Had the proposed Amending Treaty been in existence, they would all have been handed over to the British for imprisonment or execution.

The decisions of the Courts of the United States have been based strictly on the concepts of international law in regard to the non-extradition of persons for political offences of for politically related activities. The law in this matter is fully reviewed in two recent cases of the U.S. District Courts, namely, the Desmond Mackin case judgment by Naomi Reice Buchwald (80CR MISC. 1, p 54 U.S. Magistrates) and the judgment of John E. Sprizzo, in the Doherty case (83 Cr. MISC 1, p 26 (jes) United States District Court, Southern District of New York).

Anyone with even a superficial knowledge of Anglo-Irish-American relations is fully aware that the struggle for the independence, Sovereignty and Unity of Ireland is a very old standing dispute between Great Britain and Ireland, and is in no way related to present day international terrorism.

It is self evident that the present insurrectionary situation in Ireland is completely unrelated to the international terrorism which has become prevalent in recent years. It is part of the struggle of the Irish people to assert and make effective the sovereignty of the Irish people over the whole of the island of Ireland. The Irish people have overwhelmingly decided, both in 1918 and again in 1937, that they claim jurisdiction over Ireland and reject any claim by Britain to interfere in Irish affairs. This was reaffirmed by the Declaration unanimously adopted by Dail Eireann (The Irish Parliament) on 10 May 1949.

Under Irish Consitutional and Nationality Law, every person born in Ireland, North or South, is regarded as an Irish citizen. If, as appears pretty certain, the intention of the proposed Amending Extradition Treaty is to secure the extradition of Irish persons from the United States to Great Britain or to Northern Ireland, it is a law which will be dealing nearly exclusively with Irish citizens and therefore is of direct concern to the Republic of Ireland. * * * It would not seem unreasonable to ascertain whether the United States Government has consulted the Government of the Republic of Ireland before entering into this proposed Amending Treaty, and if so, what views have been conveyed by the Irish Government to the Government of the United States.

For some considerable time past, the normally recognised standards concerning the application of the Rule of Law for criminal trials, and to the criminal process have ceased to apply in Northern Ireland. Jury trials have ceased to exist in political cases: Instead, single-judge Courts known as "Diplock" courts have replaced Jury trials. The ordinary rules of evidence have been altered and corroboration of the evidence of accomplices in what are known as supergrass trials has ceased to be required. Persons suspected of political offences are often detained for two and even three years before being brought to trial. The interrogation methods adopted by police authorities in Northern Ireland have been criticised and condemned by the European Commission on Human Rights, and described as degrading and inhuman. Some members of the judiciary have even sought publicly to justify the killing of unarmed suspects by the security forces. It is submitted that in such circumstances it would be highly improper for the United States to extradite to Northern Ireland any Irish person who might then be submitted to inhuman or degrading treatment, and who might also be deprived of the full protection of the due process of law and the rule of law applicable to criminal trials. The United States might thus be placed in a position of condoning violation of human rights.

Traditionally, at least for a century, the policy of the United States State Department has been systematically pro-British. This has been particularly evident in the course of the Anglo-Irish struggle ever since the beginning of the century. The Pro-British and anti-Irish stance of the U.S. State Department even up to the present day is made very evident in an article published recently by Mr. Sean Cronin, in the Journal of Irish Studies published by the Irish American Cultural Institute "Eire-Ireland" (Vol 20, 2 Summer 1985), which establishes the extent to which even in the most minute detail of the State Department acted in complete subservience to the requirements of the British Foreign Office, when dealing with any Anglo-Irish issue. Indeed, the London Government establishment regard it as one of the greatest achievements of British diplomacy, that the British Foreign Office should, always, have been in a position to impose its policies in regard to Ireland without question through the State Department.

Quite apart from the Irish aspect of the proposed Amending Treaty between Britain and the United States, it is submitted that the Treaty may form a dangerous precedent that will facilitate the extradition of persons involved in political offenses in other Countries, be it Salvador, Guatemala, China or Poland. The Amending Treaty will certainly facilitate the extradition of persons in regard to politically related offenses and may thus well deprive them of their most elementary and fundamental human rights. Certainly the extradition of any Irish Republicans to Britain or to Northern Ireland would have that effect. One of the reasons for including the "Political Exception" provisions in all Extradition Treaties hitherto has been to ensure that persons would not be deprived of the right to a fair trial, or would not be extradited to a country where they might be tortured or summarily executed.

A case in point was the case of Lieutenant Colonel Amekrane, of the Air Force of Morocco. In his case, after an abortive attempt to overthrow the Government of Morocco, Colonel Amekrane arrived in Gibraltar in search of political asylum; he was refused asylum by the British Government and was extradited to Morocco on 17 August 1972. He was subsequently tried by Court Martial and executed on 13 April 1973. His widow and two children brought proceedings against Great Britain by way of application to the Commission of Human Rights of the Council of Europe, claiming damages against the British Government for having refused him asylum and for having him extradited, then to be tried by his enemies. While the case never came to a full hearing, after preliminary hearings the Government of the United Kingdom agreed to make a payment of £37,500 to his widow and children.

I would like to avail of this opportunity to congratulate the Irish American Unity Conference, the Ancient Order of Hibernians, the Irish American Caucus, the Brehon Law Society, the Irish American Labor Coalition and all the other organisations which have collaborated together in opposing the transmission of this Amending Treaty to the floor of the Senate. This has been a good example of how Irish-American organisations can collaborate together and can collaborate with American Civil Rights organisations to counteract the English-American influence in the American establishment. If this Amending Treaty ever reaches the floor of the Senate, I hope that all the Irish American Organisations which are here, will work together to ensure that it does not receive the two-thirds majority of the Senate which would enable it to require the force of law in the United States.

By working together to defeat the British attempts to distort the laws of extradition in order to involve the United States in the Anglo Irish struggle, the Irish American organisations have rendered a signal service to

the cause of Irish nationalism. In Addition, they have helped to strengthen the consciousness of civil rights organisations in the United States against the tendency to minimise the effective protection of those who seek refuge from tyranny and oppression in this great Republic.

PANAMA VERSUS PRENSA

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. SOLARZ. Mr. Speaker, the death knell of Panamanian democracy is sounding. The military has removed from office President Nicholas Ardito Barletta only after a year in office. President Barletta began his Presidency under a cloud because of serious allegations that he had been the beneficiary of electoral fraud. But he was an intelligent and dedicated public servant, and there were many who hoped that he could create legitimacy by a vigorous attack on Panama's economic crisis. By engineering a quiet coup against President Barletta, the Panamanian Defense Force has confirmed once again that its central objective is to retain power in its own hands rather than transfer it to the hands of the people, where it belongs.

The generals' intent is clearly obvious in its treatment of La Prensa. This independent opposition newspaper was a beacon of accountability in Panama. It should be no surprise that the military has sought to extinguish that light of truth.

Mr. Speaker, there is no question that the United States has significant interests with respect to Panama, particularly with respect to the Panama Canal. Yet those interests are best fulfilled in the context of a vibrant and institutionalized democracy in Panama. We can only hope that extraordinary steps will be taken to repair the damage that has occurred in recent weeks. Freeing La Prensa to renew its service to democracy is one of those steps.

Recent editorials in the Miami Herald and the Boston Globe have addressed the current situation in Panama. I included them for the benefit of my colleagues.

[From the Miami (FL) Herald, Oct. 3, 1985]

PANAMA VS. 'PRENSA'

Prescription for a Latin military government: First you oust the civilian president. Then you intimidate the press. If that doesn't work, then you permit street thugs to attack any newspaper that dares to be independent.

Gen. Manuel Antonio Noriega, head of Panama's National Defense Forces (NDF), knows the formula well. He and his henchmen have imposed or deposed five Panamian presidents in the last three years. The last coup came on Friday, when General Noriega demanded the resignation of President Nicolas Ardito-Barletta and appointed former Vice President Eric Arturo del Valle to replace him.

That done, General Noriega turned to *La Prensa*, Panama's fiercely independent opposition newspaper. (*La Prensa*, coincidentally, prints part of the *The Miami Herald's* international edition in Panama.) *La Prensa* knows what happens when the NDF objects to its independence. The NDF has closed the five-year-old newspaper twice.

The American ambassador is reported to have warned *La Prensa's* editors that the NDF wants it closed. And columnist Guillermo Sanchez Borbon, Panama's most respected political commentator, bade farewell to his readers the other day. His photograph has been distributed among NDF members, he explained. Fearing for his life, he said that he is going into hiding.

Mr. Sanchez Borbon merely was being prudent. The last time *La Prensa* was closed, thugs broke in and poured acid on its presses and in the computers.

This time, matters could be worse. For *La Prensa*, and particularly Mr. Sanchez Borbon, have insisted adamantly on an independent investigation into the murder and decapitation of Dr. Hugo Spadafora, one of General Noriega's enemies. Dr. Spadafora's mutilated body—his head is still missing—was found two weeks ago in Costa Rica, near the border with Panama. Witnesses say that cars similar to NDF vehicles, and men dressed in military uniforms, were seen in the vicinity shortly before.

General Noriega should consider carefully the consequences of muzzling *La Prensa* or harming columnist Sanchez Borbon. That would-bring upon him the condemnation of democratic governments and human-rights advocates throughout the hemisphere. Moreover, it would elongate the shadow already cast upon the NDF by the death of Dr. Spadafora. If General Noriega and the NDF have nothing to hide, they have nothing to fear from a free press demanding an independent investigation.

[From the Boston (MA) Globe, Oct. 4, 1985]

DEMOCRACY IN PANAMA

The dictatorship in Panama, which has been camouflaged by a veneer of democracy, is in trouble. Turmoil has erupted over a murder believed to have been commissioned by Gen. Manuel Antonio Noriega, head of the 15,000-man national guard.

Last week Noriega forced President Nicolas Ardito Barletta to resign. The opposition paper La Prensa is threatened with closure. Panamanian professionals have called a strike.

In this state of peril mixed with promise, Americans must back the forces of democracy symbolized by La Prensa, and bring maximum pressure on Noriega to end his sordid rule.

This responsibility falls most heavily on the U.S. government, which has supported the military regime. The administration should suspend military aid and publicly criticize Noriega. In the long run, that is the clearest way to assure Panamanian stability.

The United States's main concern has always been the security of the Panama Canal. Traditionally, whichever leader offered "la paz social"—another way of saying "law and order"—has been the U.S. favorite.

The administration now is cooling toward Noriega, after a split in the officer corps provoked by the decapitation of a critic who had accused Noriega of being the drug kingpin of Central America. The brutal killing would have been unremarkable in El Salvador or Guatemala, but has shocked Panamanians.

The 700 small shareholders who formed La Prensa gave Panama the gift of a free press. They are true democrats battling an undemocratic system. People like them are the key to saving countries like Panama, Chile, South Korea and the Philippines. Faced with guns, they cannot do it alone.

Panamanian democrats need to know Americans are behind them. Noriega needs to know that Americans who value democracy want him out. Democracy hangs in the balance, and where the U.S. weighs in can tip the scale.

STOP THE LEAKERS!

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. BROOMFIELD. Mr. Speaker, the weekend papers again regaled the American public with classified details about an alleged intelligence operation directed against Colonel Qadhafi in Libya. I commend the President for immediately ordering a full investigation into this illegal release of classified information. For the sake of the Nation, the time to stop the leakers is now.

According to a Sunday Washington Post article, the administration has reportedly authorized a covert plan designed to thwart Libyan support for terrorism. The alleged plan would also lure Colonel Qadhafi into a situation that would give his numerous opponents in the Libyan military a chance to seize power, or provide one of his United States-backed neighbors with justification for a military response.

When the administration's reported plan was discussed with the Senate and House Select Intelligence Committees, there was reportedly initial resistance concerning the plan.

We all know that leaking classified information and details of intelligence operations has unfortunately become a real art form here in the Congress. When many in the Congress disagree with an opponent's stand on an issue or when many fail to see eye-to-eye with an administration plan, they get even by leaking sensitive information.

All too often, our morning newspapers contain most of the information which the President receives in his daily intelligence briefing. Unlike foreign newspapers, American papers routinely carry sensitive information which has been intentionally leaked to journalists in order to prove a point or win an argument. The KGB and its sister intelligence services from the East bloc must have a field day here in America. Their collecting efforts are simplified thanks to the professional leakers and the cooperative attitude of many American journalists.

If a Member of Congress owes anything to the American public, it is responsibility. It is extremely irresponsible to release sensitive information to the public for political or personal gain. This obligation of responsibility also pertains to congressional staff. Our Government spends billions of dollars annually in our national intelligence collection effort. Leaked information can jeopardize sensitive and important oper-

ations which are designed to serve the Nation's interest. Intentionally released intelligence data can also jeopardize the lives of many who are serving our Government overseas. Our allies can be embarrassed and their intelligence services may decide not to share data with our Government because of our inability to keep a secret a secret.

This year, I cosponsored House Joint Resolution 7, which proposes that a Joint Committee on Intelligence be created. This joint committee would significantly reduce the number of staff and Members with routine access to sensitive information. Should the proposed bill become law, an investigation into a leak of this nature would be more easily conducted.

I encourage the President to pursue the investigation of this recent disclosure of U.S. intelligence documents. The individual responsible for the disclosure should be identified and punished for his irresponsibility.

This is the only sane way to stop this damaging outflow of sensitive intelligence information. Tough action is needed now before some shortsighted Americans give away all of our secrets.

A TRIBUTE TO THE NEWS WOMEN OF WASHINGTON

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. WRIGHT. Mr. Speaker, the National Press Club recently honored the newswomen of Washington. The event paid tribute to the accomplishments of newswomen who have been reporting from the Nation's Capital for the past 153 years. That program was chaired by the famous reporter from my home State, Sarah McClendon. The keynote speech of the evening was delivered by Mrs. Katherine Graham, chairman of the board of the Washington Post Co.

Mrs. Graham, in her address, focused on the progress women have made in the news profession and she singled out Sarah McClendon for her "grit" and determination to become a success in a male-dominated profession long before the barriers came down. As Mrs. Graham said, "Sarah may be a thorn in the side of the Presidents, but she is an American beauty rose to all of us." I ask that Mrs. Graham's full text be included in the RECORD.

The speech follows:

ALL'S WELL THAT ENDS WELL

(Remarks by Katherine Graham, Chairman of the Board, the Washington Post Co., in a tribute to the Newswomen of Washington—The National Press Club, Washington, October 22, 1985)

Good evening. It's a great honor to speak at this long-overdue tribute to all newswomen of Washington.

At first I thought you asked me because of my job. Now I realize you were looking for someone old enough to remember what it was like in the Dark Ages, but young enough to have eluded senility. Given the possible length of tonight's program, I hope I make it.

Any talk about the emergence of women journalists could rightly be called: "A History of the Oppressed." But I think a more appropriate choice would be: "All's Well that Ends Well."

Women journalists have come a long way—from the days when we had to shout questions at visiting dignitaries from the balcony of the National Press Club, or send in male emissaries to read the wires because we weren't allowed in the wire room. Now some of you are media stars. But we still have some distance to travel.

Shakespeare said there are seven ages in the life of man. But I believe there are five ages in the life of women journalists. That's because women have always been more efficient. Unfortunately, we're stalled at number four.

The first was in full swing when I donned hat and gloves and went to work at The Post as an editorial writer in 1939. That was the era when men thought they were better than women. And the sad part is, a lot of women thought so, too.

I know I did. I grew up with the subliminal idea that men were naturally smarter and more capable than women.

As a result, some things that would be offensive and impossible today seemed less so then. For example, when the men went off to fight World War II, women were hired in the newsroom with the understanding that they would give up their jobs when the men returned.

Most women who were regulars on the paper were assigned to cover only parties, clubs and social welfare issues—presumably because we liked children!

Such prejudice lasted a long time, inside journalism and out.

In the 1970s, I remember attending a board meeting of a big company, of which I was then a director. A man was giving a little talk, complete with slides, describing the activities of a roomful of workers. Most of them were older women, many gray-haired.

He would take his pointer and say, "These girls are doing such and such. And these girls are doing something else."

Suddenly I hear a voice say, "Women." He went on and said "and these girls" again. And again the voice said "Women." I then realized it was my voice! My sensitivity had been raised a long way.

Liberation certainly hadn't yet arrived when I returned to The Post as president in 1963. In fact, I gave an interview in which I said I thought perhaps men were better equipped to do my job than a woman was. I was brought up sharp by Elsie Carper, then editor of the Style section of The Post. She sailed into my office the next day and said: "If you really believe that, then I quit."

Fortunately, Elsie is still at The Post, so my beliefs obviously changed. And that brings me to the second age in the life of women journalists, an age when we became fully aware that we could indeed perform as well as men. But the barriers were still up.

I think of May Craig as perhaps the epitome of the pre-liberation era, which combined a traditional, flowery-hat femininity with important accomplishments in a tough environment.

For those of you too young to remember, May was for 30 years the Washington correspondent for a chain of newspapers in Maine.

She was called "dynamite in a blue dress" because she didn't mince words and because she asked peppery questions at presidential news conferences. Today, of course, she'd be dynamite in a red dress.

The Sam Donaldson of her day, May always tried to ask "dodge-proof" questions because the presidents had, she said, such a "lovely long list of evasions." Some things never change! FDR once asked her if she had stayed up all night thinking of an especially provocative question. She immediately responded, "I did."

May was on the front lines in the battle for the advancement of women. It was she who "won the washrooms" in the Congressional Press Gallery, loudly complained about being excluded from the National Press Club and railed against stag gatherings of the White House Correspondents Association. "I'm a bona fide member and I pay my dues," she proclaimed.

May also fought to have the word "sex" added to the list of discriminations banned by the Civil Rights Act of 1964. Although it wasn't taken seriously at first, the "May Craig Amendment," as it soon became known, was one of the most important advances for women in the past 25 years.

In short, May led the advance guard of women journalists who believed in themselves and what they could accomplish, and who were willing to fight for their rights.

This new breed of woman came into its own in the next age, the era of more militant pressure for equal rights.

I was a participant in this process in more ways than one. I was in the curious position of heading a company being pressured, yet understanding where women were coming from as issues developed, and trying to do something about it in our company and in the industry.

The women journalists at Newsweek sued us for discrimination. When I heard of this action, I said to myself and others: "Whose side should I be on?"

The newsweeklies were founded on the theory that God had ordained women to be researchers, and men to be writers and editors. It was believed that women couldn't handle the Thursday and Friday late-night deadlines, which were thought to be very difficult. Early on, I proposed a woman for an editor's job at the magazine and was told by the men it was "unthinkable."

It was hardly unthinkable. It could be done and it was. But successful women discovered the price they had to pay at first often was a high one.

For one thing, there were so few women around that when another appeared on the scene, the incumbent thought: "It's her or me." And hard feelings sometimes arose.

More important, the psychological pressure of being the first woman, or among the first, was enormous—and still is. One woman told me: "I always get the feeling that men are still waiting for you to make a mistake. If a man doesn't succeed, people say: 'He just didn't work out.' But if a woman fails, the generalization is always made that a woman just couldn't do the job."

In fact, women felt they had to be much better than men merely to be considered their equals. They put enormous pressure on themselves to succeed.

Fortunately, success did come. And that brings me to the fourth age, the age in which we now live: the age of general acceptance.

I remember two harbingers of this era.

The first was when Meg Greenfield came to The Post as an editorial writer 15 years ago, when Phil Geyelin was editor. People

said: "Geyelin's hired a woman, but she can do it. You'd be surprised!"

The second came when, after a long and arduous campaign, I was finally invited to the Gridiron Club—as a guest! I'm afraid I didn't consider the implications. I was pleased by the invitation, after decades of hearing about the dinner, and decided to accept.

The women at The Post wrote me a letter urging that I stay away. If women couldn't be members, they said, we shouldn't go at all. Some of our reporters were planning to picket outside the dinner.

They were right. I decided not to go. I couldn't bring myself to picket, however. The most I could do—and I've never said this in public before—was get in the car and drive by.

Today, of course, women are accepted—and respected—for their brains . . . for their abilities . . . for their professionalism. They are making enormous contributions to their craft. And by doing so, they are contributing to the well-being of everyone in this country and, indeed, around the world.

But I'm looking forward to the fifth age, when women will hold real power at the top.

I'm tired of being the only woman CEO of a Fortune 500 company, by choosing the right genes—or Eugene—to begin with. I'm tired of three networks with three male anchors and, worse, male-dominated corporate structures. And I'm tired of so few women being in the top news jobs at major publications.

This is not too surprising—women have only been in the workforce in large numbers for about 15 years. We haven't had much time to work our way to the top of the large organizations. But that moment cannot be far away.

Come it will and when it does, I believe women will be more than able to fulfill the aspirations of our predecessors who fought so hard to clear the path.

In closing, I want to pay tribute to one woman who has fought for women journalists with spirit, dignity and results for almost 35 years.

I am a real admirer of the grit of Sarah McClendon. She is a woman who made it long before the barriers came down. And she made it the hard way. She wasn't handed anything, no base from which to work. Instead she created her own—a successful news service, not to mention her high-visibility at press conferences. In that unmistakable twang of hers, she kept the backs of uncounted presidents firmly against the wall.

Sarah, we give you great credit and great thanks. You may have been a thorn in the side of the presidents, but you are an American Beauty rose to all of us here tonight.

Thank you.

THE SOVIET UNION'S WAR OF IDEAS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. LAGOMARSINO. Mr. Speaker, Representative JIM COURTER, our distinguished colleague from New Jersey, recently had printed in the Jewish Institute for National Security Affairs [JINSA] newsletter, August/September 1985, the following statement on "The Soviet Union's War of Ideas." Congressman COURTER succinctly points up the massive Soviet disinformation network and offers insightful examples of the use of such active measures tactics.

It is incumbent upon all Members of this body to face the facts which confront American foreign and national security policy today. One of these cold facts is that the Soviet Union has a massive, well-financed and high priority active measures campaign underway, designed to undermine Western efforts at self-defense and to mislead the West and its leaders about Soviet intentions and capabilities.

Congressman COURTER's piece offers much-needed insight into this facet of Soviet foreign policy, and I urge my colleagues to consider its content.

[From the Jewish Institute for National Security Affairs, August/September 1985]

THE SOVIET UNION'S WAR OF IDEAS

(By James P. Courter)

On July 30, 1984 Radio Moscow told the world that a bus carrying Olympic athletes in Los Angeles had come under gunfire. When an American news service checked this report, police said that no such incident had occurred, but that one bus may have been struck by a rock or a similar object. It is not known whether the Soviet story was a fabrication or just a gross exaggeration.

But we do know that for Radio Moscow's world audience, this "proves" correct the Soviet claim that athletes would be in danger in Los Angeles.

Before the athletes arrived in Los Angeles, some had received threatening letters mailed to their Third World countries from the Ku Klux Klan in Maryland and Virginia. After a linguistic and forensic analysis by the FBI, the letters were found to be KGB forgeries, and this was announced by Attorney General Smith on August 7. The crude, racist threats were obviously intended to intimidate athletes and keep them away from the games.

These are examples of "disinformation", the spreading of falsehoods or half-truths to support Soviet foreign policy goals. This is one of several means used by the Soviets to influence world opinion: other "active measures" include use of front groups, agents of influence in Western news media, forgeries, clandestine radio broadcasts and the like.

The international flow of ideas and information has an indisputable impact on foreign policy and national security, because it affects world understanding of our nation's—and the Soviet Union's—goals and actions. It's unfortunate that this important subject has received so little attention in the American press.

Nonetheless, much can be learned from former Soviet intelligence officers who have fled to freedom, and from government and other sources.

Stanislav Levchenko, who defected from the KGB in 1979, worked in Tokyo, ostensibly as a correspondent for the Soviet Journal New Times. He was one of five KGB personnel in Tokyo who handled a total of 25 Japanese "agents of influence"—journalists, government officials or other elites who were compromised and were willing to provide Japanese secrets to the Soviets, spread Soviet disinformation in the Japanese government, or print information, themes, or entire articles to promote Soviet goals in the Japanese press.

The highest Soviet objective was to harm Japan's relations with China and the United States, both of which were seen as a potential threat to the Soviet Union. Using agents in both the press and the Japanese Socialist Party, Levchenko made extensive use of disinformation. One rumor was circulated to top Japanese officials describing serious policy rifts in the Chinese government over the 1979 invasion of Vietnam; this implied that Deng Xiaoping's tenure was uncertain and that close Sino-Japanese ties could be risky.

Levchenko also used an agent who was a confidant of the owner of a large Japanese newspaper to place "one of the most successful Soviet forgeries of the 1970's" in the newspaper, Sunkei Shimbun, in January 1976. The forgery, written "line by line, word by word" in Moscow, was the "political will" of former Chinese premier Chou En-Lai, giving the late Chou's views on all areas of Chinese policy. It was supposedly circulated to the Chinese Central Committee by his widow. Chou's "testament" was designed to encourage political rivalries in China, by its criticism of the Cultural Revolution and its support of better relations with the Soviet Union. Its release in Japan was intended to give the Japanese a picture of a divided, volatile Chinese leadership. As soon as the document was printed, the Soviet "news" service TASS carried word of the Japanese "scoop" around the world. Only after an interval of several days did the Chinese declare the document a fake.

The use of forgery is common. In 1981, a State Department document dissenting from U.S. policy on Central America was given to a New York Times foreign affairs columnist and was described in her column. The document, of dubious origin, was a forgery, and this was admitted by the columnist three weeks later.

During the Falklands war, a fake Pentagon press release circulated among Latin American diplomats in Washington, carrying the text of a statement by Secretary Weinberger. The statement, containing English grammatical errors characteristic of Slavic language speakers, delivers a series of blunt, undiplomatic comments which support Britain in the war but manage to insult both Latin America and Britain at the same time.

Clandestine radio stations are another means used by the Soviets to influence foreign opinion. Without claiming Soviet sponsorship, these radio stations support Soviet views while pretending to represent local opinion of people in Turkey, China or Iran.

For example, the National Voice of Iran has broadcast to Iran since 1959 from a transmitter in the USSR. Speaking in the persona of the Iranian people, it refers to the Soviet Union as "our friendly northern neighbor". This station consistently attacked the Shah and his policies, and began calling for his overthrow in the fall of 1978. When American diplomats were taken hostage, the National Voice of Iran departed from Moscow's official policy of silence, and supported the taking of the hostages by Iran's "struggling and enthusiastic young people". This line was reversed after the United States lodged a diplomatic protest in Moscow. Today, the National Voice of Iran regularly rebukes Khomeini and Iranian media for anti-Soviet statements, and consistently criticizes Iran's "unrealistic" opposition to the Soviet war against Afghanistan.

These are but a few examples of the many techniques the Soviets use to sway public

opinion. While most Americans are aware of ideological competition, few are aware of this type of Soviet manipulation of Western media. The result is often that people read Soviet opinions and disinformation while believing that they are reading facts and analysis by their own domestic press.

CITIZENS FOR CITIZENS, FALL RIVER, MA

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. FRANK. Mr. Speaker, unfortunately, issues sometimes become unfashionable before we have resolved them. An example of this is the question of poverty. Sadly, in recent years, the level of poverty in our society has begun to increase, and the agencies dedicated to combating poverty and providing economic opportunity to all Americans have suffered from a loss of attention and support. It is important to remind ourselves that poverty remains a problem, and that there also remain in being organizations dedicated to providing better economic lives for those who haven't been able to share in the prosperity that has been available for most Americans.

One of the most vibrant and effective of the antipoverty organizations with which I am familiar is the Community Action Agency in the Greater Fall River Area, Citizens for Citizens. Under the creative leadership of its executive director, Mark Sullivan, Citizens for Citizens makes a very important contribution to the Greater Fall River community. CFC effectively administers Federal programs, and performs the advocacy role that community action agencies are supposed to perform on behalf of those in need. Recently, in a very innovative program, Mr. Sullivan and CFC have received an urban development action grant from the Department of Housing and Urban Development to provide low income people with a chance at home ownership. Working with Mr. Robert Valton, a leading contractor in the Greater Fall River Area, Mr. Sullivan and CFC have drawn on several Federal programs to meet one of the most pressing social needs of our time: decent housing for lower income people, with a chance for them to become home owners.

Recently, the Fall River Herald News published two excellent articles outlining the work that Citizens for Citizens does. These articles are typical of the excellent coverage which the Fall River Herald News gives to the activities in Greater Fall River, and I ask that these articles be reprinted here.

CITIZENS FOR CITIZENS GOING STRONG AFTER 20 YEARS

(By Sean Flynn)

Citizens for Citizens Inc., a remnant of the 60s "War on Poverty," is still alive and well, and celebrating its 20th anniversary this year.

"We have a combined budget of $11 million dollars, and 500 employees," said Mark A. Sullivan, CFC executive director, and this he added, despite repeated efforts by Lyndon Johnson's presidential successors to drastically reduce the means for the "war," and give up the ambitious goal of eliminating poverty.

"Nixon, Ford, Carter and Reagan have been trying to put us out of business," said Sullivan, "but we are still here. Nixon's glad he got his amnesty, Ford is golfing, Carter is a carpenter, and Reagan will be remembered as an amiable incompetent."

In the fall of 1965, the Fall River Community Action Program Committee approved the establishment of a regional community action agency to serve this city, Freetown, Somerset, Swansea and Westport. The new private non-profit corporation was named Citizens for Citizens. Soon after, the Fall River City Council endorsed CFC as its community action agency.

"That designation qualifies us for a grant of $256,000 to eliminate poverty in Southeastern Massachusetts," said Sullivan. "And that's enough to buy everybody a hamburger and send them home." The rest of CFC's budget, for the funding of its many programs (see related story), comes from 189 federal agencies, 10 state agencies, various foundations, and private contributions. "We are very good at getting grants," said Sullivan. Over 80,000 people in Southeastern Massachusetts are affected by CFC programs.

During his 15 years as executive director of CFC, Sullivan has brought in over $157 million in government grants for administration by the agency. "We run quality programs with as little money as possible," said Sullivan. And, for all the programs CFC is involved in, administrative costs make up less than four percent of CFC's budget.

CFC, its main offices located in the former Brightman Methodist Church on Griffin Street, was founded as a result of the Economic Opportunity Act of 1964, which led to the creation of over 2,000 Community Action Agencies nationally, explained Sullivan. "Now there are about 700 left," he said. And the federal Office of Economic Opportunity no longer exists, a victim of the Nixon cutbacks.

Up until four years ago before the Reagan administration began cutting programs which service people, while massively increasing the military budget, noted Sullivan, CFC was the second largest community action agency in the U.S., with a budget of $22 million and over 800 employees.

"Now, all the community action agencies in the country receive $300 million," said Sullivan, "which would pay for one-quarter of a B1 bomber." He added, "And these are the official agencies to fight the poverty of 40 million Americans."

When asked to define CFC's different projects, plans, and future goals, Sullivan laughed and said, "CFC is anything you want to be." In his commitment to programs and plans to alleviate the misery of poverty, Sullivan is constantly probing various possibilities of government assistance.

Various CFC programs are continually in the news, and people often don't realize they are all under the CFC umbrella. The CFC fuel assistance program, which last year allowed $5.358 million in reduced fuel costs for 11,000 households, started last week. CFC's $2.5 million housing project was also in the news last week, as the first 12, of 39, townhouses were made available for purchase last week to the winners of the Corky Row lottery.

Sullivan, who has a degree in economics, and master's degrees in labor studies and urban affairs, said the tough part of the job is deciding who won't be helped. "There is never enough to go around. To see 11,000 people come in year in, year out, for fuel assistance is disheartening."

This year is the last year of authorization for the fuel assistance program. The program exists "so that people don't face the choice of eating or heating," said Sullivan. He said any new legislation that does not either eliminate the program, or substantially cut funding, will most likely be vetoed by Reagan.

Sullivan stressed the difficulty of working in social services, and against the antipathy of the current administration to the needs of the 40 million Americans who live below the poverty level, according to government statistics. He noted that individuals in this economic grouping are now paying $300 more annually in federal taxes than prior to Reagan's tax reform."

Committed to alleviating needs of the poor, Sullivan, looking back, concludes, "This country really never intended to win the War of Poverty."

THERE'S ALMOST NO END TO THE RANGE OF CFC PROGRAMS AND ACTIVITIES

The range of activities and programs of Citizens for Citizens is incredible, and often confusing to the outsider.

When asked about elements of CFC's success, and how he keeps it all together, Mark A. Sullivan, CFC executive director, said, "I have excellent project directors—they know their jobs. Project employees are in-house people who have been promoted through the ranks."

Programs administered by CFC for children include the Head Start program, the After School Day Care program, the Pre-School Day Care program, the Child Nutrition Feeding program, a summer recreation program, and Operation Christmas. Just for the Head Start program, CFC administers over $1 million.

CFC also administers the fuel assistance program in two cities and nine towns, which is the biggest item in CFC's budget, at over $5 million. These funds will help some 11,000 households with heating between now and March, 1986. Each family can receive a maximum of $750 in aid.

Related programs are the Home Weatherization Program and the "Hot Whap" program, a boiler and burner replacement program for low-income families. These programs have been extremely effective, said Sullivan. "We have weatherized more houses than any agency in the U.S.," noted Sullivan.

CFC senior programs include the Senior Aid program, foster grandparent program, and the RSVP program. CFC also runs the Woman Infancy and Children program, and the food distribution program in Fall River and surrounding towns.

The Council on Alcoholism; the butter and cheese program, which distributes annually $1 million worth of food; and the community gardens program, which plows 200 gardens for families, are also administered by CFC. The CFC advocacy program helps low-income people with legal problems and bureaucratic regulations.

CFC recently entered the housing business, with a $2.5-million project. By constructing 39 condominium townhouses in the Corky Row neighborhood, CFC is not only providing housing for moderate-income families, but is also revitalizing a historical neighborhood. "It is the feeling of this

agency as a community action agency that the only way we can turn around the neighborhood is through home ownership," said Sullivan.

The list of CFC programs and community activities goes on.

CFC Inc. has two spin-off corporations, the Citizens for Citizens Foundation and the Alternative Housing Corp., which were set up for tax and liability reasons. The foundation owns all the property, such as the headquarters on Griffin Street, the Head Start buildings on Robeson and Quequechan streets, and equipment such as vans and computers, which it then leases to CFC Inc.

The three CFC corporations have separate boards of directors. Eugene Kosinski is president of the CFC Inc. board of directors; Frank Sullivan is president of the foundation board; and Steve Lopes is president of the alternative housing board. Sullivan is executive director of CFC Inc., and chief executive officer of the other two corporations.

The 30 members of the CFC, Inc. board of directors include 10 publicly-appointed members—four from Fall River, two from Taunton, and one each from Somerset, Swansea, Westport and Freetown—10 representatives from organizations such as the Council of Churches and the NAACP, and 10 representatives elected from low-income constituency groups. The boards of directors of the other two corporations are smaller in size, but their members must be on the parent board, said Sullivan, to ensure coordinated policies.

THE SOVIETS AND SIGNED AGREEMENTS

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. BROOMFIELD. Mr. Speaker, once again the Soviet Union has shown its disregard for signed international agreements. This time, the Soviets and Afghanistans are playing dirty tricks on our Embassy in Kabul. While it is important to negotiate and sign accords, the ultimate goal is to have signatory nations respect those agreements. That is the bottom line.

In clear violation of international accords, the Soviets downed the Korean airliner in 1983, and took the life of Maj. Arthur Nicholson last year. The provisions of the Helsinki Final Act are routinely violated by the Soviets. There is deep concern in our Government about Soviet violations of the numerous treaties which they have with the United States. These would include violations by the Soviet Union of its legal obligations under the Biological and Toxin Weapons Convention of 1972. In clear violation of the provision of SALT II, the Soviets are encrypting telemetry from ballistic missiles. The U.S. Government is concerned that the new SS-X-25 ICBM is a prohibited second new type of ICBM and that this missile is in violation of the SALT II treaty. Equally serious is the Soviet violation of the ABM treaty with the construction of a large phased-array radar near Krasnoyarsk in central Siberia.

Just last week, a Soviet soldier sought asylum in the American Embassy in Kabul, Afghanistan. In typical Soviet fashion, the Embassy was bathed in spotlights all night long, electric power to the building was cut off, and a young Embassy officer was roughed up by one of the many Soviet and Afghani soldiers who surrounded the building there. Again, the Soviets and their Afghani friends have violated a long-standing agreement regarding the sanctity of diplomatic premises and the treatment of foreign diplomats.

While we all hope that progress can be made in the forthcoming talks in Geneva, we must keep in mind that agreement signing is not the ultimate goal of our efforts to seek better relations with the Soviets. Compliance with signed agreements is the key consideration. Only by complying with important agreements between our two nations can all of us hope to make a better and safer world for future generations. Good luck, Mr. President.

SOCIAL SECURITY NEEDS REFORM

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. HUBBARD. Mr. Speaker, as the House Committee on Ways and Means continues to deliberate on tax reform proposals, I want to share with my colleagues an excellent letter from one of my constituents, Angela Miller of Route 2, Hazel, KY.

Angela Miller is a 15-year-old sophomore at Murray High School and is concerned about the state of the Social Security system. She recognizes the problem of the growing dependence of retirement age persons upon Social Security, and she offers some thought-provoking suggestions which are worthy of consideration.

Angela Miller's remarks reflect a degree of wisdom and concern far beyond her youthful years, and I encourage you to read her letter to me that follows:

SEPTEMBER 16, 1985.

Representative CARROLL HUBBARD,
Rayburn House Office Building,
Washington, DC.

DEAR REPRESENTATIVE HUBBARD: As a young person about to enter the labor market, I am concerned about the state of Social Security.

I would like to suggest persons 30 years and above complete the Social Security program. Those under 30 years of age be required to pay into an I.R.A.

In this way the government will gradually eliminate their support of the masses in retirement.

Because of the increasing retirement age voted by Congress, I would not be able to retire until age 67. I would like to provide my own retirement thereby hoping to retire young enough to enjoy it. I feel the retirement age should be left at 62 and the Social Security funds returned to an account used for Social Security alone as it was before President John F. Kennedy's administration.

It is apparent from your recent news letter that a revamping of the income tax system so that everyone pays their fair share would solve government's financial troubles.

Sincerely yours,

ANGELA MILLER.

MAKING MEDICARE MANAGEABLE FOR SENIORS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. BIAGGI. Mr. Speaker, on November 18, I introduced legislation, H.R. 3631, to place a 1-year freeze on out-of-pocket costs for the elderly under part A of Medicare, which pays for hospitalization. The freeze would coincide with the 3.1 percent cost-of-living adjustment for Social Security payments and would prevent increased drain on out-of-pocket costs for health care.

Mr. Speaker, this legislation is needed for the very simple reason that without it—on January 1, 1986, the Medicare hospital deductible will increase 23 percent by $92 to $492. The 30 million Medicare beneficiaries—many of whom rely on Social Security for their primary source of income—will only have to pay an added $13 in 1986, which will not exceed the level of their Social Security COLA increase.

In order to fund this freeze of the Medicare deductible, H.R. 3631 would add 6 cents to the current 16 cent cigarette excise tax in order to offset the $1 billion cost of implementing this plan. I believe that this is a responsible, and relatively painless way to address the financing of this bill that does not direct dollars in the wrong direction.

I consider this bill a short-term, stopgap measure which will give seniors a break while Congress addresses the long-term financing needs of the Medicare Program that will make it more responsive to the out-of-pocket costs borne by seniors in the program. At a minimum, we should be actively working to support efforts to ensure that increases in Medicare Program costs are directed away from those on fixed incomes. This is particularly important when we consider that since the outset of the DRG system under Medicare in 1983, hospital revenues have increased from $1.2 billion to over $2 billion annually.

It is especially critical that we take a close look at the new DRG system which pays hospitals a set fee for specific procedures under Medicare. In my own State of New York, we will come under the DRG system beginning January 1986. Given the high per capita income of the State and the large percentage of seniors on fixed incomes, I feel that it is critical for the 1.3 million seniors in my own city of New York to be given adequate protection against the ravages of health care inflation.

The need for this legislation to assist elderly New Yorkers in particular is critical considering current and future demograph-

ic trends in our city. Not only does the DRG system discharge elderly patients into communities sooner—but it also places poor elderly New Yorkers, on fixed incomes, in the unacceptable position of having to pay increased health care costs. In the past decade, the number of "old old" elderly, age 75 to 84, rose 15 percent and the number of those over age 85 rose by 37 percent. In 1980, one out of every three seniors in New York City lived alone. Elderly women outnumber elderly men living alone by nearly 2 to 1. In sum, this population is the neediest in terms of health care and least able to afford such exorbitant increases.

Seniors continue to be caught in a catch-22 situation. On one hand, inflation has dropped so that the Social Security COLA is limited. On the other hand—health care costs continue to rise, as reflected by increased out-of-pocket costs paid by seniors. In a study conducted by the Select Committee on Aging in July, we found that seniors are now paying more in out-of-pocket costs for health care than 20 years ago when Medicare was first enacted. I consider this an intolerable situation and one that requires our immediate and direct attention.

The freeze in H.R. 3631 will not begin to address the related increases in Medigap policies that seniors will begin to receive. Even with a hospital deductible less than the projected $492, the elderly are projected to spend an average of $2,583 for health care in 1990—nearly 19 percent of their income. This is substantially higher than the 15 percent seniors must pay today. Passage of H.R. 3631 will soften the blow and return the Medicare Program to its original purposes—as a primary payor of health care needs—not a payor of almost last resort.

For the benefit of my colleagues, I am inserting the text of H.R. 3631 into the RECORD for their review.

H.R. 3631

A bill to amend part A of title XVIII of the Social Security Act to limit the increase in the inpatient hospital deductible and extended services coinsurance amount for 1986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MEDICARE INPATIENT HOSPITAL DEDUCTIBLE AND EXTENDED SERVICES COINSURANCE AMOUNT.

(a) SETTING INPATIENT HOSPITAL DEDUCTIBLE AT $412 FOR 1986.—Section 1813(b) of the Social Security Act (42 U.S.C. 1395e(b)(2)) is amended—

(1) in paragraph (1), by striking out "shall be $40 in the case of any spell of illness beginning before 1969" and inserting in lieu thereof "shall be $412 for 1986";

(2) in the first sentence of paragraph (2), by striking out "1968" and inserting in lieu thereof "1986"; and

(3) in the second sentence of paragraph (2)—

(A) by striking out "$45" and inserting in lieu thereof "$412", and

(B) by striking out "1966" and inserting in lieu thereof "1984".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to—

(1) inpatient hospital services furnished during a spell of illness beginning on or after January 1, 1986,

(2) to extended care services furnished on or after January 1, 1986, and

(3) to monthly premiums under section 1818 of the Social Security Act for months beginning with January 1986.

SEC. 2. INCREASE IN FEDERAL EXCISE TAX ON CIGARETTES AND APPLICATION OF INCREASE TO FEDERAL HOSPITAL INSURANCE TRUST FUND.

(a) INCREASE IN CIGARETTE TAXES.—Section 5701 of the Internal Revenue Code of 1954 (relating to the imposition of tax on cigarettes) is amended—

(1) by adding at the end of subsection (b) the following new paragraph:

"(3) ADDITIONAL TAXES.—In addition to the rates under paragraphs (1) and (2) and subject to subsection (f)—

"(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $4 per thousand.

"(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $8.40; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette."; and

(2) by adding at the end thereof the following new subsection:

"(f) COST-OF-LIVING ADJUSTMENTS IN RATE OF ADDITIONAL TAX ON CIGARETTES.—

"(1) IN GENERAL.—In the case of cigarettes removed during a fiscal year after fiscal year 1986, subsection (b)(3) shall be applied by increasing each dollar amount contained therein by the cost-of-living adjustment for such fiscal year.

"(2) COST-OF-LIVING ADJUSTMENT.—For purposes of paragraph (1), the cost-of-living adjustment for any fiscal year is the percentage (if any) by which—

"(A) the CPI for the preceding fiscal year, exceeds

"(B) the CPI for fiscal year 1985.

"(3) CPI FOR FISCAL YEAR.—For purposes of paragraph (2), the CPI for any fiscal year is the average of the Consumer Price Index as of the close of the 12-month period ending on July 31 of such fiscal year.

"(4) DEFINITIONS.—For purposes of this subsection—

"(A) CONSUMER PRICE INDEX.—The term 'Consumer Price Index' means the last Consumer Price Index for all urban consumers published by the Department of Labor.

"(B) FISCAL YEAR.—The term 'fiscal year' means the 1-year period ending on September 30 of the calendar year to which such term relates.

"(5) ROUNDING.—Any increase under paragraph (1) shall be rounded to the nearest cent (or if such increase is a multiple of ½ cent, such increase shall be increased to the next highest multiple of 1 cent)."

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before November 15, 1985, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $6 per thousand; and

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $12.60 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on November 15, 1985, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 of the Internal Revenue Code of 1954 and shall be due and payable on January 1, 1986, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on November 15, 1985.

(3) CIGARETTE.—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1954.

(4) EXCEPTION FOR RETAILERS.—The taxes imposed by paragraph (1) shall not apply to the cigarettes in retail stocks held on November 15, 1985, at the place where intended to be sold at retail.

(c) APPLICATION OF ADDITIONAL TAXES TO FEDERAL HOSPITAL INSURANCE TRUST FUND.—Section 1817(a) of the Social Security Act (42 U.S.C. 1395i(a)) is amended—

(1) by striking out "and" at the end of paragraph (1),

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and", and

(3) by inserting after paragraph (2) the following new paragraph:

"(3) the taxes imposed by section 5701(b)(3) of the Internal Revenue Code of 1954.".

(d) EFFECTIVE DATES.—

(1) TAX INCREASE.—The amendments made by subsection (a) shall apply to cigarettes removed after November 14, 1985.

(2) DEPOSIT OF INCREASE INTO TRUST FUND.—The amendments made by subsection (c) shall apply to taxes imposed on cigarettes removed after December 31, 1985.

CONGRESSIONAL SALUTE TO THE HONORABLE FRANK POMBO OF TOTOWA, NJ DISTINGUISHED CITIZEN, ESTEEMED RESTAURATEUR AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. ROE. Mr. Speaker, on Thursday, November 7, residents of my congressional district and the State of New Jersey will join together in testimony to an esteemed restaurateur, distinguished citizen and good friend, the Honorable Frank Pombo of Totowa, NJ, whose birthday celebration commemorating the 60th year of his birth will provide an opportunity for his relatives and many, many friends to express tribute to his lifetime of good works. On this most joyous occasion, they will also commemorate the 20th anniversary of the Bethwood, one of New Jersey's largest and finest catering facilities, which was established, owned, and operated by Frank Pombo for the past two decades. I know

that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to Frank, his good wife Marilyn; daughters: Sharon and husband Philip Scavone, Cindy and husband Joseph Maraccino; and stepdaughters: Debbie and husband William Calantoni; Karen and husband John Nicoloro on this milestone of achievement in testimony to his standards of excellence in our American way of life.

Mr. Speaker, the pleasure of great personal dedication and always working to the peak of one's ability with sincerity of purpose and determination to fulfill a life's dream—that is the success of the opportunity of America—and the mark of distinction in our society of "the self-made man." The aspirations and success of Frank Pombo in the mainstream of America's food catering industry does, indeed, portray a great American success story.

We are proud to boast that Frank Pombo was born and raised in our great sovereign State of New Jersey. He was one of 12 children of Pasquale and Vincenza Pombo, who emigrated from La Sola Conzolino, a small town near Naples, Italy, at the turn of the century and settled in Totowa, NJ.

Frank became involved in the food service business at an early age learning the trade with his older brother, August Charles Pombo, who established his own restaurant, Casino De Charlz, succeeding to the enterpreneurship of a restaurant that occupied the first floor of the home where the Pombo family resided.

In 1965 Frank Pombo acquired a well-known area restaurant in Totowa, NJ, called "The Old Duck Farm Inn." Coining his sister's name, Elizabeth Eastwood, he selected "The Bethwood" for the name of his restaurant. Within a year he leveled the building that housed his restaurant and constructed a place of beauty and refreshment of Spanish architecture and design. The Bethwood expanded over the past 20 years under his management, flourishing through three major renovations and additions and reaching a staff force that currently totals 250 employees. Frank was in full swing as a leading enterpreneur in the restaurant industry. He describes his hard work in making The Bethwood a success, "a labor of love," as he developed an outstanding venture in food service and a splended impresario catering to the delectable taste buds of this clientele. Frank Pombo has attained excellence and prominence in the quality of his leadership and professional expertise in his field of endeavor which has truly enriched our community, State and Nation.

Mr. Speaker, it is indeed appropriate that we reflect on the deeds and achievements of our people who have contributed to the quality of life here in America. There is much that can be said of the friendship and goodwill that Frank Pombo has so willingly and abundantly given over these many years that mean so much to the lives of many, many people. As we join together in a birthday celebration of a good friend and commemorate the establishment and founding of a magnificent restaurant, The Bethwood, we do indeed salute a great American, the Honorable Frank Pombo of "The Bethwood of Totowa, NJ."

IMPROPER POLITICAL SOLICITATIONS

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. LOTT. Mr. Speaker, on September 27, 1985, I wrote to the House Committee on Standards of Official Conduct, asking it to reconsider its recent interpretation that the Federal laws against political solicitations of Federal employees and in Federal buildings only apply to "coercive" solicitations. That finding was a part of the committee's report of September 19, 1985, entitled, "Investigation of Alleged Improper Political Solicitation," H. Rept. 99-277, in response to a complaint filed by Representative MCCANDLESS and me.

Mr. Speaker, my request for a reconsideration of the coercion standard on September 27 was accompanied by a lengthy memorandum tracing the legislative history of the applicable Federal statutes, a critique of various other findings of the committee, and an argument that the plain meaning rule of statutory construction should be applied, which in this case means a flat ban on all knowing political solicitations of Federal employees. A copy of my September 27 letter to the ethics committee and arguments from my memorandum can be found in my special order of October 23, printed in the October 24 RECORD at pages H8265-8269.

On October 21, I received a response from the chairman and ranking minority member of the Ethics Committee in which they indicated that the committee was "married" to the Justice Department's interpretation that the laws only apply to coercive solicitations, despite language in last year's ethics manual which states that any solicitation by a member of an employee is illegal.

I consequently wrote to the committee on October 29, asking for an advisory opinion, specifically, whether Members may now solicit congressional employees in their offices for campaign contributions so long as the solicitation is couched in purely noncoercive, voluntary terms. If the committee now thinks such activities are permissible, does the committee think they should be permitted; and, if not, would the committee recommend a House rule change to prohibit them?

Mr. Speaker, it is my firm belief that if we open this door to political solicitations, as the committee's report implies we now may, we are taking a dangerous backward step into the past in which Federal employees were considered fair game for political shakedowns. The authors of the antisolicitation provisions in the Criminal Code realized that without an outright ban on political solicitations of this nature, it would be difficult to draw the line between what was coercive and what was not. As one Senator put it during debate on these provisions:

> The intention is by this bill to remove not only coercive influences but the semblance of them; not only to withhold legal power to exact but to withhold the use of official place which may be treated as an exaction.

Mr. Speaker, it is my fear that the Ethics Committee's recent marriage to the Justice Department's threshold for prosecution significantly lowers the standards of official conduct for Members of Congress. Members should not be permitted to knowingly solicit congressional or other Federal employees as a class, especially in their offices. The so-called "coercion" standard is difficult if not impossible to define, let alone enforce, short of a blatant threat of job loss for failure to contribute. We must and should have and enforce higher standards of conduct for our Members.

At this point in the RECORD, Mr. Speaker, I include my recent exchange of correspondence with the Ethics Committee.

The letters follow:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON STANDARDS OF OFFICIAL CONDUCT,
Washington, DC, October 21, 1985.

Hon. TRENT LOTT,
U.S. House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR COLLEAGUE: The Committee is in receipt of your letter and memorandum of September 27, 1985. We thank you for the complimentary comments contained therein.

In regard to your "appeal" to the Committee that it reconsider its conclusion that coercion is a necessary element in the establishment of a violation of either 18 U.S.C. 602 or 18 U.S.C. 607, please be assured that the Committee shares your concern regarding solicitations which do not meet the elemental requirements in order for a prosecution to be undertaken. It is exactly because of this concern that the Committee, with what it believes to be appropriate emphasis, placed all interested persons on notice that such activities come perilously close to constituting a violation of these two provisions, and that any solicitation of Federal employees should be made only in a manner which will "avoid questions being raised with regard to the propriety of such undertakings." See, House Report 99-277, Section VII, at page 21. The Committee does not, however, feel that the complaint warranted creation and imposition of a less stringent elemental standard, vis-a-vis the alleged misconduct, which would somehow place the respondents in violation of the statutes. The Committee is "married" to the judicial and executive interpretations of the law which require coercion as an essential element of improper political solicitations. As you are aware, the complaint only alleges violations of sections 602 and 607. Therefore, the Committee believes that the issues raised therein have been properly disposed of in accordance with the recognized scope of the two statutes.

The Committee appreciates your interest in this matter.

Sincerely,

JULIAN C. DIXON,
Chairman.

FLOYD D. SPENCE,
Ranking Minority Member.

HOUSE OF REPRESENTATIVES,
Washington, DC, October 29, 1985.

Hon. JULIAN C. DIXON,
Chairman, Committee on Standards of Official Conduct, Capitol Building, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your response of October 21 to my letter and memorandum of September 27 regarding the Committee's report on the political solicitation of House employees (H. Rept. 99-177, Sept. 19, 1985).

I am gratified that the Committee shares my concern about solicitations which do not meet the Justice Department's "coercion" standard for the purposes of prosecution. The basic questions remain, however: How is that concern to be interpreted, and what is to be done about it?

Your letter indicates that "such activities come perilously close to constituting a violation of these two provisions" (18 U.S.C. 602 & 607), and that "any solicitation of Federal employees should be made only in a manner which will 'avoid questions being raised with regard to the propriety of such undertakings.'" But, your letter makes clear that the Committee is now "married" to the interpretation that coercion is "an essential element of improper political solicitations."

This does seem to represent a 180-degree departure from your Committee's House ethics manual in the 98th Congress in which it is unequivocally stated that—

"Members of Congress, candidates for Congress, and Federal employees are now specifically prohibited by provisions of Federal criminal law from soliciting political contributions from Federal employees, including employees of the House of Representatives." (p. 123)

While the manual does go on to indicate that these provisions were enacted to "prevent employees from being subject to any form of political assessment," and to protect employees "who by their employment and position may be subject to coercion," this is a far cry from saying that the provisions only prohibit coercive solicitations. As I point out in my memorandum on the legislative history behind these provisions, the proponents felt a flat ban on solicitations was the only way to avoid the potential for corruption and the evil of coercive shakedowns.

And yet, under the Committee's most recent interpretation, there must be the "intent or perception to coerce Federal employees," for without such "evidence of 'victimization'," the mere fact of solicitations being distributed in Federal buildings, without coercion, is insufficient for application of 18 U.S.C. 607" (Committee Report, p. 21). In short, either the solicitor or solicitation must evidence the intent to coerce by admission or on their face, or the person being solicited must prove "victimization," that is, that he felt coerced into giving. I think you will agree that, short of a blatant, mandatory and threatening shakedown, almost everything else will fall outside the net of your criteria.

Because your Committee rules apparently do not permit the formal reconsideration of an interpretation, I would like to formally request an advisory opinion pursuant to your responsibilities under House Rule X, clause 4(e)(1)(D). My question regarding the general propriety of proposed conduct is this: "Would it be permitted, under Federal laws and House rules and standards, for this Member to knowingly solicit political contributions from congressional staff (other than his own) in their offices, provided the solicitation is couched in purely non-coercive, voluntary terms?"

If the Committee's answer is, "Yes, such activities are now permissible under Federal law and House rules," I would be interested in knowing whether the committee thinks such activities should be permitted, and, if not, whether it would recommend a rules change to prohibit them in the future. I would be happy to join in cosponsoring such a change.

Sincerely yours,

TRENT LOTT.

THE DAILY RECORD ON PROTECTING THE JERSEY SHORE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. COURTER. Mr. Speaker, on May 4, 1985, the Environmental Protection Agency [EPA] designated a waste disposal site approximately 115 nautical miles from the New Jersey coast for the dumping of sewage sludge. In September, Massachusetts, faced with a court order to cleanup Boston Harbor, decided to ask EPA for permission to spill its sludge at this site.

I believe that the ocean disposal of treated waste is a practice that should cease, not be expanded. The New Jersey shore has been a dumping ground for others for too long and Massachusetts' proposal is a step backward in New Jersey's efforts to protect its environment, its resources, and its livelihood.

The Federal Government should be seeking alternatives to eliminate the ocean dumping of sewage sludge, not considering new applications that would add to the amount of sewage sludge dumped in the ocean. If Boston succeeds in its request, who is to stop other communities from using this site as well. As the Morristown Daily Record points out in the following excellent editorial, if EPA doesn't sink this idea fast, it can expect a string of applications from similarly affected regions, and it will find difficulty in closing the Pandora's Box once it allows it to be opened.

The editorial from the Daily Record follows:

OPINIONS—IMPROPER BOSTONIANS

The proposal of the city of Boston to dump its sewage in the Atlantic Ocean—at a time when the rest of the East Coast is striving to restrict and eventually eliminate ocean dumping—is abominable enough. That it wants to deposit the material off the New Jersey coast, even 106 miles out at sea, is intolerable.

Granted Bostonians have a problem in disposing of their sludge—doesn't everybody?—but adding to pollution of the sea can hardly be thought of as the proper method of solving it.

Initial feelers about ocean dumping came from the Massachusetts Water Resources Authority last month: It requested federal Environmental Protection Agency approval to barge its sludge from Boston Harbor's island treatment plants to a site 106 miles out, while the authority develops other alternatives for disposing of the material.

New Jerseyans are all to familiar with temporary solutions to sewage problems—witness, for one, the millions of gallons dumped daily at the existing sludge dump site 12 miles off Sandy Hook. And valiant efforts are being concluded to close down that nearby source of pollution of our shores. With success in our grasp—albeit the actual halt to dumping is in the hands of the courts and is still many months in the future—we hardly can be expected to welcome the additional sludge, even 106 miles out.

Initial reaction from EPA spokesmen, and protests from New Jersey officials, are encouraging.

EPA Regional Administrator Christopher Daggett is said to view the 106 mile site as only the "last resort" open to the Bay State's leading city.

Representatives of New Jersey shore communities are particularly vocal in their vows that the state will "stand hard and fast" against allowing other states to dump off the coast; numerous members of the congressional delegation have fired off messages of protest to EPA Administrator Lee Thomas; state Department of Environmental Protection Commissioner Robert E. Hughey has asked the EPA to deny the request, and independent environmentalists are pulling as many strings as they can grasp.

By all that's proper, Bostonians should be the last to wish to abrogate their independence and seek to dump their sewage on a neighbor, thereby adding to ocean and shoreline pollution.

If the EPA doesn't sink this idea fast, it can expect a string of applications from similarly afflicted regions, and it will find difficulty in closing the Pandora's Box once it allows it to be opened.

IN MEMORIAM: LAWRENCE J. O'BRIEN, JR.

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. MANTON. Mr. Speaker, on Sunday, November 3, I lost one of the first friends I had in Washington. Lawrence J. O'Brien, Jr., ended a valiant struggle against cancer.

I first met Larry last year after I announced my candidacy for the Ninth Congressional seat vacated by my predecessor, Geraldine Ferraro. Larry helped me raise needed campaign funds, and he offered me superb political advice.

After I was elected, Larry assisted me in obtaining the one vacant Democratic seat on the Merchant Marine and Fisheries Committee. Larry knew the Committee as well as anyone in town. And with good reason. For three years, Larry served as chief counsel to the committee. During this period, Larry drafted a number of important bills which made their way into law.

After leaving the committee, Larry founded the law firm of Kiernan & O'Brien, which quickly became one of the leading maritime firms in Washington. From his vantage point, Larry was able to offer many members of the committee his

wise counsel and experience. I was fortunate to have been one of the beneficiaries.

Mr. Speaker, Larry served his country with distinction and dignity in Vietnam. As a captain in the U.S. Army, Larry saw extensive combat duty and earned the Bronze Star, the Air Medal, two Army commendations, and Combat Infantryman's Badge. Upon returning to the United States, Larry continued to serve his country in the Army Reserves, where he earned the rank of major.

Mr. Speaker, I know all of my colleagues join me in sending our deepest sympathies to Larry's wife, Melinda, and his daughter, Tara. Although Larry's life was cut short at the age of 38 by this terrible disease, Larry lived life to the fullest. We all mourn Larry's loss today, but we must thank God that Larry crossed our paths and hope that all of us will be blessed with knowing more people like him.

A TRIBUTE TO EVALEE KUNES

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. KOLTER. Mr. Speaker, today I rise to pay tribute to Evalee Kunes. Mrs. Kunes received the Honorary Parent of the Year Award for Parents Day, October 5, 1985, at Geneva College in Beaver Falls. This award was granted to Mrs. Kunes due to her unswerving dedication to her family. Mrs. Kunes raised five of her eight children alone after her husband died. She is also known for her service to her church and community. Timothy Kunes, a junior at Geneva College, nominated his mother for the award. A selection committee chose Mrs. Kunes from a field of nine nominations. The award, a plaque bearing the inscription: "In recognition of your service, dedication, and sacrifice representative of all Geneva College parents on behalf of their children," was presented to Mrs. Kunes during halftime at the Parent's Day football game. I am proud to honor Mrs. Evalee Kunes today before the U.S. House of Representatives.

MESROBIAN ARMENIAN SCHOOL

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. MARTINEZ. Mr. Speaker, I wish today to congratulate the Mesrobian Armenian School of Pico Rivera, CA, on the occasion of its 20th anniversary. The school was founded by members of the Armenian community of the San Gabriel Valley. Descended from immigrants who had been driven from their homeland, these good people wished to preserve their language and culture while preparing their children to pursue the full benefits of American life.

Their dream has been realized, and the Mesrobian Armenian School has grown and served its students well during the past two decades. Starting with 80 students in 1965, the school has expanded to enroll 520 students currently. It graduated its first high school class in 1975, and it has graduated 300 students since then. Many of its graduates have attended college and returned to make significant contributions to their communities.

American education is characterized by no single thing more than its diversity. From the one-room schoolhouse of the 19th century rural community to the huge public university of today; from the inner-city public school coping with the problems of social and economic hardship to the parochial school seeking to teach religious values as well as secular knowledge—in a multitude of forms, American schools have sought to train our children to be the workers and citizens and leaders of each successive generation. The Mesrobian Armenian School occupies a proud place in this diverse universe of American schools. Its administration and teachers have helped preserve the Armenian heritage and enrich the lives of their students. I wish the staff and students of the Mesrobian Armenian School continued success as it enters its third decade.

CONGRESSMAN GEORGE MILLER SALUTES CONTRA COSTA PIC

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. MILLER of California. Mr. Speaker, I am very proud to call the attention of the House to the commendation recently awarded to the Private Industry Council [PIC] of Contra Costa County.

Contra Costa's PIC received one of 14 distinguished performance awards from the National Alliance of Business for the Special Education Local Planning Agencies' "On-the-Job Training [OJT] Project" for handicapped youth. This unique project brings members of the local business community into our high schools to work closely with special education teachers in order to help students develop skills and contacts to enable them to move into private sector, unsubsidized employment.

Working together in this project are employers, as well as educators, business leaders, union representatives, agencies which serve the disabled and employment specialists. In particular, I want to commend the three special education local planning districts [SELPA's] and the county's school districts with secondary schools, all of which participated in this outstanding program.

The young people who participate are 16-21 year old high school students in special education programs. About one-third of the participants have severe learning disabilities, while others have orthopedic, visual, hearing, or other impairments.

As one in this House who has had a very close involvement in special education and rehabilitation laws, I appreciate how significant an effort it is to promote economic self-sufficiency for the disabled. Between 50 and 80 percent of disabled adults are unemployed—many because they have been denied adequate education, training, and employment opportunities. Many of those who hold jobs work at substandard wages and often under unpleasant conditions.

The success of the OJT program speaks for itself. Of 82 students in Contra Costa who participated, 59 were hired at the end of the OJP period, working in the food service, clerical, and retail businesses. The program cost per job placement was less than $3,000. I am delighted that the OJT project is once again being funded this year.

I want to salute Art Miner, the executive director of Contra Costa's PIC, and William Sharkey, who chairs the county effort. I also want to congratulate the 80 employers and other supporters who made this program work by underwriting its creation and by hiring its participants.

And I also want to congratulate the young men and women who are the main beneficiaries of this outstanding program. Their persistence and desire to live life fully and independently is an inspiration to all of us who have recognized the great, untapped potential in so many of our fellow Americans.

The success of the OJT Program is further evidence of the cost-effectiveness of investing in young Americans and helping them develop the skills and training they need to be productive citizens.

OPPOSITION TO THE PROPOSED ARMS SALE TO JORDAN

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. GEJDENSON. Mr. Speaker, I rise today to express my opposition to the proposed arms sale to Jordan. While on the face of it, it may seem perfectly logical for the United States to be selling arms to Jordan, a close examination of the true facts reveal a different story.

The Middle East is still in a state of war and this proposed sale threatens Israel's very security. The fact is that Jordan has attacked Israel three times in the past, in 1948, in 1967 and in 1972. Jordan also allowed a unit of the PLO to fight in Lebanon against Israel as recently as 1982. This arms sale can only erode Israel's already precarious position.

To allow this arms sale is to allow a renewed arms race in the Middle East. Israel's security is almost totally dependent on air superiority, since numerically Israel's ground force is no match for Arab forces. To increase Jordan's air weapons will mean that Israel will also have to increase her air weapons. And if Israel has to increase its defense spending, then the United States will be forced to increase its assistance to Israel.

If there is to be an arms sale, it must wait until the first step toward a peace initiative has been achieved. We must not be rewarding Jordan before they have even agreed to sit down at the peace table. In 1978 Congress approved the sale of F-16's to Egypt and Saudi Arabia, but only because there were ongoing peace talks at the time. To reward Jordan without any definite progress on peace is to set a very dangerous precedent.

In actuality, this arms sale is not truly needed. From 1981 to 1983, Jordan imported over $3 billion in arms and spent over $1.1 billion in 1983 alone. This made them the seventh largest arms importer in the world. In contrast, Israel spend only $370 million on arms in 1983 and ranked 26th in arms imports.

And since we can't even begin delivery on these weapons unitl 1988 or 1989, this sale will not be of any immediate help to Jordan in defending its borders from hostile nations. There are other, technical means, whereby we can send clear and solid messages to Syria and other nations that to attack Jordan would lead to serious consequences, without actually supplying Jordan with advanced arms.

Mr. Speaker, there are more effective ways of securing Jordan and showing our support for that nation than through this arms sale. To arm Jordan in this manner is to invite further instability into an already highly volatile region. We are not doing anyone any favors by approving this sale.

HONORING ROY McDONALD

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mrs. LLOYD. Mr. Speaker, on October 14, 1985, Roy McDonald of Chattanooga, TN was awarded the coveted Dorothy Patten "Love of Chattanooga" award.

Roy McDonald is a true American great. If the term "rugged individualist" had not already been phrased, it would have when Mr. McDonald came along. He epitomizes the admirable concepts of personal faith in Jesus Christ, love of country, hard work, meeting challenges head-on, achievement, and then using his accomplishments to help other people.

Roy McDonald was born in the little town of Graysville in the northern end of Hamilton County on November 25, 1901. He remembers the time when it was an overnight trip by wagon with this father to get to Chattanooga. He grew up in Chattanooga, helping his father in a family grocery store and carrying a newspaper route. Both of these activities were to play a large part in his life.

From a 70-store grocery chain, which he developed, sprang a newspaper originally called the Chattanooga Free Press. The paper became a daily in August of 1936. Roy McDonald is the founder and publisher of today's Chattanooga News-Free Press, the community's largest newspaper.

The attributes that made Roy McDonald successful in business were also beneficial in his service to this fellow man. Active in many civic causes, his love for Chattanooga has been evidenced for more than eight decades. For example, he has headed the Chamber of Commerce, led the Community Chest Drive and was chairman of the board of Erlanger Hospital for more than 20 years. Roy McDonald is credited with bringing prepaid medical insurance to the community through Blue Cross-Blue Shield of Tennessee.

A man who has little interest in material things, he is happiest when facing a challenge and when serving quietly and humbly. Always an optimist, always eager to forge ahead to bigger and better things, he has been outstanding among the leaders and the servants of the Chattanooga community and its people.

This award is presented only to those people who have distinguished themselves in long-time community service and professional activities and by contributing to the enrichment and development of the community apart from the person's business or professional life. I applaud the choice of Roy McDonald as this year's recipient.

A TRIBUTE TO DR. AARON CAPLAN

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. KOLTER. Mr. Speaker, today I rise to salute a constituent of the Fourth District of Pennsylvania, Dr. Aaron Caplan.

Dr. Caplan is being honored by American Legion Post 157 for his exemplary work as a physician for 50 years and for the his valor as a combat doctor in World War II. Mr. Speaker, I would like to share some information about Dr. Caplan with our colleagues.

Dr. Caplan graduated from Lincoln High School in 1926. He went on to attend Geneva College in Beaver Falls in 1928 and 1929, concluding his undergraduate work at the University of Pennsylvania in 1930. In pursuit of his lifelong dream to be a physician, Aaron Caplan traveled to Scotland where he studied medicine at the University of Glasgow Medical School. After graduating with his degree in medicine in 1935, Dr. Caplan returned to Pennsylvania. He interned at Passavant Hospital in Pittsburgh for 1 year after which he returned home to Ellwood City to open his private practice. The doctor's office on the second floor at 523 Lawrence Avenue, which was opened in 1936 has proudly remained the workplace for Dr. Caplan for the past 50 years. Only once was the practice of medicine interrupted at this location. From April 1941 to December 1945 Dr. Caplan left the community and his practice to serve his country in the Army Medical Corps. A major in the 29th Division Artillery, Dr. Caplan served in Normandy, France and was involved in D-Day. His efforts earned him the Bronze Star with oak leaf cluster for meritorious achievements.

Dr. Caplan's dedication to this community extends beyond his vocation. In 1967 he was honored by the Jaycees for the Senior Citizens Distinguished Service Award. That same year he held the position of chairman of the Ellwood City borough's diamond jubilee. He was active in the establishment of a blood bank program for the city, was president of the chamber of commerce in 1965 and was the president of the Ellwood City Hospital medical staff. He is a charter member of the Ellwood City Lions Club. The list of Dr. Caplan's civic accomplishments and organization memberships is virtually endless. Suffice it to say that Dr. Caplan is a man of action who has played an integral part in making Ellwood City a safer, healthier place to live over the course of the past 50 years.

In spite of bouts with illness over the past 5 years, Dr. Caplan has continued to service the community diligently, decreasing his workload by a mere hour each day. This man of strength has no immediate plans for retirement since his concern for his patients overrides his desire for relaxation.

Mr. Speaker, I ask that you join American Legion Post 157, his wife Anne, and their three children, Harvey, Barbara Azizio, and Rebekah in honoring Dr. Aaron Caplan.

CONGRESSIONAL CALL TO CONSCIENCE

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. BOSCO. Mr. Speaker, I rise today to add my voice to those of my colleagues who are protesting the continued persecution and mistreatment of Soviet Jews. As a participant in the Congressional Call to Conscience, I would like to bring to my colleagues attention the plight of a young refusnik that I have adopted.

Pavel Astrakhan was born in 1955 and first applied to emigrate in 1978. He was refused permission to do so on the grounds that he "choose to emigrate without his elderly parents, thus breaking up a family." Although Pavel is an English teacher/translator by profession, he is unable to find work. Thus, he devotes a great deal of his time to studying the Torah and helping other Jews process their applications for emigration. Pavel is also involved in religious seminars which take place unofficially and are attended by refusniks and nonrefusniks. As many as 100 people have attended these seminars at one time; however, a tourist has reported that attendance has begun to drop off because of KGB raids on the homes where seminars are held. Pavel lives in Leningrad with his wife Sonya and their two-year-old daughter Ruth. In 1984, the family received an invitation and began the long procedure of resubmitting their emigration papers once

again. Unfortunately, on July 12, of this year, Pavel received notice that they had once again been refused the right to emigrate.

Mr. Speaker, every day 2 to 3 million Jews residing in the Soviet Union are denied the basic freedom of religious expression and experience routine discrimination in education, social life, and employment. Physical abuse, unlawful property searches, and arrests on trumped up charges are not uncommon. Anti-Semitism is officially endorsed and propagated. While the practice of the Jewish religion and culture is prohibited, Jews are also denied the right to emigrate. Pavel Astrakhan and his family are just one example of the plight of thousands of Soviet Jews striving to free themselves from religious persecution.

It is my hope that when President Reagan meets with the Soviet Secretary General Gorbachev in Geneva this month, that the issue of human rights, especially for Soviet Jews, will be among the top items to be discussed. We in the Congress and the American people must insist that immediate action be taken to ensure that the Soviet Government comply with the Helsinki accords. We must continue to focus attention on the issue of Soviet Jewry so that one day soon individuals like Pavel Astrakhan may be granted the right to worship free from the threat of reprisal.

BRUIN/TROJAN SUPERSTAR CLASSIC 10TH ANNIVERSARY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. DORNAN of California. Mr. Speaker, I rise today to pay tribute to a group of athletes in southern California who will soon resume an old rivalry for a worthy cause when they play softball against one another in the Bruin and Trojan Superstar Classic.

The Bruin and Trojan Superstar Classic was conceived some 10 years ago by a group of community leaders seeking a way to unite traditional rivals UCLA and USC in an event that would benefit the pediatric programs serving special children at both schools. The special children are the handicapped and chronically or terminally ill children.

Little did this group of leading business and civil volunteers know that their dream would turn into an annual event that will soon celebrate its 10th anniversary. I understand that plans are already being finalized for the Big 10th, which will be held on May 31, 1986, at UCLA's Jackie Robinson Stadium. It should be a marvelous day for the players, the fans, and most importantly the special children.

This effort is in large part made possible by the commitment of an enthusiastic and energetic committee under the direction of Superstar Classic President Bob Goetz and Vice President Marc Franz. Mr. Goetz and the dedicated executive committee and board of directors given countless hours of their time in organizing this event. And although they don't receive the attention the players do, without their enthusiasm and plain hard work the game would not be possible.

The players too are to be highly commended. As I look down the list of prior participants, I see the names of some of the finest football players ever to come to come out of these two schools, such as: Marcus Allen, Pat Haden, and O.J. Simpson of USC; and Mark Harmon, Freeman McNeil, and Wendall Tyler of UCLA.

Mr. Speaker, I ask that the player roster of the Bruin/Trojan Superstar Classic be admitted in the RECORD as we may pay tribute to these outstanding athletes.

If nothing else, the Bruin and Trojan Superstar Classic clearly illustrates that when we give of ourselves for a worthy cause, we are all winners. I would therefore urge my colleagues and the citizens of our great country, especially those in southern California, to join with the other Superstar Classic supporters, President Ronald Reagan, Los Angeles Mayor Tom Bradley, and head coaches from the two schools, Dr. Jerry Buss, and leading California corporate sponsors, in supporting this tremendous initiative and to help make the Big 10th the best year yet.

Let's do it for the children.

BRUIN AND TROJAN SUPERSTAR CLASSIC PLAYER LIST

UCLA

Larry Agajanian, Kermit Alexander, Kurt Altenberg, Norm Anderson, Foster Anderson, David Baran, Terry DeBay, Peter Boermeister, Steve Bono, Jim Brown.

Theodis Brown, Paul Cameron, Randy Cross, Dave Dalby, Peter Dalis, Jeff Dankworth, Ron Debose, Terry Donahue, Charles Doud, Dennis Dummit.

Ken Easley, Keith Eck, Oscar Edwards, George Farmer, Tom Fears, Robert Ferrier, Cliff Frazier, Bob Geddes, Mark Harmon, Ron Hull.

Jerry Jaso, Kermit Johnson, Ed Kezirian, Vic Lepisto, Don Manning, Frank Manumaleuna, Michael Martinez, James McAlister, Patrick Marty, Freeman McNeil.

Rev. Donn D. Moomaw, Max Montoya, Dennis Murphy, Byron Nelson, Tim Oesterling, James Owens, Bob Pifferini, Rick Purdy, Severn Reece, John Richardson.

Nelson Rising, Jerry Robinson, Jim Salsbury, John Sciarra, Rob Scribner, Bob Smith, Frank Stephens, Bob Stiles, John Tautolo, Terry Tautolo.

Greg Taylor, Wendell Tyler, Rick Walker, Tim Wrightman.

USC

Marcus Allen, Chuck Arrobio, Bill Bain, Art Battle, George Bozanic, Willie Brown, Brad Budde, Raymond Butler, Mario Celotto, Jay Chaplain.

Bob Chandler, Leon Clarke, Marvin Cobb, Al Cowlings, Sam Cunningham, Mario Da RE, Anthony Davis, Clarence Davis, Sam Dickerson, Dave Farmer.

Craig Fertig, Jeff Fisher, Chris Foote, Mike Garrett, Frank Hall, Pat Haden, Rob Hertel, Hudson Houck, Fred Hill, Marv Goux.

Dennis Johnson, Rex Johnston, Bob Klein, Myron Lapka, Tony Linehan, Ronnie Lott, Rod Martin, Earl McCullouch, Mike McGee, Marlin McKeever.

Rod McNeill, Bruce Matthews, Clay Matthews, Ron Mix, Manfred Moore, Pat Morris, Don Mosebar, Anthony Munoz, Richard Perry, Bob Peviani.

Danny Reece, Steve Riley, C.R. Roberts, Rod Sherman, O.J. Simpson, Dennis Smith, Lynn Swann, Calvin Sweeney, Mosi Tatupu.

Dennis Thurman, Ted Tollner, Charles White, Ron Yary, Charlie Young.

PERSONAL EXPLANATION

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. BARNES. Mr. Speaker, I was unable to be present for two votes on Friday, November 1, and would like to use this opportunity to indicate my position on them.

On rollcall No. 389, passage of H.R. 3669, to prevent disinvestment of the Social Security Trust Fund, I would have voted "yea."

On rollcall No. 390, adjournment of the House, I would have voted "yea."

TRADITIONAL PRINCIPLES IMPORTANT TO ETHNIC AMERICANS

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. LIPINSKI. Mr. Speaker, I rise this afternoon to bring to the attention of my colleagues, a speech which I gave before the Polish American Congress in Chicago on October 12, 1985. While I was speaking from the perspective of co-chairman of the Council on Ethnic Americans of the Democratic National Committee, I believe that the observations which I made are important enough to be brought to this body, regardless of political affiliation. America was founded on great traditional principles and I believe it is appropriate that we reexamine these principles; especially as we get close to our national day of Thanksgiving.

SPEECH BEFORE POLISH AMERICAN CONGRESS

It is indeed an honor and a privilege to be here this evening to address the Polish American Congress. Your efforts on behalf of the Polish community are truly noteworthy and I commend each and everyone of you.

America's strength as a world leader can easily be attributed to her diverse and talented people. From her birth, America—this land of opportunity has been a haven, a promise and a dream. Men and women have come to our shores to escape poverty and repression. They have come to seek work, to seek liberty, to seek justice and equality, and to build a future of hope for themselves and their families.

For all of our ancestors who came from every nation on earth, the American dream is as much theirs as it is ours. It is as much yours as it is mine.

You, who are members of the Polish American Conference, have a rich and vibrant heritage whose values and accomplishments have contributed significantly to the development of this country.

By any measurements, you can congratulate yourselves on the many successes you have achieved to date. However, the question I wish to specifically address this evening is how Ethnic Americans can enhance their voice in the American political process.

As you may be aware of, I was recently appointed co-chairman of a National Democratic Advisory Committee on Ethnic Americans.

Before I go any further, let me define what I mean by Ethnic Americans. I mean the middle class, blue collar, white collar workers and small business people of the following ethnic backgrounds: Lithuanian, Italian, Polish, Irish, German, Croation, Ukrainian, Armenian, Bohemian, and other Eastern and Southern European descents.

There is no question in my mind, and the facts bear it out, that since the mid-1960's, Ethnic Americans have been drifting away from the Democratic Party and the political process in presidential, gubernatorial and senatorial elections.

Undoubtedly, Ethnic Americans can play a significant role in upcoming elections, however, this will only be accomplished if both major parties become more cognizant of various ethnic concerns.

Last year the Democratic party's council on Ethnic Americans held hearings across the country in cities with large ethnic populations. As a result of their testimony, the council proposed an Ethnic American plank in the Democratic Party platform calling for an end to discrimination and ethnic stereotyping. As you know, this plank was approved at the convention in San Francisco and is now incorporated into Democratic Party policy.

But this is certainly only the beginning. The task of the Democratic Party is not yet complete although the party is going through a period of reassessment, we cannot turn our backs on the principles which have been our traditional strength. We cannot abandon the small, but highly Democratic groups because to do so would be to abandon the values that make us Democrats. To do so would be tantamount to abandoning our souls. But we must expand our horizons and broaden our appeal.

To retain its vitality, the Democratic Party must continue to work with all ethnic groups while maintaining as its underpinning, those principles which give our party strength—the hopes and aspirations that we know as the American dream.

How can we encourage and persuade Ethnic Americans to strengthen their collective voice in the political process? There are a number of ways to achieve this objective. The first step obviously will be for American political leaders to address issues of special concern to Ethnic Americans.

Some of these issues which continue to inflame the hearts of ethnic voters include national defense, abortion, student loans, school prayer, reverse discrimination and tuition tax credits.

Ethnic Americans are proud to be Americans but feel that they no longer have control over their lives and principles of thrift, hard work, and self-reliance are no longer respected. More importantly, Ethnic Americans honestly believe that the cherished values and traditions, which have been the backbone and foundation of this country, have been forgotten.

Ethnics were told that if they worked hard, studied hard, and abided by the law, they would be rewarded. Now, our courts exercise an unfair amount of control over promotions, hiring, housing, health and education. Ethnics are upset by the apparent substitution of race and gender for what they were taught was merit. Ethnic Americans feel a sense of bitterness when they are denied job opportunities or promotions because of government enforced affirmative action programs.

In addition, we, in the Democratic Party, must realize that Ethnic Americans have only been on the fringe of benefits promoted by our party over the years and, therefore, justifiably feel discriminated against as do other minorities, though without any compensatory consideration.

I am pleased to announce, however, that just this past week the House of Representatives approved legislation which, among other things, calls for a study of whether the Federal government's hiring and promotion practices are consistent with the applicable provisions of law prohibiting discrimination on the basis of sex, race, or national origin. An amendment to this legislation which I introduced and which is now incorporated in the bill re-defined the term "National Origin", to include individuals of all ethnic backgrounds that have historically suffered discrimination such as those with Italian, Polish, German, Irish, Lithuanian, Ukranian, Yugoslavian, Czechoslovakian or other ethnic backgrounds.

What is noteworthy here is that we finally have an official recognition and concern for persons of different ethnic backgrounds. Ethnic Americans represent the main stream of our great country and for too long they have been taken for granted. Their interest's have been badly neglected expecially at the Federal level.

Individuals of different ethnic backgrounds must no longer be overlooked. This effort on behalf of Ethnic Americans was only the beginning of a movement to ensure further recognition of their concerns.

Additionally, I would urge each and everyone of you to become more active in the DNC's council on Ethnic Americans. This National Forum has already had a significant impact on the Democrat's Party platform and policies and has also inspired the Republican Party to become more in tune with ethnic concerns.

These, like all aspects of American society, are parts of a process. I will continue to listen to your concerns and facilitate your participation in the process.

We, in the Democratic Party, must continue to develop cohesive programs that will remove the political isolation that many Ethnic Americans feel today, and again instill within us all a sense of security, dignity and pride.

Let us together continue to nurture and build that American dream.

Thank you.

POLITICS GETTING IN THE WAY OF POLICY

HON. CLARENCE E. MILLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. MILLER of Ohio. Mr. Speaker, the political drum beating is getting louder as the debate builds over the unresolved budget reduction provisions attached to the debt limitation legislation.

The majority Members of the House of Representatives, thinking they have happened on to a major political issue of benefit to their party, are unloading their criticism on the administration for permitting the disinvestment of the major federally administered retirement trust funds. They have gone so far as to schedule a hearing to call public attention to the administration's actions in this regard, the end product of which will be the sounding of an unwarranted alarm to our Nation's senior citizens that their future benefits are needlessly being jeopardized by an administration more concerned with its own financial priorities than with our Nation's retirees.

Supporters of reduced Federal spending and of the need for establishing a legislative vehicle that would mandate a balanced budget in the years ahead, feel that many Members of the majority party in the House are purposely distorting the debt ceiling/disinvestment issue and are sitting on their hands letting the situation unnecessarily worsen so that they in turn can accomplish the own political ends.

If this were a case in court, the evidence of their shenanigans would be there for all in the jury to see, but unfortunately this is a case that will be tried in the media and in our Nation's election precincts. It will be aired in the context of political partisanship rather than in the context of a policy debate as it should be.

One only has to look at the recent developments in Congress to see who the heavies are. On Friday the House passed a temporary extension of the debt ceiling, an action which I supported and one which would have precluded any need to go forward with the disinvestment of federally administered retirement trust funds. However, it then voted to adjourn before the Senate could take commensurate action.

So much for getting the bill to the White House in time to eliminate the need for going forward with disinvestment. One can't help but conclude that the majority party in the House of Representatives is more interested in pursuing its political objectives than the policy objective of a more balanced Federal budget, a position that is shared by the vast majority of Americans these Members have been elected to represent.

THE RETIREMENT OF MAJ. GEN. JAMES W. TAYLOR

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. MATSUI. Mr. Speaker, I rise today to bring to the attention of the House of Representatives the retirement of Maj. Gen. James W. Taylor. The general, whose activism and meritorious achievements span both the civilian and military areas, was honored on November 2, 1985, as part of the Individual Mobilization Augmentee

Conference for Northern California Air Force Reservists. The tribute took place at McClellan Air Force Base in Sacramento.

General Taylor is mobilization assistant to the commander, Air Force Logistics Command at Wright Patterson Air Force Base in Ohio. His many military decorations and awards include the Air Force Commendation Medal, American Defense Service Medal, Air Force Longevity Service Award Ribbon, Armed Forces Reserve Medal with hourglass device and Small Arms Expert Marksmanship Ribbon. In 1974, General Taylor was selected as Reservist of the Year.

In his civilian capacity, General Taylor is president of three organizations: Potter, Taylor & Co., Inc., a real estate and development firm; Potter Investment Co.; and McMicking-Potter Development Corp. He is also on the advisory board of the River City Bank.

The general's civic affiliations have included past president and vice president for metropolitan development, Sacramento Metropolitan Chamber of Commerce; president of Chapter 51, Reserve Officers Association; vice president of Chapter 116, Air Force Association; member of the board of directors and chairman of the Industrial Commercial Division, Sacramento Board of Realtors; member of the board of directors, Sacramento Area Commerce and Trade Organization; advisory board, Volunteers of America; advisory board, Tuberculosis and Health Association; Sacramento Rotary Club; Sutter Club; board of directors, Comstock Club and Society of Logistics Engineers.

Mr Speaker, on behalf of the people of Sacramento and McClellan Air Force Base; I want to commend General Taylor on his illustrious career spanning over three decades and thank him for his dedication and outstanding service to the people of the United States of America.

THE REPRESSION OF JEWS IN THE SOVIET UNION

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. DAUB. Mr. Speaker, for the Soviet Jew, 1984 lived up to George Orwell's grisly prediction of state repression. In all of that year, only 896 Soviet Jews were permitted to leave the Soviet Union. This is 896 out of the more than 350,000 who requested permission to leave.

The fact that 350,000 out of a total population of the 3 million Jews in that country willingly faced the increased persecution leveled at all who ask to leave, demonstrates the grave circumstances under which these people live.

The entire cultural life of the Jewish community is imperiled. Slanderous, persistent, anti-Semitic rhetoric oozes daily out of what the Soviet Union calls a press. This vindictive infects the air inciting systematic persecution. Even the teaching of Hebrew now brings 7 years of hard labor in a Soviet gulag.

Of course the Jewish population is not alone in activism for greater personal and cultural freedoms. Minimal, even token, expressions of freedom by the rest of the Soviet concerned citizenry is ruthlessly suppressed. The "treatment" for such activities is liberal doses of gulag and psychiatric hospitals.

The Soviet Union signed the Final Act of the 1975 Conference on Security and Cooperation in Europe, known as the Helsinki accords. That document guarantees basic freedoms including the right to practice religion and even emigrate. The Soviet Union, particularly in the case of Soviet Jews, has systematically violated both the letter and spirit of this agreement.

It has been said that the Helsinki accords, if observed by the signators, would be the greatest peace agreement of all time. Andrei Sakharov, the only Russian to be awarded the Nobel Peace Prize, warned that his government's failure to observe human rights is directly related to Soviet conduct in its external affairs.

Without compliance to the provisions of the Helsinki accords, voices of moderation in both internal and external affairs are silenced. These voices can have an impact on the Soviet Government. Witness the successful pressure Sakharov brought to bear on Khruschev to accept President Kennedy's Nuclear Test Ban Treaty.

We have a right, and indeed an obligation, to insist on Soviet compliance with the provisions of this document. Since being elected to Congress, I along with a number of my colleagues in Congress have continuously written Soviet officials about the plight of Soviet Jews, especially refuseniks. We urge compliance with this agreement. This pressure will continue.

We in the West have a moral obligation to work for easing Soviet repression of Jews and other minorities in that country. This obligation springs from a humanitarian commitment rooted in our cultural and political heritage. This commitment finds its expression in a desire to relieve suffering and see the human spirit flourish rather than languish.

It must also be remembered that we have a direct interest in seeing the lot of the Soviet Jew improve. Soviet actions against its own citizens are an indication of what to expect of its behavior in the international arena. The more responsible the Soviets become at home, the more responsible they will be abroad. This is the lesson from Sakharov and what is meant by the statement that the Helsinki accords could be the greatest peace document of all time.

It is for all these reasons that I have written to the President urging that he raise the issue of Jewish emigration with Soviet leader Mikhail Gorbachev in their meeting later this month. The United States has a unique opportunity to help end Soviet repression of a minority which has sadly continued for hundreds of years.

IN HONOR OF JUDGE GIBBENS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. DORNAN of California. Mr. Speaker, I was extremely saddened to learn recently of the death of Santa Monica Municipal Court Judge W. Blair Gibbens.

Judge Gibbens was a truly great man whose life touched literally thousands of people. He was a driving force in developing many of the charitable and legal organizations still in existence in Santa Monica. Moreover, he encouraged many of his legal clients to bequest literally hundreds of thousands of dollars to the Crippled Children's Hospital of Los Angeles.

But the judge is probably best remembered as the "Traffic Judge," a nickname he earned for meting out unusual punishments for routine traffic violations. During his tenure as judge, from 1961 to 1970, newspapers throughout America, indeed the world, headlined stories on his imaginative and effective penalties.

For instance, the judge would sentence motorists cited for running stop signs to stand guard at crosswalks for children and ordering offenders to display "Traffic Violator, Santa Monica Municipal Court" bumper stickers on their cars. He even had a flower draped coffin wheeled into his courtroom, which he tapped while meting out sentences. In short, he was a good man who used his position to advance many worthy values.

The judge is survived by two daughters and seven grandchildren, some of whom I am well acquainted. And after recently becoming a grandfather for the fourth time, I can tell you with certainty that the judge died a wealthy man.

In my view, the best one can hope to accomplish in life is to make a difference. The very Honorable Judge W. Blair Gibbens made a big difference in the lives of countless people, and for that we owe him our eternal gratitude and for that we pay him tribute here today.

THE EMMANUEL CANCER FOUNDATION

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. COURTER. Mr. Speaker, I rise to commend the Emmanuel Cancer Foundation for Children and Their Families, and its founders, Joseph and Susan Vizzoni. In 1981, the Vizzonis of Summit, NJ, lost their only son, 7-year-old Emmanuel, to cancer. It is in his memory that they started the foundation whose aims are to increase the quality and availability of pediatric cancer and counseling services in New Jersey.

The costs of cancer to our society are staggering. The social and economic impli-

cations of cancer for the victims and for society as a whole are pain, suffering, disability; millions of years of life lost; and tremendous amounts of human and economic resources devoted to detection, prevention, and treatment.

The social costs—personal catastrophies that cancer brings to individual victims and their families—will never be fully measured. Yet the economic costs of cancer have to some extent been assessed, and the numbers are significant.

For example, the National Center for Health Statistics did a study in 1980 which showed that the comprehensive medical costs for Americans with cancer were $10.8 billion. When one considers the 20-percent annual inflation rate for medical care, it is quite likely that this $10.8 billion figure has almost doubled in the 5 years since that study was completed. Of course, more difficult to measure are the billions of dollars of economic output forgone each year due to lost human resources.

It seems clear to me that the only way to combat this disease which causes so much waste, pain, and grief is through the dedication and simple desire to be of service that is present in the Vizzonis and all who are involved in the Emmanuel Cancer Foundation.

Somehow, Joseph and Susan have managed to turn the tradegy of their son's death into a triumph for other children with cancer. Today, 57 percent of those children can be cured. With the help of the Emmanuel Foundation in New Jersey, and similar organizations across the country, I am confident that cure rate will 1 day be 100 percent.

SATELLITE DISH OWNERS NEED FAIR DEAL

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 5, 1985

Mr. SCHUETTE. Mr. Speaker, on October 29, 1985, Congressman TIM WIRTH, chairman of the Energy and Commerce Subcommittee on Telecommunications, Consumer Protection and Finance, announced that in January hearings on scrambled satellite programs will be held. I am pleased that we will finally address this situation.

I became a cosponsor of both satellite bills currently under consideration in the House because the satellite dish owners in my rural district should have equal access to educational, informational, and entertainment programming. H.R. 1769 and H.R. 1840 would encourage a marketplace resolution to a nationwide crisis that faces all of rural America. With the advent of home satellite Earth stations, a variety of television programming can now be delivered directly into our homes. It is America's rural areas that benefit from this technological development. Without satellite Earth stations, millions of rural Americans, including many from the 10th District of Michigan would be excluded from television programming.

Recently, television program distributors nationwide have announced plans to scramble televisions signals. Some indicate that satellite dish owners will be cutoff from services; some indicate that only they will offer antiscrambling devices. This monopolistic approach will hurt the rural satellite dish owners in mid-Michigan; scrambling cuts off the only access my folks in the district have to television programs. The issue at hand is not payment but fairness. I have talked with many dish owners in the 10th District and they have categorically stated that they do not want a free ride and they are willing to pay, but they don't want to be taken to the cleaners for these services. The two bills in Congress will clarify Federal policies regarding the right to view scrambled satellite programs at reasonable prices, terms, and conditions. Other provisions would be directed to prevent monopolistic control of a satellite viewers' access to programming.

I am committed to fairness in the marketplace. H.R. 1769 and H.R. 1840 will ensure the continued availability of television programming at fair and reasonable prices. Rural viewers cannot be excluded from these services. It is for these reasons that I am working for the passage of these bills.

SENATE—*Wednesday, November 6, 1985*

(Legislative day of Monday, November 4, 1985)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Almighty God, judge of all the Earth, we invoke Thy presence, Thy grace, peace and love upon this body today. Lead the Senate to the integrating force that will bring its collective power into focus on the critical issue now before it. Guide to commonality of purpose which will concentrate the power of 100 to decisive action. Protect against disintegration which fragments the Senate's potential into competing powers which collide, ricochet, and neutralize each other. As the objective is beyond debate, grant the will and the wisdom to realistic means for the desired end. We pray this for Thy namesake and for the sake of the future of this Republic. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each.

Mr. President, I will reserve the minority leader's time, and any time that I do not wish I will reserve.

There are special orders by Senators GLENN, PROXMIRE, and GORTON for not to exceed 15 minutes each; routine morning business not to extend beyond the hour of 11 a.m. with Senators permitted to speak therein for not more than 5 minutes each.

Following routine morning business it will be the intention of the majority leader to turn to the Executive Calendar to consider the nominations of Vance L. Clark; Orson G. Swindle III; Alan Lee Keyes; and Robert K. Dawson.

Then, at about 1 o'clock, we will go back to House Joint Resolution 372, the debt limit extension.

There are a couple of amendments which I believe can be disposed of without rollcall votes. There will be a rollcall vote on final passage of the joint resolution.

Following disposition of that—which should be about 2:30—it is my hope that we can turn to the consideration of H.R. 3327, the military construction appropriations bill.

We also hope to dispose of the House message today on H.R. 505, the veterans' health care amendments, and the nomination of Alex Kozinski, hopefully, under a couple of hours' time agreement, if Senator LEVIN is willing to enter into a time agreement.

So I alert my colleagues that it could be a fairly late evening—not real late—but into the evening, and hopefully we can complete action of these items.

Then on tomorrow, we would be on the civil service retirement bill, hopefully, if we do not have some agreement on reconciliation, and start that process again. The farm bill is a matter of great urgency. But I have indicated we would not move on that if the distinguished ranking Democratic Member, Senator ZORINSKY, prefers that we wait until he is back on Monday.

I have yet to hear from his staff. We are making that inquiry.

That, more or less, is the schedule for the balance of the week.

I reserve the balance of my time.

RECOGNITION OF SENATOR GLENN

The PRESIDING OFFICER (Mr. ARMSTRONG). Under the previous order, the Senator from Ohio [Mr. GLENN], is recognized for not to exceed 15 minutes.

Mr. GLENN. Mr. President, the minority leader, Senator BYRD, indicated that I could have his time this morning, and that he did not need that time. I do not believe I need all of it. But he indicated I could have it if I needed it.

The PRESIDING OFFICER. Without objection, the time of the minority leader will be allocated to the Senator from Ohio [Mr. GLENN].

Mr. GLENN. Thank you, Mr. President.

UNITED STATES-CHINA NUCLEAR AGREEMENT

Mr. GLENN. Mr. President, on July 24, 1985, the President submitted the Agreement for Cooperation between the United States and the People's Republic of China [PRC] to Congress for review. Under the Nuclear Non-Proliferation Act of 1978 [NNPA], as amended, the Congress has 90 days of continuous session to consider the agreement, but if no joint resolution of disapproval is enacted during that period, the agreement goes into effect.

This agreement, the first such with a nuclear weapons state since passage of the NNPA, has been spurred by the prospect of potential gains in our balance of payments if the United States is successful in the competition for China's nuclear business. It is unique in its language which, among other things, does not provide for safeguards—I repeat, does not provide for safeguards—to verify peaceful uses of exported items, and appears to compromise the exercise of statutorily required U.S. consent rights over production of weapons-usable materials by the Chinese from U.S.-origin spent fuel.

I am concerned that the above deficiencies, coupled with certain other ambiguities of language, unless rectified, may foster differing interpretations of the agreement with potentially serious consequences not only for future Sino/American relations, but also for future U.S. effectiveness in the international arena on nonproliferation matters.

Now, Mr. President, before going into the details of the agreement, I would like to say a word about the requirements for new agreements in section 123a of the Nuclear Nonproliferation Act of 1978 [NNPA], an act that I was proud to coauthor. Section 123a was never meant to be an absolute ceiling on the requirements for nuclear cooperation with another country. These were viewed as statutory requirements which might be expanded at the prerogative of the executive branch on a case-by-case basis. Indeed, before we signed an agreement with the Egyptians, we insisted that they become signatories to the Nuclear Nonproliferation Treaty [NPT], which is not required by the NNPA, and we inserted provisions on reprocessing that went far beyond the requirements of the NNPA because we did not feel comfortable with the possibility of any separation of plutonium occurring in the Middle East.

In addition, we need to recognize that times have changed since the passage of the NNPA 7 years ago. At that time there was not the sensitivity to vertical proliferation that exists today, and the discriminatory advantages on nuclear trade given to weapon states over nonweapon states was not as resented then as it is today. So the issue

is not just whether the minimal statutory requirements have been met. To sign an agreement with a weapon state without a safeguards provision in such a worldwide political climate is to wave a red flag in the face of all NPT signatories. The fact that this particular red flag is also the flag of revolution does not make it any better.

Now, I believe all of my colleagues are aware of the administration's argument that China represents a special case—not only because it is a nuclear weapon state—but also because we are trying to provide additional incentives for the People's Republic of China to join the community of nations working against proliferation. But I would argue that in fashioning this particular agreement, we have gone to extraordinary and unnecessary lengths to accommodate the People's Republic of China, and in so doing, we risk seriously undermining and not enhancing our nonproliferation interests.

LACK OF SAFEGUARDS

I would like now to review those provisions of the agreement that I find particularly troubling.

First, and perhaps foremost, the agreement is completely opaque on the question of verifying peaceful uses of items exported to the People's Republic of China by the United States.

Article 5(3) of the agreement states that:

Material, facilities or components transferred pursuant to this agreement and material used in or produced through the use of any material, facility or components so transferred shall not be used for any nuclear explosive device, for research specifically on or development of any nuclear explosive device, or for any military purpose.

But verification of this peaceful use requirement is uncertain. Article 8(2) states that:

The parties recognize that this cooperation in the peaceful uses of nuclear energy is between two nuclear-weapon states and that bilateral safeguards are not required.

A little later on, the paragraph goes on to state that:

(T)he parties will use diplomatic channels to establish mutually acceptable arrangements for exchanges of information and visits to material, facilities and components subject to this agreement.

So the only verification the United States will have of peaceful uses will be through these "visits." There is no standard provided to enlighten anyone as to what would constitute adequate verification, and you may be sure that the People's Republic of China will use the competitive posture of the French and others to pressure our negotiators into not demanding much.

What this means, in essence, is that the Congress is being asked to review favorably an agreement whose full content will be unknown to us until after the agreement goes into effect. I submit that that is a dangerous erosion of congressional prerogatives which were established in the first place because of dissatisfaction with executive branch performance in nonproliferation activities.

If we do not establish appropriate standards of verification, not only do we risk the possibility of substantial crossovers of U.S. exported items from civilian to military activities, but we exacerbate seriously the already strained relationship on nuclear trade matters that exists between nuclear weapon states and nonweapon states. The discrimination built into the international nonproliferation regime, and particularly the NPT, has become a running sore that could ultimately threaten the treaty. The Third NPT Review Conference that recently ended in Geneva is being viewed as a triumph because none threatened to withdraw. But what message do we send to the 125 non-weapon-state signatories to the treaty who are committed to put all their nuclear activities under safeguards, when we sign an agreement on nuclear trade that calls for no safeguards whatsoever on the grounds that the parties are weapon states?

After the NPT went into effect in 1970, it gradually became apparent to the weapon states that their positions were morally and politically indefensible. The gap in safeguards requirements was a factor inducing reluctance on the part of some important industrialized states to sign the NPT. As a result, the United States made a voluntary offer to allow IAEA safeguards on our peaceful nuclear facilities. Such safeguards, including the inspections that are a part of them, are in place now at selected U.S. facilities. Similarly, because of their membership in Euratom and the IAEA/Euratom Agreement, the peaceful nuclear activities of Great Britain and France are subject to safeguards. Even the Soviet Union, as closed a society as exists on Earth, has made a voluntary offer to allow IAEA safeguards on selected facilities inside her territory.

So then, why does the United States/China agreement not call for safeguards? We are told, in the statutorily required Nuclear Proliferation Assessment Statement [NPAS] accompanying the agreement, and prepared by ACDA, that:

(T)he United States did seek Chinese acceptance of IAEA safeguards on U.S. supply under the agreement, but the Chinese adamantly refused.

They refused, and we caved. The Japanese did not cave—their nuclear agreement with the Chinese calls for safeguards; the Argentines did not cave—their nuclear agreement with the People's Republic of China calls for safeguards: the Brazilians did not cave—their nuclear agreement with the People's Republic of China also calls for safeguards. But we caved. The Japanese, the Argentines, the Brazilians get safeguards. We get "visits"—because the Chinese were "adamant."

Mr. President, I do not want to say that our negotiators might not have tried hard enough, but I will point out some revealing information about the People's Republic of China nuclear agreement with Japan. A news article that appeared in the Tokyo Kyodo on July 31, 1985, contained the following passage:

The agreement is the strictest nuclear power pact China has signed to date, requiring China to allow onsite inspection by the International Atomic Energy Agency [IAEA] to ensure that Japanese nuclear technology is used for peaceful purposes only. Japan, as a country which adheres to a strict nonnuclear policy, regards IAEA safeguards as the most important part of the pact. The Chinese were at first reluctant to agree to the inspections, which were finally included in the present agreement, initialed last month in Beijing after a series of six talks that began in September 1983.

So the Japanese did not quit when the Chinese were reluctant to agree to inspections. The Japanese were adamant, and they got what they wanted. But this administration, which prides itself on talking tough to the "Commies," gave in because the "Commies" were adamant.

Can you imagine the President sending up an arms control agreement with the Soviets without any verification provisions because the Soviets were "adamant"?

But that is the equivalent of what we did with the Chinese. No safeguards because they were "adamant."

Well, how adamant are they, really? Here is what Ambassador Kennedy said at a hearing on July 31, 1985, before the House Foreign Affairs Committee, in explaining the provisions of the agreement:

This agreement does not provide for International Atomic Energy Agency safeguards in the PRC * * *. But neither does the agreement foreclose such safeguards, *were China to undertake a voluntary offer with the IAEA as the other nuclear-weapon states have done.* (Emphasis added).

Well, guess what? At the recent IAEA General Conference, the People's Republic of China announced that they, too, would join the other weapons states in making a voluntary offer to allow IAEA safeguards on some of their facilities. This was announced after the signing of the agreements with Japan, Argentina, and Brazil, and therefore suggests they may indeed be prepared to go further than their obligations under those agreements.

Mr. President, of all the arguments that the administration has advanced thus far to defend its failure to put safeguards arrangements into this agreement, the one that irks me the most is contained in the legal memorandum prepared by the executive branch answering claims that the law requires a guaranty of safeguards.

This memorandum says, in part, that we were not under legal obligation to require safeguards, and to back this up, references agreements that we signed 30 years ago that did not contain safeguards. It is just not acceptable to suggest that what might have been acceptable nuclear policy in 1955 is therefore acceptable in 1985. The fact is, there was no IAEA 30 years ago, and this is the first nuclear power agreement we have signed since the IAEA safeguards system became operational in the 1960's that does not contain a safeguards requirement. So the bottomline, Mr. President, is that regardless of the merits of the arguments concerning legal requirements, as a matter of good policy and protection of our national security, I believe the United States should insist that the verification of peaceful uses for any exported items to the People's Republic of China be covered by IAEA safeguards or their equivalent. To do less under these circumstances is to take a 30-year backward leap and to let our nonproliferation policy be dictated by short-term considerations that may cause serious trouble for us later on.

U.S. CONSENT RIGHTS

This brings me to the second area of concern I have regarding this agreement—the exercise of statutorily required U.S. consent rights. The NNPA requires that any new agreement provide the United States with consent rights over various activities, including the further enrichment of U.S.-supplied fuel, the reprocessing of spent fuel of U.S. origin, and the reprocessing of spent-fuel that has passed through a U.S. reactor. That provision was put into the NNPA because nuclear weapons require critical masses of either highly enriched uranium or plutonium in order to explode. Plutonium is formed as uranium fuel fissions, and can be separated out through chemical reprocessing of the spent fuel. Hence, by controlling the further enrichment of any low-enriched fuel we might export, and by controlling reprocessing of any spent fuel, we have effective control over the manufacture of weapons-usable materials, without which no nuclear weapons can be made.

The United States/China Agreement deals with this issue in article 5(2) in language that is so arcane and convoluted it almost defies belief that both sides could agree on its precise interpretation. In essence, article 5(2) says that whenever the People's Republic of China decides it wants to separate plutonium from spent fuel that has emerged from a U.S. reactor.

[T]he parties will promptly hold consultations to agree on a mutually acceptable arrangement. *The Parties undertake the obligation to consider such activities favorably.* (Emphasis added).

Later in the same paragraph, it is explained that during these consultations, the parties:

(W)ill seek agreement within six months on long-term arrangements for such activities,

And that,

If such an arrangement is not agreed upon within that period of time, the parties will promptly consult for the purpose of agreeing on measures which they consider to be consistent with the provisions of the agreement in order to undertake such activities on an interim basis.

Still later, the paragraph states that:

The parties agree that the consultations referred to above will be carried out in a manner to avoid hampering, delay, or undue interference in their respective nuclear programs.

Mr. President, I submit that it would be difficult for any fair-minded person to look at this language and conclude that there was no bias here in favor of Chinese interests on reprocessing or enrichment or any other area involving the exercise of our consent rights. Some people think this language is so biased in that direction that, in essence, we have given up our consent rights. Personally, I do not go that far. But the language does have the potential for creating a serious dispute with the Chinese in the future unless we are certain that the Chinese interpret the language the same way we do. Let me explain this as follows:

In the nuclear proliferation assessment statement [NPAS] of ACDA, on page II-9, the statement appears that:

The Chinese cannot undertake reprocessing, enrichment, or alteration if the United States objects on grounds that such activity "would prejudge the long-term arrangments or adversely affect cooperation."

The quote within the quote is directly from article 5(2).

What is not mentioned in the ACDA analysis is the possibility of the People's Republic of China invoking that part of section 5(2) that I quoted earlier to the effect that there is an obligation on both parties to reach mutual agreement "in a manner to avoid hampering, delay or undue interference in their respective nuclear programs."

The Chinese can also point to a sentence in article 5(2) that I did not quote earlier which says:

Nothing in this article shall be used by either party to inhibit the legitimate development and exploitation of nuclear energy systems for peaceful purposes in accordance with this agreement.

Thus, the question is whether the situation could arise where the United States says "no" to reprocessing, but the Chinese claim we are violating the agreement's requirement that the United States consider such activities favorably; that we not hamper, delay or unduly interfere with their nuclear program; and that we not inhibit their legitimate development of and exloitation of nuclear energy systems for peaceful purposes.

Mr. President, the executive branch has examined such questions in their legal memorandum, and they have laid out a good legal argument claiming the Chinese would not be in their rights to make such claims. The trouble with their analysis is that they do not claim that the Chinese accept this argument. And without such an understanding, we face a possible future situation with the Chinese that is similar in some respects to the situation we have with India over the reprocessing of spent fuel at Tarapur. That dispute has not helped United States-India relations, and there is no reason why we ought to repeat it with the Chinese.

Mr. President, there may be some who think I am exaggerating the possibility of a misinterpretation by the Chinese of the language in article 5(2). For those who think that, let me quote from the British Foreign Office's comparison of the United States-China nuclear agreement with the United Kingdom-China agreement. The quote concerns the United States-China agreement's provision on enrichment and reprocessing.

The United States sought to obtain a prior consent right on this point as it is required to do by the Nuclear Non-Proliferation Act. *The Chinese however refused to concede this* so the wording used in the Agreement (Article 5(2)) is to the effect that neither party has any plans to do either of these things and will consult if it changes its mind. (Italic added.)

This quote raises a simple question. If the Chinese refused to concede that the United States has prior consent rights on enrichment and reprocessing, how can the State Department be so sure that they will not interpret the phrase, "the parties undertake to view such activities favorably," as anything but a promise by the United States to say "yes" to reprocessing? The answer is that the State Department cannot be sure and neither can anyone else without asking the Chinese. That is why the Nuclear Regulatory Commission has expressed its own concerns about this provision. Here is what they said on October 2, 1985 in response to a question posed to them by Senator PROXMIRE in a letter dated August 30, 1985:

Q. Is the Commission fully satisfied that Article 5(2) of the U.S./PRC Nuclear Cooperation Agreement represents a clear and unambiguous statement of U.S. consent rights for the subsequent reprocessing or enrichment by the PRC of U.S. nuclear material transferred pursuant to the agreement?

A. Although we believe the requirements of Section 123 of the Atomic Energy Act are satisfied, the Commission would have preferred that the agreement contains a clear statement of U.S. consent rights for the subsequent reprocessing or enrichment of U.S.-supplied nuclear fuel or fuel used in U.S.-supplied reactors. Such a statement could eliminate the potential for future misunderstandings.

The solution to this is very simple, Mr. President. We simply need to have the Chinese recognize what the State Department says is obvious—that the language of the agreement neither favorably or unfavorably disposes the United States to exercise its consent rights in any particular direction. That is, the language is neutral and the United States will say "yes" or "no" to Chinese requests in accordance with our security and nonproliferation interests at the time.

AGREEMENTS AND INTERNAL U.S. LAW

A third area in the agreement that is troubling to me resides in the last sentence in article 2(1). It states:

The parties recognize, with respect to the observance of this agreement, the principle of international law that provides that a party may not invoke the provisions of its internal law as justification for its failure to perform a treaty.

Mr. President, perhaps this sentence appears in another agreement for cooperation somewhere in the past. If it does, I have not discovered it. It is a curious statement, because the United States has never treated agreements for cooperation as treaties. The Senate does not ratify them, and they generally do not put the United States under obligation to actually engage in any nuclear trade. They are, instead, frameworks within which contracts that do involve obligations can be entered into. An agreement does not substitute for U.S. export laws and regulations. Indeed, such laws and regulations can be changed at will without normally affecting such agreements, and that would appear to be the case in the present agreement as well when we look at the next to last sentence in article 2(1). It states:

Each party shall implement this agreement in accordance with its respective applicable treaties, national laws, regulations and license requirements concerning the use of nuclear energy for peaceful purposes.

This would appear to say we can change our laws and regulations as we wish and Chinese export requests will be subject to them. But the last sentence of article 2(1) seems to suggest that changing our domestic export laws might put us in violation of the agreement—although the word "treaty" is used.

Again, I understand the the executive branch does not believe the language can be read that way in a legal sense, but, again, we have no assurance that the Chinese also see it that way.

Here, again, is what the NRC had to say about this provision in its reply to Senator PROXMIRE's letter of August 30, 1985:

The Commission is concerned that this new provision could be read as reducing the flexibility of the U.S., including that of congress, in enactiing and implementing future legislation affecting U.S./PRC relations.

Mr. President, I do not believe it would be a good idea for nuclear trade with China to proceed without an understanding by the People's Republic of China that future export requests by them will be subject to whatever export criteria and regulations are in effect at that time.

PEOPLE'S REPUBLIC OF CHINA NONPROLIFERATION POLICY

The three deficiencies in the agreement I have discussed thus far—lack of safeguards, the possibility of misinterpretation of our consent rights, and the possible misunderstanding about the applicability of future export laws and regulations, would be of concern regardless of who the trading partner was, Mr. President. But I think we have reason to have particular concerns in the case of the People's Republic of China because of the history of its relationship with the United States and the history of its policies and practices in the area of nuclear trade.

I need not remind my colleagues that there have been two major political upheavals since the People's Republic of China was established 36 years ago, so there is some question about the wisdom of signing 30-year nuclear agreements with a nation that is undergoing such instabilities.

I also need not remind this body that after the second Shanghai Communique was signed in August 1982, we thought we had struck a deal in which a reduction in arms sales to Taiwan was predicated on the People's Republic of China's promise of a peaceful solution to the Taiwan issue. The day after the communique was signed, Chinese leaders said they had made no such promise. This experience alone suggests the importance of ensuring that Chinese and United States understandings of the language of the agreement are commensurate with each other.

I might add that the problem of interpreting Chinese messages concerning Taiwan is still very much with us. In a Christian Science Monitor story, dated October 16, 1985, regarding Vice President Bush's visit to China, it is stated:

Chinese and American accounts of the description of talks between Vice President Bush and top people in the Chinese Government and Communist Party have differed in tone and emphasis.

Later on the story quotes Deng Ziaoping as saying:

The main question in our bilateral relations remains that of Taiwan.

While Mr. BUSH is quoted as saying, with respect to the discussion regarding Taiwan,

I see a frankness in bringing these matters up, but it was not the dominant theme of these meetings.

Mr. President, if we cannot get a common understanding with the Chinese on communiques and on the main subject matter of bilateral talks, does that not suggest we need to take special care with respect to the understandings contained in the nuclear agreement?

But it is China's nonproliferation policies themselves that may require the most careful scrutiny.

The history of China's nonproliferation policies and activities is not a happy one. For example, on August 16, 1963, in the Peking Review, an official statement contained the following passages:

Whether or not nuclear weapons help peace depends on who possesses them. It is detrimental to peace if they are in the hands of imperialist countries; it helps peace if they are in the hands of socialist countries. It must not be said indiscriminately that the danger of nuclear war increases along with the increase in nuclear powers. . . . Nuclear weapons in the possession of a socialist country are always a means of defense against nuclear blackmail and nuclear war. So long as the imperialists refuse to ban nuclear weapons, the greater the number of socialist countries possessing them, the better the guarnatee of world peace.

Please note that in this timeframe we had concluded the Partial Test Ban Treaty with the Soviets, a treaty that was criticized severely by the Chinese and which they have not signed to this day.

Now, of course the statement I quoted from was made before China became a nuclear power herself in 1964. Did that event change her attitude about proliferation of weapons? No, it did not.

In 1966, Zhou En Lai stated that the draft Nuclear Nonproliferation Treaty [NPT] was "a great conspiracy against all peace-loving countries and people."

In 1977, the Chinese news agency Xinhua described a comprehensive test ban [CTB] as:

A new starting point for another round of the nuclear race. The hegemonic practice of prohibiting the small- and medium-sized countries from developing their own nuclear weapons can deceive nobody.

In 1981, a Chinese delegate declared to the U.N. Commission on Disarmament that a CTB—

Can only tie the hands of those countries with weaker defense capabilities. . . .

Well, Mr. President, we have seen many newspaper reports in recent years that the Chinese pro-proliferation stance was backed up by more than words. China was reported as helping Pakistan with the latter's nuclear weapons program, and China was reported to have sent heavy water to Argentina and enriched uranium to South Africa without requiring safeguards.

Now we are told by the executive branch that Chinese policies have changed. Last year, a public declaration was made by Premier Zhao Ziyang that:

51-059 O-87-17 (Pt. 22)

. . . We by no means favor nuclear proliferation, nor do we engage in such proliferation by helping other countries to develop nuclear weapons.

The problem with this statement—besides the fact that it was preceded by criticism of the NPT and a reiteration of China's refusal to accede to it—was that not long after it was made, Chinese scientists were reportedly, according to news reports, discovered at the Kahuta site in Pakistan which is the site where a clandestine nuclear enrichment plant is reportedly being built—a plant that will have the capability of producing weapons grade high enriched uranium. It was that discovery that put this agreement on hold for over a year.

Despite this history, we are asked to accept, as a definitive description of Chinese nonproliferation policies, a summary of discussions on the subject prepared by United States negotiators, and not signed by the Chinese.

Mr. President, over the past year, we have observed Chinese entry into the IAEA, its voluntary offer to allow safeguards on some of its facilities, and its promise to require safeguards on all its nuclear power exports to nonweapon states. These acts do suggest that the Chinese see value in behaving more responsibly on nuclear matters. But their attitudes, even today, are still cause for concern. At the recently concluded IAEA General Conference in Vienna, on September 24, 1985, the head of the Chinese delegation, Zhou Ping, in the same statement in which he announced his country's voluntary offer to accept IAEA safeguards on some of its facilities, complained that:

The proportion the safeguards expense assumes in the Agency's budget has been growing too fast.

In other words, Mr. President, the Chinese are in favor of some safeguards as long as thay do not cost too much. Let me point out, Mr. President, that it is a well known fact that the IAEA's budget has been pinched for many years, and that its inspection goals, based on its technical objectives, are not being met today. China's lipservice to safeguards is not a sufficient basis for nuclear trade, especially since China has not even said that its voluntary offer will apply to United States exports.

Even more serious than seeming Chinese ambivalence on safeguards is the fact that the reported Pakistani incident took place during the period when it was believed by our negotiators that Chinese policy had changed significantly. Given this history, should we depend on a written summary of subsequent discussions that the Chinese have not formally subscribed to as a basis for judging the adequacy of present Chinese nonproliferation policy? I say no. We need a comprehensive description prepared by the Chinese themselves so we can see whether what they say is consistent with what the State Department believes, and also so we have a formal basis for comparing future Chinese actions to Chinese words in the area of nuclear nonproliferation.

Mr. President, the history of Chinese nonproliferation policies suggest that certain questions should be put to the administration. For example, in the NPAS attached to the agreement, it is stated that:

A few of the major provisions in the agreement were subject to long and difficult negotiations. We have had detailed discussions on what it means in practice to assist other countries to acquire nuclear explosives.

Does this statement mean that we have told the Chinese that transfers of reprocessing or enrichment equipment or technology, even under safeguards, constitutes assisting other countries to acquire nuclear weapons capabilities according to our policies and laws—for example, the Glenn/Symington amendment to the Foreign Assistance Act? And if we have informed the People's Republic of China about that, did we get a commitment from them that they will not engage in such activity? This is an important point. The spread of reprocessing or enrichment technology is tantamount to the spread of weapons technology, and there is reason to wonder about the Chinese attitude on such questions. At the international colloquium on nonproliferation sponsored by the Groupe de Bellerive in Geneva in June, the Chinese representative, Mr. H.E. Jiadong Qian, in a rather extended attack on the NPT, stated that the rights of nonweapon states party to the NPT to participate in the fullest possible exchange of equipment, materials, and information for the peaceful uses of nuclear energy were effectively being denied. To quote Mr. Qian:

(I)n order to exercise such rights the non-nuclear-weapons States, apart from accepting IAEA safeguards, are moreover required to enter into special arrangements with the supplier countries. These extra conditions have in actuality hampered the non-nuclear-weapon States from enjoying *what is their due.* (Italic added.)

This statement may be interpreted to mean that supplier agreements to show restraints on the transfer of sensitive nuclear technologies like reprocessing and enrichment are denials of the rights of nonweapon states. Does this mean China will not abide by such restraints? And does it mean that if we say "no" to China on reprocessing, that China will interpret this as a denial of her own rights under the agreement?

There are other questions. Did we query the Chinese regarding a story in the London Financial Times of August 14, 1984, that the Chinese had given the Pakistanis some highly enriched uranium? If we did, what was the answer to our query?

In comparison, would my colleagues in the Senate be content with an agreement which transfers high technology items to the Soviet Union with verification of peaceful uses assured only by visits?

Mr. President, we are being asked, basically, by the administration to believe: First, that in January 1984, China began turning over a new leaf in international behavior; second, that we have reason to put some trust in Chinese assurances of peaceful uses of our exports so that safeguards are not necessary; and third, that we should assume the Chinese interpret the agreement the way we do. That might be the way to treat a close ally with a longstanding record of benign intentions, but is that the situation we are dealing with here?

Is this agreement alone, without filling in the page gaps and removing the potential for misunderstanding, sufficient to encourage good Chinese nuclear behavior?

We have already had some parallel experience to draw on in this respect. In January 1984, we signed a nonnuclear high technology export agreement with China.

One month later, five persons were arraigned in the Federal district court in Newark, charged with plotting to smuggle high technology equipment to China. The New York Times reported on February 14, 1984, that the assistant U.S. attorney called the plot, involving up to $1 billion in missile guidance and radar jamming gear, "a very serious defense matter. According to the Chicago Tribune of February 14, 1984, an Assistant Commissioner for Enforcement with the Customs Service in New York said:

It was very clear that they were buying on behalf of the Peking Government and that they planned to divert the equipment through Hong Kong to Peking.

Was that a unique case? No. Three months after the high technology agreement went into effect, a 17-count indictment for the illegal export of electronic testing and calibrating equipment to China was filed in Los Angeles.

An assistant U.S. attorney was quoted in the Los Angeles Times of April 11, 1984, as saying:

A primary use of some of the exports is in nuclear research.

Later on, the article states:

Authorities believe that (the individual arrested) was supplying hardware for use at China's main nuclear testing site in the northwestern part of the country.

Evidently, the signing of a high technology export agreement with China did not provide a sufficient incentive for good behavior by the People's Republic of China in high technology trade.

So, Mr. President, this is the record the Senate must consider in deciding what to do about the United States-China agreement.

Mr. President, I have not attempted to be encyclopedic in my discussion of this agreement. For example, I have not discussed the question of what happens if the People's Republic of China replicates any equipment or technology transferred under the agreement. Under the agreed minute of the agreement, the People's Republic of China appears to have every right to use such replicated equipment or technology for weapons or other military purposes. I make no recommendation as to how or even whether to deal with this issue, but the Congress should be aware that this is what the agreement appears to allow.

Mr. President, I have attempted to approach this agreement in a spirit of constructiveness, and I believe I have identified those problems which can be naturally remedied in the context of the diplomatic discussions provided for by the agreement. These remedies are incorporated in S. 1974, the Sino-American Nuclear Verification Act of 1985, introduced on October 9, 1985, with the original cosponsorship of Senator ROTH, and also cosponsored by Senator DURENBERGER, BUMPERS, ANDREWS, KASSEBAUM, and CRANSTON.

S. 1754 does not prevent the agreement from formally going into effect, and it does not require any alteration in the agreement's language. Rather, it postpones any nuclear transfers or retransfers to the People's Republic of China until the President certifies that the deficiencies in the agreement have been rectified. Moreover, the bill is precise in describing what constitutes a satisfactory resolution of these issues.

PROVISION ON VERIFICATION

In the case of verification of peaceful uses, S. 1754 requires that verification be equivalent to that provided under so-called INFCIRC/66/Rev. 2 safeguards of the IAEA. These are the safeguards arrangements that the IAEA enters into with nations that have unsafeguarded as well as safeguarded facilities. Now that China has made a voluntary offer to the IAEA to accept safeguards on some of its facilities, this provision is appropriate and is in keeping with the Chinese voluntary offer.

I should point out once again, Mr. President, that the Chinese have signed nuclear trade agreements with Japan, Argentina, and Brazil in which IAEA safeguards on all exported items are provided for. I am sorry that our negotiators failed to achieve a similar provision before deciding to initial and before the President signed the proposed agreement, but I believe that we can salvage the situation through enactment of this legislation.

PROVISION ON CONSENT RIGHTS

The second area of concern, U.S. consent rights, simply requires that we redress an imbalance of language in the agreement in order to avoid any misunderstanding on the part of the Chinese. Thus, while the agreement does say "the parties undertake the obligation to consider such activities—that is, reprocessing, and so forth—favorably," the State Department has stated in an explanatory brief that "the United States has the right to withhold its agreement to any activity that is proposed," and claims that this is sufficient to satisfy the requirements of U.S. law. But, Mr. President, it is evident to any person, even lawyers, that a right that is circumscribed in some way cannot be freely exercised. If I tell someone he cannot enter my home without my permission, but guarantee that I will give my permission at 7 p.m. on Saturday night, the State Department might claim I still retain my consent right because my home cannot be entered until my permission is given. But have tendered a guarantee, I have, if I am an honorable person, effectively circumscribed that right, and some might argue that I have effectively given it up. Certainly, at the least, the other party could feel rather aggrieved if the guarantee was not honored. I do not believe it was the intent nor would it be wise, for the Chinese to be given the impression that the United States was biased in favor of allowing the reprocessing of any spent fuel covered by this agreement. Accordingly, S. 1754 would simply restore some balance to this area by requiring the President to elicit from the Chinese their recognition that the language of article 5 does not favorably or unfavorably dispose the United States to approve any reprocessing or enrichment of spent fuel or other alterations in form or content of fuel covered by the agreement. In other words, the langauge of the agreement should be seen as completely neutral in terms of any predisposition by the United States toward approvals of future Chinese requests for reprocessing or other activities governed by U.S. consent rights.

PROVISION ON FUTURE EXPORT CONTROLS

Similarly, it is important to clarify the status of the agreement with respect to future legislation on United States. export controls, and to have Chinese recognition of such status.

S. 1754 would require the President to elicit recognition from the Chinese Government that any future Chinese requests for transfers or retransfers of nuclear equipment, materials, or technology will be subject to all the rules and regulations mandated by domestic law and policy at that time, regardless of whether such laws and policies were implemented before or after this agreement went into effect.

The purpose of this provision is to emphasize that the agreement is only a framework for engaging in nuclear trade, but that the detailed structure within this framework is variable, and at any given time is determined by all the export laws and regulations in existence at that given time. If the United States, for example, decided to require an additional export criterion in 5 years from now, then any Chinese export license request in 5 years would be subject to that criterion. We must be sure that the inappropriate language in the agreement referring to treaties and domestic legislation is not interpreted by the Chinese to mean that our requirements for nuclear transfers or retransfers to China will be unchanged once this agreement goes into effect.

PROVISION ON CHINESE NONPROLIFERATION POLICIES

Finally, Mr. President, S. 1754 would require that, prior to initiating any trade under this agreement, the United States have a public, written, and detailed description of Chinese nonproliferation policies prepared by the Chinese themselves, and that this description correspond in all essential details with the summary of United States-China discussions on Chinese nonproliferation policies provided to the Congress by the State Department on a confidential basis. This will ensure that we have a clear and unambiguous Chinese commitment to those policies. People's Republic of China just acknowledge that our understanding is their policy.

Mr. President, as I said earlier, this agreement provides for diplomatic discussions to work out the details of visits for purposes of establishing verification of peaceful uses of future United States nuclear exports to China. These diplomatic discussions allow an opportunity for the United States to engage the Chinese in discussions that would lead to clarifying the agreement in accordance with the requirements laid down in S. 1754.

I believe that with these clarifications, including the publication of Chinese nonproliferation policies and the establishment of an appropriate system of verification of peaceful uses in accordance with IAEA Document INFCIRC/66/Rev. 2, we will have a framework for nuclear trade with the People's Republic of China that we can support and be comfortable with.

But let us make no mistake about what may await us down the road if these clarifications and verification conditions are not issued or adopted. We will have a situation similar to that which occurred and is still occurring with the Indians; we will risk having thorny diplomatic problems that will prevent the advances in United States-China relations that this agreement is supposed to bring;

we will have provided another example of how to undermine ones own nonproliferation policy, with an attendant loss of our credibility on the issue; and we may even end up putting our national security in jeopardy.

Mr. President, I understand there are some who believe that as long as we ensure that this agreement is not viewed as a precedent for others, then it is perfectly OK.

I have a message for those who have adopted that position. This agreement is already being used as a precedent before it has even been adopted. There is a story in the Indian newspaper, the Hindu, August 31, 1985. The story is about an agreement we have worked out with India on the sale of sophisticated computers. The agreement was held up for awhile because, according to the press reports, the United States wanted assurances that these computers would not be used for nuclear-related purposes. A solution to this problem was finally proposed by India. Here is a quote from the story:

In arriving at the latest understanding, the Government of India has relied partly on the formulations used in the nuclear agreement signed by China with the U.S. providing the necessary guarantees against diversion of equipment to third countries or its use for nonauthorized purposes. As the text of the letter containing these assurances that has been given to the U.S. Government is being kept secret, it is not possible at this stage to ascertain how far India has gone in complying with the U.S. requirements.

So, Mr. President, let no one kid themselves that this agreement will stand alone. That is another reason why it is imperative that we obtain the appropriate understandings with the Chinese, as required by S. 1754.

Mr. President, I ask unanimous consent that the following materials be printed in the RECORD following these remarks:

First, the United States-China Agreement for Cooperation.

Second, a Dear Colleague letter, dated October 30, 1985.

Third, S. 1754, The Sino-American Nuclear Verification Act of 1985.

Fourth, an explanatory three-page chart indicating how S. 1754 clears up the deficiencies in the agreement without altering it.

Fifth, an editorial from the Washington Post, dated October 28, 1985.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

PROBLEMS WITH THE UNITED STATES/CHINA NUCLEAR AGREEMENT AND PROPOSED SOLUTIONS IN THE SINO/AMERICAN NUCLEAR VERIFICATION ACT OF 1985

Issue	Agreement language	Problem	Bill language	Comment
Verification of peaceful uses	"The parties will use diplomatic channels to establish mutually acceptable arrangements for exchanges of information and visits subject to this agreement".	No standard is provided for verification of peaceful uses for exported equipment, materials, or technology, and the diplomatic discussions will not be completed until congressional review is finished and the agreement is in effect.	(For nuclear trade with China to proceed, the President must certify that:) "The verification of peaceful uses on exported items covered by the agreement for cooperation will be essentially equivalent to that provided by the materials accounting and inspection standards normally applied by the IAEA in accordance with its document INFCIRC/66/REV. 2 entitled "The Agency's Safeguards System (1965, as provisionally extended in 1966 and 1968)".	China has joined the IAEA and has made a voluntary offer to allow safeguards on some (unspecified) facilities. This provision of the bill would require China, in essence, to allow safeguards on U.S. exported items. The United States itself allows IAEA inspection of U.S. peaceful nuclear facilities under an agreement with the Agency signed in 1979.
U.S. consent rights	"In the event that a party would like at some future time to undertake such activities, the parties will promptly hold consultations to agree on a mutually acceptable arrangement. The parties undertake the obligation to consider such activities favorably, and agree to provide pertinent information on the plans during the consultations".	The "activities" include the production of weapons-usable materials from U.S.-supplied fuel or U.S.-origin spent fuel. Unbiased exercise of required U.S. consent rights over such activities appears to be compromised by unorthodox language that may be interpreted to suggest that the United States is biased toward acceding to Chinese requests.	(For nuclear trade with China to proceed, the President must certify that:) "The Government of the People's Republic of China has communicated its recognition that the agreement for cooperation neither favorably nor unfavorably disposes the United States toward approving or agreeing to any enrichment, reprocessing, or alteration in form or content of material transferred pursuant to the agreement for cooperation or material used in or produced through the use of any material or facility transferred pursuant to the agreement for cooperation.	The State Department claims that there is no intent, nor should anyone interpret the agreement, to bias the exercise of U.S. consent rights. The bill would ensure the China agrees with this view. This would avoid repetition of a similar problem that arose with the United States India/Agreement for Cooperation because of lack of clarity, with each side in the dispute making conflicting claims.
China's nonproliferation policies	N/A—but U.S. policy requires that countries with whom we enter into nuclear agreements must establish and maintain satisfactory nonproliferation policies.	Past People's Republic of China policy-statement and actions have favored proliferation. The only detailed description of the People's Republic of China's present nuclear nonproliferation policies is contained in a classified summary of discussions prepared by the State Department, and not formally endorsed by the People's Republic and China.	(For nuclear trade with China to proceed, the President must certify that:) "The Government of the People's Republic of China has provided a public, written, detailed description of its nonproliferation policies, and those policies correspond in all essential elements and details to the description of such policies contained in the Department of State document entitled "United States Summary of Discussions" (relating to China's nonproliferation policy)".	A general statement made by Premier Zhao in February, 1984, that "we by no means favor nuclear proliferation on, nor do we enage in such proliferation by helping other countries to develop nuclear weapons" was followed by the initialling of the Agreement in April 1984 during President Reagan's visit. This was followed, in turn, by the reported discovery of Chinese technical personnel at the clandestine Pakistani nuclear enrichment plant at Kahuta. The Agreement was, consequently, not signed until July, 1985, at which time the State Department produced its classified "summary of discussions". Since this summary has not been officially recognized by the People's Republic of China, it is important to have the People's Republic of China's account of its policies to ensure there is full understanding of the nonproliferation policies of the People's Republic of China, including its commitment not to assist Pakistan and other nations in developing nuclear weapons capabilities.
Relationship of agreement to future U.S. export laws and regulations.	"The parties recognize, with respect to the observance of this agreement, the principle of international law that provides that a party may not invoke the provisions of its internal law as justification for its failure to perform a treaty".	Unorthodox language in Agreement may be interpreted to suggest that the application to nuclear trade with China of United States export laws and regulations enacted after the Agreement goes into force, could be a violation of the Agreement.	(For nuclear trade with China to proceed, the President must certify that:) The Government of the People's Republic of China has communicated its recognition that all proposed exports of nuclear materials, equipment, or technology under the agreement for cooperation are subject to such laws and regulations of the United States which are in effect at the time of each such export or the licensing thereof.	An agreement for cooperation is not a treaty. Treaties require ratification by 2/3 majority vote of the U.S. Senate. Rather, agreements for cooperation are meant to be frameworks for engaging in nuclear trade; they do not obligate the United States to make any transfers, nor are they a substitute for binding contracts. It is normally expected that an applicant for an export at any given time will be require to satisfy whatever laws and regulations are in effect at that time regarding licensing or other procedures for export approval, and that this is legal and proper under an agreement for cooperation. The bill language ensures that the Chinese will not view future additional export laws or regulations as lying outside the framework of the agreement.

S. 1754

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Sino-American Nuclear Verification Act of 1985".

FINDINGS

SEC. 2. The Congress finds that—

(1) the international nuclear nonproliferation regime, including the safeguards system of the International Atomic Energy Agency (IAEA), and the domestic laws of the United States controlling nuclear exports, are important elements in the struggle against the spread of nuclear weapons;

(2) nuclear trade involving nonsensitive safeguarded equipment, materials, and technology can be a useful component in an effective nuclear nonproliferation policy, is of economic value to the United States, and helps to fulfill the obligations of the United States under the Treaty on the Non-Proliferation of Nuclear Weapons, done on July 1, 1968;

(3) nuclear agreements for cooperation between the United States and other nations should be without ambiguity as to meaning or implementation and should be in keeping with the letter and spirit of the Nuclear

Non-Proliferation Act of 1978 and the Atomic Energy Act of 1954;

(4) agreements for cooperation, including the agreement between the United States and the People's Republic of China, signed on July 23, 1985, do not constrain the United States from applying all laws and regulations regarding nuclear exports which are in effect at the time of the export or the licensing thereof;

(5) the national security of the United States may be put at risk by nuclear trade with nations whose nuclear nonproliferation policies are either unsatisfactory or are not sufficiently specific or detailed to judge whether they are satisfactory;

(6) the transfer or retransfer of nuclear equipment, materials, or technology to any nation without adequate verification of their peaceful uses undermines the international nuclear nonproliferation regime and is inimical to the common defense and security of the United States; and

(7) the Agreement for Cooperation Between the United States and the People's Republic of China Concerning Peaceful Uses of Nuclear Energy, signed on July 23, 1985 (hereafter in this Act referred to as the "Agreement for Cooperation"), together with the Department of State document entitled "United States Summary of Discussions" (relating to China's nuclear nonproliferation policy), do not provide a sound basis for nuclear trade between the two countries without further clarification of—

(A) the verification of peaceful uses covering exported items;

(B) the rights of consent and the exercise thereof by the United States over the enrichment of United States supplied fuel, the reprocessing of United States-origin spent fuel, or the reprocessing of other spent fuel arising from a United States supplied reactor;

(C) Chinese nuclear nonproliferation policies; and

(D) the relationship of the Agreement for Cooperation to future United States export control laws.

PURPOSES

SEC. 3. The purposes of this Act are to—

(1) provide for the clarification of understandings regarding the implementation of the Agreement for cooperation;

(2) strengthen the nuclear nonproliferation regime by providing an example of United States leadership in fostering more equal treatment of nuclear-weapon states and nonnuclear-weapon states regarding conditions of nuclear trade;

(3) encourage commitments by nuclear-weapon states to formal or tacit adherence to the principle of safeguards for nuclear materials, equipment, and technology used for peaceful purposes; and

(4) protect United States national security interests through strict verification of peaceful uses and full retention of United States rights of consent concerning transfers or retransfers of United States nuclear equipment, materials, and technology as well as materials derived from United States facilities.

SEC. 4. (a) Notwithstanding any other provision of law, including any international agreement, no license may be issued for the export to the People's Republic of China of any nuclear equipment, materials, or technology, and no approvals for the transfer or retransfer to the People's Republic of China of any nuclear equipment, materials, or technology may be given by the United States until the expiration of a period of 30 days of continuous session of Congress after the President has certified to the chairman of the Foreign Relations Committee of the Senate and to the chairman of the Foreign Affairs Committee of the House of Representatives that—

(1) the verification of peaceful uses on exported items covered by the Agreement for Cooperation will be essentially equivalent to that provided by the materials accounting and inspection standards normally applied by the International Atomic Energy Agency in accordance with its document INFCIRC-66-Rev. 2 entitled "The Agency's Safeguard System (1965, as provisionally extended in 1966 and 1968)";

(2) the Government of the People's Republic of China has communicated its recognition that the Agreement for Cooperation neither favorably nor unfavorably disposes to the United States toward approving or agreeing to any enrichment, reprocessing, or alteration in form or content of material transferred pursuant to the Agreement for Cooperation or material used in or produced through the use of any material or facility transferred pursuant to the Agreement for Cooperation;

(3) the Government of the People's Republic of China has provided a public, written, detailed statement of its nuclear nonproliferation policies, and those policies correspond in all essential elements and details to the description of such policies contained in the Department of State document entitled "United States Summary of Discussions" (relating to China's nuclear nonproliferation policy); and

(4) the Government of the People's Republic of China has communicated its recognition that all proposed exports of nuclear materials, equipment, or technology under the Agreement for Cooperation are subject to such laws and regulations of the United States which are in effect at the time of each such export or the licensing thereof.

(b) For purposes of subsection (a), the continuity of a session of Congress is broken only by adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the period indicated.

COMMITTEE ON GOVERNMENTAL AFFAIRS,
Washington, DC, October 30, 1985.

DEAR COLLEAGUE: The time for action on the U.S./China Nuclear Agreement is fast approaching. The Agreement, while significantly flawed, is salvageable if Congress provides goals, standards and guidance to the State Department in the diplomatic discussions on verification of peaceful uses of U.S.-exported nuclear items provided for by the Agreement.

As things stand right now, the Agreement:

Provides for no safeguards against the misuse of U.S. nuclear exports to China, making this the first nuclear power agreement signed by the United States since the operational advent of the international safeguards system that calls for no safeguards.

May be interpreted by the Chinese to bias in their favor the exercise of U.S. consent rights on production of weapons-usable materials by China using U.S.-exported nuclear materials or equipment.

May be interpreted by the Chinese to supercede future U.S. nuclear export laws and regulations.

Is accompanied by no public, detailed, written statement by China describing its nuclear nonproliferation policies, despite the fact that all other nuclear weapon States and the 125 nonweapon States that have signed the NPT have, in effect, issued such statements. Instead, we have a confidential "summary of discussions" prepared by the State Department and not formally endorsed by the Chinese.

These deficiencies undermine the international nonproliferation regime and have the potential for causing serious disagreements in the future that will be damaging to U.S./China relations.

On October 9, 1985, Senator Glenn introduced S. 1754, the Sino-American Nuclear Verification Act (SANVA). *This bill, if enacted, requires no rejection of the Agreement and requires no change in the language of the Agreement.* Instead, S. 1754 relies on the Agreement's provision for diplomatic discussions with the Chinese to ensure, *via Presidential certification*, that:

Safeguards or their equivalent will be applied to U.S. exports.

China agrees with the State Department's interpretation of the Agreement's provisions on U.S. consent rights and the applicability of future U.S. export laws and regulations.

China has provided a public, detailed, written statement of its nonproliferation policies.

In the absence of these one-time certifications by the President, no nuclear exports can go to China.

In our view, the required certifications in SANVA are reasonable and prudent. We should recall that:

Until 1984, it was China's announced policy to *favor* proliferation, and there have been many disturbing stories in the press regarding unsafeguarded Chinese nuclear exports to nations with suspicious nuclear intentions.

Within months after the U.S. signed a high-tech export agreement with China in 1984, a number of indictments were handed down concerning the smuggling of militarily sensitive electronic equipment from the U.S. to China. Some of this equipment is believed by U.S. authorities to be for nuclear applications.

Finally, it should be noted that without S. 1754, the Congress will be in the position of passing on an agreement whose final content will be unknown until the diplomatic discussions with the Chinese on verification are concluded, i.e., after the Congressional review period is over and the agreement has gone into effect. We believe this frustrates the purpose of Congressional review, and further supports the necessity of the Presidential certifications required by S. 1754.

A copy of S. 1754, a three-page chart explaining the bill, and a recent editorial from the Washington Post are enclosed. If you would like to cosponsor, please call Len Weiss (4-4508) or Ian Butterfield (4-2441).

Sincerely,

WILLIAM V. ROTH, Jr.
JOHN GLENN.
DAVID DURENBERGER.
DALE BUMPERS.
MARK ANDREWS.
ALAN CRANSTON.
NANCY LANDON KASSEBAUM.

[From the Washington Post, Oct. 28, 1985]

NUCLEAR EXPORTS TO CHINA

A cloud of unresolved doubts continues to hang over the nuclear cooperation agreement signed last summer between this country and China. Congress has the power to reject the agreement, but should not do so.

China has possessed nuclear weapons for two decades, and if it chose could greatly increase the risks to the world's security by disseminating this technology to the countries that seek it. In the past China has occasionally seemed inclined to do that. But more recently it has taken several steps indicating support of the regimen in which most of the world's governments have joined to prevent further proliferation of these weapons. The agreement between the United States and China could strongly reinforce that commitment.

The agreement is a bargain. The United States is to give the Chinese access to its reactor technology for peaceful purposes, allowing American companies to sell the Chinese equipment, fuel and engineering advice. China, for its part, has agreed to divert none of this technology to its own military uses and to give no further assistance to any other country's attempts to build weapons. The questions about the agreement begin with the absence of provisions for verification and extend to several areas of ambiguity on other crucial points. But it's not a subject to be left to vague good will.

Sen. John Glenn pointed out earlier this month that on two occasions this year U.S. authorities have intercepted what were evidently attempts to smuggle advanced electronic equipment to China. Last week Sen. Alan Cranston charged that China has recently held nuclear trade talks with, or actually sent nuclear exports to, five countries with nuclear ambitions—Iran, Pakistan, South Africa, Brazil and Argentina.

The history of this agreement is similarly troubling. It was first initialed a year and a half ago, during President Reagan's trip to China. But instead of forwarding it routinely to Congress, the administration put it in the deep freeze. Although the reason was never publicly stated, there had been intelligence reports of Chinese technicians working at a uranium enrichment plant in Pakistan. The agreement was finally signed last July. The State Department, evasive and secretive throughout this process, has not succeeded in persuading many senators that its current information is adequate to support the assurances it is giving them.

Sen. Glenn has drafted an ingenious remedy. He does not want to see the agreement rejected. But he has introduced a bill providing that, before this country licenses any nuclear exports to China, the President would have to certify that the key questions have been settled with the Chinese. The State Department opposes the Glenn bill, arguing that it demands a degree of legalistic detail to which the Chinese will never consent. But that's a decision for the Chinese to make, not the State Department.

This American technology has an immense capacity for good or, unfortunately, evil. Mr. Glenn and the growing number of senators of both parties who join him are right to want a more precise agreement on China's intentions.

Agreement for Cooperation Between The Government of the United States of America and The Government of the People's Republic of China Concerning Peaceful Uses of Nuclear Energy

The Government of the United States of America and the Government of the People's Republic of China,

Desiring to establish extensive cooperation in the peaceful uses of nuclear energy on the basis of mutual respect for sovereignty, non-interference in each other's internal affairs, equality and mutual benefit,

Noting that such cooperation is one between two nuclear weapon states,

Affirming their support of the objectives of the statute of the International Atomic Energy Agency (IAEA),

Affirming their intention to carry out such cooperation on a stable, reliable and predictable basis,

Mindful that peaceful nuclear activities must be undertaken with a view to protecting the international environment from radioactive, chemical and thermal contamination.

Have agreed as follows:

ARTICLE 1. DEFINITIONS

For the purposes of this agreement:

(1) "parties" means the Government of the United States of America and the Government of the People's Republic of China;

(2) "authorized person" means any individual or any entity under the jurisdiction of either party and authorized by that party to receive, possess, use, or transfer material, facilities or components;

(3) "person" means any individual or any entity subject to the jurisdiction of either party but does not include the parties to this agreement;

(4) "peaceful purposes" include the use of information, technology, material, facilities and components in such fields as research, power generation, medicine, agriculture and industry but do not include use in, research specifically on or development of any nuclear explosive device, or any military purpose;

(5) "material" means source material, special nuclear material or byproduct material, radioisotopes other than byproduct material, moderator material, or any other such substance so designated by agreement of the parties;

(6) "source material" means (i) uranium, thorium, or any other material so designated by agreement of the parties, or (ii) ores containing one or more of the foregoing materials, in such concentration as the parties may agree from time to time;

(7) "special nuclear material" means (i) plutonium, uranium 233, or uranium enriched in the isotope 235, or (ii) any other material so designated by agreement of the parties;

(8) "byproduct material" means any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material;

(9) "moderator material" means heavy water, or graphite or beryllium of a purity suitable for use in a reactor to slow down high velocity neutrons and increase the likelihood of further fission, or any other such material so designated by agreement of the parties;

(10) "high enriched uranium" means uranium enriched to twenty percent or greater in the isotope 235;

(11) "low enriched uranium" means uranium enriched to less than twenty percent in the isotope 235;

(12) "facility" means any reactor, other than one designed or used primarily for the formation of plutonium or uranium 233, or any other item so designated by agreement of the parties;

(13) "reactor" is defined in Annex I, which may be modified by mutual consent of the parties.

(14) "sensitive nuclear facility" means any plant designed or used primarily for uranium enrichment, reprocessing of nuclear fuel, heavy water production or fabrication of nuclear fuel containing plutonium;

(15) "component" means a component part of a facility or other item, so designated by agreement of the parties;

(16) "major critical component" means any part or group of parts essential to the operation of a sensitive nuclear facility;

(17) "sensitive nuclear technology" means any information (including information incorporated in a facility or an important component) which is not in the public domain and which is important to the design, construction, fabrication, operation or maintenance of any sensitive nuclear facility, or such other information so designated by agreement of the parties.

ARTICLE 2. SCOPE OF COOPERATION

1. The parties shall cooperate in the use of nuclear energy for peaceful purposes in accordance with the provisions of this agreement. Each party shall implement this agreement in accordance with its respective applicable treaties, national laws, regulations and license requirements concerning the use of nuclear energy for peaceful purposes. The parties recognize, with respect to the observance of this agreement, the principle of international law that provides that a party may not invoke the provisions of its internal law as justification for its failure to perform a treaty.

2. Transfers of information, technology, material, facilities and components under this agreement may be undertaken directly between the parties or through authorized persons. Such cooperation shall be subject to this agreement and to such additional terms and conditions as may be agreed by the parties.

3. Material, facilities and components will be regarded as having been transferred pursuant to this agreement only upon receipt of confirmation by the supplier party, from the appropriate Government authority of the recipient party, that such material, facilities or components will be subject to this agreement and that the proposed recipient of such material, facilities or components, if other than the recipient party, is an authorized person.

4. Any transfer of sensitive nuclear technology, sensitive nuclear facilities, or major critical components will, subject to the principles of this agreement, require additional provisions as an amendment to this agreement.

ARTICLE 3. TRANSFER OF INFORMATION AND TECHNOLOGY

Information and technology concerning the use of nuclear energy for peaceful purposes may be transferred. Transfers of such information and technology shall be that which the parties are permitted to transfer and may be accomplished through various means, including reports, data banks, computer programs, conferences, visits and assignments of persons to facilities. Fields which may be covered include, but shall not be limited to, the following:

(1) research, development, experiment, design, construction, operation, maintenance and use and retirement of reactors and nuclear fuel fabrication technology;

(2) the use of material in physical and biological research, medicine, agriculture and industry;

(3) nuclear fuel cycle research, development and industrial application to meet civil nuclear needs, including multilateral approaches to guaranteeing nuclear fuel supply and appropriate techniques for management of nuclear wastes;

(4) health, safety, environment, and research and development related to the foregoing;

(5) assessing the role nuclear power may play in international energy plans;

(6) codes, regulations and standards for the nuclear energy industry; and

(7) such other fields as may be agreed by the parties.

ARTICLE 4. TRANSFER OF MATERIAL, FACILITIES AND COMPONENTS

1. Material, facilities and components may be transferred pursuant to this agreement for applications consistent with this agreement. Any special nuclear material to be transferred under this agreement shall be low enriched uranium except as provided in paragraph 4 of this article.

2. Low enriched uranium may be transferred for use as fuel in reactors and reactor experiments, for conversion or fabrication, or for such other purposes as may be agreed by the parties.

3. The quantity of special nuclear material transferred under this agreement shall be the quantity which the parties agree is necessary for any of the following purposes: the loading of reactors or use in reactor experiments, the efficient and continuous operation of such reactors or conduct of such reactor experiments, and the accomplishment of such other purposes as may be agreed by the parties.

4. Small quantities of special nuclear material may be transferred for use as samples, standards, detectors, targets, radiation sources and for such other purposes as the parties may agree.

ARTICLE 5. RETRANSFERS, STORAGE, REPROCESSING, ENRICHEMENT, ALTERATION, AND NO USE FOR MILITARY PURPOSES

1. Material, facilities, components or special nuclear material transferred pursuant to this agreement and any special nuclear material produced through the use of such material or facilities may be retransferred by the recipient party, except that any such material, facility, components or special nuclear material shall not be retransferred to unauthorized persons or, unless the parties agree, beyond its territory.

2. Neither party has any plans to enrich to twenty percent or greater, reprocess, or alter in form or content material transferred pursuant to this agreement or material used in or produced through the use of any material of facility so transferred. Neither party has any plans to change locations for storage of plutonium, uranium 233 (except as contained in irradiated fuel elements), or high enriched uranium transferred pursuant to this agreement or used in or produced through the use of any material or facility so transferred. In the event that a party would like at some future time to undertake such activities, the parties will promptly hold consultations to agree on a mutually acceptable arrangement. The parties undertake the obligation to consider such activities favorably, and agree to provide pertinent information on the plans during the consultations. Inasmuch as any such activities will be solely for peaceful purposes and will be in accordance with the provisions of this agreement, the parties will consult immediately and will seek agreement within six months on long-term arrangements for such activities. In the spirit of cooperation the parties agree not to act within that period of time. If such an arrangement is not agreed upon within that period of time, the parties will promptly consult for the purpose of agreeing on measures which they consider to be consistent with the provisions of the agreement in order to undertake such activities on an interim basis. The parties agree to refrain from actions which either party believes would prejudge the long-term arrangements for undertaking such activities or adversely affect cooperation under this agreement. The parties agree that the consultations referred to above will be carried out promptly and mutual agreement reached in a manner to avoid hampering, delay or undue interference in their respective nuclear programs. Neither party will seek to gain commercial advantage. Nothing in this article shall be used by either party to inhibit the legitimate development and exploitation of nuclear energy for peaceful purposes in accordance with this agreement.

3. Material, facilities or components transferred pursuant to this agreement and material used in or produced through the use of any material, facility or components so transferred shall not be used for any nuclear explosive device, for research specifically on or development of any nuclear explosive device, or for any military purpose.

ARTICLE 6. PHYSICAL SECURITY

1. Each party shall maintain adequate physical security with respect to any material, facility or components transferred pursuant to this agreement and with respect to any special nuclear material used in or produced through the use of any material or facility so transferred.

2. The parties agree to the levels for the application of physical security set forth in Annex II, which levels may be modified by mutual consent of the parties. The parties shall maintain adequate physical security measures in accordance with such levels. These measures, as minimum protection measures, shall be comparable to the recommendations set forth in IAEA document INFCIRC/225/Revision 1 entitled "The Physical Protection of Nuclear Material", or in any revision of that document agreed to by the parties.

3. The parties shall consult at the request of either party regarding the adequacy of physical security measures maintained pursuant to this article.

4. Each party shall identify those agencies or authorities responsible for ensuring that levels of physical security are adequately met and having responsibility for coordinating response and recovery operations in the event of unauthorized use or handling of material subject to this article. Each party shall also designate points of contact within its national authorities to cooperate on matters of out-of-country transportation and other physical security matters of mutual concern.

ARTICLE 7. CESSATION OF COOPERATION

1. Each party shall endeavor to avoid taking any actions that affect cooperation under this agreement. If either party at any time following entry into force of this agreement does not comply with the provisions of this agreement, the parties shall promptly hold consultations on the problem, it being understood that the other party shall have the rights to cease further cooperation under this agreement.

2. If either party decides to cease further cooperation under this agreement, the parties shall make appropriate arrangements as may be required.

ARTICLE 8. CONSULTATIONS

1. The parties shall consult at the request of either party regarding the implementation of this agreement, the development of further cooperation in the field of peaceful uses of nuclear energy, and other matters of mutual concern.

2. The parties recognize that this cooperation in the peaceful uses of nuclear energy is between two nuclear-weapon states and that bilateral safeguards are not required. In order to exchange experience, strengthen technical cooperation between the parties, ensure that the provisions of this agreement are effectively carried out, and enhance a stable, reliable, and predictable nuclear cooperation relationship, in connection with transfers of material, facilities and components under this agreement the parties will use diplomatic channels to establish mutually acceptable arrangements for exchanges of information and visits to material, facilities and components subject to this agreement.

3. The parties shall exchange views and information on the establishment and operation of their respective national accounting and control systems for source and special nuclear material subject to this agreement.

ARTICLE 9. ENVIRONMENTAL PROTECTION

The parties shall consult, with regard to activities under this agreement, to identify the international environmental implications arising from such activities and shall cooperate in protecting the international environment from radioactive, chemical or thermal contamination arising from peaceful nuclear cooperation under this agreement and in related matters of health and safety.

ARTICLE 10. ENTRY INTO FORCE AND DURATION

1. This agreement shall enter into force on the date of mutual notifications of the completion of legal procedures by the parties and shall remain in force for a period of thirty years. This term may be extended by agreement of the parties in accordance with their respective applicable procedures.

2. Notwithstanding the suspension, termination or expiration of this agreement or any cooperation hereunder for any reason, the provisions of articles 5, 6, 7, and 8 shall continue in effect so long as any material, facility or components subject to these articles remain in the territory of the party concerned or any material, facility or components subject to these articles remain subject to that party's right to exercise jurisdiction or to direct disposition elsewhere.

ANNEX I—DEFINITION OF "REACTOR"

"Reactor" means:

1. Any apparatus, other than a nuclear weapon or other nuclear explosive device, in which a self-sustaining fission chain reaction is maintained by utilizing uranium, plutonium or thorium, or any combination thereof; or

2. Any of the following major parts of an apparatus described in paragraph 1:

(1) a pressure vessel designed to contain the core;

(2) primary coolant pumps;

(3) fuel charging or discharging machines;

(4) control rods.

A "reactor" does not include the steam turbine generator portion of a nuclear power plant.

ANNEX II

Pursuant to paragraph 2 of article 6, the agreed levels of physical security to be ensured by the competent national authorities in the use, storage and transportation of the materials listed in the attached table shall

as a minimun included protection characteristics as below.

Category III

Use and storage within an area to which access is controlled.

Transportation under special precautions including prior arrangements among sender, recipient and carrier, and prior agreement between entities subject to the jurisdiction and regulation of supplies and recipient States, respectively, in case of international transport a specifying time, place and procedures for transferring transport responsibility.

Category II

Use and storage within a protected area to which access is controlled, i.e., an area under constant surveillance by guards or electronic devices, surrounded by a physical barrier with a limited number of points of entry under appropriate control, or any area with an equivalent level of physical protection.

Transportation under special precautions including prior arrangements among sender, recipient and carrier, and prior agreement between entities subject to the jurisdiction and regulation of supplier and recipient States, respectively, in case of international transport, specifying time, place and procedures for transferring transport responsibility.

Category I

Material in this category shall be protected with highly reliable systems against unauthorized uses as follows:

Use and storage within a highly protected area, i.e., a protected area as defined for category II above, to which, in addition, access is restricted to persons whose trustworthiness has been determined, and which is under surveillance by guards who are in close communication with appropriate response forces. Specific measures taken in this context should have as their objective the detection and prevention of any assault, unauthorized access or unauthorized removal of material.

Transportation under special precautions as identified above for transportation of categories II and III materials and, in addition, under constant surveillance by escorts and under conditions which assure close communication with appropriate response forces.

TABLE.—CATEGORIZATION OF NUCLEAR MATERIAL [1]

Material and form	Category		
	I	II	III
1. Plutonium [2] [3] (unirradiated [4])	2 kg or more.	Less than 2 kg but more than 500 g.	500 g or less. [6]
2. Uranium-235 [5] (unirradiated [4]):			
Uranium enriched to 20 percent ^{235}U or more.	5 kg or more.	Less than 5 kg but more than 1 kg.	1 kg or less. [6]
Uranium enriched to 10 percent ^{235}U but less than 20 percent.		10 kg or more.	Less than 10 kg. [6]
Uranium enriched above natural, but less than 10 percent ^{235}U.			10 kg or more.
3. Uranium-233 (unirradiated [4])	2 kg or more.	Less than 2 kg but more than 500 g.	500 g or less. [6]

[1] Irradiated fuel should be protected as category I, II or III nuclear material depending on the category of the fresh fuel. However, fuel which by virtue of its original fissile material content is included as category I or II before irradiation should only be reduced one category level, while the radiation, level from the fuel exceeds 100 rads/h at one meter unshielded.

[2] All plutonium except that with isotopic concentration exceeding 80 percent in plutonium-238.

[3] The State's competent authority should determine if there is a credible threat to disperse plutonium malevolently. The State should then apply physical protection requirements for category I, II or III of nuclear material, as it deems appropriate and without regard to the plutonium quantity specified under each category herein, to the plutonium isotopes in those quantities and forms determined by the State to fall within the scope of the credible dispersal threat.

[4] Material not irradiated in a reactor or material irradiated in a reactor but with a radiation level equal to or less than 100 rads/hour at one meter unshielded.

[5] Natural uranium, depleted uranium and thorium and quantities of uranium enriched to less than 10 percent not falling in category III should be protected in accordance with prudent management practice.

[6] Less than a radiologically significant quantity should be exempted.

AGREED MINUTE

During the negotiation of the Agreement for Cooperation between the United States of America and the People's Republic of China Concerning Peaceful Uses of Nuclear Energy signed today, the following understanding, which shall be an integral part of the agreement, was reached.

The parties agree that the interpretation and implementation of article 5(3) shall not involve any nuclear activities and related research and development carried out by either party, as a nuclear weapon state, through the use of material, facilities, components and technology not subject to the agreement.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

Mr. PROXMIRE. I thank the Chair.

THE POLICY THAT WILL BRING NUCLEAR WAR

Mr. PROXMIRE. Mr. President, the President of the United States, Ronald Reagan, has made a statement that every American, certainly every Senator and especially the President himself, should consider at great length. The President has said: "A nuclear war cannot be won. It must never be fought." I repeat the words of the President. He said, "A nuclear war cannot be won. It must never be fought."

That Presidential statement, if true, should change our military policy profoundly. Is the statement true? If it is true, what are the implications for our military policy? Is it true. Could the United States win a nuclear war? Could any country win a nuclear war? Certainly in a war between two nuclear armed nations, there could only be a winner if one nation struck with such power that it destroyed the capacity of its adversary to respond with nuclear weapons. Or it could win a nuclear war if it could strike a devastating nuclear blow that would eliminate much of the adversary's nuclear capability and then rely on a defensive system and antimissile or SDI or star wars to prevent virtually all of the adversary's nuclear counterattack from penetrating the SDI shield. So, the President's statement that a nuclear war can never be won is not true if either superpower can build a successful antimissile system.

Consider the military implications or that fact. The ABM Treaty if successfully enforced, would, by preventing an antiballistic missile defense, assure both powers that neither can win a nuclear war. But could an antiballistic missile system or star wars work? There does seem to be a preponderance of competent and independent scientific opinion that SDI or star wars cannot work. That opinion holds that no matter how much a superpower pours into a star wars defense in scientific genius and trillions of dollars, the adversary can overcome it by pouring a roughly equal scientific and economic effort into refining and improving offensive penetrating missiles.

The kind of major antimissile effort our country has begun will change the prospects of the President's statement. With the vigorous U.S. effort for star wars, the President's statement should be modified to read: a nuclear war probably cannot be won. It cannot be won unless and until either superpower has perfected an antimissile system. That system would require not only an ability to prevent more than 90 percent of an adversary's ICBM's from finding their target. It would also have to be able to stop low flying cruise missiles. It would have to stay ahead of any technology that developed offensive penetration aids.

So let us put it another way. A nuclear war can never be won unless the arms race continues and one adversary develops a defensive technology that can stop the other superpower's offensive technology. Since we can never know what magic nuclear weapons technology may develop, we are left with the conclusion that if we reach an enforceable agreement with the Soviet Union to stop the arms race, it will be true that a nuclear war can never be won. If we cannot reach such an agreement we will live in doubt.

Which is more likely to prevent nuclear war? Is nuclear war less likely if both superpowers know that no one can win a nuclear war? Or is it better to join in a competition that will keep that assertion in doubt? Which policy is more likely to prevent nuclear war? Can there be any question? For the 40 years of the nuclear age, there has been no superpower war. And in the 22 years since the Cuban missile crisis, the two superpowers have not even come close to war. Why? The answer is easy. The answer is that both countries have known that they could not win a nuclear war.

Both the Soviet and the American Governments have known that a nuclear war would be an absolute and certain catastrophe. We know that more surely now than ever. We know the immensely advanced nuclear capability on both sides would devastate both countries. We now have the finding of the American Academy of Science that if only 1 percent of the Soviet nuclear arsenal reached Ameri-

can cities, there would be between 35 million and 56 million immediately dead Americans. Many survivors would suffer terminal illness with virtually no medical attention available.

We also now know of a new and terrible danger. Both the National Academy of Science and the U.S. Defense Department have told us that there is a clear possibility that a superpower nuclear war would trigger a nuclear winter. That nuclear winter would constitute the most terrible environmental disaster the Earth has suffered in 65 million years. It could actually exterminate mankind. The assurance that under present conditions, indeed, no one could win a nuclear war has been reinforced. It is now stronger than ever. So the prospect of a superpower nuclear war today is happily remote.

Can that change? Indeed, it can. It can change if either or both superpowers proceed with a defensive missile system—an SDI or star wars that either power comes to believe can insulate it from nuclear attack. When that happens, deterrence is gone. The impasse that has kept the peace evaporates. A superpower believes it can win a nuclear war. Then both parts of the President's assertion fall. A nuclear war can be won. So it will be fought.

MYTH OF THE DAY: U.S. AID TO UNITA WILL STOP COMMUNISM IN SOUTHERN AFRICA

Mr. PROXMIRE. Mr. President, the myth of the day is that American intervention in Angola will stop communism in southern Africa.

The myth is not complicated. Some 30,000 troops remain in Angola, along with 1,500 Soviet military advisers in support of the Marxist Luanda government. What better way to fight communism than to channel aid to non-Communist rebels seeking to overthrow the existing Government?

Sounds familiar doesn't it? You may remember, it was only 10 years ago that the CIA secretly funneled aid to UNITA, union for the total independence of Angola, forces during the civil war. The aid flowed until 1975, when Congress passed legislation prohibiting any assistance to the rebels in Angola.

A newly introduced bill seeks to reinvolve us in the Angolan war. The Kemp-Pepper bill proposes to provide $27 million in "nonlethal aid" to UNITA forces under the direction of Jonas Savimbi. The White House is said to support the bill. The Washington Post has reported that the administration is also considering a Pentagon and CIA plan that would send massive covert aid to the rebels. The Post reported that this package could be worth "$200 to $300 million."

The proposed legislation carries two disastrous consequences. First, our intervention in the Angolan war would disrupt any possible negotiated settlements for Namibian independence or Cuban troop withdrawal. The legislation would probably be counterproductive destroying talks over South-West Africa and locking in a continued Cuban presence.

Second, the proposed legislation calls for us to join efforts with the South African regime in its persistent attempts to topple the Luanda government. For 10 years, Pretoria has tried to destabilize the Angolan Government through invasions, bombings, occupation, and terrorism. Just last May, Angolan Government forces foiled a plot by South African commandos to blow up the Malongo oil complex in northern Angola. This mission came on the heels of Pretoria's announcement that it was withdrawing South African troops from Angola.

South Africa has also provided UNITA with arms, military planning, and air cover. In addition, the Botha regime has expanded regionally, injecting millions of dollars into the illegal military occupation of Namibia and funding attempts to unseat the Government of Mozambique. Despite international pressure, Pretoria continues to systematically persecute its 22 million blacks. We have no business aligning ourselves with South Africa in this war.

Mr. President, the way to fight communism is to attack it in its breeding grounds—in the poverty, disease and ignorance on which it thrives. We can do this with programs like the Peace Corps, with technical assistance or boot strap programs, and with humanitarian assistance to meet the unanticipated catastrophies of our day.

We need to attack communism before it takes root and grows among the oppressed. We need to present a positive view of America to the peoples of the world—an America based on principles, trust, opportunity, and freedom.

To plunge into Angola—either covertly or overtly—is to forge partnership with the forces of repression and racial subjugation. What better reason is there for oppressed victims to turn to another alternative, like communism? Instead of stopping the spread of communism, the current legislation may very well stimulate Communist expansion. Rejecting the Kemp-Pepper bill is the best way to lay this myth to rest.

PINOCHET'S REPRESSION

Mr. PROXMIRE. Mr. President, during the same period when nations in South America's southern cone are returning to constitutional democracy Argentina in 1983, Uruguay in 1984, and Brazil in 1985, a backlash is taking place in Chile.

In its annual country report on human rights practices, the State Department wrote that Chile's longstanding pattern of human rights violations continued in 1984. During a 7-month state of siege imposed by President Augusto Pinochet in November 1984, more than 8,000 people were temporarily detained in massive police roundups. More than 600 persons were exiled without trial to remote parts of the country, such as the detention camp at Pisagua. In 1984, 84 persons filed complaints in courts alleging torture or cruel and unusual punishment. Most of these claimed they were subjected to beatings, electric shocks or threats, especially during the first days of detention prior to arraignment. The Government also ordered police roundups and security checks in Santiago's poorest neighborhoods, censored the media, and called upon the Army to silence the protests.

There's more. The Spanish daily El Pais has reported that the Roman Catholic Church in Chile has filed 1,400 reports of torture and other violence.

Opposition is now mounting in Chile. In an unprecedented expression of national unity, 11 political parties, ranging from the Establishment right to the Democratic Socialist left signed a national accord outlining a transition from military to civilian rule. These parties do not include the Communist Party and historically represent about 80 percent of the Chilean electorate.

What does this extraordinary accord call for? It calls for direct election of a President and Congress, constitutional reforms, guarantees for human rights, and a mixed economy with developmental goals. The accord renounces violence as a political tool and calls for the abolition of decrees that limit political freedoms. And it asks permission for 4,200 political activists to return home from exile.

Never before have so many of Chile's political parties been able to agree on so much. Tens of thousands of Chileans are now signing their names to this national accord, which the State Department has described as "positive, pragmatic, and forward-looking."

How has Pinochet responded? He has renewed his Government's emergency powers, in effect since 1981, for 6 more months. These powers allow the Government to arrest people for up to 3 weeks without charge, exile or confine them without trial, and to ban all news publications.

Pinochet seems determined to stay in office. The constitution, approved 5 years ago in a questionable plebiscite, calls for a Presidential referendum in 1989, but also provides for just one nominee—one selected by the military

junta. If he has his way, Pinochet will be elected President until 1997.

If the United States is serious about promoting democracy in Chile, it must do two things. We must end our ambivalence and indifference to Pinochet's crass violation of human rights by expressing our support for the new national accord proposal. And we must ratify the Genocide Treaty. Ratification is long overdue. We have a great stake in seeing international law strengthened in the area of human rights. And we have a strong responsibility to use our moral influence in cases where genocide is alleged. As the Chilean example teaches us, human indifference brings irreversible tragedy.

RECOGNITION OF SENATOR GORE

The PRESIDING OFFICER. Under the previous order, the Senator from Tennessee [Mr. GORE] is recognized for not to exceed 15 minutes.

STRATEGIC ARMS CONTROL

Mr. GORE. Mr. President, in the first of this series of speeches that I have been making this week, I mentioned that Congress is still awaiting, 1 month after the date mandated in law, a report from the Secretary of Defense on the characteristics of the Midgetman missile system. Today, I understand that this report is likely to be further delayed, and in fact, I have formed a strong suspicion that we shall not see it until after the summit, although it would be pleasant to be proved wrong.

Fortunately, however, Members of this body who desire to be informed on the Midgetman have another recourse. They may request from the Government Accounting Office access to a classified report on the Midgetman, prepared by the Ballistic Missile Office at Norton Air Force Base, which is charged with overall responsibility for developing this system. Granted, the BMO report is not the report that this body will see after it has been worked over by the Pentagon: that is probably a very strong argument for reading it. Those who are interested should apply to the GAO's National Security Division, which can make the report available to persons having appropriate clearances.

I intend to return to the subject of the Midgetman another time. The rest of my remarks today, however, will center on another dimension of the problem of stratetic stability: the interaction between offensive and defensive forces.

The New York Times of November 5 carries an account of the President's news conference with members of the Soviet press. During this interview, the President made a remarkably penetrating observation concerning the interplay between offense and defense. I would like to quote it in full because much attention has been devoted to another statement by the President which is again discussed in the news this morning. But this second statement, I believe, deserves more attention. I quote:

> If someone was developing such a defensive system and going to couple it with their own nuclear weapons, offensive weapons, yes, that could put them in a position where they might be more likely to dare a first strike.

Following this line of reasoning, the President went on to say—twice, as a matter of fact—that in order to avoid this destabilizing potential, the United States would not put a defensive system in place until we do away with our offensive missiles.

Now, surely, this latter point is in error; and the White House staff has explained this morning that it constituted a bit of what they referred to as "Presidential shorthand." That stands to reason, because I do not really expect that the President would break faith with the supporters of SDI in the conservative wing of his party to such an extent. Surely, none of them is prepared to see the deployment of a defensive system held up until all offensive systems have been laid aside, and the lion has lain down with the lamb.

Granted, the President was pretty clear about the matter. He said elsewhere in this interview that the real purpose for a defensive system would be to prevent some third party—a "madman," in the President's words—from attacking either the United States or the Soviet Union, should be manage to scrape together a delivery system.

Nevertheless, I am willing to concede that the purpose for all the massive expenditures ahead of us in SDI could not possibly be to deal with third parties, in some millennial world in which the United States and the Soviets had already laid down their arms. Perhaps it was simply a misprint.

But, I am not prepared to let the President's other statement—on the interaction between offenses and defenses—pass. The reason for it is that he was dead right, and has stated, in his usual succinct way, facts which others approach only through acrane calculations.

In fact, I think we could profit by looking into the implications of the President's statement, and by perhaps doing a few simple numbers of own.

The question is: What is wrong with a little bit of defense; a light screen, perhaps , useless for defending populations, but able perhaps to complicate and even thin out a Soviet first strike against our ICBM's? Would that not enhance deterrence? And is not enhancing deterrence what stability is all about?

These are, after all, very important questions, very pertinent to what is going on; because, for every true believer in a complete, perfect defense of the sort in which the wonderful little girl with the crayon drawing in the TV add believes, there are many others who think in terms of just defending ICBM's, in order to enhance deterrence, not replace deterrence, as the President has said he wants to do. However, for those who believe that such a light screen plan might work, there is a hook. It would work only in a world where we were the sole proprietors. But we do not live in that kind of world, and things that look great if only the United States has them, can take on an entirely different cast if we assume that the Soviets follow us, or even beat us to the punch.

So let us make that tiny, little leap of the imagination and assume that the Soviet Union actually goes ahead and deploys a limited defensive system.

In my speech of 2 days ago, I used an illustrative model of how United States and Soviet forces might look if reductions were carried out in a manner consistent with the United States proposal for a 4,500 overall cap on ballistic missile warheads. In that model, the United States could end up with 762 ICBM silos and 14 *Ohio* class submarines. On the submarines, we would have 2,688 D-5 warheads. The Soviets could end up with 700 ICBM silos and 15 submarines. In the silos, the Soviets would have 2,500 warheads.

Quite clearly, the Soviets would be able in theory to destroy our silo-based forces, since they would have nearly four warheads per target, where only two would suffice. No matter. We still have the submarines, of which two-thirds would ordinarily be at sea and expected to survive. That is 1,792 surviving D-5 warheads.

Every day, we can read testimony before this body—not science fiction but testimony—crediting the possibility of a defensive system that could track and destroy an assault involving eight or more times that number of weapons. So may we not postulate a Soviet system capable of dealing with a mere 1,792 warheads?

One may play with the numbers, but the message remains the same. Just as the President said in his interview for the Soviet press, if you combine a defensive system with offensive weapons, you can put someone in a position where they might be more likely to dare a first strike.

In the 1970's, when it began to look as though negotiations on SALT II were about to culminate in an agreement, some who are now in power in the present administration, including

the President himself, criticized the then President of the United States as he was attempting to complete those protracted and delicate talks. The current President and others at that time worked tirelessly to impugn the value of the treaty even before it was finished and, above all, to assure that it would never be ratified, and they succeeded.

It is important now to look closely at the reason for their zeal. It was because, in the view of those who supplied analysis for this group, under SALT II, the Soviets might be in a position from which they could derive theoretical benefit from a first strike against our ICBM silos.

As I have been attempting to point out in this little series of speeches, the Scowcroft Commission took the problem of a first strike seriously, and its solution was to move toward the deployment of mobile single-warhead ICBM's in an appropriate arms control setting.

Seemingly, the President understood and endorsed this. Many of us in Congress gave our word that we would fight hard to secure the approval of at least 50 MX missiles. And we made it abundantly clear both in private and in public that 50 was the number we would approve. The President, in turn, gave his word that his administration would move forward vigorously toward the development and deployment of a mobile single-warhead missile. We kept our word. But the President has now proposed to ban not just new MIRV'd mobile ICBM's—like the Soviet Union's SS-X-24—but all mobile ICBM's, including the Midgetman.

This is inconsistent with the Scowcroft Commission recommendations and the specific pledge made by the President. More importantly, his new proposal would close off the most promising avenue to strategic stability.

Instead, what he proposes to leave open as the means to preclude a first strike advantage is the deployment of defenses against ballistic missiles. Yet, as we have just seen, the President not only knows that this is destabilizing, but also was prepared to say so before an audience comprising the entire reading public of the Soviet Union.

Clearly, the President's logic in this statement is correct. But, if so, then the work of his advisers must be faulty, indeed.

Mr. President, I hope to continue this series of speeches during the remainder of the week.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond 11 a.m.

ST. MARYS HIGH SCHOOL IN PLEASANTS COUNTY, WV, RECEIVES NATIONAL EXEMPLARY SCHOOL AWARD

Mr. BYRD. Mr. President, on October 1, 1985, St. Marys High School in Pleasants County, WV, received the national exemplary school award through the Secondary School Recognition Program of the Department of Education.

For those of you who are not familiar with this award, schools are nominated by the chief State school officers in each State to the Department of Education. These awards are made to those schools that exhibit, among other qualifications, clear academic goals, positive school climate, well-articulated curriculum, community support and development, teacher efficacy, administrative leadership, and student achievement. Of the 509 secondary schools nominated to compete for this award, St. Marys High School was one of the 212 that were finally chosen.

Education is of primary importance to every man, woman, and child in this country. It is only through providing our young people with a quality education that we can hope to lead the world in technological development. It is only through instilling into our young people a thirst for knowledge that we can produce capable and good leaders of tomorrow, and it is only through knowledge that we can remain a free nation.

In the last 50 years, we have seen many changes in our lives. New words and understandings have been added to our vocabularies—microchips, laser disks, laser surgery, mechanical hearts, organ transplants, space stations—these terms are no longer something that we only read about in the comic strips or see in science fiction movies. What was fiction 50 years ago is reality now.

Our Nation has stepped over the threshold into a world where man is only limited by his vision and commitment. Gone are the days when an education was for the well-to-do only. Education has become a necessity in meeting the demands of daily life for every American.

I am very proud of the role that St. Marys High School is playing in educating our young people. I commend the community, the teachers, and the students for their commitment to excellence in education. It is only through the joint cooperation, commitment, dedication, and support of the community, parents, students, and academia that such excellence can be achieved and our young people be prepared to meet the challenges and promises of the future.

GERALD J. LEVY ASSUMES CHAIRMANSHIP OF THE U.S. LEAGUE OF SAVINGS INSTITUTIONS

Mr. KASTEN. Mr. President, a good friend and outstanding Wisconsinite, Gerald J. Levy of Fox Point, WI, is being installed today as the chairman of the U.S. League of Savings Institutions, the principal trade group representing this Nation's savings association and savings bank businesses. I rise today to extend to him congratulations and best wishes as he undertakes this very responsible and demanding assignment.

Mr. Levy is chairman of the board and president of Guaranty Savings & Loan Association of Milwaukee, an institution with approximately a quarter of a billion dollars in assets. He joined Guaranty Savings & Loan in 1960 and became its president and CEO in 1973. He took on the additional responsibilities of chairman of the board in 1984.

Mr. Levy has served as a member and chairman of the Savings & Loan Review Board of Wisconsin, president of the Wisconsin League of Financial Institutions, Ltd., vice chairman and director of the Federal Home Loan Bank of Chicago, a member of the Federal Home Loan Mortgage Corporation's Advisory Committee, a director of Salomon Capital Access for Savings Institutions, Inc., and in numerous capacities—including that of vice chairman—of the U.S. League of Savings Institutions.

He is highly respected in the business community in our State and has made a fine contribution to the betterment of his community through numerous volunteer roles. He serves as a member of the board of trustees of Mount Sinai Medical Center, as a director of the Midwest Athletes Against Childhood Cancer Fund, as a director of the Wisconsin Partnership for Housing Development, Inc., as a trustee of the Wisconsin chapter of the Leukemia Society of America, Inc., and as a member of the advisory board of Milwaukee's Neighborhood Housing Services Program. Mr. Levy also has been a member of the board of trustees of the Citizen's Governmental Research Bureau, Inc., and a director of the United Performing Arts Center Fund.

Mr. President, I ask that my colleagues in the Senate join me in extending to Gerald J. Levy our con-

gratulations as he leads the U.S. League of Savings Institutions into a very important year for the savings institutions business.

AMERICA'S LIABILITY EXPLOSION: CAN WE AFFORD THE COST?

Mr. KASTEN. Mr. President, the crisis in product liability law continues to grow. This year, hundreds of thousands of businesses across the country have seen their product liability insurance rates skyrocket, and many have been forced to go out of business or go "bare" and attempt to continue manufacturing their products with no insurance coverage at all.

Clearly, the time has come to act. I have been pushing for several years for national product liability reform legislation. I urge my colleagues to consider the havoc the current liability system is causing and to lend their support to the effort to reform this area of law.

Last month, FMC Corporation Chairman Robert Malott addressed this growing national problem in a speech given at Northwestern University Law School. It is an excellent speech, and it outlines the increasingly serious crisis in product liability. I commend the address to the attention of all my colleagues and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

AMERICA'S LIABILITY EXPLOSION: CAN WE AFFORD THE COST?

(By Robert H. Malott)

I am delighted to have this opportunity to discuss a concern that is uppermost in my mind—namely, the destructive and rapidly escalating trend toward liability litigation in this country and the implications that this trend portends not only for industry but for society as a whole.

It is a trend that is costing the American public billions of dollars each year, it is undermining the competitiveness of U.S. industry, and it is threatening the very existence of some businesses in this country. Yet it is a trend that the vast majority of the American people has either failed to understand or has persistently chosen to ignore.

AMERICA'S LIABILITY EXPLOSION

The disturbing truth is that America has become the most litigious society in the world. Last year, one out of 15 Americans filed a private civil lawsuit of some kind. In all, over 13 million private civil law suits were filed in state and federal courts.

No less than the highest court in the land is appalled at the situation. As Chief Justice Warren Burger lamented in a recent speech, our society today "has an almost irrational focus—virtually a mania—on litigation as the way to solve all problems."

In some instances, the grounds for resorting to litigation strain credulity. Let me cite just a few examples that sound more like stories out of Ripley's "Believe It or Not" than examples of responsible American jurisprudence:

Item: Two Maryland men decided to dry their hot air balloon in a commercial laundry dryer. The dryer exploded, injuring them. They sued the manufacturer of the dryer and ended up winning nearly $900,000 in damages.

Item: An overweight man with a history of coronary disease suffered a heart attack while trying to start a Sears lawnmower. He sued Sears, charging that too much force was required to yank the mower's pull rope. A jury in Pennsylvania awarded him one million dollars, plus another $500,000 in prejudgment interest.

Item: A two-year-old child being treated in the hospital for bronchial spasms suffered brain damage from a drug overdose. Although the hospital staff had clearly exceeded the dosage level prescribed by both the attending doctor and the drug manufacturer, the child's parents successfully sued the company producing the drug. The jury award? Nine million dollars in compensation and $13 million in punitive damages.

If you think these are isolated cases of absurdly generous liability awards, you are wrong. Last year, awards of a million dollars or more were given in more than 360 personal injury suits—an incredible 13 times the number 10 years ago.

The list of those afflicted by liability litigation runs the full spectrum of American business—including

What is causing the problem? I attribute the current situation to the following: first, the ambiguity of current liability laws; second, an increasing acceptance of the concept of victims' *entitlement* to compensation; and third, the contingency system for compensating the legal profession.

THE EXPANDING DEFINITION OF LIABILITY

Since the early 1960's, the concept of liability for product-related injuries has been relentlessly expanded by both state and federal courts.

First, the courts created a new legal theory, strict liability, to enable claimants to recover damages for injuries caused by defectively manufactured products. This happened because the courts believed that business—rather than the injured party—should bear the cost of manufacturing errors, regardless of fault.

Then, the concept of strict liability was extended from defects in manufacturing to defects in a particular product's design, in its operating instructions, or in its safety warnings. In essence, the focus of product liability was shifted from the conduct of manufacturers to the condition of the product itself.

However, unlike the test for manufacturing defects, there are no clearcut standards to guide judicial decisions on the adequacy of a product's design or its safety warnings. Although some 30 states have now enacted product liability statutes, no two are alike. Consequently, cases based on similar facts, but tried in different states, can produce strikingly different and often contradictory judgments.

In an FMC case concerning a construction worker who had driven a crane into high voltage lines, an Illinois court ruled *against* FMC for not providing adequate safety warnings and for not installing automatic warning devices, even though the devices available at the time the crane was manufactured were not reliable.

Yet courts in two other states, in similar cases, ruled that the crane manufacturers were *not* liable, because the hazard of driving a steel boom into electrical lines was obvious. Any resulting injury was therefore the responsibility of the crane operator.

Such inconsistency in product liability judgments has produced enormous confusion among manufacturers and consumers alike, with neither side knowing what rights or responsibilities they have and what limits, if any, there are on liability

ENTITLEMENT TO COMPENSATION

Another factor contributing to the chaos in liability law is the growing "attitude of entitlement" in compensating injury victims, even in those cases where it is obvious that the manufacturer cannot be charged with responsibility or, at a minimum, responsibility is shared between the manufacturer and the injured party.

A decade ago, injured persons whose own carelessness was responsible for injury could not successfully prosecute. However, since the mid-1970's, 10 states have adopted comparative fault standards, which allow plaintiffs to recover damages even if they share responsibility for their injuries. By adopting the concept of comparative fault, these states have precipitated a whole new generation of lawsuits and are encouraging increasing numbers of people to seek compensation through suit or the threat of litigation.

Underlying this attitude toward victims' compensation is the assumption that the insurance industry—fed by corporate premiums—has a bottomless pool of funds to compensate the injured, no matter how tenuous their claims. Indeed, in some cases, courts and juries have seemed far more concerned with compensating the plaintiffs than in establishing the liability of the manufacturer.

Witness the recent litigation over Agent Orange. The judge pressured the seven corporate defendants to pay $180 million in death and disability compensation to Vietnam veterans and their families even though, as he said later, he did not believe there was any medical evidence to support their claims.

LUCRATIVE CONTINGENCY FEES

The third factor contributing to the number and cost of liability claims the contingency system for determining legal fees.

Because plaintiffs do not incur liability by initiating action, they are encouraged to pursue injury suits even if the evidence for their claims may be relatively weak. Similarly, with liability awards now reaching a million dollars or more, lawyers have a powerful incentive to keep filing liability cases, even if the prospect of winning any one case is highly uncertain. In short, by eliminating the financial risk of bringing a case to trial, contingency fees are encouraging both plaintiffs and trial lawyers to clog the courts with suits.

In addition, contingency fees tend to increase the size of injury awards, as juries factor in the cost of legal counsel when determining the total size of damages for the plaintiff. This cost is far from insignificant.

Indeed, if one considers the legal fees for both plaintiff and defendant, it becomes clear that more money is being paid today to adjudicate a claim than the compensation being paid to victims.

According to a study by the Rand Institute For Civil Justice, only 37 percent of the amounts paid for compensation and legal fees typcially goes to the claimant. The balance—or 63 percent of the assessed damages—goes to pay the legal fees of the litigants.

Because of high contingency fees and the potential for lucrative awards, liability law-

yers have an enormous stake in preserving the status quo. I can assure you the plaintiffs' bar is well aware of this and is effectively organized to resist change.

WHO PAYS? WE ALL DO

Who ends up paying for our current mania for litigation? It's obvious that we all do. The growing tide of liability litigation is imposing enormous costs on consumers, on business, and on society as a whole.

As consumers, we are paying not only through higher product prices but also through the reduced availability of many products and services. Already, astronomical legal settlements and escalating insurance premiums have forced more than a few companies to drop product lines or, in some cases, to go out of business.

This trend is cutting across all segments of U.S. industry, as the following examples illustrate:

In the past decade, 10 of the 13 U.S. firms making football helmets have had to stop production, due to runaway jury awards.

In 1983, Merrell Dow was forced to discontinue production of the drug Bendectin, although the Food and Drug Administration approved the drug for treating women who suffered nausea during pregnancy. The reason? The cost of liability insurance for making Bendectin had reached 10 million dollars a year, or over 80 percent of the company's annual sales from the drug.

And today, the continued production of small aircraft in this country is being seriously threatened by burgeoning liability costs. This year, those costs to general aviation airframe manufacturers will amount to $100 million, requiring an average increase of $50,000—or 50 percent—to the cost of the average plane. Such cost increase have already led one manufacturer, Beech Aircraft Corporation, to shut down its plant in Wichita, Kansas, and eliminate up to 12,000 jobs.

Perhaps the most pernicious example of this trend is the decline in production of the DPT vaccine, which is used to prevent diphtheria, tetanus, and pertussis—commonly known as whooping cough—among young children.

Since the introduction of the vaccine in the 1920's, the number of deaths in the United States from pertussis each year has declined dramatically—from one in 10,000 to one in 10 million. Yet, nearly a dozen companies have dropped out of the DPT market in the last ten years, leaving only one U.S. producer of the vaccine and creating dangerous nationwide shortages. The reason? Excessive liability costs.

The problem is that the courts focus on compensating the pain and suffering of those injured—not on serving the needs of society as a whole. This attitude is not only adversely affecting the American public but is significantly increasing the costs of doing business for many U.S. companies and undermining their ability to compete. According to a study by the Commerce Department last year, the insurance costs that U.S. companies face for product liability coverage are many times higher than those facing manufacturers in Europe and Japan. In fact, some U.S. manufacturers of machine tools and textile machinery must support liability premiums that are *20 to 100 times* greater than those paid by their foreign competitors.

FMC's own experience corroborates this. Over the last five years, our total insurance expenses in the United States, including self-insured losses, have cost five times as much as our insurance premiums in international markets. These differences in liability costs can create a major competitive disadvantage for domestic manufacturers in both local and foreign markets.

For some companies, the costs of product liability litigation are not only hurting their ability to compete, but are forcing them to seek refuge under Chapter 11 of the federal bankruptcy laws. Since the Manville Corporation made history in 1982 by declaring bankruptcy at least three other companies have followed suit.

In 1983, the James Hunter Machine Company, a small Massachusetts manufacturer of textile machinery, was forced to file for bankruptcy after being in business for 136 years because it faced liability claims totaling over $17 million.

Last year, Aquaslide 'N' Dive Corporation, the nation's largest manufacturer of diving boards and swimming pool slides, also sought protection under federal bankruptcy laws, because it did not have enough insurance or assets to cover potential liability claims.

Most recently, the A. H. Robins Company has filed for bankruptcy, due to liability suits for injuries related to the Dalkon Shield, the intrauterine birth control device the company removed from the market in 1974. By July of this year, Robins had already paid nearly $500 million in awards, settlements, and legal expenses to dispose of approximately 9,000 liability suits. Yet another 5,000 claims are still pending and more are expected.

TIME TO REVAMP LIABILITY LAWS

This situation is absurd. How many more companies must be forced into Chapter 11 before we realize that it is time to revamp our liability laws? We are rapidly approaching the point where the competitive ability of U.S. manufacturers is being determined more by the vagaries of state laws and jury awards than by the price or quality of their products.

In considering potential areas for reform, it is instructive to compare our system of liability with that prevailing in Western Europe and Japan, where the incidence of product liability claims is far lower and the average size of awards is much smaller. In my view, there are three factors that account for these differences in the frequency and cost of liability ligigation.

First, contingency fee arrangements are not allowed in Western Europe or Japan. Instead, plaintiffs must pay their attorneys during the course of litigation and they risk paying the legal costs for the defense if they lose.

Second, damage awards in Europe and Japan usually only cover actual expenses and loss of income. Punitive damages and awards for pain and suffering are not readily available in Europe, and they are nonexistent in Japan.

As a result, plaintiffs must bear a significant financial risk in bringing a case to trial, and generally they have lower expectations for awards. Those two factors alone act as a major disincentive to litigation.

Third, and most important, the Europeans and the Japanese have a totally different attitude toward litigation than do Americans.

Europeans generally believe that, if a product is made safely, it is up to the consumer to use it safely. The Japanese are even more conservative in their approach to litigation. They rarely use the legal system to resolve disputes and, in fact, tend to consider litigation as a form of harassment.

In contrast, Americans tend to be keenly aware of the availability of legal redress for accidental injury and appear to be willing to pursue such a course without reservation. They rely on the courts not only to settle disputes, but also to provide extensive compensation for injuries, often with little regard for who is at fault and with *no* regard for the costs they are imposing on business and society.

In my opinion, this litigation mentality cannot continue. The costs have simply become too great. Our runaway liability is contributing significantly to the competing claims of different interest groups or subordinated to other, more pressing issues on the Congressional agenda.

Efforts to gain support for product liability reform in the American Bar Association have also been blocked, first at the San Francisco convention two years ago and more recently in New Orleans. This has been largely due to the enormous influence of the trial bar.

I challenge all of you, as leaders in the legal profession, to join the fight for product liability law reform. We need your help to broaden public awareness of the current crisis in product liability but, even more importantly, we need your help to counteract the political power of the trial lawyers. As vigorous supporters of the status quo, they have placed a virtual stranglehold on efforts to enact federal product liability legislation—and given the legal profession an unfortunate reputation for being more concerned with protecting its own interests than with serving the interests of society as a whole.

I urge you to stand up and be counted. Make product liability reform an issue within your company, with your trade associations, and with your outside counsel. Let them know why the issue is important to you and why it should be important to them.

Above all, I urge you to make it an issue with your congressmen. It is imperative that we maintain pressure in Washington for federal preemption. If Congress keeps brushing the issue aside, we will continue to see increasing numbers of U.S. companies succumbing to the weight of excessive litigation, exorbitant legal fees, and escalating damage awards. That is a price we can no longer afford. The time to bring our runaway liability system under control is now.

CHRISTMAS SEAL CAMPAIGN OF THE AMERICAN LUNG ASSOCIATION

Mr. DOLE. Mr. President, I would like to call to the attention of my colleagues the fact that today is the official opening day of the annual Christmas Seal Campaign of the American Lung Association.

THE COSTS OF LUNG DISEASE

Lung diseases are the third most common cause of death in the United States. A total of 86 million American men, women, and children—one-third of our population—suffer from some form of chronic respiratory illness. The direct economic cost to our Nation of these diseases is estimated at nearly $30 billion each year.

Lung cancer and emphysema, once seen almost exclusively among men, have risen dramatically among American women, and the incidence contin-

ues to rise. In fact, by the end of this year, lung cancer will have become the No. 1 cause of cancer deaths among American women. These and other smoking-related diseases cause 350,000 premature deaths in this country each year.

Asthma is the most common chronic disease of childhood, and is the major cause of school absenteeism. Tuberculosis, although treatable, has not yet been eradicated. Pneumonia is the leading cause of death by infectious disease in the United States.

THE AMERICAN LUNG ASSOCIATION—LEADING THE FIGHT

Leading the fight against death and disability from lung disease is the American Lung Association—the Christmas Seal people. The oldest nationwide voluntary health agency in the United States, it was originally founded in 1904 to combat tuberculosis, then our Nation's greatest health menace. This organization has a long, proud history of sponsoring community health education and research efforts that have succeeded in reducing TB from the leading killer disease to the ranks of controllable illness. Today the Lung Association, its medical arm, the American Thoracic Society, and its 139 affiliated associations throughout the country, work to control and prevent all lung diseases and some of their related causes, including cigarette smoking, air pollution, and occupational hazards.

ALA works with the Federal Government, local governments, private industry, and other voluntary agencies to keep in the forefront of the public health movement as our country grows and changes.

THE BEST OF TRADITIONS

For 78 years now, the American Lung Association has relied on donations to its Christmas Seal Campaign and on other voluntary contributions to support its work. Christmas Seals remind us at holiday time that, while lung disease remains a serious problem, much of it can be prevented. Gifts from the public to the Christmas Seal Campaign represent among the best of traditions during the holiday season.

This year, Christmas Seals are reaching into 60 million American homes, including those of most of my colleagues and their constituents. I commend the American Lung Association for its efforts and wish it continued success.

JOE C. MORRIS' ELECTION TO THE VICE CHAIRMANSHIP OF THE U.S. LEAGUE OF SAVINGS INSTITUTIONS

Mr. DOLE. Mr. President, it is always satisfying to see a talented, dedicated and hard-working individual receive the recognition of his or her peers. That recognition is being granted to Joe C. Morris of Emporia, KS, who today assumes the position of vice chairman of the U.S. League of Savings Institutions. Most in this Chamber are aware, I believe, that the U.S. league—with 3,500 member savings and loan associations and savings banks recording assets of $1.1 trillion—is the largest trade group representing the savings institutions business.

Joe Morris is president and chief executive officer of Columbia Savings Association of Emporia, a federally chartered institution with 15 offices throughout Kansas and assets of $440 million. Mr. Morris joined Columbia Savings in 1964 as a loan officer, and 2 years later was promoted to treasurer. In 1969 he became that institution's executive vice president, and assumed his present position in 1972.

During his 21-year career with Columbia Savings, Mr. Morris also has served his chosen field on both the State and national levels. He has served as chairman of the Kansas League of Savings Institutions, of which he presently is a director, and as president of the Kansas Savings and Loans Institute. As an active member of the U.S. League of Savings Institutions, Mr. Morris has been a director and has served in numerous major committee assignments, including the chairmanship of the Corporate Tax Issues Committee and the Tax Incentive for Savings Committee.

Mr. Morris has devoted much time to community affairs in Emporia, where he was born and reared. He served two terms on the Emporia Board of Education and currently is a member of a special presidential advisory committee at Emporia State University. He has been a vice president of the Chamber of Commerce of Emporia, and is past president of the United Way and the Rotary Club. An active promoter of community development, he has served as a director of Emporia Enterprises, an organization devoted to fostering economic growth. The Kansas Kiwanis Foundation recognized Mr. Morris, his wife, Susan, and their three sons in 1981, honoring them as the Kansas Family of the Year.

We Kansans are proud of Joe Morris' accomplishments, Mr. President, and we congratulate him and wish him success today as he begins his 1-year term as vice chairman of the U.S. League of Savings Institutions. After this term is up, he will ascend to the presidency of the U.S. league, and we will of course look forward to working with him in that capacity as well.

BIRMINGHAM AND THE NEW SOUTH

Mr. HEFLIN. Mr. President, recently one of the many fine universities in my home State, the University of Alabama at Birmingham, held their "1985 Honors Convocation." The principal address at that ceremony was delivered by Dr. Richard Arrington, Jr., mayor of the city of Birmingham.

Dr. Arrington's address was entitled "Birmingham: The Reality of a New South Experience." In many ways, Mr. President, Dr. Arrington himself is the epitome of the current edition of the "New South." A biologist specializing in invertebrate zoology by education, he first became involved in academic administration and then in politics. After having served two terms as a member of the Birmingham City Council, he is now in his second term as the city's mayor, and his determination and vision are leading my State's largest city into an even brighter 21st century.

Dr. Arrington's talk was very well thought out and presented an accurate image of Birmingham as it relates to what is today thought of as the "New South." Of course, Mr. President, as the mayor pointed out, the term "New South," with all the promise and potential it implies, has been around since at least the 1880's, when Atlanta journalist Henry Grady pointed out the need for his region to recover from the Civil War and develop a new industrial thrust.

In too many ways, however, efforts to build such a "New South" have failed to reach fruition. Today's efforts—exemplified by Birmingham's growth, evolution, change, and development—seem different, and Dr. Arrington's remarks are very timely in this regard.

I commend his remarks to all of my colleagues, Mr. President, and ask unanimous consent that his address be printed in full in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

BIRMINGHAM: THE REALITY OF A NEW SOUTH EXPERIENCE

(By Dr. Richard Arrington, Jr.)

Ever since the Civil War era, the people of the South have shown an acute sensitivity about their deficiencies. Southerners have felt different. Some have focused on the Civil War defeat. Others have worried about economic failure and political impotence. Still others have lived with guilt because we fought a war over the institution of slavery, wrestled with racial prejudices more overtly than the rest of the nation, and were often judged by others to be out of step with America.

However, for the last one hundred years there has also been a growing impulse within the South to improve Southern economic development, cultural life, educational opportunities, and the attitudes of people in general. Whether black or white, rich or poor, we Southerners have lived with a special brand of selfconsciousness and self-examination which has often taken the form of seeking change.

One of the first social commentators to call for a New South was the Atlanta jour-

nalist, Henry W. Grady. In the 1880s, Grady urged the need of this region to recover from the Civil War and develop a new industrial thrust. And, just as my grandfather's and father's generations grappled with the same task of molding the New South of their times, I expect that my grandchildren and their children will discuss and debate with equal certainty the manifestations of their "New South"—just as I shall attempt to do here today.

The South's quest for renewal and development has taken different forms in its constant metamorphosis. Following Grady's call for a New South, there was indeed some change. In the late nineteenth century, new cotton mills sprouted throughout the South, providing new sources of family wages and bringing a degree of diversity to a hard-pressed agricultural economy. Life in fact was changing, and the rallying cry, "The South Shall Rise Again," seemed to be coming true. But that period of change fell far short of creating the transformation southern visionaries had in mind and what history tells us was so badly needed. The failing may well be explained by the words of David Mathews. In addressing the topic of the New South, Dr. Mathews wrote:

"But somehow in that New South, we became so caught up in our own propaganda that we forgot to look at what we really had. And what we really had was just an extension of the poverty of the plantation system shifted into an industrialized framework. A 'family wage' in the new industrialized South meant that every member of the family who wanted to eat, even women and children, had to work long and hard for the money to pay the commissary for food. And while the image of the South prospered, the people who made that image possible, the cheap labor force, were a straggly, tubercular lot, and not a credit to anyone. . . . We should learn from earlier New Souths that progress without people was just so much technology."

If we examine the history of all of the previous New Souths, seeking the basis for the failures which might have occurred, one major lesson is evident. More often than not, the efforts at social change were not targeted at the uplift and transformation of the individual, the people. Our true wealth is not just our vast lands and rich natural resources but our *human* resources. People are the foundation for lasting, constructive change. The earlier New Souths failed because the concept of progress simply was not extended to a broad base of the Southern population. Economic and social change cannot thrive in a society where only one-third of the people are to be part of the progress. The essential and bitter lesson which the South has had to learn is that, in a democratic society, when large segments of your population are programmed for failure, progress will not be achieved. Therefore, earlier New Souths turned out to be ineffective, empty, and perhaps even mythological.

Today, in certain parts of the South, there seems to be another effort to achieve a New South, but this time there appears to be more substance, more reality to the growth. Indeed, the metamorphosis to the current New South has brought our region to the point of emerging as a prime center of positive economic and social change.

Although Birmingham is a relatively young Southern city, its short history contains the essential ingredients of the New South experience: success mixed with disillusionment and defeat. Emerging in the 1870s as an industrial center, with rich resources of coal, iron ore, and limestone, the city soon found itself in the grips of a cholera epidemic which sent people fleeing from its environs. By the 1920s there was another period of rapid development and then, following the Crash of 1929, yet another period of social and economic trauma. No city in the United States was hit harder by the Great Depression than was Birmingham. More recently, the iron and steel industry that once had made Birmingham the "Magic City" began to fall upon hard times. Between 1950 and 1970 Birmingham lost more than 25,000 steel-related jobs and with them the cornerstone of the city's initial economic way of life. Almost simultaneously Birmingham experienced the civil rights movement. The reality is that the 1950s and 1960s were decades of overt racial hostility in our city. In retrospect, racial inequalities had long been developing across America, and in Birmingham all this came to a painful, if needed, climax.

As we have borne these different experiences, however, we have learned that we must live together, work together, and trust each other if we are to survive and prosper. And in the process we have progressed dramatically toward a New Birmingham and a genuine New South. Our recent progress has been real because the target of the new progressive plan has been *all the people of Birmingham:* all the private interests and all the public institutions. It has been real because we have steered clear of unfounded boosterism and because we have tried never to move forward on a particular issue without being mindful of the lessons of our past.

There are many dimensions and many players involved in this story of recent growth. Let me focus briefly on several of the basic changes which have occurred in Birmingham in the last decade or two.

With key corporate, educational, and governmental leaders in the forefront, and the overwhelming majority of our citizens pursuing common goals, the city's economic transition accelerated. From an economy originally built on the steel industry, we have fashioned a more diversified and promising economy based on health, education, research, utilities, telecommunications, finance and insurance. Although we have retained a significant number of heavy industry jobs, we also can claim the largest number of engineers of any city in the South except for Houston. A *balanced* economy is the cornerstone of Birmingham's new quality of life.

While Birmingham has successfully dealt with economic transition, it has, at the same time, dealt with social and political change. The shifting and sharing of political power among all the people of this community has been a remarkable story in itself. The manner in which Birmingham handled this transformation has been a tribute to its people. Indeed, we believe that some of America's most significant recent history was acted out in this city. And while many of us do not fully appreciate the significance of the Birmingham freedom struggle, I have no doubt that it will be perceived in history as one of our nation's most significant social and political developments.

Much of Birmingham's recent development also must be attributed to The University of Alabama at Birmingham. This institution has been outstanding in its sensitivity and responsiveness to our community UAB has provided this city not just with jobs but with talented and skilled individuals who are an intricate part of our community's welfare. UAB has enhanced our city's image and given us pride and hope for the future, especially in terms of economic development.

To be sure there are still big challenges awaiting us in the current transition. But with renewed faith in ourselves and some success under our belt, we are certain that we are equal to the task. In fact, because of this transition, because of the price we paid as a people and the lessons we could not help but have learned, and because of our new forward-looking attitude, I can speak confidently today of a New South of which Birmingham is an integral part—a community in which positive attitudes and social change continue to evolve. America has a lot to learn from the Birmingham experience: people of different races and different social and economic backgrounds *can* work together to build a better community.

Finally, I want to address my closing remarks to these fine young people whom we honor here today. I commend them for their achievements. I applaud their hard work and sense of dedication to individual achievement, for such achievement is one of the foundations of community and national success. At the same time, I challenge each of you not just to be talented and educated but also to be concerned, compassionate, and committed. I challenge you to shape your philosophy of life *early* so that you may have more time to give of yourself to that which you believe to be important. Let your goals be something *beyond* individual achievement. It is never enough to just succeed individually. In some way—perhaps small, perhaps great—all of us must make a positive difference in the society around us. We cannot afford to become calloused of conscience and indifferent to poverty, suffering and other injustices. We, who are part of the *genuine* New South, face a special challenge—a call for the pursuit of excellence and a call for conscience. This time our drive toward social and economic progress must not falter. We must be bold in matters of justice and human compassion as we are in the exploration of space or the development of military might. We must stand as strongly for human dignity and freedom in the South Africas of this world as we stand for corporate profits and free enterprise. We must apply the lessons of our South to the problems of America and the world. Clearly, we have something to offer.

There is a New South—a New Birmingham—wiser, bolder, and progressive in a meaningful way. The greatest resource of the New South is its people with their enduring hope. For, as we have seen, our hope *can be* transformed into action. I urge you to join me in making a personal contribution in this time of progress for the people of our city and for those well beyond.

RANDY WILLIAMS: PRESIDENT OF CIRCLE K INTERNATIONAL

Mr. HEFLIN. Mr. President, it is a great honor for me to rise today in recognition of an outstanding honor recently achieved by a fine young Alabamian, Randy Williams of Montgomery. This past August, Randy, a graduate student at Auburn University at Montgomery, was elected president of Circle K International.

In this position, Randy serves as the leader of the collegiate affiliate of

Kiwanis International. A coeducational service and leadership development organization, Circle K now has more than 10,500 members in approximately 600 clubs spread throughout 6 countries. The organization has come a long way from its beginning as a service fraternity in 1936, and since its official recognition by Kiwanis Internatinal in 1955.

The election of Randy Williams as president of Circle K International is but the latest evidence of the fine Circle K district organization in my home State. There are Circle K Clubs at more than 20 colleges, universities, and junior colleges across the State. Through the years, the contributions these groups have made to improving the welfare of Alabamians have been truly unbelievable. Through involvement with local boys and girls clubs, children's homes, Special Olympics, the Muscular Dystrophy Association, and other groups, they have helped us all build a better world.

During the last 30 years, there have been some 25 times that the members of Circle K have chosen young people from Alabama to serve on the international board of officers, helping to set the policy that has steered the organization through its years of growth. In addition, clubs from Alabama have won 10 first-place awards in recognition of the quantity and quality of their service.

Randy is the 24-year-old son of Dr. and Mrs. L.M. Williams of Montgomery, and is currently pursuing a masters of business administration degree. He first became involved with Circle K as an undergraduate at the University of Alabama in 1980. After serving his local club as newsletter editor, he was chosen as editor of the district publication, The Bama Bugle, for the 1980–81 year.

In 1981, Randy was elected to serve as lieutenant governor of the Vulcan division of the Alabama district. In that capacity, he served as a counselor to all clubs in the Birmingham-Tuscaloosa area. The next year, Randy had done such a fine job that he was a unanimous choice for the office of governor. After he served 1 year as chairman of the district committee on conferences and conventions, delegates to the 1984 international convention elected Randy to serve as international vice president. In that capacity, he served as counselor to the New York, Missouri-Arkansas and southwest districts, as well as serving as chairman of the membership development and education/club growth and retention committee. Under his leadership, this committee developed a comprehensive year-round membership process to streamline and facilitate Circle K's growth.

Randy has made many plans for his year as president of Circle K, and I am confident he and his board will do a fine job. I am very proud of the example he is setting for other young men and women from Alabama and other States. He is a truly fine representative of the ideals of Circle K—leadership, service, involvement, caring. I wish him the best during his year as president.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session in order to consider the nomination of Alan Lee Keyes, to be an Assistant Secretary of State.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the nomination.

DEPARTMENT OF STATE

NOMINATION OF ALAN LEE KEYES, OF MARYLAND, TO BE AN ASSISTANT SECRETARY OF STATE

The legislative clerk read the nomination of Alan Lee Keyes, of Maryland, to be an Assistant Secretary of State.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Alan Lee Keyes, of Maryland, to be an Assistant Secretary of State?

The nomination was confirmed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF COMMERCE

NOMINATION OF ORSON G. SWINDLE III, OF GEORGIA, TO BE AN ASSISTANT SECRETARY OF COMMERCE

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate move to the consideration of the nomination of Orson G. Swindle III, to be an Assistant Secretary of Commerce.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the nomination.

The legislative clerk read the nomination of Orson G. Swindle III, of Georgia, to be an Assistant Secretary of Commerce.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Orson G. Swindle III, of Georgia, to be an Assistant Secretary of Commerce?

The nomination was confirmed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF AGRICULTURE

NOMINATION OF VANCE L. CLARK, OF CALIFORNIA, TO BE ADMINISTRATOR OF THE FARMERS HOME ADMINISTRATION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now move to the consideration of the nomination of Vance L. Clark, to be Administrator of the Farmers Home Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the nomination.

The legislative clerk read the nomination of Vance L. Clark, of California, to be Administrator of the Farmers Home Administration.

Mr. HELMS. Mr. President, it gives me great pleasure to support the nomination of Vance L. Clark for the position of Administrator of the Farmers Home Administration.

The Committee on Agriculture, Nutrition, and Forestry held a confirmation hearing on this appointment on September 9, and it was reported with a favorable recommendation without objection on September 20, 1985.

Mr. Clark's qualifications for this position are exceptional. He has been involved in lending, and specifically agricultural lending, during his 42-year career with Bank of America. Upon Mr. Clark's retirement from Bank of America in 1983, he was senior vice president with offices in Fresno and overall responsibility for the bank's operations in the San Joaquin Valley through 104 branches with 3,200 employees.

Mr. Clark was born in Nebraska and was graduated from Nebraska Business College in 1941 and joined Bank of America in Los Angeles that year. During World War II Mr. Clark served with the Marine Corps and answered the call to duty again during the Korean war.

Mr. Clark's education includes graduation from the University of California at Los Angeles Graduate School of

Business Executive Development, the Pomona College Executive Program, the Brookings Institution government operations conference, and courses in such fields as farm management and financing and crop production at the University of California—Davis, and California Polytechnic Institute. An honorary juris doctor degree from the San Joaquin Valley College of Law was conferred in 1981.

Mr. Clark has been actively involved in many agricultural and community organizations and has given freely of his energies to various civic groups.

As the Senate is aware, the job to which Mr. Clark has been nominated is one which is currently a "hotseat" and one which requires a level of sacrifice above and beyond the call of duty. However, there is no doubt in my mind after reviewing the many accomplishments in Mr. Clark's illustrious career that he is indeed the man for the job.

I urge the Senate to support his nomination.

Mr. President, I ask unanimous consent that a biographical sketch of Mr. Clark be printed in the RECORD immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VANCE L. CLARK

Vance L. Clark, a veteran banker with extensive experience in agricultural credit, was nominated by President Reagan on July 12 to be administrator of the Farmers Home Administration, principal credit agency of the U.S. Department of Agriculture.

During his professional career, Clark spent 42 years with the Bank of America. Upon his retirement in 1983, he was regional senior vice president with offices in Fresno and overall responsibility for the bank's operations in the San Joaquin Valley through 104 branches with 3,200 employees.

Clark was born Sept. 17, 1923, in St. Paul, Neb., where he grew up and attended Nebraska Business College. Upon graduation in 1941, he joined the Bank of America in its Los Angeles district. He served in a number of the bank's offices while advancing up the career ladder and serving the credit needs of California's diverse agricultural community, as well as other clients.

He served in the Pacific campaign as a member of the Marine Corps from 1943 to 1946, and was called back to active duty in 1950 during the Korean conflict.

His education includes graduation from the University of California at Los Angeles Graduate School of Business Executive Development, the Pomona College executive program, the Brookings Institution government operations conference, and courses in such fields as farm management and financing and crop production at the University of California Davis and California Polytechnic Institute. Clark holds an honorary juris doctor degree from the San Joaquin Valley College of Law which was conferred in 1981.

Business and professional memberships have included the California Student Aid Commission, the boards of the Bank of America's Livestock Symposium (an educational outreach forum) and the Producers Cotton Oil Company, and the Business Advisory Council to Public Television and Channel 18 Fresno. Clark has served as president of the Fresno County and City Chamber of Commerce, chairman of the Business Advisory Council to the School of Business and Administrative Sciences, University of California Fresno, and board chairman of the trustees of the San Joaquin College of Law.

Clark and his wife have three sons and six grandchildren.

Mr. THURMOND. Mr. President, I rise in support of the nomination of Mr. Vance L. Clark, who has been selected by President Reagan to serve as Administrator of the Farmers Home Administration.

Mr. Clark is superbly qualified for this position by reason of his educational background and his experience. He received his undergraduate degree from the Nebraska Business College and has since graduated from the University of California at Los Angeles Graduate School of Business Executive Development and the Pomona College executive program. He attended the Brookings Institution government operations conference, and studied farm management and financing and crop production at the University of California at Davis and California Polytechnic Institute.

Mr. Clark has extensive experience with the peculiarities of agricultural credit. During his 42 years with the Bank of America, he served the credit needs of California's diverse agricultural community, as well as other clients. Furthermore he has proved himself an able administrator during his tenure as regional senior vice president of Bank of America, with overall responsibility for operations of the bank in the San Joaquin Valley which has 104 branches with 3,200 employees.

Mr. President, in this difficult agricultural climate, the FmHA needs both an able Administrator and an individual experienced in the specialized needs of agricultural banking. Mr. Clark fits both these needs and is an excellent choice for Administrator of the Farmers Home Administration. I commend President Reagan on his selection, and I urge my colleagues to support this nomination.

Mr. WILSON. Mr. President, I rise today in support of the nomination of Vance Clark to serve as Administrator of the Farmer's Home Administration. In September, I was pleased to appear before the Senate Agriculture Committee to introduce Vance Clark and support his nomination to this position. The committee unanimously supported his nomination and I would now like to share with my distinguished colleagues in the Senate some of the reasons why I believe Vance Clark deserves your full support for his confirmation.

Vance Clark is a veteran banker with extensive experience in agricultural credit. He spent 42 years with the Bank of America and by the time he retired 2 years ago, Vance was regional senior vice president for offices in Fresno, CA. In that position, he had overall responsibility for the bank's operations in the San Joaquin Valley comprised of 104 branch offices with 3,200 employees. This extensive agricultural bank and credit experience is only one of Vance's strongpoints.

His educational background is equally impressive, including studies at UCLA's Graduate School of Business Executive Development, the Brookings Institution government operations conference, and courses in farm management, financing, and crop production at the University of California at Davis and at the California Polytechnic Institute. Vance was given an honorary juris doctor degree from the San Joaquin Valley College of Law in 1981, an honor appropriate to his distinguished career.

The remarkable thing about Vance is that he is anything but one dimensional. In spite of the many professional demands of his time, Vance also contributed to his community at the highest level through a variety of business and professional memberships. These have included the California Student Aid Commission, the board of the Bank of America's Livestock Symposium, an educational outreach forum, and the Business Advisory Council to Public Television. Vance has also served as president of the Fresno County and City Chambers of Commerce.

While this list of accomplishments is far from complete, I think it gives my colleagues an idea of why Vance Clark is the right man to administer the Farmer's Home Administration at this very critical time in American agriculture.

We are all aware of the difficult economic situations confronting many of our farmers. Many of us visited with our farmers during the August recess and know firsthand the problems they face. Financial credit problems rank high on the list. Now more than ever, we must have strong leadership in the Farmers' Home Administration.

Throughout its half century of operation, the Farmers' Home Administration has been concerned primarily with credit and counseling services that have supplemented resources of the private sector for building stronger family farms. In 1984, farm credit accounted for about one-half of all the resources administered by FmHA. The agency, through its farmer, rural housing, community, and business programs, administered close to 176,000 loans and grants worth nearly $8 billion in 1984. In the credit delivery system that FmHA has developed over the years, FmHA resources are directed through Washington to 46 State offices, 270 district offices and about 1,945 county offices serving every rural county in the 50 States and our

territories. FmHA's close one-on-one relationship with its borrowers is unique in the Federal Government.

In these trying financial times, administering an agency with such a profound impact on the agricultural sector requires the best leadership and insight available. Vance Clark, because of his professional background and impeccable personal qualities, is the man for that job.

I have full confidence in Vance's ability to undertake this challenging assignment. It is without reservation that I intend to vote for his confirmation and would urge my colleagues in the Senate to do likewise.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Vance L. Clark, of California, to be Administrator of the Farmers Home Administration?

The nomination was confirmed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I wish to thank the distinguished minority leader for his assistance in clearing these nominations. As I have indicated earlier, it is our hope that we can move to the nomination of Robert K. Dawson, to be an Assistant Secretary of the Army. I understand Senator CHAFEE has a meeting set with Mr. Dawson, and Mr. Dawson is not available today. We are going to try to see if we can help arrange that meeting today.

Later on today, probably this evening, we will move to the nomination of Alex Kozinski, to be U.S. Circuit Judge for the Ninth Circuit. I understand the distinguished Senator from Michigan [Senator LEVIN] who has a problem with that nomination, is willing to enter into a time agreement of 2 hours, with a half hour on this side.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY—TREATY DOCUMENT NO. 99-12

Mr. DOLE. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the 1984 Protocols to the Civil Liability and Fund Conventions for Oil Pollution Damage (treaty document No. 99-12), which were transmitted to the Senate yesterday by the President of the United States; and also ask that the protocols be considered as having been read the first time; that they be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith, for the advice and consent of the Senate to ratification, the Protocol of 1984 to Amend the International Convention on Civil Liability for Oil Pollution Damage, 1969 (Civil Liability Convention) and the Protocol of 1984 to Amend the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1971 (Fund Convention). The Department of State has prepared a Technical Report on the Protocols, which is attached for the information of the Senate.

The 1984 Protocols to the Civil Liability and Fund Conventions are intended to revise and update the international system of liability and compensation for damage caused by vessel source oil pollution. In light of worldwide experience with costly oil spills since the conventions were first negotiated, they both required substantial amendment to raise their liability and compensation limits. The maximum liability and compensation limits contained in the new Protocols are approximately four times higher than in the original conventions and are now deemed sufficient to compensate all legitimate claimants with regard to any oil spill likely to occur in waters off the coasts of the United States. These new limits would provide substantially greater levels of compensation for United States citizens who sustain oil pollution damage than is currently available under existing domestic statutes or voluntary industry mechanisms.

A United States understanding of the term "pollution damage" and declarations by which the United States would exercise the option under the Protocols to delay the effective date of our instruments of ratification, are included in the Technical Report of the Department of State for consideration of the Senate. If approved, these declarations and understanding would be appended to the United States instruments of ratification.

Expeditious ratification of the 1984 Protocols would demonstrate not only our interest in assuring compensation for United States citizens who sustain oil pollution damage, but also our commitment to higher, uniform international standards for mitigating such damage which can be generally accepted worldwide.

I recommend that the Senate give early and favorable consideration to the 1984 Protocols to the Civil Liability and Fund Conventions and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *November 5, 1985.*

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VETERANS' ADMINISTRATION HEALTH-CARE AMENDMENTS

Mr. MURKOWSKI. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 505.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the text of the bill (H.R. 505) entitled "An Act to amend title 38, United States Code, to improve the delivery of health care services by the Veterans' Administration, and for other purposes", with the following amendment:

In lieu of the matter inserted by said amendment, insert:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Veterans' Administration Health-Care Amendments of 1985".

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. References to title 38, United States Code.

TITLE I—HEALTH-CARE PROGRAMS

Sec. 101. Alcohol and drug treatment and rehabilitation.
Sec. 102. Special contract-care authority outside the 48 contiguous States.
Sec. 103. Extension of interim health-care eligibility based on exposure to dioxin or other toxic substances in Vietnam or to nuclear radiation.
Sec. 104. Outpatient and ambulatory services following nursing home or domiciliary care.
Sec. 105. Vietnam Veteran Resource Centers pilot program.
Sec. 106. Technical amendment relating to continuing availability of readjustment counseling.

Sec. 107. Counseling for former prisoners of war.
Sec. 108. Transfers for nursing home care.
Sec. 109. Chiropractic services pilot program.

TITLE II—HEALTH-CARE ADMINISTRATION

Sec. 201. Medical quality-assurance records.
Sec. 202. Authority to expand Geriatric Research, Education, and Clinical Centers program.
Sec. 203. Revision of authority for appointment of student nurses and graduate nurses.
Sec. 204. Quality assurance and credentialing.
Sec. 205. Availability of State financial support for approved State home projects.
Sec. 206. Procedures for reduction or revocation of clinical privileges.

TITLE III—VETERANS' ADMINISTRATION MEDICAL FACILITIES

Sec. 301. Clarification of requirement of congressional approvcl of construction and acquisition projects.
Sec. 302. Operational and construction planning requirement.
Sec. 303. Major facility prospectus requirement.
Sec. 304. Development of medical-facility modular components.

TITLE IV—MISCELLANEOUS PROVISIONS

Sec. 401. Servicemen's Group Life Insurance and Veterans' Group Life Insurance.
Sec. 402. Extension of authority to operate an office in the Republic of the Philippines.
Sec. 403. Veterans' Administration grade reduction.
Sec. 404. Land transfer, Phoenix, Arizona.
Sec. 405. Modification of restrictions on real property, Milwaukee County, Wisconsin.
Sec. 406. Authority to release limitation on use of real property, McKinney, Texas.
Sec. 407. Modification of restrictions on real property and conveyance of a fence on such property, Salt Lake City, Utah.

SEC. 2. REFERENCES TO TITLE 38, UNITED STATES CODE.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—HEALTH-CARE PROGRAMS

SEC. 101. ALCOHOL AND DRUG TREATMENT AND REHABILITATION.

(a) EXTENSION OF SPECIAL CONTRACT AUTHORITY.—Section 620A is amended—

(1) in subsection (a)(1)—

(A) by striking out "may conduct a pilot program under which the Administrator" in the first sentence; and

(B) by striking out the second sentence;

(2) by striking out "October 31, 1985" in subsection (e) and inserting in lieu thereof "September 30, 1988"; and

(3) by striking out subsection (f) and inserting in lieu thereof the following:

"(f)(1) The Administrator shall monitor the performance of each contract facility furnishing care and services under the program carried out under subsection (a) of this section.

"(2) The Administrator shall use the results of such monitoring to determine—

"(A) with respect to the program, the medical advantages and cost-effectiveness that result from furnishing such care and services; and

"(B) with respect to such contract facilities generally, the level of success under the program, considering—

"(i) the rate of successful rehabilitation for veterans furnished care and services under the program;

"(ii) the rate of readmission to contract facilities under the program or to Veterans' Administration health-care facilities by such veterans for care or services for disabilities referred to in subsection (a) of this section;

"(iii) whether the care and services furnished under the program obviated the need of such veterans for hospitalization for such disabilities;

"(iv) the average duration of the care and services furnished such veterans under the program;

"(v) the ability of the program to aid in the transition of such veterans back into their communities; and

"(vi) any other factor that the Administrator considers appropriate.

"(3) The Administrator shall maintain records of—

"(A) the total cost for the care and services furnished by each contract facility under the program;

"(B) the average cost per veteran for the care and services furnished under the program; and

"(C) the appropriateness of such costs, by comparison to—

"(i) the average charges for the same types of care and services furnished generally by other comparable halfway houses, therapeutic communities, psychiatric residential treatment centers, and other community-based treatment facilities; and

"(ii) the historical costs for such care and services for the period of time that the program carried out under subsection (a) of this section was a pilot program, taking into account economic inflation.

"(4) Not later than February 1, 1988, the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the experience under the program carried out under this section during fiscal years 1984 through 1987. The report shall include—

"(A) a description of the care and services furnished;

"(B) the matters referred to in paragraphs (1), (2), and (3) of this subsection; and

"(C) the Administrator's findings, assessment, and recommendations regarding the program under this section.".

(b) CONFORMING AMENDMENTS.—(1) The heading for such section is amended by striking out the semicolon and the last two words.

(2) The item relating to such section in the table of sections at the beginning of chapter 17 is amended by striking out the semicolon and the last two words.

SEC. 102. SPECIAL CONTRACT-CARE AUTHORITY OUTSIDE THE 48 CONTIGUOUS STATES.

(a) REVISION OF SPECIAL CONTRACT CARE AUTHORITY.—Section 601(4)(C)(v) is amended—

(1) by striking out "(except with respect to Alaska and Hawaii) shall expire on October 31, 1985" and inserting in lieu thereof "with respect to the Commonwealth of Puerto Rico shall expire on September 30, 1988"; and

(2) by striking out "and to the Virgin Islands".

(b) PHASE-OUT OF SPECIAL AUTHORITY IN PUERTO RICO.—(1) Effective on October 1, 1988, such section is amended—

(A) by inserting "(other than the Commonwealth of Puerto Rico)" after "in a State"; and

(B) by striking out "contiguous States" the second place it appears and all that follows through "medical services;" and inserting in lieu thereof "contiguous States and the Commonwealth of Puerto Rico;".

(2) During fiscal year 1986, the obligations incurred for Puerto Rico contract care may not exceed 85 percent of the obligations incurred for such care for fiscal year 1985.

(3) During fiscal year 1987, the obligations incurred for Puerto Rico contract care may not exceed 50 percent of the obligations incurred for such care for fiscal year 1985.

(4) During fiscal year 1988, the obligations incurred for Puerto Rico contract care may not exceed 25 percent of the obligations incurred for such care for fiscal year 1985.

(5) For the purpose of this subsection, the term "obligations incurred for Puerto Rico contract care" means the total obligations incurred during a fiscal year for medical services for veterans residing in the Commonwealth of Puerto Rico under the Administrator's authority to contract for hospital care or medical services under clause (v) of section 601(4)(C) of title 38, United States Code, in the Commonwealth of Puerto Rico.

SEC. 103. EXTENSION OF INTERIM HEALTH-CARE ELIGIBILITY BASED ON EXPOSURE TO DIOXIN OR OTHER TOXIC SUBSTANCES IN VIETNAM OR TO NUCLEAR RADIATION.

Section 610(e)(3) is amended by striking out "after the end of" and all that follows and inserting in lieu thereof "after September 30, 1989.".

SEC. 104. OUTPATIENT AND AMBULATORY SERVICES FOLLOWING NURSING HOME OR DOMICILIARY CARE.

Section 612(f)(1) is amended—

(1) by striking out "where" the first two places it appears and inserting in lieu thereof "if";

(2) by inserting a comma and "nursing home care, or domiciliary care" after "hospital care" the second place it appears;

(3) by striking out "hospital" the fourth place it appears; and

(4) by striking out "in-hospital" and inserting in lieu thereof "such".

SEC. 105. VIETNAM VETERAN RESOURCE CENTERS PILOT PROGRAM.

Section 612A is amended by adding at the end the following new subsection:

"(h)(1) During the period beginning on January 1, 1986, and ending on September 30, 1988, the Administrator shall conduct a pilot program to provide and coordinate the provision of services described in paragraph (2) of this subsection. The pilot program shall be carried out in order to evaluate the effectiveness, feasibility, and desirability of providing veterans eligible for readjustment counseling under this section with additional services through facilities furnishing such counseling.

"(2) The services referred to in paragraph (1) of this subsection are—

"(A) counseling with respect to, and assistance in applying for, all benefits and services under laws administered by the Veterans' Administration for which veterans participating in the pilot program may be eligible;

"(B) employment counseling, training, placement, and related services described in

sections 2003 and 2003A of this title or provided under any other law administered by the Secretary of Labor;

"(C) initial intake and referral services with respect to disabilities related to alcohol or drug dependence or abuse and followup services for veterans who have received treatment for such disabilities; and

"(D) assistance in coordinating the provision of benefits and services to veterans participating in the pilot program with respect to such veterans' receipt of—

"(i) services provided under the pilot program; and

"(ii) other benefits and services provided under laws administered by the Veterans' Administration, the Secretary of Labor, or any other Federal agency or official.

"(3)(A) In order to carry out the pilot program, the Administrator shall—

"(i) designate as sites for demonstration projects 10 facilities which on the date of the enactment of this section are providing readjustment counseling under this section; and

"(ii) assign such staff and other resources to such facilities as are necessary to enable such facilities to provide the services referred to in subparagraphs (A) and (C) of paragraph (2) of this subsection.

"(B) Facilities designated under subparagraph (A) of this paragraph shall be known as Vietnam Veteran Resource Centers (hereinafter in this subsection referred to as 'Centers').

"(4) The Administrator—

"(A) shall be responsible for coordinating the assignment and use of employees, on full- or part-time bases, as appropriate, in each Center; and

"(B) shall, in carrying out that responsibility, make maximum feasible use of the Veterans' Administration employees who are providing services at each facility on the date it is designated as a Center under this subsection.

"(5) The Secretary of Labor shall provide for the assignment to each Center, on full- or part-time bases, as the Secretary considers appropriate, of disabled veterans' outreach specialists appointed under section 2003A of this title or employees on the staffs of local employment service offices who are assigned to perform services under section 2004 of this title.

"(6) Not later than April 1, 1987, the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the experience under the pilot program during its first 15 months of operation. The report shall include—

"(A) the Administrator's assessment of—

"(i) the effectiveness of the pilot program in providing and coordinating the provision of the services described in paragraph (2) of this subsection and counseling and services furnished under subsections (a) and (b) of this section; and

"(ii) the appropriateness of the use of the personnel assigned to the program;

"(B) a description of any administrative action that the Administrator plans to take generally to increase the coordination of the provision of such services to veterans eligible for readjustment counseling services under this section;

"(C) any recommendation that the Administrator considers appropriate; and

"(D) a comparison of such assessment, plans, and recommendations with the evaluation of and the recommendations relating to the readjustment counseling program included in the report required by subsection (g)(2) of this section.

"(7) Not later than January 1, 1989, the Administrator shall submit to such Committees a final report on the pilot program. The report shall include—

"(A) updates of all information provided in the report submitted pursuant to paragraph (6) of this subsection; and

"(B) the Administrator's final assessment of the pilot program based on 33 months of operation.".

SEC. 106. TECHNICAL AMENDMENT RELATING TO CONTINUING AVAILABILITY OF READJUSTMENT COUNSELING.

Section 612A(g)(1)(B) is amended by striking out "who requested counseling before such date" and inserting in lieu thereof "who request such counseling".

SEC. 107. COUNSELING FOR FORMER PRISONERS OF WAR.

(a) IN GENERAL.—Subchapter II of chapter 17 is amended by inserting after section 612A the following new section:

"§ 612B. Counseling for former prisoners of war

"The Administrator may establish a program under which, upon the request of a veteran who is a former prisoner of war, the Administrator, within the limits of Veterans' Administration facilities, furnishes counseling to such veteran to assist such veteran in overcoming the psychological effects of the veteran's detention or internment as a prisoner of war.".

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 612A the following new item:

"612B. Counseling for former prisoners of war.".

SEC. 108. TRANSFERS FOR NURSING HOME CARE.

(a) IN GENERAL.—Subsection (a) of section 620 is amended to read as follows:

"(a)(1) Subject to subsection (b) of this section, the Administrator may transfer to a non-Veterans' Administration nursing home, for care at the expense of the United States—

"(A) a veteran—

"(i) who has been furnished hospital care, nursing home care, or domiciliary care by the Administrator in a facility under the direct jurisdiction of the Administrator; and

"(ii) who the Administrator determines—

"(I) requires a protracted period of nursing home care which can be furnished in the non-Veterans' Administration nursing home; and

"(II) in the case of a veteran who has been furnished hospital care in a facility under the direct jurisdiction of the Administrator, has received maximum benefits from such care; and

"(B) a member of the Armed Forces—

"(i) who has been furnished care in a hospital of the Armed Forces;

"(ii) who the Secretary concerned determines has received maximum benefits from such care but requires a protracted period of nursing home care; and

"(iii) who upon discharge from the Armed Forces will become a veteran.

"(2) The Administrator may transfer a person to a nursing home under this subsection only if the Administrator determines that the cost to the United States of the care of such person in the nursing home will not exceed—

"(A) the amount equal to 45 percent of the cost of care furnished by the Veterans' Administration in a general hospital under the direct jurisdiction of the Administrator (as such cost may be determined annually by the Administrator); or

"(B) the amount equal to 50 percent of such cost, if such higher amount is determined to be necessary by the Administrator (upon the recommendation of the Chief Medical Director) to provide adequate care.

"(3) Nursing home care may not be furnished under this subsection at the expense of the United States for more than six months in the aggregate in connection with any one transfer except—

"(A) in the case of a veteran—

"(i) who is transferred to a non-Veterans' Administration nursing home from a hospital under the direct jurisdiction of the Administrator; and

"(ii) whose hospitalization was primarily for a service-connected disability;

"(B) in a case in which the nursing home care is required for a service-connected disability; or

"(C) in a case in which, in the judgment of the Administrator, a longer period of nursing home care is warranted.

"(4) A veteran who is furnished care by the Administrator in a hospital or domiciliary facility in Alaska or Hawaii may be furnished nursing home care at the expense of the United States under this subsection even if such hospital or domiciliary facility is not under the direct jurisdiction of the Administrator.".

(b) ADMISSION TO CONTRACT NURSING HOMES OF CERTAIN VETERANS.—Subsection (d) of such section is amended—

(1) by inserting "(1)" after "(d)";

(2) by striking out "to any public or private institution not under the jurisdiction of the Administrator which furnishes nursing home care" in the first sentence and inserting in lieu thereof "to any non-Veterans' Administration nursing home";

(3) by inserting after the first sentence the following new sentence: "The Administrator may also authorize a direct admission to such a nursing home for nursing home care for any veteran who has been discharged from a hospital under the direct jurisdiction of the Administrator and who is currently receiving medical services as part of home health services from the Veterans' Administration.";

(4) by striking out the sentence beginning "Such admission" and inserting in lieu thereof the following:

"(2) Direct admission authorized by paragraph (1) of this subsection may be authorized upon determination of need therefor—

"(A) by a physician employed by the Veterans' Administration; or

"(B) in areas where no such physician is available, by a physician carrying out such function under contract or fee arrangement, based on an examination by such physician."; and

(5) by designating the last sentence as paragraph (3).

(c) DEFINITION OF NON-VETERANS' ADMINISTRATION NURSING HOME.—Subsection (e) of such section is amended—

(1) by inserting "(1)" after "(e)";

(2) by striking out "subsection (a)(ii)" in the second sentence and inserting in lieu thereof "subsection (a)(2)(B)"; and

(3) by adding at the end the following:

"(2) For the purposes of this section, the term 'non-Veterans' Administration nursing home' means a public or private institution not under the direct jurisdiction of the Administrator which furnishes nursing home care.".

(d) IMPROVEMENT IN PENSION PROGRAM ADMINISTRATION.—(1) In order to improve the timeliness of adjustments made pursuant to section 3203(a) of title 38, United States Code, in the amount of pension being paid to a veteran who is being furnished nursing

home care by the Veterans' Administration, the Chief Medical Director of the Veterans' Administration shall develop improved procedures for notifying the Chief Benefits Director of the Veterans' Administration when a veteran is admitted to a nursing home.

(2) The Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the development and implementation of such procedures. The report shall be submitted not later than 90 days after the date of the enactment of this Act.

SEC. 109. CHIROPRACTIC SERVICES PILOT PROGRAM.

(a) ESTABLISHMENT OF PILOT PROGRAM.—(1) The Administrator of Veterans' Affairs shall conduct a pilot program to evaluate the therapeutic benefits and the cost-effectiveness of furnishing certain chiropractic services to veterans eligible for medical services under chapter 17 of title 38, United States Code. Such a veteran is eligible to receive chiropractic services under the pilot program if the veteran was furnished hospital care or medical services by the Veterans' Administration for a neuromusculoskeletal condition of the spine within the 12-month period immediately preceding the commencement of the furnishing of such chiropractic services.

(2) The pilot program shall consist of not less than one demonstration project in each of five geographic regions of the United States designated by the Administrator for the purpose of this section.

(3) The pilot program shall be carried out during the period beginning on January 1, 1986, and ending on December 31, 1988.

(b) CONSULTATION AND COORDINATION.—In developing the pilot program, the Administrator shall consult with the Secretary of Defense regarding the demonstration projects carried out by the Secretary under section 632(b) of the Department of Defense Authorization Act, 1985 (10 U.S.C. 1092 note). In designing, conducting, and evaluating the pilot program, the Administrator shall obtain advice and recommendations from recognized medical or scientific authorities in the treatment of neuromusculoskeletal conditions of the spine. The Administrator shall ensure that there is adequate participation by chiropractors in the design and evaluation of the demonstration projects, including participation by representatives from chiropractic colleges recognized by an approved accrediting organization.

(c) PAYMENT FOR CHIROPRACTIC SERVICES UNDER THE PILOT PROGRAM.—(1)(A) The Administrator shall pay the reasonable charge for chiropractic services furnished to eligible veterans under the pilot program.

(B) The Administrator may not pay for such services to the extent that the veteran is entitled to such services (or reimbursement for the expenses of such services) under—

(i) an insurance policy or contract;

(ii) a medical or hospital service agreement or membership or subscription contract; or

(iii) a similar arrangement for the purpose of providing, paying for, or reimbursing expenses for such services.

(2) The Administrator—

(A) shall reimburse the veteran for such reasonable charges if the veteran has paid for such services; or

(B) in lieu of reimbursing a veteran for a charge for chiropractic services under subparagraph (A), may pay the reasonable charge for such chiropractic services directly to the chiropractor who furnished the services.

(3) The amount paid for chiropractic services under this subsection may not exceed the amount for such services prescribed under the schedule of reasonable charges established under subsection (d).

(4) Chiropractic services may be provided in private facilities or chiropractic colleges approved in guidelines issued by the Administrator.

(5) Reimbursement of veterans and payments to chiropractors under this subsection shall be carried out under regulations which the Administrator shall prescribe.

(d) SCHEDULE OF REASONABLE CHARGES.—The Administrator shall establish a schedule of reasonable charges for chiropractic services furnished under the pilot program. Such schedule shall—

(1) be consistent with the reasonable charges allowed under section 1842 of the Social Security Act (42 U.S.C. 1395u); and

(2) be established in consultation with—

(A) appropriate public and nonprofit private organizations; and

(B) other Federal departments and agencies that provide reimbursement for chiropractic services.

(e) PROGRAM CAP.—The amount spent in any calendar year for chiropractic services under the pilot program may not exceed $2,000,000.

(f) REPORT.—Not later than April 1, 1989, the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report on the implementation, operation, and results of the pilot program. The report shall include—

(1) the number of requests made by eligible veterans for reimbursement or payment for chiropractic services under this section and the number of such veterans who made such requests;

(2) the number of such reimbursements and payments made and the number of veterans to (or for whom) such reimbursements and payments were made; and

(3) the total amount spent for such reimbursements and payments.

(g) DEFINITIONS.—For the purposes of this section:

(1) The term "chiropractic services" means the manual manipulation of the spine performed by a chiropractor to correct a subluxation of the spine. Such term does not include physical examinations, laboratory tests, radiologic services, and any other tests or services determined by the Administrator to be excluded.

(2) The term "chiropractor" means an individual who is licensed as such by the State in which the individual performs chiropractic services and who meets the uniform minimum standards promulgated for chiropractors under section 1861(r)(5) of the Social Security Act (42 U.S.C. 1395x(r)(5)).

TITLE II—HEALTH-CARE ADMINISTRATION

SEC. 201. MEDICAL QUALITY-ASSURANCE RECORDS.

Section 3305 is amended—

(1) by inserting "(other than reports submitted pursuant to section 4152(b) of this title)" in subsection (a) after "program"; and

(2) by adding at the end of subsection (b) the following new paragraph:

"(6) Nothing in this section shall be construed as authorizing or requiring withholding from any person or entity the disclosure of statistical information regarding Veterans' Administration health-care programs (including such information as aggregate morbidity and mortality rates associated with specific activities at individual Veterans' Administration health-care facilities) that does not implicitly or explicitly identify individual Veterans' Administration patients or employees or individuals who participated in the conduct of a medical quality-assurance review.".

SEC. 202. AUTHORITY TO EXPAND GERIATRIC RESEARCH, EDUCATION, AND CLINICAL CENTERS PROGRAM.

Section 4101(f)(1)(A) is amended by striking out "fifteen" and inserting in lieu thereof "25".

SEC. 203. REVISION OF AUTHORITY FOR APPOINTMENT OF STUDENT NURSES AND GRADUATE NURSES.

Section 4114(a)(3) is amended—

(1) by striking out "one year" in the second sentence of subparagraph (A) and inserting in lieu thereof "two years"; and

(2) by adding at the end the following new subparagraph:

"(C) A student nurse who has a temporary appointment under this paragraph and who is pursuing a full course of nursing in a recognized school of nursing approved by the Administrator may be reappointed for one year. Other personnel whose appointments are limited by this section to one year may not be reappointed under this subsection.".

SEC. 204. QUALITY ASSURANCE AND CREDENTIALING.

(a) IMPROVEMENTS IN PROGRAMS TO EVALUATE AND ASSURE HEALTH-CARE QUALITY.—(1) Chapter 73 is amended by adding at the end the following new subchapter:

"Subchapter V—Quality Assurance

"§ 4151. Quality assurance program

"(a) The Administrator shall—

"(1) establish and conduct a comprehensive program to monitor and evaluate the quality of health care furnished by the Department of Medicine and Surgery (hereinafter in this section referred to as the 'quality-assurance program'); and

"(2) delineate the responsibilities of the Chief Medical Director with respect to the quality-assurance program, including the duties prescribed in this section.

"(b)(1) As part of the quality-assurance program, the Chief Medical Director shall periodically evaluate—

"(A) whether there are significant deviations in mortality and morbidity rates for surgical procedures performed by the Department of Medicine and Surgery from prevailing national mortality and morbidity standards for similar procedures; and

"(B) if there are such deviations, whether they indicate deficiencies in the quality of health care provided by the Department of Medicine and Surgery.

"(2) The evaluation under paragraph (1)(A) of this subsection shall be made using the information compiled under subsection (c)(1) of this section. The evaluation under paragraph (1)(B) of this subsection shall be made taking into account the factors described in subsection (c)(2)(B) of this subsection.

"(3) If, based upon an evaluation under paragraph (1)(A) of this subsection, the Chief Medical Director determines that there is a deviation referred to in that paragraph, the Chief Medical Director shall explain the deviation in the next report submitted under section 4152 of this title.

"(c)(1) The Chief Medical Director shall—

"(A) determine the prevailing national mortality and morbidity standards for each type of surgical procedure performed by the Department of Medicine and Surgery; and

"(B) collect data and other information on mortality and morbidity rates in the De-

partment of Medicine and Surgery for each type of surgical procedure performed by the Department and (with respect to each such procedure) compile the data and other information so collected—

"(i) for each medical facility of the Veterans' Administration, in the case of cardiac surgery, heart transplant, and renal transplant programs; and

"(ii) in the aggregate, for each other type of surgical procedure.

"(2) The Chief Medical Director shall—

"(A) compare the mortality and morbidity rates compiled under paragraph (1)(B) of this subsection with the national mortality and morbidity standards determined under paragraph (1)(A) of this subsection; and

"(B) analyze any deviation between such rates and such standards in terms of—

"(i) the characteristics of the respective patient populations;

"(ii) the level of risk for the procedure involved, based on—

"(I) patient age;

"(II) the type and severity of the disease;

"(III) the effect of any complicating diseases; and

"(IV) the degree of difficulty of the procedure; and

"(iii) any other factor that the Chief Medical Director considers appropriate.

"(d) Based on the information compiled and the comparisons, analyses, evaluations, and explanations made under subsections (b) and (c) of this section, the Chief Medical Director, in each report under section 4152 of this title, shall make such recommendations with respect to quality assurance as the Chief Medical Director considers appropriate.

"(e)(1) The Administrator shall allocate sufficient resources (including sufficient personnel with the necessary skills and qualifications) to enable the Department of Medicine and Surgery to carry out its responsibilities under this section.

"(2) The Inspector General of the Veterans' Administration shall allocate sufficient resources (including sufficient personnel with the necessary skills and qualifications) to enable the Inspector General to monitor the quality-assurance program.

"§ 4152. Quality-assurance reports

"(a)(1) Not later than February 1 of 1987, 1989, and 1991, the Chief Medical Director shall submit to the Administrator a report on the experience through the end of the preceding fiscal year under the quality-assurance program carried out under section 4151 of this title.

"(2) Each such report shall include—

"(A) the data and other information compiled and the comparisons, analyses, and evaluations made under subsections (b) and (c) of such section with respect to the period covered by the report; and

"(B) recommendations under subsection (d) of such section.

"(b) Not later than 60 days after receiving each such report, the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a copy of the report, together with any comment concerning the report that the Administrator considers appropriate.

"(c) A report submitted under subsection (b) of this section shall not be considered to be a record or document as described in section 3305(a) of this title.".

(2) The table of sections at the beginning of chapter 73 is amended by adding at the end the following:

"SUBCHAPTER V—QUALITY ASSURANCE

"4151. Quality assurance program.

"4152. Quality-assurance reports.".

(b) REPORT ON CREDENTIALS OF HEALTH-CARE PROFESSIONALS.—(1) The Administrator of Veterans' Affairs shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report describing in detail the current efforts and procedures and future plans of the Veterans' Administration for determining and monitoring the credentials of health-care professionals in connection with their furnishing care to veterans under chapter 17 of title 38, United States Code.

(2)(A) The report shall include a description of each current and planned Veterans' Administration policy or procedure regarding, or arrangement for, credentialing information exchanges.

(B) With reference to any such policy, procedure, or arrangement that is planned and has not been implemented at the time the report required by paragraph (1) is submitted, the Administrator shall—

(i) include in the report a timetable for such implementation; and

(ii) report to the committees on progress toward such implementation every three months thereafter until implementation of each such policy, procedure, and arrangement is achieved.

Upon implementation of each such policy, procedure, and arrangement, a final report on such implementation shall be submitted to the Committees.

(3) For the purposes of this subsection, the term "credentialing information exchanges" includes the exchange of relevant information with a license issuing or monitoring entity—

(A) in order to determine, with respect to an individual who is seeking employment with, or who is employed by, the Veterans' Administration as a health-care professional for the furnishing of care to veterans under chapter 17 of title 38, United States Code—

(i) whether the individual has completed medical or other health-care professional education satisfactorily;

(ii) the current and past licensure and clinical privilege status of the individual; or

(iii) the full employment history of the individual; or

(B) in order to provide appropriate information to such an entity about an individual whose employment with the Veterans' Administration as a health-care professional is terminated—

(i) following the completion of a disciplinary action relating to such individual's clinical competence;

(ii) voluntarily after having had such individual's clinical privileges restricted or revoked; or

(iii) voluntarily after serious concerns about such individual's clinical competence have been raised but not resolved.

(4) For the purposes of this subsection, the term "license issuing or monitoring entity" means—

(A) an appropriate State medical or other health-professional licensing body;

(B) the Federation of State Medical Boards;

(C) the American Medical Association; and

(D) any other public or private entity that the Administrator considers appropriate that is involved with the issuance or monitoring of health-care professional licenses.

(5) The report required by this subsection shall be submitted not later than 90 days after the date of the enactment of this Act.

SEC. 205. AVAILABILITY OF STATE FINANCIAL SUPPORT FOR APPROVED STATE HOME PROJECTS.

(a) DEADLINE FOR AVAILABILITY OF STATE CONSTRUCTION FUNDS.—Subsection (a)(6) of section 5035 is amended by inserting "by July 1 of the fiscal year for which the application is approved" before "and for its maintenance".

(b) DEFERRAL OF CERTAIN APPLICATIONS.—Subsection (b) of such section is amended—

(1) by inserting "(1)" after "(b)";

(2) by redesignating clauses (1) through (4) as clauses (A) through (D), respectively; and

(3) by adding at the end the following new paragraph:

"(2)(A) The Administrator shall defer approval of an application that meets the requirements of this section if the State submitting the application does not, by the July 1 deadline (as defined in subparagraph (C) of this paragraph), demonstrate to the satisfaction of the Administrator that the State has provided adequate financial support for construction of the project.

"(B) In a case in which approval of an application is deferred under subparagraph (A) of this paragraph—

"(i) the Administrator, in accordance with guidelines established by the Administrator, shall select for award of a grant or grants under this section an application or applications for a nursing home project or projects that the Administrator determines—

"(I) to be most in need;

"(II) would, but for the deferral, not have been approved during the fiscal year in the which the deferral occurred; and

"(III) have been provided adequate financial support by the State and are otherwise qualified for approval during the fiscal year; and

"(ii) during the next fiscal year, the application with respect to which approval was deferred shall be accorded priority for approval ahead of applications that had not been approved before the first day of such fiscal year.

"(C) For the purposes of this paragraph, the term 'July 1 deadline' means July 1 of the fiscal year in which the State is notified by the Administrator of the availability of funding for a grant for such project.".

SEC. 206. PROCEDURES FOR REDUCTION OR REVOCATION OF CLINICAL PRIVILEGES.

(a) GUIDELINES.—Not later than April 1, 1986, the Administrator of Veterans' Affairs shall prescribe uniform guidelines establishing administrative procedures to be followed in any case in which a reduction or revocation of the clinical privileges of any person employed in a position described in paragraph (1) of section 4104 of title 38, United States Code, is proposed on the basis of a deficiency in the employee's performance of professional responsibilities.

(b) REPORT.—Not later than May 1, 1986, the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representativs a report (containing a copy of such guidelines) on the implementation of this section.

TITLE III—VETERANS' ADMINISTRATION MEDICAL FACILITIES

SEC. 301. CLARIFICATION OF REQUIREMENT OF CONGRESSIONAL APPROVAL OF CONSTRUCTION AND ACQUISITION PROJECTS.

Subsection (a) of section 5004 is amended to read as follows:

"(a)(1) The purpose of this subsection is to enable Congress to ensure the equitable distribution of medical facilities throughout

the United States, taking into consideration the comparative urgency of the need for the services to be provided in the case of each particular facility.

"(2) After the adoption by the committees during a fiscal year of resolutions with identical texts approving major medical facility projects, it shall not be in order in the House of Representatives or in the Senate to consider a bill, resolution, or amendment making an appropriation for that fiscal year or for the next fiscal year which may be expended for a major medical facility project—

"(A) if the project for which the appropriation is proposed to be made is not approved in those resolutions; or

"(B) in the event that the project is approved in the resolutions, if either—

"(i) the bill, resolution, or amendment making the appropriation does not specify—

"(I) the medical facility project for which the appropriation is proposed to be made; and

"(II) the amount proposed to be appropriated for the project; or

"(ii) the amount proposed to be appropriated for the project (when added to any amount previously appropriated for the project) exceeds the amount approved for the project.

"(3) No appropriation may be made for the lease of any space for use as a medical facility at an average annual rental of more than $500,000 unless each committee has first adopted a resolution approving such lease and setting forth the estimated cost thereof.

"(4) For the purpose of this subsection, the term 'major medical facility project' means a project for the construction, alteration, or acquisition of a medical facility involving a total expenditure of more than $2,000,000. Such term does not include an acquisition by exchange.".

SEC. 302. OPERATIONAL AND CONSTRUCTION PLANNING REQUIREMENT.

(a) REQUIREMENT FOR IMPROVED PLANNING.—Subsection (a) of section 5007 is amended—

(1) by inserting "(1)" after "(a)";

(2) by striking out "and alteration" the second place it appears in the first sentence and inserting in lieu thereof "alteration, and operation";

(3) by striking out the second and third sentences; and

(4) by adding at the end the following new paragraphs:

"(2) Each such report shall contain—

"(A) a five-year strategic plan for the operation and construction of medical facilities—

"(i) setting forth—

"(I) the mission of each existing or proposed medical facility;

"(II) any planned change in such mission; and

"(III) the operational steps needed to achieve the facility's mission and the dates by which such steps are planned to be completed; and

"(ii) a five-year plan, based on the factors set out in subclause (i) of this clause, for construction, replacement, or alteration projects for each such facility;

"(B) a list, in order of priority, of not less than 10 hospitals that, in the judgment of the Administrator, are most in need of construction or replacement; and

"(C) general plans (including projected costs, site location, and, if appropriate, necessary land acquisition) for each medical facility for which construction, replacement, or alteration is planned under clause (A)(ii) of this paragraph.

"(3) The report under this subsection shall be submitted not later than June 30 of each year.".

(b) TECHNICAL AMENDMENTS.—Subsection (b) of such section is amended—

(1) by striking out "(beginning in 1981)";

(2) by inserting "(1)" after "medical facility"; and

(3) by striking out "title and, in the case of the second and each succeeding report made under this subsection," and inserting in lieu thereof "title, and (2)".

(c) CLERICAL AMENDMENTS.—(1) The heading for such section is amended to read as follows:

"§ 5007. Operational and construction plans for medical facilities".

(2) The item relating to such section in the table of sections at the beginning of chapter 81 is amended to read as follows:

"5007. Operational and construction plans for medical facilities.".

SEC. 303. MAJOR FACILITY PROSPECTUS REQUIREMENT.

Section 5004(b)(1) is amended by inserting "and, in the case of a prospectus proposing the construction of a new or replacement medical facility, a description of the consideration that was given to acquiring an existing facility by lease or purchase" after "such facility".

SEC. 304. DEVELOPMENT OF MEDICAL-FACILITY MODULAR COMPONENTS.

In order to evaluate the applicability to the Veterans' Administration of the use of modular components in the design and construction of medical facilities for the furnishing of hospital care and to determine the efficiency and cost-effectiveness of that approach, the Administrator of Veterans' Affairs shall, not later than one year after the date of the enactment of this Act, develop a modular approach to the planning and design of an appropriate Veterans' Administration medical facility for the furnishing of hospital care.

TITLE IV—MISCELLANEOUS PROVISIONS

SEC. 401. SERVICEMEN'S GROUP LIFE INSURANCE AND VETERANS' GROUP LIFE INSURANCE.

(a) SERVICEMEN'S GROUP LIFE INSURANCE.—(1) Subsection (a) of section 767 is amended—

(A) by striking out "$35,000" and inserting in lieu thereof "$50,000"; and

(B) by striking out "the amount of $30,000, $25,000, $20,000, $15,000, $10,000 or $5,000" and inserting in lieu thereof "an amount less than $50,000 that is evenly divisible by $10,000".

(2) Subsection (c) of such section is amended by striking out "the amount of" the first place it appears and all that follows through "as the case may be," and inserting in lieu thereof "any amount less than $50,000, such member may thereafter be insured under this subchapter in the amount of $50,000 or any lesser amount evenly divisible by $10,000".

(3) Subsection (d) of such section is amended—

(A) by striking out "the effective date of this subsection" each place it appears and inserting in lieu thereof "January 1, 1986"; and

(B) by striking out "up to a maximum of $35,000 (in any amount divisible by $5,000)" and inserting in lieu thereof "in the amount of $50,000 or any lesser amount evenly divisible by $10,000".

(b) VETERAN'S GROUP LIFE INSURANCE.—(1) Subsection (a) of section 777 of such title is amended—

(A) by striking out the first sentence and inserting in lieu thereof the following: "Veterans' Group Life Insurance shall be issued in the amounts specified in section 767(a) of this title. In the case of any individual, the amount of Veterans' Group Life Insurance may not exceed the amount of Servicemen's Group Life Insurance coverage continued in force after the expiration of the period of duty or travel under section 767(b) or 768(a) of this title."; and

(B) by striking out "$35,000" in the sentence immediately following the matter inserted by clause (A) and both places it appears in the last sentence and inserting in lieu thereof "$50,000".

(2) Such section is further amended by adding at the end the following new subsection:

"(h)(1) Notwithstanding any other provision of law, members of the Individual Ready Reserve and the Inactive National Guard are eligible to be insured under Veterans' Group Life Insurance. Any such member shall be so insured upon submission of an application in the manner prescribed by the Administrator and the payment of premiums as required under this section.

"(2) Notwithstanding subsection (b)(2) of this section, Veterans' Group Life Insurance coverage under this subsection shall be issued on a renewable five-year term basis, but the person insured must remain a member of the Individual Ready Reserve or Inactive National Guard throughout the period of the insurance in order for the insurance of such person to be renewed.

"(3) For the purpose of this subsection, the terms 'Individual Ready Reserve' and 'Inactive National Guard' shall have the meanings prescribed by the Administrator in consultation with the Secretary of Defense.".

(c) EFFECTIVE DATE.—The amendments made by subsections (a) and (b) shall take effect on January 1, 1986.

SEC. 402. EXTENSION OF AUTHORITY TO OPERATE AN OFFICE IN THE REPUBLIC OF THE PHILIPPINES.

Section 230(b) is amended by striking out "October 31, 1985" and inserting in lieu thereof "September 30, 1988".

SEC. 403. VETERANS' ADMINISTRATION GRADE REDUCTION.

(a) Section 210(b) is amended by adding at the end the following new paragraphs:

"(3)(A) The Administrator may not implement a grade reduction described in subparagraph (B) of this paragraph unless the Administrator first submits to the Committees on Veterans' Affairs of the Senate and House of Representatives a report containing a detailed plan for such reduction and a detailed justification for the plan. Such report shall include a determination by the Administrator (together with data supporting such determination) that, in the personnel area concerned, the Veterans' Administration has a disproportionate number of employees at the salary grade or grades selected for reduction in comparison to the number of such employees at the salary levels involved who perform comparable functions in other departments and agencies of the Federal Government and in non-Federal entities. Any grade reduction described in such report may not take effect until the end of a period of 90 calendar days (not including any day on which either House of Congress is not in session) after the report is received by the committees.

"(B) A grade reduction referred to in subparagraph (A) of this paragraph is a systematic reduction, for the purpose of reducing the average salary cost for Veterans' Administration employees described in subparagraph (C) of this paragraph, in the number of such Veterans' Administration employees at a specific grade level.

"(C) The employees referred to in subparagraph (B) of this paragraph are—

"(i) health-care personnel who are determined by the Administrator to be providing either direct patient-care services or services incident to direct patient-care services;

"(ii) individuals who meet the definition of professional employee as set forth in section 7103(a)(15) of title 5; and

"(iii) individuals who are employed as computer specialists.

"(D) Not later than the forty-fifth day after the Administrator submits a report under subparagraph (A) of this paragraph, the Comptroller General shall submit to such Committees a report on the Administrator's compliance with such subparagraph. The Comptroller General shall include in the report the Comptroller General's opinion as to the accuracy of the Administrator's determination (and of the data supporting such determination) made under such subparagraph.

"(E) In the case of Veterans' Administration employees not described in subparagraph (C) of paragraph (3), the Administrator may not in any fiscal year implement a systematic reduction for the purpose of reducing the average salary cost for such Veterans' Administration employees that will result in a reduction in the number of such Veterans' Administration employees at any specific grade level at a rate greater than the rate of the reductions systematically being made in the numbers of employees at such grade level in all other agencies and departments of the Federal Government combined.".

SEC. 404. LAND TRANSFER, PHOENIX, ARIZONA.

(a) REQUIREMENT FOR TRANSFER.—The real property described in subsection (b) and the structures on such property on the date of the enactment of this Act shall be transferred without compensation or reimbursement from the control and jurisdiction of the General Services Administration to the control and jurisdiction of the Veterans' Administration.

(b) DESCRIPTION OF LAND.—The real property referred to in subsection (a) is a tract of land consisting of 3.4 acres, more or less, in Phoenix, Arizona, that—

(1) was formerly part of the Veterans' Administration Medical Center, Phoenix, Arizona; and

(2) was declared to be excess to the needs of the Veterans' Administration in a report to the General Services Administration dated September 25, 1959.

SEC. 405. MODIFICATION OF RESTRICTIONS ON REAL PROPERTY, MILWAUKEE COUNTY, WISCONSIN.

(a) RELEASE OF REVERSIONARY INTEREST.—The Administrator of Veterans' Affairs shall execute such instruments as may be necessary to modify the conditions under which the land described in subsection (b) will revert to the United States in order to permit Milwaukee County, Wisconsin, to lease all or part of such land to a nonprofit corporation which—

(1) shall construct and equip on such land structures, facilities, and other permanent improvements useful for public recreational purposes or general civic purposes; and

(2) shall use such land for such recreational or civic purposes.

(b) DESCRIPTION OF LAND.—The land referred to in subsection (a) is—

(1) the land conveyed to Milwaukee County, Wisconsin, pursuant to the Act entitled "An Act to authorize the Administrator of Veterans' Affairs to convey lands and to lease certain other land to Milwaukee County, Wisconsin", approved September 1, 1949 (63 Stat. 683); and

(2) the land conveyed to Milwaukee County, Wisconsin, pursuant to the Act entitled "An Act authorizing the Administrator of Veterans' Affairs to convey certain property to Milwaukee County, Wisconsin", approved August 27, 1954 (68 Stat. 866).

(c) GENERAL LIMITATIONS.—The Administrator may carry out this section subject to such terms and conditions (including reservations of rights for the United States) as the Administrator determines to be necessary to protect the interests of the United States.

SEC. 406. AUTHORITY TO RELEASE LIMITATION ON USE OF REAL PROPERTY, MCKINNEY, TEXAS.

(a) RELEASE OF LIMITATION.—The Administrator of Veterans' Affairs shall execute such instruments as may be necessary to release the limitation to recreational purposes only on the use of the land described in subsection (b).

(b) DESCRIPTION OF LAND.—The land referred to in subsection (a) is two parcels of land, consisting of a total of 38.741 acres, that were conveyed by the Administrator to the city of McKinney, Texas, by deed of May 5, 1965, under the authority of Public Law 88-438 (78 Stat. 444, approved August 14, 1964).

SEC. 407. MODIFICATION OF RESTRICTIONS ON REAL PROPERTY AND CONVEYANCE OF A FENCE ON SUCH PROPERTY, SALT LAKE CITY, UTAH.

(a) MODIFICATION OF RESTRICTION.—(1) The Administrator of Veterans' Affairs shall execute such instruments as may be necessary in order to authorize the land conveyed under the authority of the Act referred to in paragraph (3) to be used—

(A) without regard to any limitation required by section 2 of that Act, but

(B) subject to the limitations set forth in paragraph (2).

(2) Any instrument executed under paragraph (1) shall provide, with respect to the tract of land conveyed under the Act referred to in paragraph (3)—

(A) that such tract may be used only for hospital, educational, civic, residential, or related purposes;

(B) that, if any part of such tract is used in any manner that is determined by the Administrator to interfere with the care and treatment of any patient at a Veterans' Administration health-care facility located in the reservation described in such Act, such use shall cease immediately upon notice by the Administrator of such interference to the person holding legal title to such part at the time such use occurs;

(C) that, if any part of such tract is used for a purpose other than a purpose prescribed in clause (A), title to such part shall revert to the United States; and

(D) that, if any interference referred to in clause (B) does not cease as required under such paragraph, title to the part of such land that is being used in a manner to cause such interference shall revert to the United States.

Any such instrument may contain such additional terms and conditions (including reservations of rights to the United States) as the Administrator determines to be necessary to protect the interests of the United States.

(3) The Act referred to in paragraphs (1) and (2) is the Act entitled "An Act authorizing the Administrator of Veterans' Affairs to convey certain property to the Armory Board, State of Utah", approved July 29, 1954 (68 Stat. 579).

(b) CONVEYANCE OF FENCE.—The Administrator shall convey, without consideration, to the Armory Board of the State of Utah all right, title, and interest of the United States in the fence erected as required by the quitclaim deed issued to the Armory Board by the Administrator on October 14, 1954, under the authority of the Act referred to in subsection (a)(3). The conveyance shall contain such terms and conditions as the Administrator determines to be necessary to protect the interests of the United States.

Resolved, That the House agree to the amendment of the Senate to the title of the bill.

AMENDMENT NO. 966

Mr. MURKOWSKI. Mr. President, I move that the Senate concur in the House amendment with a further Senate amendment which I send to the desk on behalf of Senator DENTON.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] for Mr. DENTON, Mr. MURKOWSKI, and Mr. HEFLIN proposes an amendment numbered 966.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. CHILES. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue.

The assistant legislative clerk resumed and concluded the reading of the amendment.

The amendment is as follows:

In the table of contents in section 1(b), after the item relating to section 304 insert the following:

Sec. 305. Feasibility plan for the purchase of a facility for furnishing hospital and nursing home care.

At the end of title III, add the following:

SEC. 305. FEASIBILITY PLAN FOR THE PURCHASE OF A FACILITY FOR FURNISHING HOSPITAL AND NURSING HOME CARE

In the documents submitted by the Administrator of Veterans' Affairs to the appropriate committees of the Congress at the time of and in connection with the submission, pursuant to section 1105 of title 31, United States Code, of the Budget for fiscal year 1987, the Administrator shall provide a feasibility plan for the purchase for Veterans' Administration use of a medical facility that is located in an urban area and is suitable for furnishing both hospital and nursing home care services, and meets the current and projected needs and specific. tions of the Veterans' Administration for furnishing health care to eligible veterans. In such Budget, the President, as warranted by such feasibility plan, shall include a request for an appropriate amount to purchase such a facility which meets those needs and specifications.

Mr. DENTON. Mr. President, this amendment, which was just read, is simple and straightforward. It puts back into the bill a provision adopted unanimously by the Veterans' Affairs Committee and by the Senate, a provision that was deleted by the House.

The language is identical to that approved by the committee and included in our bill. That language was not what I personally, wanted at the time, but it was a compromise worked out in good faith carefully and effectively by the majority and the minority on our committee. I found it acceptable ultimately, and I appreciated the cooperation shown by members and staff on both the majority and the minority, and particularly the leadership and consideration shown by the chairman, the Senator from Alaska.

Because it was supported unanimously in our Veterans' Affairs Committee, there can be little controversy about it now on the merits.

The amendment will not cost the Government or the taxpayers any money.

Indeed the study which is called for by the amendment will most likely confirm that significant sums will be saved during the coming years.

The amendment requires the Veterans' Administration to provide, as part of the fiscal year 1987 budget submission, a feasibility plan for the purchase of an existing hospital located in an urban area which is capable of providing both hospital and nursing home care and which meets the current and projected needs and specifications of the Veterans' Administration.

The amendment further provides that, as warranted by the feasibility plan, the President shall include in the budget a request for funds to purchase a facility that meets the needs and specifications.

In other words, that inclusion in the budget for funds would be dependent on the findings of the feasibility plan.

Report language adopted by the committee at the time indicates that the hospital that should be studied is the Providence Hospital in Mobile, AL.

Lest anyone think that this is simply a parochial matter, let us examine several facts.

First, the hospital has already been examined by the facilities people in the Veterans' Administration, who concluded in a formal written report that it is in good condition and suitable for conversion to a VA facility.

Second, the facility and its possibilities have been examined by senior staff from both the House and the Senate Veterans' Affairs Committees. There has been nothing but enthusiasm for its potential benefit to the VA and to veterans.

Third, the amendment does not require that the Veterans' Administration purchase the hospital. It provides only that the VA conduct a study of the feasibility of purchase and conversion and request funds if the study suggests that that course should be followed.

Fourth, the VA itself has identified a need for an additional VA hospital to serve the veterans of the gulf coast region. A new facility could not be built before the mid-1990's at the earliest, and would cost many millions of dollars. The veterans of the region, who are among the most underserved in the country, strongly support the provision of a hospital as quickly as possible, and a great many of them strongly support the acquisition of Providence Hospital in Mobile. The VA needs, therefore, to consider whether the advantages of speed of establishment and the lower cost of acquiring an existing facility offset any disadvantages that might flow from the location of the hospital.

Mr. President, at a time of budgetary stringency, we need to be concerned about effective ways to minimize costs and save money in any program, including in our veterans programs.

Although the Veterans' Administration has had the authority in law to acquire and convert existing facilities for its own use, it has never done so. I say again the Veterans' Administration has had the authority in law to acquire and convert existing facilities but it has never chosen to do so. Many of us on the committee believe that, if our veterans are to continue to receive adequate care at a time of declining Federal budgets, the VA must begin to use that option.

That option has been endorsed by the Congressional Budget Office, by the Office of Management and Budget, and by the VA itself. In other words, for many years the Veterans' Administration has been pressed to buy existing facilities suitable rather than build hospitals from scratch. Strangely enough there has been no evidence of desire or determination on the part of the Veterans' Administration to follow that course and that course is not followed I believe for reasons that are not connected with the economies or with adequacies of service to our veterans.

It is, of course, the case that most hospitals in our country that are or could be offered for VA acquisition and use are not up to the standards that are required. most cases, organizations that close or dispose of hospitals do so because those hospitals are no longer adequate. That is not the case in this instance, as the VA's own facility study demonstrated.

This situation, therefore, provides an opportunity to see whether conversion makes sense and is feasible. If it is, then we can save a great deal of money in this instance, and even more in future years from other hospitals that might be acquired through the same process, an acquisition process which is long overdue and has been long urged.

Mr. President, let me reiterate the key points:

First, this amendment was unanimously approved by the Senate Committee on Veterans' Affairs and was included in our bill as sent to the House. The other body removed it for reasons best known to itself.

Second, it involves no expenditure of funds unless the VA itself decides that the option is cost effective and should be pursued.

Third, it promises the possibility of saving a great deal of money not only in the case of a facility already proposed for addition to the VA system but for the provision of other facilities in the future.

Fourth, if the feasibility plan shows that the idea makes sense, it offers a way to respond quickly, effectively, and economically to the needs of thousands of American veterans who are currently not well served by the VA medical system precisely because such economies and practicalities are not being followed.

Mr. President, I hope that the managers of the bill will accept this amendment to restore our own provision in our own bill. I hope that my other colleagues in this body will join them in supporting it.

Mr. MURKOWSKI. Mr. President, I rise in support of Senator DENTON's amendment to H.R. 505, the proposed Veterans' Administration Health Care Amendments of 1985 and urge my colleagues to approve its adoption.

The Senator is quite correct in his assessment that this particular legislation moved unanimously out of the Senate Veterans' Affairs Committee which I have the pleasure of chairing. There was a good deal of discussion at that time. I would propose that the amendment is identical to the provision contained in S. 876. This was action taken by the Senate Veteran's Affairs Committee on July 9 and passed the Senate as H.R. 505 on July 30. I would highlight again, Mr. President, the fact that the provision requires the VA to study the feasibility of acquiring an available private sector hospital.

We are not suggesting that the VA acquire a property or hospital, but simply study the feasibility. And we have seen opposition to this in the House as they have refused to accept this recommendation. Unfortunately, Mr. President, the threat is that the House will let the bill die if indeed this feasibility study is attached. I find that extraordinary and I think we have to recognize it for what it is.

Unfortunately, we have an issue that pits one State against another. Whether it be Alabama, Mississippi, or Florida, the question of which State may

get a new hospital, or if indeed the feasibility study suggests that it is in the interests of the VA and the Government that the hospital in Alabama is feasible, then it may be in the best interests to go ahead and eventually acquire that. But that is not the question before the Senate today. It is a question of determining whether or not a feasibility study occur. I think it is a most reasonable request. That is why I support my colleague from Alabama.

I cannot begin to comment on the number of feasibility studies that are done and authorized by Congress. It is not a question of further funding being necessary. The VA has currently in their budget the capability to meet the monetary requirements to initiate a feasibility study.

So, as chairman of the committee, and acting on behalf of the unanimous vote taken in the committee, I think it is indeed unfortunate that we have been unable to work out some arrangement on this matter and that we are forced to accept a dictate from the House that the bill be killed if, indeed, it carries on an amendment suggesting that the feasibility study be initiated.

I think it points out the reality that we are down to either accepting the House's dictate or threatening the bill to be killed. And while I certainly do not support killing the bill which is in the best interest of the veterans, I do not know why necessarily we have to take the dictate of the House on this matter.

The Senator from Alabama has already indicated clearly the provisions and the position of the VA and these that have indeed made a recommendation. It would seem to me, Mr. President, that it is appropriate that we make a determination of whether or not this is in the Federal Government's interests and the VA. It very well may be that those who are opposed to this are concerned that an independent feasibility study will support the reality that the acquisition of this hospital is in the best interests of the VA and the Federal Government.

I think it is clear to point out, too, that we are approaching a precedent-setting consideration here, because this would mark almost the initial effort of the VA to step outside its traditional procedure, which indicates a feasibility study and then a VA hospital, to utilizing existing facilities that might be available that would provide the VA with substantially less strain on their hospital facility and construction budget.

All we are doing here is asking for this feasibility study to occur, which I feel is most reasonable. In time of budgetary constraints and high cost of medical facility construction, it is appropriate that we consider some alternatives. The VA's construction budget has been approximately $1 billion a year for some time. It is long past the appropriate time when the VA should seriously consider purchasing or leasing private sector facilities instead of expending large sums of Federal dollars to build entirely new facilities.

I am not objecting to new facilities, by any means. But if we are looking responsibly toward meeting the requirements of America's veterans, we have to show some flexibility and recognize that there may be the capabilities of providing our veterans with quality care cheaper by looking at alternatives that may exist in the private sector that are not totally utilized. And this, Mr. President, may be one of those alternatives.

So again I would point out the reality that it is an entirely reasonable request. Under the current law, the VA has the option, even under severe budget restraint and rising construction costs. The VA has yet to use this authority. Mr. President, I think that tells you something about the bureaucracy. They are opposed to this because it suggests a precedent. I do not say that is good utilization of Government spending.

This certainly would not result in the Congress selecting the sites for VA medical facility construction projects and circumventing the VA's existing construction priority setting process. We are not asking for that, nor do we suggest that. This provision would, instead, send the VA a clear message that Congress wants the VA to go ahead with acceptable available and cost-effective alternatives to construction to meet an already defined process. Why is it not used, Mr. President, if it is already defined? That is a good question. We believe that the approach, when appropriate, will expedite the VA's construction process and provide needed services to veterans in a more timely manner.

On October 30, the House passed H.R. 505. The House-passed version, as I have indicated, did not include the Denton provision and, therefore, prevented the House and the Senate from reaching a compromise agreement on H.R. 505.

Mr. President, I respectfully urge my colleagues to reconfirm the Senate Veterans' Affairs Committee commitment to this provision. I do not feel that the Senate necessarily has to take the dictate from the House and surely we do not have to take the responsibility for killing this legislation if the House does not prevail in a manner in which they have forwarded their information on to us.

I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 967

Mr. CRANSTON. Mr. President, on behalf of Senator CHILES, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], on behalf of Mr. CHILES, proposes an amendment numbered 967 to amendment No. 966.

Mr. MURKOWSKI. Mr. President, we have not had a chance to see the amendment.

Mr. CRANSTON. It is being read now.

Mr. MURKOWSKI. We would like to have an opportunity to at least review it for a few moments. I can either suggest the absence of a quorum or maybe the Senator from California will allow us a few moments to take a look at the amendment.

The PRESIDING OFFICER. The clerk will resume reading of the amendment.

The assistant legislative clerk resumed reading as follows:

Amend the amendment of Mr. MURKOWSKI by striking out "specifications." and insert in lieu thereof:

"Specification: *Provided*, That this section shall not be construed to require the Administrator to provide a feasibility plan with respect to the purchase of a facility that would have the effect of making it infeasible to construct, acquire, or lease a medical facility in the Northern Florida panhandle to finish health care to veterans in the area."

Mr. CRANSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, the Senator from Florida will speak to that amendment. I will speak to the underlying amendment which has been proposed by the Senator from Alabama.

Mr. President, I appreciate the ongoing interest of the Senator from Alabama [Mr. DENTON] in the issue of the purchase by the VA of the Providence Hospital which is located in Mobile in his home State. Indeed, I was instrumental in working out the provision contained in the Senate bill which might have brought about VA reconsideration of the appropriateness of such a purchase. I understand about such home State issues, and I have tried to be of assistance to the Senators from Alabama.

However, I can not support his amendment to the pending measure which is in the nature if not the form of a conference agreement with the House. I urge my colleagues to reject the pending amendment for several reasons: First, it is urgently important to have the underlying legislation move forward and go to the President

for his signature. This clearly will not happen if the amendment is adopted. Second, the subject matter addressed by the amendment has had a fair hearing—both in legislation, as considered and passed by the Senate, and in our negotiations with the House, and before the Administrator of Veterans' Affairs, Harry Walters, who has given this issue his personal attention.

Mr. President, H.R. 505 should go forward to the President, and do so now, because it is good legislation which contains a variety of important provisions that should enhance the VA's overall ability to meet the health-care needs of eligible veterans. Such legislation, of general interest and benefit to all veterans, should not be held hostage to the concerns of one geographic area. And let there be no mistake, in my opinion, adding the pending amendment to this legislation will effectively end its chance of enactment. Our colleagues in the House have made it clear beyond a doubt that they do not support any legislative action regarding the Providence Hospital.

I am in concurrence with the statements by the Senator from Alaska and the Senator from Alabama that we should not yield to dictates from the other body, insofar as I am concerned, on matters that we feel are appropriately being handled by this body, but in this case I do not believe that there is a good cause for the amendment by the Senator from Alabama because of the factor of cost and other factors relating to what is in the best interests of health care for veterans.

So for the reason I do not believe that we should proceed in the way that would mean this bill will not become law in a timely fashion or will not become law at all in view of the importance of this legislation.

Perhaps of more immediate concern—this is why it is important to get this legislaition enacted now—this legislation contains three authorities which expired at midnight last Thursday—the authority to operate a VA regional office in the Philippines, the authority to provide fee-basis care for certain veterans in Puerto Rico, and the authority to contract with halfway houses to provide treatment to veterans suffering from drug and alcohol abuse disabilities. Each of these would be extended by provisions in the pending legislation and our failure to send this measure to the President in a timely manner threatens unnecessary disruption in the lives of thousands of sick veterans.

As I indicated, Mr. President, this bill as passed by the Senate in late July contained a provision indirectly relating to the Providence Hospital in Mobile, AL. However, despite our best efforts in the negotiations with our House counterparts, we were unable to gain their agreement to include it in the final compromise bill. As I noted earlier in my remarks on the bill itself, a number of Senate- and House-passed provisions met this same fate, including two provisions that I regard as quite important from my bill, S. 6. I understand the disappointment of the Senator from Alabama [Mr. DENTON], but I must support the compromise agreement that we have worked out.

Moreover, even if the Senator's amendment were enacted, the Senator's amendment would not change the VA's position on the purchase of Providence Hospital. As was set forth in a June 19, 1985, letter I received from Administrator Walters, the VA, after a "formal review of a proposal to establish a VA medical center in Mobile, AL," reached the finding that the presence of a VA medical center in Mobile, AL is not supportable. Administrator Walters went on to note that he had studied these findings and agreed with them.

I would like to read that letter in its entirety. It is quite brief. It is dated June 19, 1985. It is addressed to me. It is from Harry N. Walters.

The letter is as follows:

DEAR SENATOR CRANSTON: The Veterans Administration has completed a formal review of a proposal to establish a VA Medical Center in Mobile, Alabama. The final review process resulted in a finding that the presence of a VA Medical Center in Mobile, Alabama is not supportable. I have studied these findings and agree with them. It is my decision that the proposal is not the most beneficial alternative for providing health care to veterans who reside in a wide geographic area along the gulf coast of Mississippi, Alabama and northern Florida.

Please be assured that we have done a complete analysis of this entire issue prior to making this decison. Our deliberations assessed the health care needs of all veterans in this area including those who reside in the entire area at issue. This decision does not leave the needs of any group to veterans unaddressed. It is our intent to provide the best possible medical care and place our facilities where they will provide service to the greatest number of veterans possible. Alternative strategies which will be pursued by the Department of Medicine and Surgery will also recognize these needs. Based on the factual information of the Mobile/Providence issue, I cannot recommend at this time the establishment of a VA medical center in Mobile, Alabama. If more information becomes available, we, of course, would review it without bias.

I thank you for your interest and look forward to our continued common goal of meeting the total health care needs of the veteran population.

Sincerely,

HARRY N. WALTERS,
Administrator.

On August 26, 1985, Deputy Administrator of Veterans Affairs Everett Alvarez, Jr., reiterated the VA's position to the mayor of Mobile, AL. The letter reads as follows:

AUGUST 26, 1985.

Hon. LAMBERT C. MIMS,
Mayor of Mobile,
P.O. Box 1827,
Mobile, AL.

DEAR MAYOR MIMS: The July 5, 1985, letter to the President from you and Commissioners Dayle and Outlaw was referred to my office for response. This is to inform you that the Veterans Administration has completed a formal review of a proposal to establish a VA medical center in Mobile, Alabama. The final review process resulted in a finding that the presence of a VA medical center in Mobile, Alabama, is not supportable. The Veterans Administration's decision is that the proposal is not the most beneficial alternative for providing health care to veterans who reside in the wide geographic area along the gulf coast of Mississippi, Alabama, and northern Florida.

A complete analysis of this entire issue was conducted prior to the making of this decision. Please be assured that our deliberations assessed the health care needs of all veterans in this area. The alternative strategies which will be pursued by the Department of Medicine and Surgery also recognize these needs. This decision does not leave the needs of any group of veterans unaddressed but rather provides a more prudent plan for improving access to VA health care and meeting the existing, as well as the projected, health care needs of all veterans.

Thank you for your interest in this matter.

Sincerely,

EVERETT ALVAREZ JR.,
Deputy Administrator.

In light of this clear administration position—which was reached after extensive study as urged by my colleague from Alabama [Mr. DENTON]—there is nothing constructive to be gained by continuing to pursue this issue, particularly at the cost of the timely enactment of the pending measure.

On the more general issue of whether the VA takes appropriate account of the possibility of purchasing or leasing existing facilities when the agency is considering the establishment of a new health-care facility—a concern that Senator DENTON raised in the committee in connection with the Providence Hospital—I am pleased to note that H.R. 505 contains a provision, section 303, which requires the administrator, as part of a prospectus for a new or replacement medical facility, to submit to the two Veterans' Affairs Committees a description of the consideration that was given to leasing or purchasing an existing facility. Although this will not affect the decision with respect to the Providence Hospital at this time, it is an important step forward and Senator DENTON should be congratulated for his advocacy of such a change in current law and practice.

Mr. President, in light of these concerns and reasons, I cannot support the pending amendment and I strongly urge my colleagues to join me in opposing the amendment so that we can agree to the House amendment to

H.R. 505 and send it to the President for his signature.

Mr. DENTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. DENTON. Mr. President, I would like to respond to my friend from California. I appreciate his support, and his contribution to the unanimous support of the thrust of this amendment which was unanimously approved by the Senate Veterans' Affairs Committee not on the basis as implied by my friend—namely, that it does something for my State.

It was an action which was presented as the evident beginning of a long-urged new trend in establishing medical care at lesser cost and perhaps at better quality for our veterans.

We are in a budget crunch. The veterans are going to be squeezed in terms of their medical care, as are the services.

We have one agonizing decision after another now here on the floor as we attempt to decide how to deal with the necessity of cutting our budget.

This recommendation was proposed that way. It was investigated that way by the staffs of both the minority and the majority on the Veterans' Affairs Committee, with onsite visits to this hospital in Mobile, AL.

I admit that the hospital is in my home State and in my hometown, but I do not wish to leave my colleagues with a misimpression that I am a pork barrel Senator. I would not go for this were it not in the interest of the veterans and in the interest of the Nation.

I will give an example: When I first came to the Senate, the hottest issue in my State was the proposed appropriation of $4.1 billion in Federal money for a coal degasificiation plant in a certain part of Alabama. I looked into it. On its merits, I could not support it. I was the only Member of the Alabama delegation to oppose the Federal funding of that project and to urge that private funding be the method of installing that coal degasification plant, if, indeed, it was worthy of being installed.

Gradually, the other Members joined me and eventually that coal degasification plant found private funding and, in a sense, has fallen into limbo because of the feasibility of it in profi-and-loss terms.

I do not want to be seen as a person who goes for pork. I go for this hospital because I believe it will result in the breaking of a long-term lock of political control by people who wish to erect new hospitals really at the expense of our veterans when in some cases they are artistic hospitals.

There are a number of Senators here who will propose that this new trend be continued. This is sort of a test case. It had the total concurrence of the staffs of both sides. I want to say that in no way do I want to hold up the veterans bill but also in no way do I want to see a parochial interest rise to the absurd position of saying that this body with jurisdiction through the Veterans' Affairs Committee unanimously passed something and they are going to hold up the whole bill simply because they disagreed for parochial reasons and wished to perpetuate the uneconomical and pork barrel practice of the Veterans' Administration over which we are supposed to have jurisdiction.

I have oversight over the FBI and the Drug Enforcement Administration as subcommittee chairman of Security and Terrorism. We in Veterans' Affairs, under Chairman MURKOWSKI, and the ranking member, Senator CRANSTON, have oversight over the Veterans' Administration. The Veterans' Administration has been following the wrong path. They have built at the profit of real estate speculators and contractors and in every case they have built new facilities for our veterans which takes money that need not be taken in every case from their budget. In some cases they should have bought existing hospitals with great savings.

The Office of Management and Budget and other agencies have insisted that they stop that practice.

It is proper oversight for us to have passed this on the Senate side unanimously. I must take exception to the pork barrel aspect of it and disagree with my colleague from California. I urge that our colleagues adopt this amendment.

Without yielding the right to the floor, I would like to suggest to the Senator from Florida if he is here, to Senator CHILES, that the amendment I believe he is proposing is to my amendment, not to Senator MURKOWSKI's, if he wants to make that correction.

Senator MURKOWSKI has told me that, but he said he offered it on my behalf. I withdraw my suggestion.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I would like to make reference to a couple of facts.

First of all, the feasibility study does nothing more than address the issue of whether this private hospital in Mobile, AL, can be utilized in the scope of the future needs of the VA with regard to health care in that particular area of the United States.

It is apparent that what we have here is a situation whether it would be recommended as feasible at the expense of another proposed hospital in another area of the South that might benefit from new medical facilities being constructed.

Let there be no mistake about it, the significance of those who have spoken on the issue, including the significance of the senior members of the House Veterans Committee, have feelings that are not unknown on this matter.

Mr. President, I want to make sure my colleagues understand the issue and the merits of the issue.

Is it not appropriate that we give this particular consideration for this hospital the test of a fair and open examination based on the merits? We are not asking for more money. Funds are in the VA budget. So there is no drain on the Treasury.

We are not addressing the issue with any assurance of whether the hospital will be built.

Mr. President, I must oppose the Chiles amendment. I must state for the record that it is clearly designed to kill the study. I must bring to the attention of my colleague from California, Senator CRANSTON, the ranking minority member of the Veterans' Committee, that, indeed, the committee is in an extraordinary position.

We believe that the proposal of the feasibility study in the committee was worthwhile. It was proposed and passed before this body. We seek to change nothing now from the Senate-passed version.

The interesting thing, Mr. President, is that Senator CHILES did not object during the Senate passage. He had every right to do so.

Mr. President, let me read to you the Senate report on the bill S. 876 regarding my committee's intent on this matter.

> The committee intends that the VA carefully consider the Providence Hospital in Mobile, Alabama, as the subject for the feasibility plan required by this provision.

Here we are now, trying to undo what the committee did unanimously, trying to undo what Senator CHILES and any other Member of this body who objected to this in the normal course of its being brought before the Senate failed to do. I find this extraordinary. We have a dictate from the chairman of the House committee that we either accept this or he is going to kill the bill.

Mr. President, I think it is time that this body stood on the principal recommendation of the committee and, as a consequence, join my colleague, the Senator from Alabama [Mr. DENTON] and myself. I, therefore, move to table the Cranston amendment. The yeas and nays have been asked for.

Mr. COCHRAN. Mr. President, will the Senator withhold his motion to table, because other speakers want to be heard?

The PRESIDING OFFICER. The Senator has made a motion to table the amendment. The motion is not debatable.

Is there a sufficient second for the yeas and nays?

There does not appear to be a sufficient second.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from California.

Mr. MURKOWSKI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I believe there are a number of my colleagues who wish to speak on the issue. According to parliamentary procedure, I ask to vitiate the yeas and nays with the intention of proceeding to the conclusion of statements from my colleagues, at which time I shall propose again to table the amendment.

The PRESIDING OFFICER. The yeas and nays on the motion to table have not been ordered. The Senator may withdraw his motion to table at this time.

Mr. MURKOWSKI. Mr. President, I withdraw the motion at this time.

The PRESIDING OFFICER. The motion is withdrawn.

The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I appreciate very much the distinguished chairman's withdrawing of his motion to table.

I simply point out to the Senate that this is an area of interest in my State of Mississippi, as well as in the State of Alabama and in the State of Florida, too, with respect to the construction or location of additional veterans' hospital facilities in that area. The Senate should know, and this may have been pointed out by the chairman of the committee, that there is an existing veterans' hospital in Gulfport, MS, which is within an hour's drive of the city of Mobile and within an easy 2 hours' drive, maybe less, of the north Florida area which is of interest to the distinguished Senators from Florida.

Mr. President, I do not know where a new facility ought to be located if there should be a new facility located. I do know this, and the distinguished Senator from Alabama has probably pointed it out: The facility at Gulfport, MS, is subject from time to time to overcrowding and there probably is a need for either an enlarged facility at Gulfport or another facility of some kind in that general area to help serve the health care needs of our veterans. I am simply rising to point out that, from my observations and experience and from talking with friends and veterans in the area, we do have a need for a better health care delivery of services in that general area.

I do not know whether we can decide today on the floor of the Senate whether there should be a new facility in Pensacola or in some other area of Florida, whether an existing hospital should be purchased by the Veterans' Administration in Mobile, or whether there should be an enlarged facility in the Gulfport, MS, area. These are alternatives that the Veterans' Administration should properly consider. I know there are procedures for doing that. One of the procedures has not been, up to this point, legislating the location of new facilities.

That is the concern I have, Mr. President. I hope that we would not get into the business in the Senate of trying to make those decisions. I think we have the obligation, however, as the Senator from Alabama is trying to do, to point out alternatives that ought to be considered. I think, certainly, he has done that in a very commendable way and I congratulate him on the work he has done in this effort. It should be considered; his suggestions ought to be considered.

I do not know that the amendment of the Senator from Florida is the answer to it or would be helpful. I would like to see the amendment changed to say that the study shall be no more than a study for the purpose of getting information. Certainly, the study, just because it is going to take place if we approve the study, does not mean that any other option is not feasible. We are just suggesting, as I understand the amendment of the Senator from Alabama, that this be looked at.

Mr. CHILES. Will the Senator yield?

Mr. COCHRAN. I am happy to yield to the Senator from Florida.

Mr. CHILES. As I read the amendment, it looks to me as if it is a little bit more than that. It says the Administrator shall provide a plan. It does not say a study; it says he shall provide a feasibility plan for the purchase of a medical facility for the use of the Veterans' Administration that is located in an urban area and is suitable for furnishing both hospital and nursing home care services, and meets the current and projected needs.

I read that with some apprehension, I can tell my good friend from Mississippi, because it does not say to me that he should study, and then compare this option to other options including whether the facility would better serve existing needs if it was located elsewhere. This is much more pointed than that; it says he shall provide a plan.

Then, it goes further and talks about including a request for an appropriate amount to build that facility. So I would say that if this proposal was simply to study it, the Senator from Florida would not object to that.

Mr. DENTON. Will the Senator yield for a question?

The PRESIDING OFFICER. The Senator from Mississippi has control of the time.

Mr. COCHRAN. Mr. President, I am happy to yield to the Senator from Alabama.

Mr. DENTON. I thank the Senator.

Mr. President, I just wanted to ask the Senator from Florida if he heard the emphasis in my talk and also notes the emphasis in the amendment which says "in such budget, the President, as warranted by such feasibility plan."

It does not include a request for an appropriation. It says if the feasibility plan indicates that one should be provided to meet those needs, an appropriate amount would be requested.

Mr. COCHRAN. Mr. President, I am glad to have the assurance of the Senator from Alabama about the intent of the language. I would hope maybe we could modify that amendment, or he could modify his amendment to spell that out in a clearer way. If not, I will be in a position of having to vote against the Senator's amendment. I do not want to have to do that because I think that bringing this alternative to the attention of the Veterans' Administration is certainly an appropriate and proper thing for the Senator to do. What I do not want to see us do, though, in taking action on this amendment is mandating a decision, directing that a decision be made by the Veterans' Administration in choosing a Mobile site over a potential Florida site or a potential Mississippi site. I do not know that they are even considering enlarging Gulfport Hospital to accommodate the additional needs but since I have the floor I will suggest that as an alternative, as a third option that just might be feasible. I do not know that it is. But if the Senator could modify that language some way—and I have not really worked on the language to come up with a suggestion—so that we are just asking a feasibility study be done or that this plan as proposed by the Senator from Alabama be considered before any final decision is made, then I can support that. But directing them to purchase the Providence Hospital in Mobile, AL, I do not think I can support. I applaud just as enthusiastically as I can the efforts of the Senator from Alabama and the intent that he has to try to satisfy these critical needs because they do exist, Mr. President, and they ought to be taken into account by the Veterans' Administration.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I think we are awfully close to resolving this, if the question before us is the language to give the Senator from Florida assurances that the VA is not

going to go off and build a hospital here, that it is limited to the issue of a feasibility study. I would be happy to suggest as chairman of the committee that Senator DENTON perhaps during a quorum could work out some specific language to give the assurances that both sides apparently need. I think we are debating a very fine line here. I would defer to my colleague, the senior minority member of the Veterans' Committee, for an expression from him whether or not he has the same observation that I do, that we are close to an agreement.

Mr. CRANSTON. Mr. President, I want to speak to the subject of cost in regard to the acquisition of this hospital in Alabama. The Senator from Alabama has stated and the Senator from Alaska has suggested that purchasing the Mobile, AL, Providence Hospital would save money. That is just not the case.

If that hospital were purchased in fiscal year 1987, for the $25 million asking price, it would set in motion the following process:

Certain funds would be needed to make modifications in that structure. The extent of the modifications is not known at this time. So, of course, the cost is not known.

Next, that facility would need to be equipped with much new equipment to bring it up to VA standards for furnishing first-rate medical care. Again, we do not know what those costs would be.

Then and finally, Mr. President, the VA would begin to operate the hospital in fiscal 1987. That would require approximately $35 million per year for operation of an approximately 300-bed VA hospital that would then exist in Mobile. That is $35 million for 6 fiscal years, or a total of $210 million that would not otherwise be spent. It would not be spent because the VA's plans do not call for a VA facility——

Mr. MURKOWSKI. I wonder if my colleague will yield for a question.

Mr. CRANSTON. When I am finished speaking—do not call for a VA facility in northern Florida until fiscal year 1993, 6 fiscal years away.

So we would be spending at least $235 million plus inflation costs that would otherwise simply not be spent. Therefore, there is a huge additonal cost—not a savings—involved in this proposal by the Senator from Alabama.

I would like to point out an irony in connection with this amendment. Just yesterday the Senate rejected an amendment we offered to Gramm-Rudman that was designed to maintain the basic funding level for VA medical care. That amendment was defeated. So we now have in prospect a reduction in support for the medical care program in the VA.

That amendment was opposed by the Senator from Alabama. Today the Senator from Alabama comes in and proposes that we now proceed to bust the budget, to increase the budget, that we have a large expense added to the VA budget, which he voted yesterday to be allowed to be curtailed. What hospital would the Senator from Alabama propose be shut, in what State, to provide the funding for this new hospital in Alabama?

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, while we are talking about studies and what we should require the VA study to look at, I would like the Senate to understand that there already have been some studies. One of the things we should be concerned about as Members of the Senate is providing health care in the locale in which it is needed, providing facilities so veterans can get that care. One of the things Mr. Walters did when he became the Director of the VA was to come to see the Senator from Florida, and I think many of the other Senators, and he said, "If you will allow us to make these decisions on the basis of merit, we will try." In Florida we have a tremendous number of veterans and more are coming every day from all over the country. We never seem to catch up in Florida because we do not start getting the money for them until we get a census or new allocations. New veterans cannot understand why in the State in which they lived they could get good services, and then they move to Florida and they cannot get services. The reason for that is pretty clear. The money stays in the State from which they came and it takes us a long time to get it transferred. But Mr. Walters said, "If you will allow us to do these studies based on merit, we will do something about providing some additional facilities for your veterans in Florida." We said fine, we would allow him to do that.

Studies were made, and there have been two very distinct studies that say the need for a new VA facility is in the panhandle of Florida. Why there? Because that is where the veterans are, and that is where future growth is projected. If you look at the number of veterans that retire because they served at some time at the Pensacola Naval Air Station or they served at Eglin Field or they served at Tyndall or they just liked that particular area, you can understand the tremendous concentration of veterans. They have not been able to get care. They have had to go to Biloxi or to Gainesville or Lake City in Florida and drive tremendous distances.

Studies have shown that this is the area in which a facility should be built. Those are not studies that the Senator from Florida dictated. Those are studies that are done by the professionals in the Veterans' Administration.

At the same time, a plan to purchase a facility in Mobile, AL, was proposed. It was an existing facility, and that was studied, too; and the VA has said that they did not feel that was feasible.

The concern of the Senator from Florida is not that we shouldn't look at Mobile. My concern is that we are throwing out the window the studies that have been made that say that a facility should be put into the panhandle of Florida. That is where the need is, that is where the veterans are.

If we in Congress are going to start pinpointing where every VA hospital should be built, we will not have time to do anything else, because the fights will take place from now on. We need to allow the professionals to be able to do this.

The Senator from Florida is concerned that we are now going to dictate a feasibility plan: The language of this amendment says he shall do a feasibility plan. It does not say "study." It does not say "may." It does not say what he will consider. It does not say that that plan shall consider whether it is going to be able to best serve the veterans of this area of the country.

It almost pinpoints that you are going to make a VA hospital out of an existing hospital, in spite of demographic information on where the veterans would be and, in this instance, that is Florida.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. DOLE. Mr. President, I wonder if we could return to the pending business, House Joint Resolution 372 and whether, while we are disposing of one amendment and final passage, we might work out the disagreement in this matter and come back to it after that vote.

Mr. CHILES. If the Senator from Florida could still have the floor.

Mr. DOLE. Yes.

I say to the distinguished chairman that we are going to go back to the debt ceiling and then return to this issue. Is that satisfactory?

Mr. MURKOWSKI. That is satisfactory.

INCREASE IN PERMANENT PUBLIC DEBT LIMIT

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate return to the consideration of House Joint Resolution 372.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

A House message on H.J. Res. 372, a joint resolution increasing the permanent limit on the public debt.

Mr. DOLE. Mr. President, it is my understanding that the distinguished minority leader will not offer his amendment, and I will not offer my amendment.

Is it all right to vitiate the order for those two amendments?

Mr. BYRD. It certainly is. I thank the majority leader. As I indicated to the majority leader earlier, I have no intention of calling up the amendment.

Mr. DOLE. I have no intention of calling up my amendment, and I ask unanimous consent that the order for both those amendments be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I understand that the distinguished Senator from New York wishes a rollcall vote. I hope we can dispose of it quickly and have final passage by 1:30.

AMENDMENT NO. 968

(Purpose: To amend Title II)

Mr. MOYNIHAN. Mr. President, I send an amendment to the desk, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York [Mr. MOYNIHAN] proposes an amendment numbered 968:

At the end of the Amendment, add the following new section:

SEC. . EXEMPTION FOR AGENCIES INVOLVED WITH ECONOMIC FORECASTING.

Owing to the extraordinary dependence on economic forecasts required by this legislation, government agencies or programs involved with economic forecasting, including the relevant branches of the Intellegence Community, shall be exempt from budget reductions as otherwise provided in this Act.

Mr. MOYNIHAN. Mr. President, I asked that the amendment be read because it is straightforward and it tells the Senate what is involved here.

Mr. President, when the Senate first began to debate this extraordinary legislation or, rather, when finally it was printed and available to Members, I was struck by a kind of pseudo-scientism that pervades the measure: A curious combination of highfalutin and the primitive.

Thus, we read that:

The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount is greater than 5 percent of such maximum deficit amount.

Now, what the authors mean by the term "statistically significant" is "too much." But they are somehow uncomfortable with simple language. They prefer language which suggests arcane knowledge and professionalism. Fancy stuff. And so they turned to "statistically significant," all puffed-up with quotation marks, mind.

The problem is that "statistically significant"—in quotes, or not—does not mean "too much." It is a term used by mathematicians in estimating levels of confidence in the results of a sample. One such is the chi-square test. Most of us have become familiar with the concept from public opinion polls which are said to be accurate within, say, "plus or minus 3 percent." This is a measure of statistical significance.

And so a crucial section in the bill as written, and as approved by a 75-24 vote in the Senate, is in fact meaningless. It is gobbledygook. But it sounds so good.

That is the highfalutin' side. The primitive side is this business of knowing the future. If you think about it for a bit, the great thing that separates modern man from primitive man is that modern man, who knows more, is confident of much less. That is the great paradox of modernity: The more you know the more you know you don't know. By contrast, most primitive belief systems seem to rest on the assumption that everything can be known and in fact is known.

It is similarly plain primitive of the Senate to suppose that we know enough about our economy to forecast when it will enter a recession or a period of slow growth, which this legislation assumes we will do.

We seem not to realize how new all these concepts are, and how uncertain. James Q. Wilson has observed that "the very concept of 'economic policy'—or even a concept of the 'economy'—was largely an alien notion" in the early decades of this century. Gross national product, as a measurable quantity, is an idea conceived in the 1930's.

This brings us to the proposal, which would establish maximum deficit ceilings for this fiscal year and the following five—fiscal years 1986-1991—and provide that should CBO and OMB forecast that the budget will exceed the ceiling by 5 percent or more, automatic mechanisms to reduce spending to meet the ceiling would be activated.

Certain spending would be exempt from these automatic cuts: Social Security, net interest, claims and judgments against the Government, salaries for judges and the President, and Federal credit guarantee and insurance programs.

The rest of Government would be divided into two categories—those with automatic spending increases, such as annual cost-of-living adjustments—and so-called controllable programs. About $1.7 billion of automatic spending increases would be available for cuts; the rest of the cuts required to meet the deficit ceiling would be achieved by applying a uniform percentage reduction in outlays to controllable programs.

All this will happen—unless the economic forecasters in the Office of Management and Budget and the Congressional Budget Office predict that economic growth will be less than 1 percent in the coming fiscal year, or less than 1 percent for any two consecutive quarters in that fiscal year.

This scheme, then, we are told, would apply only when the economy is expanding—or more precisely, when we expect the economy to expand. When we expect—which is to say, predict or divine—a recession coming, we are given the opportunity to truncate the process, so as not to deepen that recession.

All such assumes we know what we're talking about, that we can predict when a recession is coming. We can't, and neither, in this matter, can anyone else.

Economists do not know the future—they study, and barely know, the past. This is really an adventure in mad scientism, pretending to know what cannot be known.

Dr. Rudolph Penner, Director of the Congressional Budget Office, testified on this legislation before the Legislation and National Security Subcommittee of the House Committee on Government Operations, and offered the following observation on the accuracy of economic forecasting:

. . . given the record of economists, it will not be difficult to convince anyone that economic forecasting is a very uncertain art. Reasonable men and women can differ widely about what the future holds, and even if there is agreement on an added layer of uncertainty involved in translating that forecast into an estimate of budget totals.

Dr. Penner later referred to the problems associated with linking budgetary policies to "the inherently uncertain forecasts of technicians," and stated that for his part, he would rather not publish quarterly economic growth estimates. In fact, he noted that:

Quarterly numbers contain a great deal of statistical noise and are therefore highly erratic. Thus, quarterly forecasts can be widely in error, even though the forecast for the entire year is fairly accurate.

There is a simple proposition here. This entire machine for deficit reduction rests on our ability to forecast increases or decreases in the gross national product and the deficit. And that we cannot do with any semblance of confidence.

Two months before the beginning of the last fiscal year, fiscal year 1985, OMB forecast that GNP would grow 4.9 percent in that fiscal year; CBO was a bit less optimistic, forecasting a growth rate of 4.5 percent. The actual results will not encourage those who would rest the direction of fiscal policy on the accuracy of these forecasts: GNP grew 3.3 percent.

Between 1976 and 1984, the GNP forecasts issued by the Office of Management and Budget were, on average, 1.15 percentage points off from the actual GNP growth rate—which was 3.3 percent for those years. The forecasting record of the Congressional Budget Office was only slightly better: On average, 0.98 percentage points off. Dr. Penner testified, "I consider any forecast of GNP a year ahead that is off by no more than 1 percentage point to be an excellent forecast."

Let me explain that 1 percentage point is a lot more than 1 percent. If GNP were forecast to grow 4 percentage points, an error of 1 percentage point is obviously sizable.

In President Reagan's first full budget, for fiscal year 1983, the Office of Management and Budget forecast a deficit of $91.5 billion for that fiscal year. The actual deficit was $195.4 billion. A forecasting error of massive proportions, such as would derail the operations of a scheme—the scheme we debate today—that depends on pinpoint accuracy in just such forecasts.

In the President's fiscal year 1984 budget, on pages 3-18 and 3-19, the Office of Management and Budget published a very enlightening table—one acknowledging the degree to which OMB's own forecasts had been drastically revised over the course of only 2 fiscal years. The 1983 forecast for GNP for that year and the following 3 years, fiscal year 1983-86, as an aggregate, were some $2.175 trillion less had been forecast in 1981, just 2 years earlier. That is no trivial sum. Projections of budget outlays increased by a total of $475 billion; forecasts for receipts dropped by $530 billion. Projections for receipts changed more than 16 percent in 2 years, and budget outlay projections changed by 14 percent.

And now we are about to enact legislation that would set in place automatic cuts in national defense, in support for poor children, in benefits owed to American war veterans—all on the basis of deficit projections assumed to be accurate.

We are about to set fixed deficit targets to 1990 and beyond. Now let's consider one variable of those deficits, one of the pieces on the basis of which budget deficits—and GNP growth rates—are predicted. Interests rates, for example—a crucial factor in determining rates of economic growth and interest costs for the Federal Government.

In August 1985, CBO published "The Economic and Budget Outlook: An Update." There, CBO projected that the 3-month Treasury bill rate for fiscal year 1990 will be 7.2 percent. OMB's "Midsession Review of the 1986 Budget" projects that 3-month T-bills will be issued at 5 percent. A 2.2-percentage point difference in interest rates on a $2-trillion debt, amounts to some $44 billion, and that means a $44-billion difference in the deficit forecast."

There is an escape valve, we are reassured: These deficit forecasts and deficit targets will not matter if we forecast a recession in the coming fiscal year. But the record of predicting recessions in advance is no better than the record of predicting interest rates of deficits.

The official arbiter of recessions—when they begin and when they end—is the Business Cycle Dating committee of the National Bureau of Economic Research. The dating committee, established in the 1940's, is made up of seven distinguished economists, including today Robert Hall (chairman), Benjamin Friedman and Martin Feldstein. The dating committee does not meet on a formal schedule. When members want to meet to discuss economic conditions, they arrange to do so. Invariably, however, it is after the fact: The dating committee dates the beginning of recessions long after they have actually begun, and dates the end well into the recovery. And that is because economics, practiced properly, can tell us about the past, not the future.

In the last two recessions, the dating committee has determined that a recession was underway about 6 months after the downturn had commenced. Similarly, the committee determined that the recessions had ended 6 months after the bottom of the business cycles had been reached.

Albert Malabre, news editor of the Wall Street Journal, wrote of much the same problem in yesterday's edition of that paper. He recalled:

> As late as August 1974, with the 1973-1975 slump already nine months old, no less an economist than Arthur Burns, then chairman of the Federal Reserve Board, assured a committee of Congress that the "economy's movements do not have . . . the characteristics" of a recession. Several months before . . . the President's Council of Economic Advisers proclamined that "a number of factors . . . support the expansion of the economy" in the months ahead.

The record of the Bureau of Economic Analysis at the Department of Commerce, the official arbiter of GNP growth rates, positive and negative, is much the same. The first estimate of quarterly GNP growth is released in the last 2 weeks of each quarter—that is, after-the-fact. Not, as this legislation requires, before-the-fact. In the course of the next 3 months, three revisions of that first GNP estimate—the "preliminary revision," "first revision," and "second revision" of the first "flash" estimate—are released.

From 1980 through the second quarter of this year, the difference between the first or "flash" estimate of GNP and the final revised estimate 4 months later averaged 1.5 percentage points. In a $4 trillion economy, that comes to $60 billion. And often, even the direction of economic growth is misjudged—all after-the-fact. The "flash" estimate for the third quarter of 1981, for example, was GNP contracting at a 0.5-percent rate. Four months later, the second revised estimate said GNP was expanding the previous quarter at a 1.4-percent annual rate. In the third quarter of the following year, 1982, the Commerce Department first estimated that GNP was growing at a 1.5-percent annual rate—above the recession trigger of this legislation. By the second revision, Commerce said GNP had actually grown that quarter at an annual rate of only 0.7 percent—below the recession trigger.

And I repeat, these estimates, inaccurate as many are, were all made after the quarter had ended. The operation of this legislation will depend on accurate GNP and deficit estimates forecast before the fact. And that, I say, is nonsense. Scientism of the worst sort, placed as the engine of fiscal policy.

In 1981, a new administration came to Washington, elected on the premise and the promise that the budget would be balanced in short order. Instead, that administration doubled the national debt, and gave the Nation a permanent deficit. The same administration has complained, criticized, and attacked any whiff of what they consider economic planning. Now it embraces a proposal not even mad Keynesian would contemplate.

Two final observations, Mr. President.

The first is that the prospect of automatic, across-the-board reductions in Federal outlays seems to me to be especially threatening to the intelligence community. Last January I completed an 8-year term on the Intelligence Committee, where, latterly, I served as vice chairman. During those latter years it fell to me to bring the Intelligence authorization bill to the floor, in the company of my respected chairman, the Senator from Arizona [Mr. GOLDWATER]. As we made clear on repeated occasions, those were years of great and necessary growth in the Intelligence budget, no small part of which is concerned with economic forecasting. This legislation threatens our intelligence community just as it threatens our defense program, and to my mind, mindlessly so.

My closing observation is not especially relevant, but I hope interesting. For some years now, an important theme among conservative economists is that the United States and other industrial democracies took the promise of Keynesian economics much too seriously. The thought—and I was here in Washington when it was thought—that we could "fine tune" the economy ultimately rested on the proposition that we could predict the economy.

Nonsense, the conservative economists have been saying. We just do not know that much, and never will. Certainly, we do not know more than markets know, and just as certainly there is a severe limit to what we can change. Yet, here we are today acting on almost the opposite premise. But then, this is not conservative legislation. It is radical and it is dangerous, and it will pass. What has become of us?

Mr. President, on a number of occasions since we began this debate, I have commented on what seemed to me to be a combination of the highfalutin and the primitive in the measure before us. By the highfalutin, I mean a kind of false scientism that suggests that there are degrees of knowledge and accuracy in economic forecasts that really do not and will never exist.

I noted that one of the provisions in the early version, still there, provides that certain mechanisms will be triggered if the deficit forecast is greater than the maximum deficit ceiling by 5 percent or more. Such deficits are defined to be "statistically significant."

What the authors of the legislation mean is that the excess is too big, is to much, but they use "statistically significant" as if this suggested some arcane and sophisticated professionalism. The problem is that they or their words are wrong.

The words "statistically significant" refer to a term statisticians use to describe the degrees of confidence you can have from the results of a sample. Statistical significance is most frequently determined by something called the chi-square test, and whatever statistical significance means, it does not mean too big. It means something very different, and I wonder whether, in consequence, the measure itself is meaningless.

The PRESIDING OFFICER. Will the Senator withhold?

The Senate will be in order.

Mr. MOYNIHAN. I thank the Chair.

However, along with the highfalutin, there is the primitive, and what is most primitive about this measure is the presumption of knowing the future.

If you think about it for a bit, the great thing that separates modern man from primitive man is that modern man, who knows much more, is confident of much less. That is the great paradox of modernity—the more you know, the more you know you do not know. By contrast, most primitive belief systems seem to rest on the assumption that everything can be known and in fact is known.

A man knows why his arms hurt, why it rains, why the corn crop fails. All those things are know. In fact, they are not known at all, but the confidence is there.

It is primitive for the Senate to suppose that we know enough about our economy to forecast when it will enter a recession or a period of slow growth, which this legislation assumes we will know.

We seem not to realize how new these concepts are. At the turn of the century, the very concept of economic policy or the concept of an economy was largely an alien notion. The idea of the gross national product was conceived in the 1930's and was never measured with any success until about 40 years ago.

This brings us to the proposal before us, which would establish maximum deficit ceilings and provide that the CBO and the OMB forecast the budget deficit, when it will exceed this ceiling or that ceiling, and when there is going to be a period of no growth or of slow growth.

The assumption that this is going to be possible is almost not credible.

Rudolph Penner, the distinguished Director of the Congressional Budget Office, all but pleaded with the conference committee not to get into this mad scientism. I quote him. He said:

> . . . given the record of economists, it will not be difficult to convince anyone that economic forecasting is a very uncertain art. Reasonable men and women can differ widely about what the future holds, and even if there is agreement on an economic forecast, there is an added layer of uncertainty involved in translating that forecast into an estimate of budget totals.

Mr. President, may I give you an example? In the President's first full budget, which is that for fiscal 1983, the Office of Management and Budget forecast a deficit of $91.5 billion. The actual deficit was $195.4 billion. The actual deficit was more than twice that predicted.

Between 1980 and the present year the difference between the first flash estimate of GNP and the final judgment is nearly 1.5 percentage points. That is not 1.5 percent but percentage points—a big jump.

The question of when we enter a recession, Mr. President, is almost not known. For more than 70 years the National Bureau of Economic Research has been studying the business cycle.

There is a group within the NBER, called the Business Cycle Dating Committee. This is not an escort service, Mr. President. This is a group of economists, trained for their profession, who work hard at it, and it is by common agreement in the Nation the NBER and this committee that decides when we have entered a recession and when a recession has ended. As a matter of principle, the dating committee never declares a recession to have begun until it has been going on at least 6 months, and does not declare one to have ended until it has ended at least 6 months. Just professional prudence tells them they do not know enough to do more than that.

Indeed, the examples of not knowing are considerable. In yesterday's Wall Street Journal, Albert Malabre describes testimony of Arthur Burns, the distinguished former Chairman of the Federal Reserve Board, and once head of the National Bureau of Economic Research. In August 1974, as Chairman of the Federal Reserve Board, and when the 1973-75 slump was almost 9 months in being, Arthur Burns told a committee of Congress that "the economy's movements do not have * * * the characteristics" of a recession.

You know, he is the first to admit it is an imperfect and necessarily inaccurate, or at least not within a wide margin of error, approximate discipline.

It is primitive to think you know the future, and in my view simply wildly irresponsible to make some of the most serious choices about this Government rest upon a presumed knowledge of that future.

I call attention, Mr. President, and I make two final observations, which are related to this measure. The first is that the prospect of automatic across-the-board reductions in Federal outlays seems to me to be especially threatening to the intgelligence community of our country. We do not come on to this floor and talk about the sums of the intelligence community budget but they are large and every Member of this body knows them or could if he or she chooses.

For 4 years as vice chairman of the Intelligence Committee I came to the floor, and with my revered and distinguished chairman, Senator GOLDWATER, presented the intelligence authorization bills. We made clear that we had commenced a very large increase in outlays on the various segments of the community. Such increases began under the previous administration, have continued under this one, and they increased because we felt increases were needed. These were matters of urgency, and there were times when, in the best judgment of intelligence officers, if we could not find a very large increase amount for a particular project, we might be jeopardizing the security of this Nation. We found those funds.

Now, we are about to subject the intelligence community to automatic cuts. Last night I joined the Senator from Colorado [Mr. HART] in proposing that the Secretary of Defense report to the Congress on the reductions that would come about in defense under the terms of Gramm-Rudman, given various assumptions. We estimate more than half the amounts of money that will be subject to automatic cuts will come from defense and, Mr. President, I reveal no matter of confidence when I say that most of the intelligence budget is in the defense budget. I mean, the Defense Intelligence Agency and Nation-

al Security Agency are part of the Defense Department.

I will not continue much longer. I have a closing observation which, if not especially relevant, I hope is of some interest.

For some years now an important theme among conservative economists has been that the United States and other industrial democracies took the promise of Keynesian economics much too seriously. The thought, and I was here in Washington at a time when it was the thought, that we could fine tune the economy ultimately rested on the proposition that we could predict the future state of the economy. Nonsense, the conservatives have been saying. We just do not know that much and never will. Certainly we do not know more than markets know and just as certainly there is a severe limit to what we can change.

The conservative counsel has been to set your course, stay with it as long as you can, let it be known what you will do, and let others react to you rather than your reacting to others.

Yet here we are today acting on almost the oposite premise.

But then, Mr. President, this is not conservative legislation. It is radical and it is dangerous, and yet it will pass. I wonder what has become of us or what will.

I have one small detail to add. I see my distinguished friend, the chairman of the Finance Committee, on the floor, and I point out to him that among the things that we have to forecast in this legislation are interest rates. In the OMB midsession review, which is by and large in August, CBO projected a 7.2 interest rate for 3-month Treasury bills in 1990. OMB projected 5 percent. That is a difference of maybe a third.

Could I just say to my friend, the chairman, if he could listen to me for just one moment—and perhaps if he is silent I will take silence in the form of an assent—would he not agree that anybody who can forecast interest rates is not likely to be working for $60,000 in the U.S. Government? Anybody who can forecast interest rates is not likely to be working for anybody. Such a person is simply sitting somewhere getting richer and richer and richer and richer, because to know that future is to have the key to wealth beyond the imagination of the Saudis or the wildest expectations of predictability of the much maligned Keynesians.

We cannot predict interest rates and yet we are going to run the Government on the basis of such predictions.

Mr. President, I do not want to keep the Senate longer. I know that our distinguished minority leader must be in West Virginia, owing to the flooding there. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Mr. President, I move the amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. DENTON addressed the Chair.

Mr. PACKWOOD. Mr. President, is the time controlled on this amendment or not?

The PRESIDING OFFICER. The time is controlled.

Mr. PACKWOOD. How much time does the Senator from Alabama need?

Mr. DENTON. As much as the Senator will give me, understanding that he plans to accommodate the minority leader and get a vote at 1:30 on Gramm-Rudman.

Mr. PACKWOOD. Mr. President, I wonder if the Senator from Alabama would be willing to withhold just for a moment and let us vote on the Moynihan amendment, because there is going to be no other amendments offered, as I understand it. I have talked to Senator DOMENICI. This is the last amendment. If we could dispose of this amendment right now, I would like to do so.

Mr. DENTON. Yes, if I may have the assurance that I will be able to make my statement on Gramm-Rudman before we vote on it.

Mr. PACKWOOD. As far as I am concerned, the Senator can, because there are no other statements to be made and we can vote before 2 o'clock.

Is the Senator from New York prepared to yield back all of his time?

Mr. MOYNIHAN. I yield back the balance of my time.

Mr. PACKWOOD. Mr. President, I would make one statement to partially correct the record. My good friend, the Senator from New York, stated that silence is acquiescence. It did not work for Thomas More.

Having said that, I am prepared to yield back the time on our side.

Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Oregon [Mr. PACKWOOD] to table the amendment of the Senator from New York [Mr. MOYNIHAN]. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Connecticut [Mr. WEICKER] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 82, nays 16, as follows:

[Rollcall Vote No. 284 Leg.]

YEAS—82

Abdnor	Ford	McClure
Andrews	Garn	McConnell
Armstrong	Glenn	Metzenbaum
Baucus	Goldwater	Mitchell
Bentsen	Gore	Murkowski
Bingaman	Gorton	Nickles
Boren	Gramm	Nunn
Boschwitz	Grassley	Packwood
Bradley	Hatch	Pressler
Bumpers	Hatfield	Proxmire
Burdick	Hawkins	Pryor
Chafee	Hecht	Quayle
Chiles	Heflin	Rockefeller
Cochran	Heinz	Roth
Cohen	Helms	Rudman
Cranston	Hollings	Simon
D'Amato	Humphrey	Simpson
Danforth	Kassebaum	Specter
DeConcini	Kasten	Stafford
Denton	Kerry	Stevens
Dixon	Lautenberg	Symms
Dodd	Laxalt	Thurmond
Dole	Leahy	Trible
Domenici	Levin	Wallop
Durenberger	Long	Warner
East	Lugar	Wilson
Evans	Matsunaga	
Exon	Mattingly	

NAYS—16

Biden	Johnston	Riegle
Byrd	Kennedy	Sarbanes
Eagleton	Mathias	Sasser
Harkin	Melcher	Stennis
Hart	Moynihan	
Inouye	Pell	

NOT VOTING—2

Weicker	Zorinsky

So the motion to lay on the table Amendment No. 968 was agreed to.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the House amendments and the Senate amendments to the House amendments to House Joint Resolution 372 be printed in bill form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered.

MOTION TO CONCUR IN AMENDMENT OF THE HOUSE TO SENATE AMENDMENT NUMBERED 2, WITH PACKWOOD AMENDMENT NO. 957, IN THE NATURE OF A SUBSTITUTE, AS AMENDED

Mr. DOMENICI. Mr. President, I rise today in support of the amendment that Senator PACKWOOD and I have introduced to House Joint Resolution 372, the debt limit extension. The amendment does several things, Mr. President, but it focuses on one thing: Making as perfect as we know how the Gramm-Rudman-Hollings balanced budget plan that this Senate approved by a 75-to-24 margin just last month.

The Senate approved the Domenici-Chiles substitute to the Gramm-Rudman-Hollings legislation by a large vote. That substitute merely built upon the good work and the originality of the authors. It contained 25 per-

fecting and clarifying amendments, not an unusually large number considering that the legislation itself ran more than 40 pages. The legislation Senator PACKWOOD and I have now put before the Senate continues the perfecting and clarifying process. It contains an additional 50 amendments to Gramm-Rudman-Hollings, but keeps intact the basic concepts of the authors.

Now, 50 amendments may sound like a large number. However, as my colleagues who have worked on such legislation as the Clean Air Act or the Natural Gas Policy Act with me remember, 50 amendments of a technical variety occur on any bill of substance. And, of the 50 amendments Senator PACKWOOD and I now offer the Senate in the substitute, fully 20 of them are purely technical and another 9 are procedural or related to the Budget Act and its operation. Only 9 of the amendments are of a major, substantive category, and another 12 are substantive, but of less importance.

Mr. President, I ask unanimous consent that a listing of amendments by these four categories be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MAJOR SUBSTANTIVE AMENDMENTS

1. A comprehensive baseline description, which includes a procedure for computing the base, the sequester percentages for any sequester order, and the base against which such an order will be administered. In addition, this amendment clarifies how to handle expiring legislation and other technical matters.

2. Maintains the present legislation's use of both OMB and CBO as the institutions that develop the sequester percentage, but places responsibility for reporting to the President and the Congress in the Comptroller General.

3. Keeps the FY 1986 deficit level at $180 billion, but changes the 7 percent trigger to 5 percent. Provides that any Presidential reduction order for FY 1986 shall be pro-rated on the basis of the number of remaining months in the fiscal year.

4. Clarifies that federal civilian pay and military basic pay may not be reduced under a sequester order.

5. Specifies precisely the accounts to be considered in the "automatic spending increases" category. Medicare has been moved from this category to category II.

6. Specifies precisely the programs to be exempt from either sequester or modification of automatic spending increases. Accepts most of the technical recommendations of the House Task Force II.

7. Clarifies treatment of prior-year contracts and requires new language to allow sequestering of future-year contracts.

8. Allows expendited judicial review and severability in case of a finding of unconstitutionality.

9. Revises special procedures in the event of a recession.

MAJOR SUBSTANTIVE AMENDMENTS

1. *Baseline* (the dollar amounts from which automatic cuts will be made):

Assume current law for spending and revenues at the time the report is prepared. If a regular appropriation, or a continuing appropriation of a full 12 months' duration, has not yet been enacted for a program for the upcoming fiscal year, the current year funding level would be assumed.

Assume that expiring provisions do indeed expire. The only exceptions to this rule are: (a) expiring excise taxes that are dedicated to a trust fund would be assumed to be extended at the same rates just prior to expiration, and (b) Farm (CCC) programs would be assumed to be extended.

Medicare spending levels with regard to hospital reimbursement would be based upon regulations issued around July 1. The baseline for purposes of determining whether automatic cuts need be made (under a sequestration order) is the same as the baseline used in determining the amount of those cuts.

2. *OMB-CBO-GAO:* The new procedure requires an OMB-CBO joint report to be submitted to the Comptroller General (not to the President and the Congress) on December 10, 1985 (for FY 1986) and on September 15th for each fiscal year thereafter. it then requires the Comptroller General to consider the joint OMB-CBO report (which is made available to the public). After giving due regard to the OMB-CBO report, the Comptroller General must issue a report to the President and to the Congress. This report is due no later than December 15, 1985 (for FY 1986) and September 25 for each fiscal year thereafter. It is the Comptroller General's report which triggers a Presidential order.

3. *Lower "trigger" for FY 1986 sequester order:* Maintains the FY 1986 maximum deficit amount at $180 billion, but lowers the amount of a deficit excess which is considered "statistically significant" from 7% to 5%.

4. *Treatment of Federal pay:* Clarifies that Federal civilian and military pay may not be reduced under a sequester order below the levels to which an individual is entitled on the effective date of the order. If a pay raise is scheduled to take effect in the future, the amount of the raise may be reduced only by the amount of the uniform percentage reduction (down to zero).

5. *"Automatic spending increases"* (category I): Retains the definition of "automatic spending increase" to mean increases in budget outlays due to changes in indexes, but specifically lists the programs to be in this category, as follows:

(a) Rail Industry Pension Fund,
(b) Supplemental Security Income,
(c) Veterans' Pensions,
(d) Veterans' Compensation,
(e) Civil Service Retirement and Disability,
(f) Military Retirement,
(g) Foreign Service Retirement and Disability,
(h) Public Health Service Retirement,
(i) Coast Guard Retirement,
(j) Federal Judiciary Survivors Benefits (including Tax Court),
(k) United States Presidents Pensions,
(l) CIA Retirement and Disability,
(m) Federal Reserve Board Employees Retirement System,
(n) Comptrollers General Retirement System,
(o) Tennessee Valley Authority (TVA) Retirement System,
(p) FECA (Worker's Compensation for Federal Employees),
(q) Food Stamps,
(r) Child Nutrition,
(s) Medicare Payments for Clinical Laboratory Services,
(t) National Wool Act,
(u) Black Lung Program, and
(v) Special Benefits for Disabled Coal Miners.

The definition retains the explicit exclusion of increases due to program participation rates and Social Security COLAs benefits.

6. *Exempt category:* Amends the definition of "controllable expenditures" (Category II) to specifically exempt the following programs from reduction under a sequester order:

(a) Specified in H.J. Res. 372:
(1) Earned Income Tax Credit,
(2) Net Interest,
(3) OASI and DI trust funds (except administrative expenses)
(4) Outlays due to increases in the number of program participants, and
(5) Outlays for prior-year obligations except certain contracts as detailed in item 7, below.
(b) Claims and Judgments Against the Government:
(1) Defense Claims,
(2) Claims, judgments, and relief acts,
(3) Eastern Indian land claims settlement fund,
(4) Payment for claims, Soldiers and Airmen's Home, and
(5) Payment of Vietnam and USS Pueblo Prisoner of War Claims.
(c) Constitutional Limitations:
(1) Salaries of Judges, and
(2) Salary of the President.
(d) Federal Credit Guarantee and Insurance Programs (only the outlay portions of the following programs that result from prior legal obligations of the government would be exempt from sequestration):
(1) VA loan guaranty revolving fund,
(2) Agriculture Credit Insurance fund,
(3) AID-Housing guarantee,
(4) Overseas Private Investment Corporation,
(5) Rural Development Insurance Fund,
(6) International Trade Administration,
(7) Economic Development Assistance,
(8) Government National Mortgage Association (Guarantee of mortgage-backed securities),
(9) Federal Housing Administration Fund,
(10) Credit Union share insurance fund,
(11) Federal Savings and Loan Insurance Corporation fund,
(12) Pension Benefit Guaranty Corporation,
(13) Federal Crop Insurance Corporation,
(14) FAA Aviation Insurance Revolving Fund,
(15) Maritime Administration (War-risk insurance revolving fund),
(16) Small Business Administration (lease guarantee revolving fund and Surety Bond guarantees revolving fund,
(17) Export-Import Bank of the United States,
(18) Federal Emergency Management Agency (National Insurance development fund and National Flood insurance fund),
(19) Nuclear Regulatory Commission,
(20) Check Forgery Insurance Fund,
(21) Railroad rehabilitation and improvement fund,
(22) Synthetic Fuels Corporation,
(23) SBA-Business loan insurance fund,
(24) SBA-Pollution control,

(25) Low-rent Public Housing,
(26) Federal Ship Financing Fund,
(27) Federal Ship Financing-Fishing Vessels,
(28) Rural housing insurance fund,
(29) Indian Loan Guarantee and Insurance Fund,
(30) Rail Service Assistance,
(31) VA Serviceman's group life insurance fund,
(32) VA U.S. Government life insurance,
(33) VA National service life insurance,
(34) VA Service-disabled life insurance,
(35) Veterans' special life insurance,
(36) Veterans' reopened insurance,
(37) Veterans insurance and indemnities,
(38) Employees life insurance fund,
(39) Federal Deposit Insurance Corporation.

(e) Payments of general funds into Trust Funds:
(1) Foreign service retirement and disability fund,
(2) Health Care trust funds,
(3) Railroad retirement accounts,
(4) Social Security trust funds,
(5) Civil Service retirement fund,
(6) Military retirement fund,
(7) State and Local Government Fiscal Assistance Trust Fund.

(f) Funds held for other governments and entities:
(1) Foreign military sales trust fund,
(2) BIA Miscellaneous trust funds (Tribal funds), and
(3) District of Columbia non-federal appropriations (only Federal funds would be subject to sequestration, not locally raised funds which are also appropriated).

(g) Federal Financing Operations:
(1) Exchange stabilization fund, and
(2) Coinage profit fund.

(h) Other:
(1) Offsetting receipts,
(2) Payment to copyright owners,
(3) Railroad Social Security equivalent benefits account,
(4) TVA power program borrowing authority,
(5) Bonneville Power Administration fund and borrowing authority,
(6) TVA Seven States Energy Corporation,
(7) Non-Federal unemployment benefits, and
(8) Postal Service Fund.

(i) Private bequests and donations.

(j) Intragovernmental funds, such as stock funds and revolving management funds, the outlays from which derive primarily from resources paid in from other government accounts, would be excluded from sequestration unless such funds received a direct appropriation for a fiscal year during which a sequestration order is in effect. It is the intention that government funds transferred from one account to another should not be subject twice to sequestration.

(k) Makes clear that receipts credited to an account shall not be deducted from outlays for the purpose of determining the amount to be sequestered.

7. *Contracts:* Clarifies treatment of contracts. Existing contracts providing for modification, renegotiation or termination are included in controllable expenditures if making such changes does not result in a net loss to the government in the first year. Also, requires that future contracts contain termination, modification, and renegotiation clauses and may not include penalty clauses, in order to make sure they will be subject to sequestering.

8. *Expedited judicial review and severability:* Any Member of Congress may bring an action to challenge the constitutionality of the Act in the D.C. Court of Appeals, sitting en banc. Review of the Appeals Court and appeal to the Supreme Court will be expedited. Any provision of the Act found unconstitutional will be severed and have no bearing on the remainder of the Act. If the President does not sequester any amounts required to be sequestered under this Act (and, if the courts decide he is not required to do so), the entire sequester order is null and void. If the courts render invalid the GAO reporting procedure to the President, provision is made for expedited Congressional consideration of a joint resolution to establish the deficit overage, percentage, reductions, and other elements of the report.

9. *Special procedures in the event of a recession:* Provides that if the report of the Comptroller General to the President and the Congress projects negative real economic growth for the fiscal year or two consecutive quarters, or if the Department of Commerce reports actual negative real economic growth for the previous two consecutive quarters, the Congress may initiate a joint resolution suspending or revising this Act in whole or in part. Such a joint resolution would be considered under highly expedited procedures.

OTHER SUBSTANTIVE AMENDMENTS

1. Clarifying how the uniform percentage reduction will be applied to both automatically indexed and controllable programs.

2. COLA language to insure that no catch-up of COLAs will occur.

3. Bringing off-budget items on-budget for purposes of this legislation.

4. Modifying how sequestering applies to the Guaranteed Student Loan program.

5. Modifying how the sequestering applies to the Commodity Credit Corporation.

6. Clarifying how unemployment compensation funds will be treated under a sequestering order.

7. Striking language requiring that contracts of more than $20 million be examined for inflation clauses.

8. Striking language relating to the Achile Lauro hijacking.

9. Clarifying sequestering as it applies to disabled coal miners and the Black Lung program.

10. Clarifying that social security related benefits under Railroad Retirement are exempt from sequestering or modification.

11. Requiring baseline updates daily for spending and revenue bills and clarifies what happens if legislation eliminating the deficit excess is passed in the middle of the sequester timetable.

12. Clarifying the treatment of social security administration programs, other than social security trust funds, under a sequester order.

Item No. and descriptions:

1. *Uniform percentages.*—Clarifies that automatic spending increases shall be reduced by a uniform percentage and controllable expenditures are to be reduced by a uniform percentage, but they may be different percentages.

2. *COLA's.*—Clarifies that any COLA which is reduced by a sequestering order will be disregarded for the purpose of computing any future COLAs.

3. *Off-budget programs.*—Clarifies that off-budget programs are treated as on-budget for purposes of this bill (House Task Force II).

4. *Guaranteed student loans (GSL).*—Clarifies how sequester process is to be applied to GSL (based in part on House Task Force II recommendation).

5. *Commodity Credit Corporation (CCC).*—Adds clarifying language authorizing the Secretary of Agriculture to adjust both target prices and loan levels in order to meet the uniform percentage reduction required under a sequester order.

6. *Unemployment compensation.*—Clarifies that regular State unemployment benefits, the State-funded share of extended unemployment benefits, and loans to States from the Federal unemployment account are exempt from a sequestering order (House Task Force II recommendation).

7. *Contracts study.*—Strikes language requiring examination of contracts over $20 million for inflation clauses.

8. *Achille Lauro.*—Strikes language relating to Achille Lauro hijacking.

9. *Disabled coal miners and black lung benefits.*—Benefits in these programs are indexed to Federal pay levels and are adjusted whenever Federal pay raises are given. Clarifying language ensures that a sequestration order would limit the maximum reduction in these programs to the COLA increases, if any.

10. *Railroad retirement.*—Clarifies that Social Security related benefits under the Railroad Retirement program are exempt.

11. *Baseline updates/sequester orders.*—Requires that baseline updates be furnished to the President for each day on which spending and revenue legislation is enacted, up to the day on which the order is issued. Also clarifies that if intervening legislation which eliminates the entire deficit excess is enacted, the order shall so state and no reductions shall be made.

12. *Special rules for SSA programs.*—Requires across-the-board reductions in payments under Medicare, Medicaid, Aid to Families with Dependent Children, foster care and adoption assistance under a sequester order. Prohibits the President from increasing any deductible coinsurance or premium under Medicare. Specifies that administrative expenses are sequesterable.

PROCEDURAL/BUDGET ACT AMENDMENTS

1. Three budget process amendments from the Beilenson proposal to accelerate the President's budget submission date, to accelerate the Congressional budget process timetable, and to accelerate the reconciliation timetable.

2. Expansion of the Budget Act Section 303 point-of-order to include bills providing credit authority.

3. Mandating a new CBO report each January on programs appropriated, but not authorized, and expiring authorizations.

4. Clarifying a point of order against budget resolutions that exceed the maximum deficit amount.

5. Clarifying a point-of-order against bills which have spending that would cause the maximum deficit amount to be exceeded.

6. Clarifying that the point-of-order in No. 5 above does not apply if a declaration of war occurs.

7. Clarifying a point-of-order against consideration of an expedited reconciliation bill, not its adoption.

8. Clarifying that a point-of-order lies against an expedited reconciliation bill that fails to eliminate the entire excess deficit amount.

9. Clarifying waivers of points-of-order.

Item No., description:

1. Incorporates several budget process deadlines proposed by Mr. Beilenson:

A. Presidential budget submission moved up to first Monday after January 3,

B. Annual budget resolution must be adopted by April 15, and

C. Reconciliation must be completed by June 15.

2. Expands Section 303 (Budget Act) point of order to include bills providing credit authority (Mr. Beilenson).

Mandates a new CBO report each January listing:

A. All programs appropriated but not authorized, and

B. All authorizations expiring at the end of the fiscal year.

4. Clarifies that points of order will lie against the consideration, not the adoption, of budget resolutions which propose deficits exceeding the maximum deficit amount.

5. Clarifies that a point of order lies only against bills which propose spending which cause the maximum deficit amount to be exceeded. This eliminates the dual standard for a point of order in the current language which allows a point of order to lie against a bill because the maximum deficit amount would be exceeded or because the deficit set forth in the budget resolution would be exceeded.

6. Clarifies that the point of order discussed in No. 5 does not apply if war is declared, and corrects section references in the Budget Act.

7. Clarifies that a point of order lies only against the consideration of an expedited reconciliation bill, not its adoption.

8. Clarifies that a point of order will lie against an expedited reconciliation bill that does not eliminate a deficit in excess of the maximum deficit amount. Like No. 5, this eliminates the dual standard.

9. Clarifies that all points of order under the Budget Act may be waived by majority vote or by unanimous consent, with the following exceptions:

A. Points of order against nongermane amendments,

B. Points of order against legislation within the jurisdiction of the Budget Committee, and

C. All points of order created by the Senate amendment, all of which can be waived only by a three-fifths vote of all members duly chosen and sworn.

TECHNICAL AMENDMENTS

This bill makes 20 technical and conforming amendments. These amendments include such things as correcting mis-numbering of provisions that might have occurred in the original legislation, conforming new language to old Budget Act provisions, elimination of redundant or confusing language in the original, and, finally, an amendment to the definition of "sequester" to insure that direct loans and loan guarantees are subject to a sequester order.

Item number and description of amendment

1. Deletes a technical amendment to the Budget Act which corrects a spelling error. As drafted, the correction would expire in 1991. The correction is made permanent.

2. Inserts the word "Section" before "301 (a)" (referring to Budget Act).

3. Makes a conforming amendment to the Budget Act regarding scorekeeping for points of order under Section 311 of the Budget Act.

4. Clarifies the redesignation of certain subsections in the Budget Act.

5. Deletes unnecessary and confusing cross-reference language to clarify that the President may issue a sequester order only after receipt of the report which indicates that the maximum deficit amount will be exceeded by a statistically significant amount.

6. Technical amendment. Introduces the terminology "base levels" to reflect the language in the baseline amendment.

7. Technical cross-referencing amendment regarding the issuance of the Presidential order:

(a) 14-day delay under positive economic growth;

(b) 30-day delay under negative economic growth; and

(c) no reductions if new legislation eliminates the deficit excesses.

8. Cross-references sequester order limitations and exceptions.

9. Technical amendment regarding sequesters of controllable expenditures. Adds back "nothwithstanding the Impoundment Control Act of 1974" inadvertently dropped earlier.

10. Strikes language which is made unnecessary by redefinitions of "automatic spending increases" and "controllable expenditures."

11. Adds a section heading.

12. Changes the section heading from "Date Issued" to "Issuance of Order."

13. Clarifies that obligated balances for existing contracts are included in the term "other budgetary resources" (which are sequesterable).

14. Technical amendment. Changes the reporting date for the mid-season review of the President's budget.

15. Technical amendment. Conforms subsection redesignation.

16. Technical amendments to Budget Act to correct errors, wording, and section numbering.

17. Corrects cross-references, improves readability, clarifies wording, or corrects spelling, syntax, or grammar.

18. Reflects constitutional language which allows Congress to declare war without the enactment of legislation.

19. *Direct loan obligations and loan guarantees.*—Amends definition of "sequester" to clarify that direct loan obligations and loan guarantees shall be subjct to uniform percentage reductions required under a sequester order (House Task Force (II).

20. Clarifies exemption from cuts due to program participation by substituting words "increases in program participation" for "program participation rates."

Mr. GRAMM. Mr. President, a look at the nine major substantive amendments illustrates my contention that what Senator PACKWOOD and I have done is try to clarify and elaborate on the original Gramm-Rudman-Hollings proposal, not change in any way its basic concepts. Let me go through at least the major changes now, so that the Senate can understand what Senator PACKWOOD and I have done. I should add at this point that many of these amendments are the result of extensive negotiations and meetings with the House conferees, both Republicans and Democrats.

The first major amendment, which the authors of the legislation have freely admitted is required, is a better definition of the base to be used in all calculations. This amendment makes it clear that current law, as operating at the time the calculations of the projected deficit are made by the Congressional Budget Office and the Office of Management and Budget, will be the base used in this legislation. In addition, the amendment clarifies the base against which a sequester order will be levied and it outlines a procedure for taking into account spending or taxing bills that are passed between the time that a deficit projection takes place and the President actually signs a sequester order. This means that late action by the Congress will count toward the deficit projection, either by lowering it or raising it.

The second major amendment attempts to remove any constitutional cloud from this legislation. It does so by giving to the Comptroller General of the United States the final responsibility of reviewing the reports of the CBO and OMB, insuring their accuracy, and, if warranted, changing those reports. It is upon the final report of the Comptroller General that the President must base his sequester order.

A third major amendment also relates to constitutionality. This amendment allows for expedited judicial review and severability in case of finding of unconstitutionality. I believe that the use of the Comptroller General as the final arbiter of the figures in the report to the President, and as the final calculator of the percentages to be used in any sequester order will remove the constitutional cloud. However, in case someone wishes to challenge this legislation on constitutional grounds, an expedited process now exists in the Packwood-Domenici package.

Other major amendments are almost self-explanatory. We have changed the "trigger" for fiscal year 1986 to 5 percent, instead of the 7 percent originally in this legislation, but retained the $180 billion deficit target. We have done this despite our knowledge that it will be extremely difficult to hit that $180 billion figure unless Congress changes its ways dramatically in the next 2 months.

Other amendments clarify the treatment of Federal military and civilian pay under any potential sequester order, specifies which programs will be treated as automatically indexed programs, which will be considered controllable, and which will be entirely exempt from this process. In addition, we have clarified the question of prior-year contracts, to make it clear that we intend that all prior-year contracts, other than those whose provisions have explicit penalty clauses whose operation would cost the Government more in the sequester year than it would save in that same year, and other than those which, if subjected to a sequester order, would be a violation of a legal obligation of the Government, will be subject to sequestration.

Finally, we have added special procedures in the case of a recession or extremely low growth in the economy. Under the amendment we adopted last night, introduced by Senator LEVIN, if the economy actually has gone through two quarters of real growth of less than 1 percent, based upon the reports and data of the Department of Commerce, then the Congress has the right to waive or suspend in part or whole the operations of this law by majority vote of both Chambers and the concurrence of the President.

That is an extremely short summary of the provisions I have designated "major substantive amendments." If Members have questions about these provisions, or to the other 41 amendments that we have made a part of our package, I would be pleased to answer them. I should add that among other amendments, we have clarified the treatment of guaranteed student loans, the Commodity Credit Corporation, cost-of-living adjustments, programs for black lung and disabled coal miners, benefits under railroad retirement, and Social Security Administration administrative costs will be treated under any sequester order or under a suspension or modification of automatic indices.

Mr. President, I believe that the Senate passed a good product. I believe that the conference with the House so far has given us insights and allowed us to produce an even better product. We have attempted, in the amendments that Senator PACKWOOD and I offer to the Senate, to clarify all of those things that can be clarified. We know that we cannot cover every contingency. Under our system, Congress can always overturn what prior-year Congresses have done: the minds of active men and women in the legislature will always find ways of operating that cannot be foreseen by anyone. But, to the best of our ability we have tried to provide a workable, technically sound, constitutional, and effective process. We have spent literally thousands of man-hours on this product. It is not perfect; no law is. But, it is as sound and as well-thought-out as any piece of legislation that I have worked on in my 13 years in the Senate. And, I must say, it surely is as sound and predictable as the present laws governing the budget and appropriations processes in the Congress.

Mr. HART. Mr. President, a little more than a decade ago, Congress passed the Budget and Impoundment Control Act of 1974 to end a constitutional crisis that had been precipitated by President Nixon. Mr. Nixon unilaterally withheld funds because he disagreed with policies these moneys, duly authorized and appropriated by the Congress, were to carry out. Without hesitation, the courts struck down the excess of an "Imperial Executive"—they were ruled unconstitutional. And the courts were right.

The House and Senate labored 15 months and passed a Budget Act to impose discipline, to establish priorities, and to coordinate the process by which we spend the people's money. To the extent that our fiscal house is in disarray, we cannot blame the budget process—the process works. It is the policies which have failed.

In reading Gramm-Rudman, you need not be a lawyer to recognize we are suffering from amnesia. We are wandering down the road of impoundment yet again, mindlessly surrendering our constitutional duty to set spending priorities for the government. In a stunning and sad confession of impotence, we are lacing ourselves into a fiscal straight jacket—as if to say, "stop me before I kill again."

I will have no part of it, Mr. President.

The first principle of responsible budgeting demands us to ask: "What are our priorities?" The first principle of responsible legislating requires that we find the resources to pay for the programs the people want. The first principle of conservative government, suggests, at minimum, that we know the implications of legislation before we pass it.

We have not simply ignored these principles, Mr. President, we have savaged them.

Gramm-Rudman suggests the only priority of budgeting is to reduce the deficit by five annual increments to zero, by 1991. Forget investments in education, forget our defense needs, forget restoring the dilapidated infrastructure—Congress is incapable of setting these priorities, its authors tell us. "Put the Government on automatic pilot," they say.

That is good budgeting? Good economics? Good government? Nonsense.

For 5 years, this Government has been on a binge, Mr. President, a real bender. This economy has labored under deficits of staggering proportions. Over the last 5 years, interest on the national debt, defense spending, and tax giveaways have combined to triple the annual deficit and double the aggregate Federal debt. Only discretionary social spending has declined as a percentage of GNP. We have promised the people 100 percent of what Government has to offer, but asked they pay only 80 percent of the cost.

Now, the authors of Gramm-Rudman ask us to make tough choices. But apparently, being tough means never having to say "raise revenues." The distinguished Senators from Florida and West Virginia had the courage to present us with that option. The original Chiles-Byrd proposal asked that we reduce the deficit by $200 billion, taking equal shares from defense, domestic spending, and taxes. On that, the "tough choice" Senators took a walk. They are totally unwilling to come to terms with the eroded revenue base of this country. So much for the principle of responsible legislating.

What about that principle of conservative government? Do we know what is in this package—do we really know? The underlying legislation, a bill to increase the public debt limit, has been before the Senate since October 3. The majority leader offered the Gramm-Rudman amendment and demanded we pass it, before we knew what it contained. If it hangs around too long, people will begin to read it, the distinguished Senator from Kansas said.

Well, thank goodness we made this freight train slow down, just a little. We have spent 10 days on this floor asking questions about this bill, Mr. President, and the answers have rarely been persuasive. This bill had the benefit of no hearings, no committee consideration, no analysis.

And it shows.

It was not until the conference the sponsors realized what this would do to the banking system. It was not until yesterday that we knew what the sponsors had in mind for Medicare. And we will not know until January what this bill will do to our Nation's defense.

To the sponsors of this legislation, you have my congratulations. You have not only supported the policies which created these horrendous deficits, but you stole back the political high ground by fashioning this disgraceful bill. You have my congratulations, but you will not get my vote.

To my Democratic friends who will vote with the majority, I recognize your concerns. Our party has ridden the deficit hobby horse for too long without providing a plausible alternative. That must change. And I believe it will.

To the people of this country who ask only for a government of conscientiousness and conscience, I can only say: Gramm-Rudman represents neither of these cherished values. It is not a statement of what this country can be, it is only an affirmation of what we have become. Those who have visited these deficits upon the least fortunate among us are asking them to bear more than their share of the deficit reduction burden.

It is not fair. It will not work. It does not deserve our support.

The PRESIDING OFFICER. Is there further debate? The yeas and nays have been ordered.

Mr. CHILES. Mr. President, I know we are right at the point of passage. I want to say that I think there has been an evolution of the bill from the time that it first was introduced in the Senate. It has gone through a lot of changes. I think many of those

changes are for the better. I think now the important thing is what is going to happen. Obviously, this is going to pass here today and pass tomorrow in the House. What is going to happen then is that we go to conference with the House. I think that, given the time we have spent on this exercise, both in the House and the Senate, and given the tremendous problem that we now find ourselves facing with these huge deficits that we have, it is going to be very, very important that we do work something out as we go to conference with the House. That certainly means a situation of both sides making their best effort and being willing to give and compromise some in order to do that. I think the American people can and should expect that. I trust that the administration will be helpful in that process, too.

I hope we are not going to go through an exercise in which we simply adopt the bill here to see that there is no further progress or we do not end up actually being able to put a procedure into law that will help us in reducing these deficits. I hope we go with a spirit of attempting to work something out and I hope we meet a similar spirit on the House side. I think it is going to be very necessary that we have that, people of good will sitting down and trying to determine how we do reconcile the legitimate differences that both bodies have. As I say, I trust the administration is going to be of some help in reconciling this.

Mr. JOHNSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. JOHNSON. I thank the Chair.

Mr. President, I think the best thing that can be said for this bill is that is not as bad as it was. It is wrong in theory, it is not going to work in practice, it does violence to the Constitution.

I must say, Mr. President, I have a little curiosity in the same way that someone sees two railroad trains from afar getting ready to crash headon and, in great curiosity, they want to see what happens. I sort of want to see what happens with this train wreck we have set up.

It is a terrible thing to say, Mr. President, that this, the greatest deliberative body in the world, has to pass a piece of legislation like this because we will not face up to our duties and our responsibilities.

Now, we will not raise taxes; no, we will not cut programs, including entitlments; no, the President will not do that. We have to have something like this, which I regard as unconstitutional, too inflexible and too rigid, both at the same time.

Mr. President, I think it is a terrible indictment of this body, of the whole Congress, of the whole Government. I am glad I am not going to have any part of it. I hope it works because the good of the country and the size of the deficits are more difficult and more important than either political party and the short-term political gain. So I hope, I pray, it works. But I am afraid, Mr. President, that we are ready to see that train wreck in which the country, this body, and, indeed, our whole Government are going to be the victims.

Mr. BYRD. Mr. President, I will not take a lot of time to explain why I oppose the Packwood amendment. But let me say first that there may be no more urgent task confronting the Nation than reducing the record budget deficits that this administration has, to a major degree, created with its tax and spending policies. Last year alone, this administration added $211.9 billion in red ink to our national debt, the third record deficit in just 4 years.

Clearly this situation cannot continue without long-term and severe damage to the American economy—to industry, to jobs, to international trade. That is why I offered a budget package in the spring that would have achieved a balanced budget within the next 5 years. But it would have achieved that result in a manner that was fair, that promoted economic growth, that encouraged investment in the Nation's future, and that protected vital national security interests. It also would have required those profitable corporations that do not pay any Federal income tax to pay a minimum tax so that all Americans would contribute to the effort to balance the budget.

I believe that amendment represented the most prudent way to achieve a balanced budget for a nation with wide-ranging domestic and international responsibilities.

Unfortunately, the amendment offered by the Senator from Oregon [Mr. PACKWOOD], while attempting to achieve that same goal, is seriously deficient. If enacted as presently worded, the amendment could put a fiscal straitjacket on the Government, preventing it from responding adequately to changed economic circumstances, such as a recession, and indeed, perhaps even creating a recession or preventing the recovery from one.

The Founding Fathers never envisioned a government bound to a formula. Yet, that is what this amendment seeks to impose on the Nation.

The amendment also would make a fundamental, and unwise grant of new power to the executive branch, potentially allowing numerous political appointees to decide the degree to which programs would be cut under the so-called "automatic sequestration procedure." The sponsors of this amendment have not closed a loophole which could allow those officials to exercise near complete discretion over program funding, if those programs were not spelled out specifically in appropriations bills and reports.

One of the most serious flaws in this amendment is that it postpones the day of reckoning with the record budget deficits that continue to climb year after year under this administration. By setting a high deficit limit—one that could allow up to $17 billion more spending than approved in the budget that Congress adopted in August—the amendment effectively delays deficit reduction until late next year, after the 1986 elections.

The Nation needs deficit reduction now. The budget amendment I offered in the spring required deficit reduction this year. But the amendment before us does not force the Congress to make the hard choices now. Every day we delay is just that much more debt that accumulates—debt that must be serviced every year with over $130 billion in interest payments and that must be paid off by future generations. The harm caused by delay is not so much in what it does to the Nation today, as it is in what it does to our future and our children's future.

The amendment also places much of the burden for deficit reduction on those people and programs that have already borne the brunt of deficit reduciton over the past 5 years. For instance, the Medicare Program, which has been cut by more than $15 billion since January 1981, would be cut by an additional $3.6 billion this year if a $25 billion sequestering is required. A cut of that size would not just eliminate any inflation adjustments; it would also cut into basic benefits, almost certainly raising the cost of health care services for the Nation's elderly.

Furthermore, by requiring equal percentage cuts in outlays, rather than in budget authority, the amendment penalizes those programs with slow spendout rates, such as construction programs to repair the Nation's infrastructure and prevent natural disasters, including floods, as well as forward funded programs such as education.

Finally, the amendment continues to impose the pain of deficit reduction on some while letting others escape. Profitable corporations, some of which now pay no Federal income tax, would not be required to undergo the same sacrifices to reduce the deficit that would be required of many others. This is inherently unfair—to require the disabled coal miner to forego an inflation adjustment in his benefits while permitting some profitable major corporations to continue to milk the Tax Code without paying their fair share.

The amendment before us is fundamentally flawed in all these respects. It delays deficit reduction until some future date when we need it now. It imposes great burdens on some while

allowing others to escape without paying. It transfers considerable power to the President and unelected political appointees and bureaucrats—power that rightfully belongs to the people's elected representatives in Congress. And it locks in a course of action for the next 5 years without giving the Congress or the President the necessary flexibility to respond to changes in the economy and domestic and international events.

It is an unwise and unsound approach to the business of government our constituents sent us here to do—not to lay off on some untried automatic process that is supposed to make deficit reduction painless.

I cannot support this proposal, and I urge my colleagues to consider its implications very seriously, because I believe history will show that those who opposed it accurately foresaw the destruction it will wreak.

Mr. COHEN. Mr. President, the Balanced Budget and Emergency Deficit Control Act—now better known as the Gramm-Rudman amendment—has occasioned a storm of criticism. This is not surprising—after all, the status quo is at stake here. While it is appropriate that such an ambitious proposal should receive all due scrutiny, much of what has been said against the Gramm-Rudman proposal is just fear mongering and fallacy.

The Gramm-Rudman-Hollings, et al. proposal has certainly captured the attention of the Congress, the administration, and the press. This is so because the proposal threatens to bring about real changes in Federal fiscal policy. The amount of ink spilt in opposition and the bitterness of contention show that concerned parties really do fear that the proposal has as much bite as it does bark. In light of this, can the Gramm-Rudman proposal be dismissed as a gimmick? I think not.

The actual reduction of Federal budget deficits is truly unpleasant political business. That is why we still have huge budget deficits. That is also why any measure which will actually bring about significant deficit reduction is so widely and thoroughly damned. Much of the opposition to the Gramm-Rudman proposal, therefore, at heart actually reflects opposition to the necessities of deficit reduction—spending cuts and/or tax increases. If, however, there is ever to be real deficit reduction, there must be both spending cuts and tax increases.

Our towering $2 trillion national debt—incredibly, half of it heaped upon us in the last 5 years alone—stands as a monumental testimony to our total inability to forswear the fiscal depravity into which we have fallen. The Congress, the administration—our entire political system—all are absolutely hooked on deficit spending. The magnitude of the Federal Government's fiscal imbalance and its obvious stubbornness shows too well that there are no easy or painless remedies. Only drastic measures can reverse our current, dangerous fiscal policy.

The Gramm-Rudman proposal is indeed a drastic measure—given the wild fiscal excesses to which we have become accustomed. It proposes that we commit the Federal Government to spend no more than it has and that we actually keep that promise. It proposes that the Federal Government be temporarily limited in much the way other governments, businesses, and households are. It proposes that Americans should pay for those Government services they demand and demand only as much from the Federal Government as they are willing to pay for. It proposes that the U.S. Congress actually face the tax and spending decisions necessary to keep this country from ruin. It is, therefore, an absolutely revolutionary proposal.

Clearly, a proposal as radical as the Gramm-Rudman legislation would have been unthinkable just a few short years ago. How, then, could such a proposal recently have received 75 votes in the U.S. Senate?

A few short years ago, the national debt was half its current measure. A few short years ago, annual interest on the national debt was a small share of the Federal budget. A few short years ago, American farmers and manufacturers could compete internationally. A few short years ago, Senators could not have imagined how protracted, difficult, and futile deficit reduction efforts would become. Those who say that the Senate is acting too hastily have not learned much from 5 years of record Federal budget deficits and the fruitless budget battles of the past several years.

The decisive Senate victory of the Gramm-Rudman proposal is at once a recognition of the urgency of the need to reduce Federal budget deficits and an admission that the Congress cannot address that urgent need through the current budget process. The outcome of this year's budget deliberations, like those of last year and the year before, show conclusively that the Congress cannot and will not significantly reduce Federal budget deficits under the current rules of the game. Critics of the Gramm-Rudman legislation have derided it as some sort of cowardly substitute for the political guts which are so lacking in the Congress. Critics have also characterized the proposal as an abdication of congressional responsibility. Call it what you will, the enactment of the proposal would bring about the necessary result of real deficit reduction. In this, it is vastly superior to the status quo.

Critics of the Gramm-Rudman proposal charge that it is rigid, inflexible, and that it would limit fiscal policy options. Of course it would limit fiscal policy options. Specifically, it would limit the option of spending more than we have and borrowing the difference. However, the statutory limits of the Gramm-Rudman legisiation will not be nearly as unforgiving as the limits imposed by the economic disaster we are courting. When, during a period of continuous economic growth, Federal budget deficits measure $200 billion annually, it seems almost ridiculous to fear the limitation of our capability to engage in stimulative fiscal policy.

It is ironic that Members of Congress and others now talk of the exercise of sound fiscal policies. Where have they been these past several years? During the robust growth of the past several years, Congress could not cut spending or raise revenues enough to keep Federal budget deficits below $200 billion. Congress has surrendered its prerogative to exercise necessary fiscal policy options even during these relatively good times. Congress will not dare to exercise them when economic growth stops and deficits soar. This, far more than current efforts to balance the budget, constitutes abdication of congressional responsibility.

At the heart of opposition to the Gramm-Rudman legislation is the fear of its automatic spending reductions or sequestering. However, sequestering is not the primary means by which the measure would bring about deficit reduction. Before any sequestering would ever occur, the President and the Congress will have had a chance to adopt a budget which conforms to the measure's deficit limits. Even if the Congress initially fails to meet its goals, the President and the Congress can enact an alternative to the automatic sequestering of expenditures. The automatic sequestering provisions serve as a mechanism to keep the Congress honest. The prospect of the automatic sequestering of Federal expenditures would concentrate congressional minds wonderfully.

While few would welcome resort to the automatic across-the-board spending reduction provisions of the Senate-passed measure, they are about the least offensive self-enforcement mechanism devisable. Their effect would be at least as fair as the most recent prior budget agreement. Furthermore, they would spread automatic reductions over the broadest range of the budget which is both technically and politically possible. The Senate has also taken considerable pains to limit the President's discretion in executing any across-the-board spending restraint. As passed by the Senate, the measure would give the President only ministerial authority to carry out the required sequestering.

The controversy over the automatic sequestering provisions of the Gramm-Rudman proposal has been fueled by speculative and tenuous projections of their effect on specific Federal programs. Defenders of social spending project that automatic spending reductions would fall disproportionately on domestic social programs. Defense advocates charge that the automatic reductions would fall disproportionately on defense spending. This obvious contradiction is both predictable and illustrative of the forces that make budget deficits such a stubborn problem.

The authors of these projections fail to take into account the powerful incentive for Congress to avoid automatic sequestering through the enactment of a budget which achieves deficit reduction. They also fail to allow for the tax increases which will be necessary whether or not the Gramm-Rudman legislation goes into effect. Instead, through extrapolation from worst-case scenarios and invalid assumptions, they project the obliteration of domestic social programs and the unilateral disarmament of the United States.

What mix of arithmetic and logic could lead politicians and pundits to presume that the Gramm-Rudman proposal would obliterate domestic social programs? What combination of algebra and reasoning could lead even the chairman of the House Armed Services Committee to claim that the enactment of the balanced budget measure would lead to demobilization and disarmament?

Can the Federal budget be balanced only through savaging social programs and casting aside national defense? Of course not. Balancing the budget would require serious consideration of the necessity of Federal programs which are neither vital to the Nation's needy or crucial to national security. I venture to say that there are yet a few such programs within the vast Federal array. Balancing the budget would also require serious reconsideration of tax expenditures and the taxation of certain types of income. The administration and the Congress purport to be going through this exercise now. However, current proposals would possibly decrease rather than increase Federal revenues. Congress could and should face these spending and tax issues. Where all else has failed, the Gramm-Rudman legislation would compel Congress to do so.

The fact of the matter is that enactment of the Gramm-Rudman legislation would not and could not force the destruction of the Federal Government's good works or our surrender to a hostile world. The only thing it would force is the balancing of our Federal budget. Barring war or recession, the proposed legislation would bring about a balanced budget in 5 years. It is not possible to know its particular effects on specific programs 3 or 4 years from now—these battles have yet to be fought. Any claims to the contrary are not worth the paper they are printed on.

I will venture with confidence, however, a projection of my own regarding the general effects of the Gramm-Rudman legislation. It will spur a tax increase.

Throughout this entire year, in vote after vote, the Senate has proved unwilling to eliminate Federal programs or to significantly cut them back. There have been exceptions, but they have been few. The reconciliation bill for fiscal year 1986 would eliminate a grand total of one Federal program. During recent Senate consideration of appropriations bills, amendments providing for across-the-board reductions were repeatedly defeated. Politically, the Senate seems to be approaching what it collectively holds to be an irreducible minimum of Federal spending. Under the heightened pressure which the Gramm-Rudman would produce, the Congress would undoubtedly discover some programs and spending that we could all live without. Congress would also discover that we all could live with a tax increase.

Many of my colleagues will claim that the President's longstanding opposition precludes a tax increase. While this bit of conventional wisdom is a convenient way to further abdicate congressional responsibility, it is not necessarily so. What is past is prolog. Since the enactment of the tax cuts of the Economic Recovery and Tax Act of 1981, President Reagan has presided over no less than four tax increases. These tax increases were included in the following measures: the Tax Equity and Fiscal Responsibility Act of 1982, the Surface Transportation Assistance Act of 1982, the Social Security Amendments of 1983, and the Deficit Reduction Act of 1984. Furthermore, for all his bluster, President Reagan has made use of his veto less frequently than any modern President except Lyndon Johnson. In fact, President Reagan's tenure has been marked by repeated episodes of unflinching opposition to congressional sentiment, followed by deft acquiescence. Faced with the prospect of extreme cuts in military programs and blame for inhumane cuts in Federal social programs, President Reagan would support an increase in taxes. So would the Congress. So would the American people.

The Gramm-Rudman proposal is based upon a simple notion—that the Federal Government cannot continue its exorbitant borrowing unchecked. Its application, however, is necessarily complex because the Federal budget is so vast, involuted, and complicated. The fault of complexity, therefore, lies more in the nature of the problem than with the proposed remedy.

We all agree, at least in principle, to the need to reduce Federal budget deficits. The Gramm-Rudman legislation has at long last set in motion serious and expeditious consideration of the means to realize this end. It has spawned parallel efforts to come up with improvements upon and alternatives to its provisions. Were it not for the efforts of Senators GRAMM, RUDMAN, HOLLINGS, and others, serious discussion of viable deficit reduction measures would not have progressed so far, so fast.

It is easy to criticize proposals for deficit reduction, for they will be by necessity a mixture of unpopular restraint and sacrifice. There are literally hundreds of programs which can provide the plots for the inevitable horror stories. Differing interests and perspectives make unanimous agreement on fairness impossible. The Gramm-Rudman, Hollings, and others proposal stands up under these criticisms as well as any effective proposal could. It remains the most comprehensive, practical, effective, and honest deficit reduction and budget reform alternative under consideration. If the Congress cannot agree to a measure which preserves the basic intent and effectiveness of the Gramm-Rudman measure, it cannot reduce Federal budget deficits. This would be abdication of the worst kind.

Mr. STAFFORD. Mr. President, in an effort to clarify the impact of the Gramm-Rudman amendment on Federal education programs, I ask unanimous consent that a series of documents be inserted into the RECORD at the end of my statement.

Last Thursday, I gave the chairman of the Senate Budget Committee a series of questions to answer in order that I might better respond to the concerns of a number of my constituents about the disproportionate impact of Gramm-Rudman on education programs. Senator DOMENICI responded to my questions in letter form, and addressed certain general concerns but did not speak directly to some individual cases I presented. At the same time, the chairman and ranking member of the House Education and Labor Committee asked similar questions of the Secretary of Education, William Bennett, which the Secretary answered in a letter dated November 1, 1985. This exchange is also included in the attached documents.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

QUESTIONS FOR SENATOR DOMENICI FROM SENATOR STAFFORD

As you know, most education programs are forward funded and thus to reach required targets for outlay reductions, far more significant cuts in budget authority would be required. For example, if all programs are to be cut in a given year by 3 per-

cent, then the budget authority for education programs would have to be reduced by what percentage to reach the 3 percent outlay reduction?

The Committee for Education Funding has indicated that for some programs the budget authority would have to be reduced by almost 50 percent for a small outlay reduction. Is this figure accurate? How have you addressed the issue of forward funded programs in the conference? My concern is that education programs be treated equally and not cut more than other programs.

Let me give you an example of a forward funded program. The Committee for Education Funding, based on statistics given them by the Congressional Budget Office, has indicated that a 3 percent to 5 percent reduction in outlays for the Education for all Handicapped Children Act, P.L. 94-142, would require a budget authority reduction of 60 percent. Is this true? If not, what budget authority reduction would it require?

The Senate passed Gramm-Rudman-Hollings amendment specifically addresses the Guaranteed Student Loan Program. First, it takes away the entitlement nature of the program. Second, it provides that any contracts allowed under the GSL program are subject to change in order to reduce costs in the program.

As you may be aware, the Consumer Bankers Association, which represents almost all GSL lenders, has indicated that their members will not participate in a program in which contracts already made are subject to change, depending on the federal GSL budget in any given year. For example, why would a lender commit private funds for a ten year GSL, if his or her rate of return on the loan were to change or even be totally eliminated each year?

Additionally, there is a great deal of concern on the part of students as to changes which might be made for them while they are still in school or repayment. For example, would the GSL provision allow the in-school interest subsidy to be removed for loans which have already been made, after the student had already been told years earlier that his or her loan would be subsidized while in school? I am referring here to loans which are made after the anticipated passage of the Gramm-Rudman amendment. There is no doubt in my mind that uncertainly in this program contributes greatly to default rates. Have you considered this possibility at all?

If the GSL program has to be amended for one year to reach a certain level of savings, for example a reduction in the special allowance of a certain amount, how would this be done in legislation? What is the long term impact on budget authority or outlays of a sequester order for a given year? Would the program then revert to provisions in existing law?

Finally, the Senate and House will presumably be in conference in the near future on the reconciliation resolution which cuts outlays for GSLs by over $800 million over a three year period. Many of the so-called compromise offers which have purportedly been made on behalf of the House and Senate on the Gramm-Rudman amendment have addressed provisions already in either the House or Senate bills. Do you consider these proposals to stand on their own, or are they to be piggybacked on the provisions contained in the reconciliation resolutions? Here I am most concerned about the cumulative effect of these proposals on availability of GSLs.

U.S. SENATE,
COMMITTEE ON THE BUDGET,
Washington, DC, November 1, 1985.

Hon. ROBERT T. STAFFORD,
Senate Hart Building,
Washington, DC.

DEAR BOB: I have carefully reviewed your questions and concerns and believe that we have alleviated the problems you mention in the Senate alternative to Gramm-Rudman.

The Senate-passed version of Gramm-Rudman does not contain specific language concerning forward-funded programs. However, in the estimates provided to the conference committee, CBO treated obligated, unexpended balances as uncontrollable expenditures. This means that under a sequestration order, only new outlays are subject to sequestration.

To make this clear, let me give you a hypothetical example. Education program A has $3.5 billion in budget authority and outlays in FY 1986, and new outlays of $245 million. Under a 5 percent sequestration order, outlays would be reduced by only $12 million and budget authority by $175 (a 5 percent cut).

In the case of the guaranteed student loan program, the Senate-passed version of Gramm-Rudman allows for extremely broad discretion in changing the provisions of GSLs, but solely, for loans which are negotiated after a sequestration order has been issued. The number of lenders who choose not to negotiate new student loans after a sequester order has been issued will depend on the degree of specificity in the final version of Gramm-Rudman. I believe that the changes contained in the latest Senate version will alleviate your concerns about any potential harm to the GSL program.

The Senate language specifies that GSLs are subject to sequester in the first year of the loan only. Should a sequestration order go into effect, the special allowance for lenders could be reduced up to 0.40 percentage points. However, in no case would the special allowance be reduced below 3.00 percentage points. During the remaining life of the loan, the special allowance for lenders would revert back to the level specified in the Higher Education Act of 1965, as amended. With regard to students, a student's origination fee would be increased by no more than 0.50 percentage points under the Senate proposal.

The Senate proposal leaves open the question of whether state guarantee agencies and Sallie Mae would be affected by sequestration. State guarantee agencies have $500 million in operating reserves according to GAO, as well as $175 million in federal advances they have never repaid. Sallie Mae's profits have increased in recent years.

Furthermore, the effects of a sequestration order may not be particularly severe. According to the Congressional Budget Office, a 5 percent sequester order in FY 1986 would require $500,000 in outlay savings. I note, for comparison's sake, that the budget resolution for FY 1986 contains $3.2 billion for the GSL program.

With regard to the relationship between Gramm-Rudman and reconciliation, I consider reconciliation to be a separate piece of legislation. Once reconciliation passes, it becomes current law. Next year, Congress will have two chances to make reductions in GSLs (if necessary). I am certain that Congress will carefully consider any changes in GSLs in connection with the provisions of current law. If Congress fails to make the necessary reductions in the overall budget and a sequester order is issued, lenders are protected by the statute's floor in their special allowance and students by a ceiling on increases in their origination fees.

As you know, I share your concern about this very important program which has provided so many of our nation's young people with the opportunity to attend college. I can assure you that the Senate conferees have done their very best to insure the integrity of GSLs and other education programs, while still requiring them to bear their fair share of the burden of sequestration. I hope I have responded to your questions. Thank you again for your concern

Sincerely,

PETE V. DOMENICI,
Chairman.

U.S. DEPARTMENT OF EDUCATION,
THE SECRETARY,
Washington, DC, November 1, 1985.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on Education and Labor, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: This is in response to the October 21 letter from you and Congressman Jeffords regarding the effects of the Gramm-Rudman-Hollings amendment on Department of Education programs. I am sending an identical letter to Congressman Jeffords.

As you know, the Administration strongly supports the Gramm-Rudman-Hollings amendment, which would mandate annual reduction in the Federal deficit to produce a balanced budget by fiscal year 1991. This would be accomplished through specific actions each fiscal year by the Executive Branch and Congress. Since non-Federal funds in general provide over 90 percent of the national expenditures for education, any overall reductions in Federal education programs—which fund less than 10 percent of total expenditures—would in general have minimal effects on education nationwide. A healthy economy, brought about by controlling the Federal deficit, will benefit American education most significantly in the long run.

In assessing specific effects on Federal education programs, three factors—with which, I am sure, you are familiar—must be considered.

First, one of the requirements would be that the President must propose to Congress a budget for each fiscal year that meets the deficit target for that year as specified in the Gramm-Rudman-Hollings amendment. Such a proposal may recommend reductions in selected areas or programs, and Congress can either accept the President's proposals or decide its own priorities for funding. Only if, after all of Congress's actions or inactions, the deficit target is still not met, would the President be required to issue a "sequester order" to place in effect a set of spending reductions sufficient to meet that target.

Second, the President would essentially perform a ministerial function in sequestering spending, being required first to reduce automatic spending increases such as cost-of-living allowances (excluding social security) to obtain half of the needed savings and then to reduce "controllable expenditures", as defined in the Gramm-Rudman-Hollings amendment, evenly across-the-board. A limited number of expenditure categories in addition to social security are excluded from the sequestering process under Gramm-Rudman-Hollings, but everything else is subject to budgetary control. If the President or Congress do not like this result, the

President and/or the Congress may propose different, alternative means of reaching the deficit target. If an alternative is not enacted, the sequester order would remain in effect.

Third, the size of any reduction—whether in the budget or through sequestration—would depend in any given year on such factors as the extent to which the projected deficit might exceed the maximum deficit amount, and the amounts that would be sequestered from programs with automatic cost-of-living increases.

In summary, until the estimate of the deficit and the size and distribution of cuts for controllable outlays are determined for any year, we cannot speculate how Federal education programs, or the services they provide, might be affected.

Similarly, any effects on staffing, salaries, or administrative costs within the Department would depend on the extent of any program reductions as well as the types of programs that might be affected. We are, however, continuing to give a high priority to more effective and efficient management of the Department and its programs, and I will continue to pursue this objective in the future.

The enclosure to this letter provides responses which address from a technical standpoint your questions pertaining to Department of Education programs.

I hope this will be of assistance to you in your consideration of the Gramm-Rudman-Hollings amendment. If we can provide you further information, please let me know.

Sincerely,

WILLIAM J. BENNETT.

Question 1: As a mater of law, which programs administered by the Department of Education would be protected fully from the reductions in resources?

Answer: It appears that two Department of Education programs would be fully protected from reduction under a sequestering order as described in Gramm-Rudman-Hollings. Reductions in outlays for the Academic Facilities Interest Grants and Teacher Cancellations of National Direct Student Loans are not possible under current law and are not addressed by Gramm-Rudman-Hollings. The outlays for these programs are determined by previous obligations of the Federal government, and there is no statutory provision for deferring payments. While there is no way to reduce outlays from the Interest Subsidy Grants, a change in the law could result in a reduction of Teacher Cancellation outlays in future years from changes in cancellation.

Question 2: As a matter of law, for which programs would there be any limits to the reductions that could be made to achieve the deficit reduction target?

Answer: Gramm-Rudman-Hollings says that no program can be eliminated entirely as a result of sequestering. However, Congress could choose to terminate a program as an alternative to across-the-board cuts in other programs. Second, only controllable expenditures—from new budget authority, unobligated balances, new loan guarantees, or existing contracts, under defined circumstances—are subject to the reductions. Almost all education programs have some outlays that would not be controllable under the Gramm-Rudman-Hollings definition. Third, outlays for the two relatively uncontrollable programs listed in response to question No. 1 could not be cut, although a change in the law authorzing payments for new cancellations of National Direct Student Loans could be made to reduce outlays. Fourth, most outlays in College Housing Loans and Higher Education Facilities Loans are related to prior loan activity; outlays from new loans or obligations could be limited by a sequestering order or authorizing law change.

Question 3: For which programs would the Department have the discretion to maintain or increase funding because of their importance to the Nation?

Answer: In the absence of Congressional action to meet the deficit targets, a Gramm-Rudman-Hollings sequestering order would apply to all controllable programs. However, the President could propose an alternative not cutting any education programs, as could the Congress. The Congress would have to adopt such an alternative to alter the uniform percentage reductions that otherwise would occur.

Question 4: Is it your understanding that programs with slow spend-out rates will absorb proportionately larger reductions than programs that spend out more rapidly? If so, please identify these programs and the reductions they will have to absorb.

Answer. Because of the Gramm-Rudman-Hollings definition of "controllable expenditures" subject to a sequestering order, it appears that no program's controllable obligation authority is affected more than another on a percentage basis. A sequestering order reducing controllable outlays by two, five, or ten percent in any one year would require a reduction in the program's controllable obligation authority of two, five, or ten percent. Programs with slower spendout rates—and lower uncontrollable outlays—would contribute relatively smaller amounts to first-year deficit reductions, but their total controllable obligation authority would be cut by the same percentage as their controllable outlays would be cut.

Question 5: Is it your understanding that total outlays can be sequestered or are prior year obligations exempt from sequestration?

Answer. It is our understanding that the provision of Gramm-Rudman-Hollings defining controllable expenditures subject to sequestering excludes outlays from prior year obligations with defined exceptions including government contracts under certain conditions. Therefore, subject to those exceptions, only those current year outlays resulting from new budget authority or other unobligated budgetary resources would be subject to reduction.

Question 6: Assuming total outlays in a fiscal year as the base, we understand that the Budget Authority cut for Chapter 1 may be as high as 40 percent, for handicapped education as high as 67 percent, and for the SEOG program as high as 60 percent. Is this the Department's understanding as well?

Answer. The stated assumption is wrong. Based on an amendment to an earlier version of Gramm-Rudman-Hollings, total outlays in a fiscal year are not the base. Only controllable expenditures, as that term is defined, are subject to reduction. Thus, the percentage cut in controllable outlays will result in the same percentage cut in controllable obligation authority. If controllable outlays are cut by two, five, or ten percent, then available Chapter 1, handicapped, or SEOG controllable obligation authority would be cut by two, five, or ten percent.

Question 7: It is our understanding that funds for Pell Grants are committed before they are obligated. As far as the Department is concerned, are commitments and obligations synonymous for purposes of Gramm-Rudman?

Answer: Commitments and obligations for Pell Grants are not the same. Under that program, the government is not legally bound to fulfill commitments if funds are not available for obligation. The government is legally bound to make payment—outlays—for obligations. Commitments are an internal aid in estimating and controlling obligations.

Pell Grants would not be disproportionately affected by the sequestration process.

Question 8: The sponsors of the amendment sought to reduce the amount of money students receive under the GSL program. Those funds are entirely private. How would the Department attempt to comply with the intent of the amendment?

Answer: Some of the Senate testimony of October 10 implies that the central impact of this amendment would be to cut GSL funds to students, as though GSLs were direct loans from the Federal Government to the student. However, given the private nature of the loan funds and the types of costs incurred under the GSL program, it is our interpretation that the sponsors of this amendment intend that the costs of the GSL program be cut, not that funds to students be cut. Moreover, it is clear that any reduction in the costs of loans or the loans themselves would apply only to new loans.

Although we have not yet obtained a complete legal interpretation of this amendment, our initial analysis of the amendment indicates a variety of possible impacts. Should a sequester order be issued, the otherwise "entitlement" costs of new GSL loans would be considered controllable over the entire life of those loans. The means by which such costs—which include both subsidy payments to lenders and reinsurance payments to guarantee agencies—would be reduced is not specified in the bill. Unless programmatic changes were legislated to effect the necessary savings, means of reducing payments might include proration of lender bills for interest subsidies on new loans, and reduced default reinsurance payments to guarantee agencies. Program costs could also be reduced by imposing some kind of limits on new loan volume, although this may require a change in substantive law.

Question 9: With respect to loans, reductions under this amendment apply to the "entire contractual period." In the case of GSL's that could be for as long as 15 or more years. Does the Department interpret the amendment to mean that the reduction following a sequester order would be in effect for up to that length of time?

Answer: Again, although we have not yet obtained a specific legal opinion, we anticipate that a sequestering order would make reductions applicable to all new loans and reduce costs of those loans for the life of each loan. If programmatic changes were legislated instead to effect the necessary savings, those changes would apply.

Question 10: The lending community has strongly indicated that all lenders would withdraw from the program if this amendment were adopted because it would be imprudent to enter into a contract with unspecified yields on loans and uncertain default coverage provisions. What, if any, information do you have on the impact of this amendment that supports or contradicts this assertion?

Answer: We currently have no specific reactions or data regarding how lenders and other participants would respond to this Bill or to the imposition of a sequester order. Certainly, the participants' reactions would

depend on the level of reduction and the specific mechanisms for making the cuts. Evidence has shown that lenders' current yields are high. Thus, we believe that lenders would continue to participate in the program, even with somewhat reduced yields. Other evidence indicates that the guarantee agencies hold substantial surplus reserves and could absorb substantial reduction in their incomes, including Federal administrative cost and reinsurance payments. Reductions in lender yields and Federal payments to guarantee agencies were proposed by the Department in legislation accompanying the President's FY 1986 budget request. We believe reductions could be enacted immediately or as a result of a sequester order without adverse impact on lender or guarantee agency participation.

Mr. LAUTENBERG. Mr. President, I will vote against the amendment of the Senator from Oregon [Mr. PACKWOOD]. We have before us a revised version of the Gramm-Rudman-Hollings amendment that the Senate approved on October 10. I opposed the amendment then, and I must oppose the amendment now.

I do so not because I reject the goal of significantly reducing our budget deficits. Indeed, I oppose the amendment because I strongly believe we must act and act now to reduce deficit spending.

The proposal before us would sanction delay in dealing with the problem of our budget deficits. At the same time, it would seriously undermine the balance of power between the Congress and the Presidency. Instead of setting budget priorities, it would avoid them. Instead of ensuring continued economic growth, it could, by forcing cuts even during an economic slowdown, increase the chances of economic contraction and recession.

Mr. President, the outline of the proposal is basically unchanged from the previous version. Budget deficit targets are adopted, leading to a balanced budget by fiscal year 1991. If budget and spending measures are not enacted into law that would meet those targets, given a 5-percent margin of error, then across-the-board cuts in Government spending would be imposed. Exempt from the across-the-board cuts would be interest payments, binding legal obligations of the Government, and certain contracts, including current farm support contracts, and defense contracts in which the penalties for modification exceed the savings that would result.

Cuts could come in two forms. For certain programs that are adjusted for inflation each year, cuts could only be made in the inflation adjustment, not in the underlying benefits. For all other programs, cuts would be made in the total program outlays.

What is wrong with this scheme?

First, it delays action, when now is the time to act. This summer, we passed a budget resolution projecting a $172 billion deficit. I said then that we could have done better. I supported a plan that would have yielded $25 billion more in deficit reduction over 3 years.

But, the pending amendment would not even keep us to the target we set this summer. Instead, it would permit deficits as high as $189 billion. That is based on a fiscal year 1986 target of $180 billion, plus an allowable 5 percent, or $9 billion margin of error.

CBO now projects the deficit for fiscal year 1986 at $185 billion. The economy is still growing. But there are signs of weakness. The longer we delay, the more likely it is that we will face cutting when the economy is slowing, and when a big cut in Government spending or an increase in taxes could bring growth to a dead halt. The longer we delay, the more we must borrow today, and pay interest on tomorrow.

Second, the pending amendment would upset the constitutional balance of power between the Congress and the Presidency. The amendment sets deficit targets, and we need targets. That's what the budget process is all about. But, under the pending amendment, Congress could pass a budget, it could pass appropriations bills, and a reconciliation bill that achieved the target. Yet, the President could use his power of veto and reject those congressional efforts, forcing a shortfall in deficit reduction, and triggering blind, across-the-board cuts in Government programs.

I am not willing to hand a trump card to a President who has sent the Congress budget after budget that would have hurt my State. I am not willing to invite mindless government budget cuts—in environmental protection, education, or health care—instead of taking responsible steps to reduce the deficit.

We are elected to make decisions about where to cut, and where not. We are not elected to avoid those decisions. That is my third point, Mr. President. The amendment sets few priorities. If deficits exceed the targets, and automatic cuts must come, they will come indiscriminately. Health care for the elderly and the poor would be cut as deeply as limousiness for bureaucrats. Care and compensation of our veterans who served this country would be cut as deeply as subsidies for profitable corporations. Spending for environmental protection would be cut, while no effort would be made to reduce tax credits or to require corporations or individuals to pay at least a minimum fair tax.

Inaction on the budget deficit is unacceptable. But, so is blind action. We are here to guide budget policy. Not to put it on automatic pilot.

The plan sets the controls for 5 years, and then walks away from the economy. That is my fourth objection to the plan. It takes too little of the threat of economic downturns, and their impact on our ability to reduce government spending, or to increase revenues.

The plan assumes steady economic growth for 5 years. I hope it happens. But, if history is any guide, it will not. At some point, the economy will slow down. When that happens, deep cuts in spending or increases in revenues could turn a slowdown into a situation much worse.

The amendment sets targets without regard to the state of the economy. All it does is provide for an expedited process for taking up a joint resolution, to revise the targets, if we are in recession or recession is predicted. So, we must enact a law to save ourselves from driving the economy into a deeper recession.

Moreover, the amendment's definition of recession is too narrow. Even as modified, the economy must experience two quarters of real growth of under 1 percent, or there must be a projection of such slow growth, over two straight quarters, or as an average over a year. But, what if the economy is bumping along at zero growth one quarter, then 1.1 percent growth the next? What if unemployment is on the rise? What if we are in a so-called growth recession? I cannot vote for a plan that threatens to dig a deeper hole for an economy in trouble, based on the promise that that there may be a rope with which to pull ourselves out.

Mr. President, these are serious flaws in the amendment. Many of these would have been cured, under the alternative that Senator CHILES and Senator BYRD offered in October. Many of these would be cured under the alternative that the House just passed. Yet, it is clear that a majority does not yet agree. It rejected amendments that I supported to require more deficit reduction now, to impose less stringent cuts on Medicare and veterans pensions and compensation, than on other spending programs.

So, we are left with a proposal that I simply cannot support. We need to slow the growth in our mounting debt. We need to reduce annual budget deficits. We need to do it now. But, Gramm-Rudman II is not the answer, just as Gramm-Rudman I was not the answer.

Mr. President, I ask unanimous consent that two editorials, one from the Philadelphia Inquirer, and one from the Washington Post, be inserted in the record at the conclusion of my remarks.

I urge my colleagues to oppose the amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Philadelphia Inquirer, Nov. 1, 1985]

GRAMM-RUDMAN IS A FRAUD

Congress is about to inflict a disaster on the American people. It is a proposed law called Gramm-Rudman-Hollings, after its Senate sponsors. It is utterly indefensible—yet even its most vigorous opponents concede that it is almost certain to be enacted imminently.

At best it is a monstrous fraud, a deliberate deception to trick voters into believing that Congress finally acted boldly to end federal deficits. At worst—and the worst results are probable—it could inflict crippling damage upon almost every federal program, from aid to the poor to the Pentagon. It would intensify rather than ease the next inevitable economic slowdown. And it would violate the Constitution at its essence, destabilizing the balance of powers between Congress and the President via congressional surrender.

There is an aura of unreality arising from Capitol Hill, leaving a growing perception that the Congress is not serious about dealing with the deficit problem. Thus, Gramm-Rudman-Hollings not only threatens the fundamental structure of the federal government, but also is shaking public confidence in the Congress.

The measure ostensibly sets ceilings for annual deficits—but only starting after the 1986 elections. If as usual the President and Congress cannot agree on budgets within those ceilings, the law would mandate the President alone to cut spending in most programs. Only Social Security, interest payments and some binding contracts from prior years would be spared. Proponents say this forced mechanism is the only way to assure declining deficits.

It surrenders to President Reagan full power to demolish government programs. It gives him an incentive to veto Congress' budgets, then employ these new powers, then amass enough allies to block the two-thirds vote needed in both houses to override him.

Congress never held a hearing on this bill that would revolutionize American government. It is drawn so sloppily that its authors disagree upon its terms, yet the Senate passed it 75-24 and the House may pass it today.

Mr. Reagan fathered these deficits. This bill would free him to end them on his terms. Dangerous as they are, this measure is far worse. Any House member irresponsible enough to vote for this deserves defeat.

[From the Washington Post, Nov. 5, 1985]

THE DEMOCRATS ON THE DEFICIT

You can tell who's ahead on points at any given moment in the Gramm-Rudman debate on deficit reduction by where the squeals are coming from. By that and other standards, the Democrats had a pretty successful week last week. They moved through the House a version of the controversial plan that would:

Create an early test of true intentions on all sides by taking a cut at the deficit right away, instead of deferring the serious cutting until after next year's elections, as would the Senate version.

For equity's sake, exempt from cuts not just Social Security, as would the Senate version, but the main forms of federal sustenance for the poor.

Provide a mechanism to fine-tune the deficit target each year, to guard against too great a cut in a weakening economy.

Clear up assorted procedural questions that the Senate, in its haste to go on record in favor of a balanced budget, left unresolved.

But what the House version really left clear was the choice that would be created by Gramm-Rudman. To the Senate Republicans who thought it up, the amendment was mostly a way out of fiscal embarrassment. The budget deficits of the Reagan presidency have brought a doubling of the national debt to just over $2 trillion in the last five years. Gramm-Rudman—which on paper would require the president and Congress to reach a balanced budget within five years—was attached to the bill authorizing the Treasury for the first time to have more than $2 trillion in debt outstanding. While voting to finance the policy of the last five years the Senate was also able to promise to reform.

What got lost in the Senate debate was that Gramm-Rudman would almost certainly require either a tax increase or a serious cut in defense spending. That either/or aspect of the proposal was glossed over both by Senate conservatives and by the White House after the president endorsed the amendment. Now, however, the House has clarified and accentuated the math of the amendment, and the administration and congressional Republicans have begun to wobble.

The secretaries of state and defense have sent the president a letter warning him that Gramm-Rudman threatens both his defense buildup and foreign economic policy. The congressional Republicans have meanwhile moved to alter their version so that there would be an appreciably smaller cut than before in defense; the slack would be taken up by Medicare. The Senate will be asked to adopt this dubious afterthought this week.

Gramm-Rudman has always been about three-quarters gamesmanship, and continues to be. The Democrats who sharpened it last week and a lot of Republicans who have embraced it as well will freely acknowledge that is bad law (the Democrats all but invited the courts to throw it out) and proof of procedural bankruptcy. It wins for lack of an alternative. Increasingly the problem in the last few years has been to make this president choose between the lower taxes and higher spending, particularly for defense, that are both parts of his program. His refusal to do so is what Gramm-Rudman is ultimately about.

MAKING THE TRUST FUNDS WHOLE

Mrs. HAWKINS. Would the distinguished chairman of the Finance Committee yield for a comment?

Mr. PACKWOOD. I would be glad to yield.

Mrs. HAWKINS. I have been most interested these past few weeks in the issue of disinvestment or redemption of the securities in the Social Security trust funds due to Congress' failure to extend the debt limit. I had planned to offer an amendment to the reconciliation bill that would make the trust funds whole, but am pleased that the issue has been addressed in the modification to the Gramm-Rudman bill.

My concern, Mr. Chairman, is this: I have reviewed the language passed by the House on this issue, which is identical to the language I would have used in my amendment, and believe that it is favorable to the modifications now contained in the Senate version of Gramm-Rudman.

Mr. Chairman, this issue of redemption of the Social Security trust funds has been widely misunderstood. Essentially, there are two issues: the first is actual interest lost to the funds. The Social Security trust fund is protected for some lost interest due to the way Treasury transfers FICA tax receipts to the Social Security trust funds. However, the other trust funds—civil service retirement and military retirement, for example—are losing millions of dollars. This problem is taken care of in the House language and in the Senate language.

The second problem, however, is more completely addressed by the language adopted by the House. That problem has to do with the fact that long-term securities with higher interest rates have been redeemed that otherwise would not have been redeemed had we not bumped up against the debt limit. In order to be certain that those securities are re-issued at the same interest rate and with the same maturity, it is my understanding that the Treasury Department must be directed to do so, and that legislative language simply instructing the Treasury to pay back the interest does not assure the Congress and the elderly Americans of this Nation that the Social Security portfolio will be put back in the same condition as it was before. Mr. President, the language adopted in the House version was suggested by officials at the Treasury Department.

It is for this reason, Mr. Chairman, that I would urge the Senate conferees to adopt the House language on making the trust funds whole in order to ensure that the trust funds are fully restored.

Mr. PACKWOOD. The Senator from Florida is absolutely correct. The House language to restore the trust funds to their condition prior to this debt limit situation was suggested by Treasury officials. It is more complete and should be adopted by the Senate conferees. I do want to emphasize that the precise intent of the Senate conferees is this: The trust funds adversely affected by the failure of Congress to raise the debt limit must be restored. They will be restored if Congress adopts the language drafted by the Treasury Department. I would like to thank the Senator for watching this issue so closely these past few weeks and for keeping us updated on the best solution. Her efforts on behalf of Social Security recipients are to be commended.

Mr. LEVIN. Mr. President, I have one question about the contracts provision of this legislation. During the conference committee, the Budget Committee staff indicated that the contracts language would result in

almost none of the prior HUD contracts in the public housing area due to the way in which they were drafted, from being subject to the sequester order by the President. Is that still the case?

Mr. PACKWOOD. That is still the case.

Mr. MATHIAS. Mr. President, it is odd that the issue of our $2 trillion debt is obscured by a debate over changing the Budget Act. We look at the total figure in disbelief. Like Adam, having sinned, we search for a fig leaf to hide our embarrassment. Over the past 5 years we have had the largest deficits in our Nation's history, and more remarkably, these deficits have occurred during relative calm times. No war, no pestilence, no severe economic calamities have befallen us, and yet a rising tide of debt threatens to drown us all.

No one disputes the facts. We all agree that deficits need to be cut. So what is our solution? Have we made the necessary, painful choices reevaluating our priorities? I regret to say that we have not. Instead, empty symbols substitute for rational choice. We do not like the logical outcome of our previous decisions so we amend the rules.

This debate is reminiscent of the theological dispute pitting free will against determinism. This amendment seeks to create an automatic mechanism that will do what the administration and the Congress so far have not had the will to do—significantly reduce the deficit. Both the administration and the Congress want to hide the source of the pain of difficult explicit budget choices behind a mechanical decisionmaking process. If Congress and the administration cannot reach an agreement over the budget—if the deficit pattern established over the past 5 years continues—then across-the-board spending cuts automatically occur. The process is mechanical, it is preset, it is mindless, and no one need accept blame. This amendment searches for a way to evade the hard choices that deficit reduction demands. It strives for a way to reach the goal without taking responsibility. It represents budget balancing by anonymous consent.

Some have seen in this amendment a potential constitutional danger. These critics have focused on the concentration of fiscal power in the executive branch and I do not minimize that danger. But the solution embodied in the measure before us raises another, equally troubling danger, the danger of abdication of constitutional responsibility. The proposal strives for a system that makes both legislators and the executive impotent spectators of the budget process. But it will fail and it deserves to fail. The Federal budget process involves setting national priorities and making difficult choices among competing needs. Making these choices is the heart of our constitutional duty.

Worst of all, this proposal, when enacted, is unlikely to lead to a balanced budget. It perpetuates the one-sided approach to deficit reduction. The amendment makes no direct provision for increasing revenues but continues the myth that our budget can be balanced solely through spending cuts.

Over the past 50 years Federal spending has grown tremendously, but the geometric growth in our deficit is a more recent problem. It took two centuries to accumulate the first trillion dollars of national debt and only 5 years to double it. We would be wrong to believe that spending is the only or even the major reason we are confronting a $2 trillion debt today.

Spending priorities over the last 5 years have changed. But the changes in spending priorities have not caused the problem. The cuts made in nondefense have more than compensated for the increases in defense spending. Senators may disagree over how the people's money should be spent but we all know that we have not chosen a rapid increase in total spending.

In 1981, the President proposed and the Congress passed a massive spending measure. Of course it was not called a spending measure. It was called a tax cut. This massive and ill-advised tax cut has dramatically reduced Federal revenues. The Congressional Budget Office estimates the revenue loss over the past 4 years at $326 billion. The proponents of that measure asserted that reducing tax rates would result in higher revenues to the Government because of increased savings and a robust growth in the economy. Clearly, this has not happened.

The gap between expenditures and revenues sent deficits soaring and is reflected in the compounding of interest payments on the debt. Rising by 89 percent over the past 5 years, interest payments are the fastest growing spending item and can only be controlled by reducing the debt. In this decade alone we will have to borrow well over $1 trillion just to finance the debt.

The vote today is not on any amendment that purports to balance the budget. That amendement could have been attached to other measures or brought to the floor of this chamber—after examination by the budget committee—as a free standing bill. This amendment has been attached to the debt limit bill where, by design or happenstance, it serves to camouflage that what we are really voting on today is a $2 trillion Federal debt. This most recent increase is necessitated by actions taken in this Chamber several months ago, when the Senate adopted a budget with a deficit of over $170 billion.

Last year, I reluctantly voted in favor of increasing the debt limit. At that time I conditioned my vote on progress being made toward controlling the Federal budget and reducing deficits. During the budget debate members on both sides of the aisle proposed alternatives that would have dramatically reduced the deficit. But all these alternatives were rejected by the Congress. Reluctantly, I must conclude that we have made no serious progress toward reducing deficits. No fig leaf can conceal this failure. Let those who voted for this budget vote to increase the debt limit today. I did not vote for this deficit and I will not vote to send the debt limit over $2 trillion.

Mr. PELL. Mr. President, I believe very strongly that the Congress can and must take prompt and effective action to reduce the huge Federal budget deficits that have developed during the past 5 years. But I cannot support the complex formulas and procedures of the Gramm-Rudman deficit reduction proposal.

If we must establish new procedures for congressional action on budget deficits, then the proposal passed by the House of Representatives is clearly better than the Gramm-Rudman proposal. The House deficit-reduction proposal would reduce the budget deficits more quickly, more effectively, and more fairly. I only regret that we did not vote on the House deficit-reduction plan.

The Congress has the primary responsibility for both prudent management of our Nation's finances, and for establishing our national priorities. In my view, the Gramm-Rudman proposal evades these congressional responsibilities. For the collective judgments of the Congress, it would substitute mathematical formulas and automatic actions set in motion by uncertain economic estimates produced by nonelected officials.

The Gramm-Rudman proposal attempts to place our Government on automatic pilot for the next 6 years. I cannot imagine any corporation, any business or any family attempting to manage its finances in this way. Indeed, if the board of directors of a corporation adopted this kind of hands-off fiscal management, I suspect the directors would quickly find themselves in court for failure to fulfill their responsibilities to the shareholders.

In fact, the Gramm-Rudman proposal, by including elaborate provisions regarding possible court actions, recognizes that this plan has constitutionally doubtful provisions that will end up in the Federal courts.

The virtue of the Gramm-Rudman proposal is that it recognizes the urgent need to reduce Federal budget deficits. The basic fault of the

Gramm-Rudman proposal is that it fails, and indeed makes no effort, to focus on the mistaken policies that have caused the deficits to explode during the past 5 years.

I think those causes are pretty clear. We have had very large tax reductions and we have had very large increases in defense spending. Tax expenditures—the special provisions that permit more and more tax deductions and tax credits—have ballooned, reducing Government income and producing a new class of highly profitable but nearly tax-free corporations. The huge increases in defense spending have been accompanied by increasing doubts that the spending is either essential or well-managed.

Meanwhile, the ability of the Congress to correct either the revenue losses or the excess defense spending has been severely limited by the administration's adamant refusal to agree to either an increase in revenues or a reduction in defense spending. These administration policies have been based on a misguided faith that we will simply outgrow the deficits if only we keep cutting taxes—and revenue—enough. But as we all know, it is the deficits that are outgrowing the economy, not the economy that is outgrowing the deficits. And the administration has been able to pursue this novel economic philosophy because, with the veto power, the administration needs the votes of only one-third of the Senate plus one vote to block corrective action.

The Gramm-Rudman plan, and for that matter no automatic mathematical formula, changes the basic administration policies that underlie our continuing deficits. For that change, I suggest there is no sustitute for our time-tested democratic processes, and for real and concerted efforts by the administration and the Congress to address the budget deficits in a spirit of compromise in the national interest.

This deficit-reducton legislation will be subject to further consideration and action by the Congress. I hope very much that this further consideration will result in changes that will provide a better approach to the urgent problem of reducing our Federal budget deficits.

Mr. DURENBERGER. Mr. President, on October 9, I joined 75 of my colleagues in support of the Gramm-Rudman budget proposal. I stated then my concerns with this sweeping change in the way we do business around here and I want to renew that statement of concern today.

A distinguished American military leader, commenting on the nuclear age, said that we have suddenly become technological giants, while we remain ethical pygmies. I hold a similar concern for the ability of the Congress to measure up to our obligations in the post-Gramm-Rudman era. We are about to create a budget process which consolidates considerable power in the Budget Committees and the OMB, and compresses the time in which Congress must make extremely important decisions. What we will have when this measure eventually passes will be a process; what we still need is a policy to carry out our goals.

The people of Minnesota didn't send me here to act as an observer, who watches as a mechanical process grinds out a Federal budget; I am here to protect and manifest their hopes and aspirations as Americans. That is the policymaking mandate that we all have in this body, to which the systems and procedures of this body must be subservient.

Those who heave a sigh of relief at the passage of this amendment, who feel we have "solved our deficit problem" thereby, could not be more mistaken. We are ushering in a period of intense and prolonged policy debate, such as we have not seen in decades in this body. At best, this amendment will succeed in putting everything on the bargaining table, including defense, revenue increases, and entitlement reform and getting everyone, including the President, to that table. It is with that hope that I support this amendment.

It is my fear, however that this exercise may serve as a confirmation of Wendell Wilkie's wise words: "That a good catchword can obscure analysis for years." Unless the policies we formulate and implement are wise, this process will do more harm than good.

That is the challenge we accept with the passage of this amendment.

In closing, I remind my colleagues of the old joke about where a 300 pound gorilla sits: Anywhere he wants to. It is up to us to detemine responsibly what kind of animal Gramm-Rudman will be and where in the final analysis it will sit.

Mr. ARMSTRONG. Mr. President, the Senate has now passed the Gramm-Rudman-Hollings amendment for a second time. Most of us believed the original Gramm-Rudman-Hollings amendment was a good provision—and it has now been improved. If the House is serious about deficit reduction, it will approve this amended and improved version of one of the more important measures to ever appear on a congressional calendar.

During the long discussions on this issue, questions have been raised about the constitutionality of Gramm-Rudman-Hollings. The conference willingly considered legal criticisms and made several changes in response to them. If there were any constitutional defects, I believe they have been corrected.

Of course, complaints about the constitutionality of Gramm-Rudman-Hollings can still be heard. They were heard on this floor today. And they will continue to be heard for years to come.

Following Senate passage of the Gramm-Rudman-Hollings amendment I asked the staff counsel of the Senate Republican policy committee to prepare an analysis of the amendment's constitutionality. This analysis concluded that Gramm-Rudman-Hollings can survive a constitutional challenge.

I ask unanimous consent that the policy committee analysis be printed in the CONGRESSIONAL RECORD. I commend it to our colleagues and others who read these proceedings.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
REPUBLICAN POLICY COMMITTEE,
Washington, DC, October 21, 1985.

MEMORANDUM

(Revised)

To: Hon. WILLIAM L. ARMSTRONG.
From: Lincoln Oliphant, Policy Committee Legislative Counsel.
Re: Is the Gramm-Rudman-Hollings amendment constitutional?

A PRELIMINARY RESPONSE TO CHAIRMAN RODINO

I. The Rodino letter

Chairman Peter Rodino of the House Judiciary Committee has sent a letter dated October 16 to the conferees on H.J. Res. 372, the debt limit extension, explaining his "serious concerns regarding the constitutional issues" raised by the Gramm-Rudman-Hollings Amendment. (Section 3 of the resolution; officially, the Balanced Budget and Emergency Deficit Control Act of 1985.) The chairman concludes that Gramm-Rudman-Hollings is a "procedural and constitutionally questionable proposal." [1]

Chairman Rodino bases his conclusion in large part on *Immigration and Naturalization Service v. Chadha*, 462 U.S. 919 (1983), in which the Supreme Court held that the one-House veto provision of the Immigration and Nationality Act was unconstitutional because it violated the bicameralism requirement of Article I, section 1, and the presentment requirement of Article I, section 7.

Gramm-Rudman-Hollings permits the President to permanently cancel budget authority, obligation limitations, other budgetary resources, and loan limits (see the definition of "sequester" at section 3(d)(4)(H) of

[1] The Rodino letter has been published in *Hearings on H.J. Res. 372 Before a Subcomm. of the House Comm. on Governmental Operations*, 99th Cong., 1st Sess., at 58-63 (1985). Mr. Rodino is not the only influential person to question the proposal's constitutionality. Louis Fisher, author of *Presidential Spending Power* and a Congressional Research Service specialist in American government, has stated his doubts. *Id.* at 197-215, 231. Laurence Tribe, author of *American Constitutional Law* and professor of constitutional law at Harvard Law School, has written that Gramm-Rudman-Hollings has "several serious [constitutional] infirmities." Letter to Hon. Mike Synar from Laurence H. Tribe, Oct. 22, 1985.

This memorandum responds directly to the Rodino letter. Responses to other constitutional objections may be found in Richard Ehlke, "Selected Constitutional Questions Raised by Gramm-Rudman-Hollings Deficit Reduction Proposal," Congressional Research Service, Library of Congress, Oct. 24, 1985 (mimeo).

H.J. Res. 372). Chairman Rodino argues that this power to sequester amounts to "terminating legal rights established under constitutionality enacted legislation" and "the effect . . . is to repeal duly enacted statutes." The Chairman concludes, "While under the Constitution Congress *can* delegate the authority to implement laws, it *cannot* delegate the authority to repeal laws. This is precisely what the Gramm-Rudman proposal purports to do." (Emphasis in original.)

II. Provisional responses to Rodino letter

A. Gramm-Rudman-Hollings Does Not Grant Unconstitutional Legislative Powers to the President

It is not necessary to regard Gramm-Rudman-Hollings sequester orders as equivalent to legislative repeals. The proposed sequester orders are not Article I legislative acts; they are Article II executive acts. Chairman Rodino takes the position that the orders have the force and effect of legislative repeals, but if Gramm-Rudman-Hollings is enacted *Congress* will have established the fiscal policy of the United States and empowered the executive to enforce that policy. Looked at in these terms, Gramm-Rudman-Hollings is unexceptionable.

Gramm-Rudman-Hollings sets the policy and requires the President to enforce it; his is not empowered to legislate. For example, in issuing any sequester order, Gramm-Rudman-Hollings forbids the President to eliminate any program, project, or activity (sec. 3(d)(2)(A)(iii)); grants *no* new authority for the President to alter relative budget priorities established by law (sec. 3(d)(2)(A)(v)); prohibits the reduction of automatic spending increases below zero (sec. 3(d)(2)(A)(ii)); excludes Social Security COLAs from the definition of automatic spending increases (sec. 3(d)(4)(A)); defines the treatment of certain veterans' and other benefits (sec. 3(d)(2)(A)(i)(II)); requires that persons who are or become eligible for program participation not be denied eligibility because of sequestering (sec. 3(d)(2)(A)(v)); and more. The details are important because the question of Gramm-Rudman-Hollings' constitutionality may turn on the details. The details for executive enforcement seem sufficiently narrow and precise to meet constitutional requirements.

Legislative acts are also discussed under subsection D, *infra.*

B. Gramm-Rudman-Hollings Fits the General Rule of Delegation

Congress may not abdicate or delegate the essential legislative functions vested in it by the Constitution. However, Congress may leave to others the making of subordinate rules within Congressionally prescribed limits and the determination of facts to which the legislative policy is to apply. *Panama Refining Co. v. Ryan,* 293 U.S. 388, 421 (1935); *Schechter Poultry Corp. v. United States,* 295 U.S. 495, 529-30 (1935). Congressional enactments which prescribe essential standards and policies and rely on Executive Branch enforcement are constitutional if the standards are "sufficiently definite and precise to enable Congress, the courts and the public to ascertain whether the [executive] has conformed to those standards." *Yakus v. United States,* 321 U.S. 414, 426 (1944). The statute's standards are not to be tested in isolation but must be judged with an eye to their context and the statute's purpose and factual background. *American Power & Light Corp. v. Securities & Exchange Comm'n,* 329 U.S. 90, 105 (1946). See also, *Federal Energy Administration v. Algonquin SNG, Inc.,* 426 U.S. 548 (1976) and *National Cable Television Assn., Inc. v. United States,* 415 U.S. 336 (1974).

On the matter of contingent legislation, i.e. legislation that takes effect upon an executive finding or declaration, see especially, *Opp Cotton Mills v. Administrator,* 312 U.S. 126 (1941), *Union Bridge Co. v. United States,* 204 U.S. 364 (1907), and *The Brig Aurora,* 7 Cr. (11 U.S.) 382 (1813).

The language and intent of Gramm-Rudman-Hollings can fit squarely within the general rule.

C. Gramm-Rudman-Hollings Fits the Particularities of the Delegation Rule

In a situation that is remarkably similar to the expected legal situation under Gramm-Rudman-Hollings, the United States Court of Appeals for the 4th Circuit upheld a delegation to the Secretary of Agriculture where the Omnibus Budget Reconciliation Act of 1982, Pub. L. 97-253, sec. 101, had authorized the Secretary to levy a 50-cent per hundredweight charge on all milk marketed commercially. The Secretary was permitted, but not required, to impose the charge only during a 3-year period and only if he estimated that net price support purchases of milk (or milk products) would be more than 5 billon pounds milk equivalent. (Presumably Chairman Rodino would say that the Reconciliation Act authorized the Secretary to "repeal" a law.) The charge was to be remitted to the Commodity Credit Corporation to help offset the cost of the milk price support program. The Senate report on the Reconciliation Act said its purpose was "to achieve . . . dramatic reductions in Federal spending [and] to wage an effective battle against Federal deficits." The Secretary estimated that the charge would reduce farmers income by about 4 percent.

When the Secretary imposed the charge he was sued. Plaintiffs alleged, among other things, that the charge constituted an unconstitutional delegation of legislative power. In reply, the Court said:

"There . . . is no merit to the contention that the involved statute unconstitutionally delegates legislative power to the Secretary. The legislative history . . . reveals that Congress clearly delineated the policy objectives of reducing milk production and reducing the increasing cost of the milk price support program. The statute clearly describes the effective dates during which the deduction may be implemented, the specific amount of the deduction, and requires a minimum level of expected government purchases before the deduction can be imposed. Congress thus clearly delineated the general policy, the public agency which will apply it, and the boundaries of the delegated authority. *American Power & Light Corp.* v. *S.E.C., [supra].*"

South Carolina ex rel. Tindal v. Block, 717 F.2d 874, 887 (4th Circ. 1983), *cert. denied,* 104 S. Ct. 1444 (1984).

The holding in *Tindal* is consistent with all recent applications of the delegation doctrine by U.S. Courts of Appeals in domestic policy cases. (The executive has greater independent discretion in immigration, trade, and foreign policy cases.) For example, *United States v. Sans,* 731 F.2d 1521 (11th Circ. 1984), *cert. denied,* 105 S. Ct. 791 (1985) ("laundering" money under what is now 31 U.S.C. 5311-5322 (1983)); *Avoyelles Sportsmen' League, Inc. v. Marsh,* 715 F.2d 897 (5th Circ. 1983), (Clean Water Act); *United States v. Womack,* 654 F.2d 1034 (5th Circ. 1981), *Cert denied,* 454 U.S. 1156 (1982) (Organized Crime Control Act of 1970); and *United States v. Davis,* 564 F.2d 840 (9th Circ. 1977), *cert. denied,* 434 U.S. 1015 (1978) (Drug Abuse Prevention and Control Act of 1970). See also, 1 Davis, *Administrative Law Treaties* (2d ed.), ch. 2.

D. *Chadha* Does Not Imply That Gramm-Rudman-Hollings Is Unconstitutional

1.

There is a temptation to read *Chadha* too broadly, and it appears that Chairman Rodino has succumbed to the temptation. *Chadha* held that a one-House veto violated Article I, sections 1 and 7, bicameralism and presentment. But Gramm-Rudman-Hollings does not circumvent either two-House legislative action or presentment. The President is expected to enforce Gramm-Rudman-Hollings as enacted, and *Chadha* reasserted his right and duty to do so:

". . . To be sure, some administrative agency action—rulemaking, for example—may resemble "lawmaking." See 5 U.S.C. 551(4), which defines an agency's "rule" as "the whole or part of an agency statement of general or particular applicability and future effect designated to implement, interpret, or prescribe *law* or policy. . . ." [Emphasis by the Court.] [H]owever, "[i]n the framework of our Constitution, the President's power to see that the laws are faithfully executed refutes the idea that he is to be a lawmaker." *Youngstown Sheet & Tube Co.* v. *Sawyer,* . . . . The bicameral process is not necessary as a check on the Executive's administration of the laws because his administrative activity cannot reach beyond the limit of the statute that created it—a statute duly enacted pursuant to Art. I, secs. 1, 7. The constitutionality of the Attorney General's execution of the authority delegated to him by sec. 244 [of the Immigration and Nationality Act] involves only a question of delegation doctrine. The courts, when a case or controversy arises, can always "ascertain whether the will of Congress has been obeyed," *Yakus* v. *United States* . . ., and can enforce adherence to statutory standards. . . . It is clear, therefore, that the Attorney General acts in his presumptively Art. II capacity when he administers the Immigration and Nationality Act. Executive action under legislatively delegated authority that might resemble "legislative" action in some respect is not subject to the approval of both Houses of Congress and the President for the reason that the Constitution does not so require. That kind of Executive action is always subject to check by the terms of the legislation that authorized it; and it that authority is exceeded it is open to judicial review as well as the power of Congress to modify or revoke the authority entirely. A one-House veto is clearly legislative in both character and effect and is not so checked; the need for the check provided by Art. I, secs. 1, 7 is therefore clear. Congress' authority to delegate portions of its power to administrative agencies provides no support for the argument that Congress can constitutionally control administration of the laws by way of a congressional veto."

Chadha, supra, at 953-54 n. 16 (citations omitted).

It is seems clear from *Chadha* that Congress may continue to delegate to the Executive Branch so long as the delegation is made with sufficient clarity to allow the courts to determine if the will of Congress has been obeyed. Such delegation is always subject to check by the terms of its author-

izing statute and to judicial review and Congressional oversight and revision.

2.

Not every governmental act that has the "purpose and effect of altering the legal rights, duties, and relations of persons outside the Legislative Branch," *id.* at 952, is a *legislative act.* Judicial, executive, and administrative acts also alter the legal rights, duties, and relations of persons. *Chadha* teaches that the rights, duties, and relations of persons outside of the Legislative Branch cannot be altered *by the Legislative Branch* except in compliance with the commands of bicameralism and presentment.

Chairman Rodino defines sequestering as a legislative act, apparently because it has the "purpose and effect of altering the legal rights, duties, and relations of persons," and perhaps also because the alteration is permanent. His argument, based largely on *Chadha*, depends on this definition. But the definition cannot carry the burden it is required to bear.

"Whether actions taken by either House are, in law and fact, an exercise of legislative power depends not on their form but upon 'whether they contain matter which is properly to be regarded as legislative in its character and effect.'" *Id.*, at 952 (citation omitted). Since *Chadha*, the federal district courts have been applying the same test of "character and effect" to the nonlegislative branches and holding that executive, quasi-executive, and quasi-legislative acts that alter the legal rights, duties, and relations of parties are *not* unconstitutionally delegated legislative acts. *Ameron, Inc.* v. *U.S. Army Corps of Engineers*, 607 F.Supp. 962 (D.N.J. 1985), *appeal docketed*, nos. 85-5226 & 85-5377, 3rd Circ. (Comptroller General's review of contracts under the Competition in Contracting Act is not an unconstitutional delegation of legislative power). *E.E.O.C* v. *Ingersoll Johnson Steel Co.*, 583 F. Supp. 983 (S.D. Ind. 1984) (President's transfer of Age Discrimination in Employment Act enforcement functions to the EEOC under Authority of the Reorganization Act of 1977 was not an unconstitutional delegation of legislative power). *Baylor Univ. Medical Center* v. *Schweiker*, 571 F. Supp. 374 (N.D.Tex. 1983), *rev'd in part on other grounds, sub nom.*, 758 F.2d 391 (5th Circ. 1985) (Administrative Procedure Act is not an unconstitutional delegation of legislative power). The results in *Ameron* and *Ingersoll Johnson* are predicated on the facts of each delegation, and the result of a constitutional test of Gramm-Rudman-Hollings also is likely to turn on the particular facts of the Act.

E. Gramm-Rudman-Hollings Is Not a Renunciation of Congressional Power or Prerogative

Chairman Rodino in his letter and Chief Justice Burger in his opinion for the Court in *Chadha* quote the *Steel Seizure Case* to the effect that the President is not a lawmaker or legislator. The supporters of Gramm-Rudman-Hollings do not propose to make him one. Nor do they propose to acknowledge inherent powers of the President to impound or sequester funds. Under Gramm-Rudman-Hollings, the President will have only those fiscal powers which have been granted by the Legislative Branch, and only to the extent granted. The President's powers are narrowly ministerial and contingent upon events which Congress has specified with particularity, therefore the grant does not appear unconstitutionally broad or vague. Gramm-Rudman-Hollings is consistent with the theory of separation of powers of the *Steel Seizure Case.*

To avoid a nationwide steel strike which he believed would immediately jeopardize the national defense, President Truman ordered the Secretary of Commerce to seize the nation's steel mills and keep them running. The Supreme Court held the seizure unconstitutional. There were seven opinions, but Justice Jackson's opinion seems to best summarize the reletionship of the Executive and Legislative Branches, *Youngstown Sheet & Tube Co.* v. *Sawyer*, 343 U.S. 579, 635-638 (1952) (Jackson, J., concurring). According to Jackson, there are essentially three possibilities:

"1. When the President acts pursuant to an express or implied authorization of Congress, his authority is at its maximum, or it includes all that he possess in his own right plus all that Congress can delegate." Possibility number 1 will describe the President's position under an enacted Gramm-Rudman-Hollings.

"2. When the President acts in absence of either a congressional grant or denial of authority, he can only rely upon his own independent powers, but there is a zone of twilight in which he an Congress may have concurrent authority, or in which its distribution is uncertain." Possibility number 2 describes the position of the President prior to passage of the Impoundment Control Act of 1974, 2 U.S.C. 681 (1982), *et seq.* President Nixon claimed that a president's right to impound funds was "absolutely clear." L. Fisher, *Presidential Spending Power* 158 (1975). Congress disagreed strongly, enacting the Impoundment Act.

And, "3. When the President takes measures incompatible with the expressed or implied will of Congress, his power is at it lowest ebb, for then he can rely only upon his own constitutional powers minus any constitutional powers of Congress over the matter. Courts can sustain exclusive presidential control in such a case only by disabling the Congress from acting upon the subject." The steel seizure was placed in this third category because Congress had covered the field with enactments that were inconsistent with the President's seizure.

The theory of the *Steel Seizure Case supports* the power of the President to sequester funds *if* Congress has granted the power.

F. Gramm-Rudman-Hollings Is Constitutionally Consistent With State Experience

Gramm-Rudman-Hollings must pass constitutional review under the Constitution of the United States, but the constitutional experience of the states may help inform the Federal courts. The United States Supreme Court has looked to the constitutional experience of the states. E.g., *McGrain v. Daugherty*, 273 U.S. 135, 165-66 (1927) (legislative investigations); *Rochin v. California*, 342 U.S. 165, 177-78 (Douglas, J., concurring) (suppression of evidence). For Gramm-Rudman-Hollings, an Iowa case is especially instructive:

Iowa's Local Budget Law requires county boards of supervisors to submit their budgets to the State Appeal Board (composed of the State Comptroller, Auditor, and Treasurer). The Board is authorized to hear protests about the budget, conduct hearings on the protests, and to "approve, disapprove, or reduce all such proposed budgets" but not to increase the budget. Iowa Code, sec. 24.30 (1981). In June, 1981, following a protest and hearing, the State Appeal Board reduced the budget for Polk County by about $880,000. The county, the president of AFSCME, and others sued.

The Iowa Supreme Court upheld the Board's action, rejecting a complaint that the Board's authority and action constituted an unlawful delegation of legislative authority in violation of Article III of the Constitution of Iowa.[2]

In Iowa, the test is "whether such delegation is a reasonable one permitting the administrative body only to 'fill in the details' to accomplish a general purpose or policy announced by the legislature itself or whether it abdicates to the administrative body the right to legislate. . . . [T]he presence or absence of procedural safeguards is important in determining whether this delegation is reasonable." Further, the "determination of whether adequate procedural safeguards exist depends on what function the agency will serve on behalf of the legislature. . . . The procedural safeguards must advance that purpose, and effectively preclude arbitrary, capricious or illegal conduct on the part of the [administrator]." *Polk County v. Iowa State Appeal Bd.*, 330 N.W. 2d 267, 273-74 (Iowa 1983) (citations omitted).

The Iowa court concluded that the establishment and powers of the Review Board were not unlawful because the legislature, "mindful that it cannot foresee all conditions which may arise in the budgetary process, provided sufficient procedural safeguards to protect interested parties. . . ." *Id.* at 274.

The Iowa rule may be more relaxed than the Federal rule that will apply to Gramm-Rudman-Hollings, but the similarities are important and the Iowa case provides an expectation that Gramm-Rudman-Hollings will survive a Federal constitutional challenge.

III. Conclusion

There are good reasons for believing that Gramm-Rudman-Hollings can survive a constitutional challenge, and some of these reasons can be found in *Chadha*, the very case that Chairman Rodino cites against the sequestering procedure. Gramm-Rudman-Hollings is specific (thereby allowing the courts to judge whether the administrator has stayed within the statutory mandate); it requires the President to ascertain certain facts and take specific, nondiscretionary action with respect to them (the Senate sponsors emphasized again and again that the President's responsibilities are ministerial); it conforms to the constitutional law on legislative delegation, as defined by the Supreme Court; and it is consistent with the way the Courts of Appeals are applying the law to specific Congressional delegations.

Mr. WALLOP. Mr. President, for several months, since the August recess I have kept a letter on my desk. This letter has served to strengthen and refresh me for the debates this body has had during consideration of the various appropriations bills and most recently during consideration of the Gramm-Rudman amendment to put this Government on track to a balanced budget. A 36-year-old student at

[2] "The powers of the government of Iowa shall be divided into three separate departments—the Legislative, the Executive, and the Judicial: and no person charged with the exercise of powers properly belonging to one of these departments shall exercise any function appertaining to either of the others, except in cases hereinafter expressly directed or permitted." Const. of Iowa, 1857, Article III, "Of the Distribution of Powers", Section 1.

the University of Wyoming, named Martin Hudson, wrote the letter. I ask unanimous consent that his letter be printed in the RECORD.

Martin Hudson is in the process of learning new skills to compete in a changing economy. His position in life has been drastically altered, going from a comfortable life with a $30,000-a-year income to what he calls a "subsistence" level. Funding from Government programs, especially the Student Loan Program, has a great impact on the quality of his life.

While Mr. Hudson has a direct personal interest in a variety of domestic Government programs, his overriding concern is for the future of his country. His analysis of our current situation is that more citizens want benefits from the Government than the Government can afford. He realizes that sustaining a Government that meets all our needs is not possible and writes, "We have to learn that life is not all a bed of roses. We need to learn that there are thorns on the stems of those roses, and that the beauty can only be maintained by working with and respecting the thorns."

Martin Hudson urges us to appreciate the magnitude of the Government spending problem and get on with the business of getting it under control. I urge my colleagues to look to his advice. As we proceed with our deliberations on the budget, I hope Martin Hudson's letter will remind my colleagues, as it has reminded me, that the people in this country are more than ready, more than willing, to accept a solution to this problem. All we have to do is act.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

W. MARTIN HUDSON,
Laramie, WY, August 16, 1985.

Senator MALCOLM WALLOP,
Russell Senate Office Building, Washington DC.

DEAR SENATOR: I am a 36 year old college student, whose job skills have been made obsolete with a changing economy. I am planning a career in law and will graduate in 1989. And I hope that you will read this letter, not just some staff member who will respond with a form letter.

I am concerned about the deficits that plague our country today, which I believe are a much greater threat to our country than any external threat, past or present. Very few, if any, great nations that were strong internally have fallen because of outside forces. An old house generally falls because of structural failure, not from external forces, and now the financial structure of our nation-house is rapidly deteriorating due to these massive deficits. All the external forces need to do is sit and wait.

I do not believe it is a question of can or can't, but a question of will or won't. An alcoholic cures his illness by saying I will, not I can. Any true winner keeps thinking I will. I will only be successful in law school if I believe I will be. So you see, an honest politician will never say we can't, but will only say we won't. There's an old saying, "Can't never could."

I know it isn't easy. Being a student I know how important federal aid is. But I feel I can make sacrifices, such as a more realistic interest rate on my student loans. Why not charge 12% or even 14% on these loans rather than the 8%, after I graduate. Why make it so easy for everyone.

We have to learn that life is not all a bed of roses. We need to learn that there are thorns on the stems of those roses, and that the beauty can only be maintained by working with and respecting the thorns. Anyone who whines because they are not getting enough is already receiving too much.

Personally, I believe a solid freeze on all government programs is the simplest and most equitable way of solving the problem. I know the existence oriented and Murphy Law ruled government can live within a freeze. My Wife and I went from an 1800 square foot house and $30,000 a year to a subsistence income and a small student apartment at the University of Wyoming. It was tough but we are making it happen. You see, it was either this or nothing. We did not whine about our situation, but did something about it. We were not like all the whiners paraded before us every night on the evening news. Formula for political action is: Political Action=(Whining People+News Cameras÷Federal Dollars per Whiner)—Common Sense.

I don't understand why politicians don't see that the benefits of a balanced budget clearly outweigh the nonbenefits of continued deficit spending. It seems the message from Congress and the President is that special interest have a much higher priority over the American people.

I wish the President and Congress would take off the rose colored glasses and wake up to the reality of the problem. The next recession will make the last seem like a Sunday picnic, but by then it will be too late. If this deficit bubble bursts, there will not even be any pieces around to pick up.

What is really sickening about this mess, is that the rich and poor really don't have to worry. It is I, and the millions like me who will be hurt the most, the backbone of America. And that is why nothing will be done, it isn't going to hurt you, the President, or others in Congress, like it will me, and the others like me.

Sincerely,

W. MARTIN HUDSON.

Mr. DOMENICI. Mr. President, we have been working on this proposal for about 5 weeks. We were on the floor about 14 days since conference. We have worked as many hours as I have seen on any major piece of legislation. I think I am as informed on the budget process as anyone. We have made 50 amendments, technical and substantive, and I am satisfied that this bill is operative. It will work.

The only question that I have been asked by the press that makes real sense is, Is it for real? Or is it another effort at getting around deficit reduction?

Let me say, if there is any law that we could pass that would make deficit reduction real and make Congress and the President face up to it, this is it.

I am not saying that we will not find some way to get out from under it, but let me tell you, Mr. President, for Congress to pass something that has a hammer in the event we do not do our work and do that in a responsible way, this will do that. No one will like it next year, but everyone will like it if we get to the $144 billion deficit and everyone will be at the table negotiating and everything other than Social Security, as presently drawn, everything else will be on the table to accomplish it. And anyone who pulls out and decides they are not going to the table—the President, the Senate, the House, sponsors of major programs, those who favor this, that, or the other, those who are against taxes—anyone who wants to pull out from that debate will find that they will suffer the sequestration of automatic cuts in everything, including things they like.

That is about the best hammer we can draw and I regret that it must be done this way, but the last years of our history indicate it must or we will not get there.

Mr. GRAMM. Mr. President, I thank the distinguished Senator from Oregon [Mr. PACKWOOD], the Senator from New Mexico [Mr. DOMENICI], the distinguished majority leader, and Senator LONG for their leadership in helping us improve this package. I thought it was a good package when we offered it.

We have gone through 5 weeks of debate. I have to take issue with those who say we do not know what is in this bill. This bill has been debated three times longer than any other issue since I have been in the U.S. Senate and it is by far better known in terms of content than anything we have considered. If you are against this bill, you know what is in it and you are against it, but no one is against it because they do not know what is in it. I believe the bill has been improved.

A constitutional issue was raised about the involvement of CBO. We have corrected that in this bill. Interestingly enough, the House has made only the CBO the instrument of the process and thereby compounded the problem they have raised in considering our proposal.

I believe it is worked out in detail. We now no longer just have a good idea that was developed. We now have an idea that has been analyzed and debated. We are ready to vote. I urge my colleagues to vote yea.

Mr. DOLE. Mr. President, could I just have 30 seconds to indicate to my colleagues that following this vote we are trying to negotiate bringing up the military construction proposal, the D.C. appropriations, and we have a nomination or two. And so I think it is fair to say that there could be additional votes this afternoon and this evening. Vote yea on this motion.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the question is on agreeing to the motion

to concur in the House amendment with an amendment (No. 957) in the nature of a substitute.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Connecticut [Mr. WEICKER] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

The PRESIDING OFFICER (Mr. COHEN). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 74, nays 24, as follows:

[Rollcall Vote No. 285 Leg.]

YEAS—74

Abdnor	Ford	McConnell
Andrews	Garn	Murkowski
Armstrong	Goldwater	Nickles
Baucus	Gore	Nunn
Bentsen	Gorton	Packwood
Biden	Gramm	Pressler
Bingaman	Grassley	Proxmire
Boren	Hatch	Pryor
Boschwitz	Hawkins	Quayle
Bumpers	Hecht	Rockefeller
Chafee	Heflin	Roth
Chiles	Heinz	Rudman
Cochran	Helms	Sasser
Cohen	Hollings	Simon
D'Amato	Humphrey	Simpson
Danforth	Kasten	Specter
DeConcini	Kennedy	Stennis
Denton	Kerry	Stevens
Dixon	Laxalt	Symms
Dodd	Leahy	Thurmond
Dole	Levin	Trible
Domenici	Long	Wallop
Durenberger	Lugar	Warner
East	Mattingly	Wilson
Evans	McClure	

NAYS—24

Bradley	Hart	Melcher
Burdick	Hatfield	Metzenbaum
Byrd	Inouye	Mitchell
Cranston	Johnston	Moynihan
Eagleton	Kassebaum	Pell
Exon	Lautenberg	Riegle
Glenn	Mathias	Sarbanes
Harkin	Matsunaga	Stafford

NOT VOTING—2

Weicker	Zorinsky

So the motion to concur in the House amendment with an amendment (No. 957) in the nature of a substitute, was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I would like the RECORD to show that Senator ZORINSKY, who had voted for this before, is ill and in the hospital and could not be here. I am not presuming how he would have voted but he voted for it before.

Mr. GRAMM. He was a cosponsor.

Mr. PACKWOOD. He was a cosponsor.

VETERANS' ADMINISTRATION HEALTH CARE AMENDMENTS

The Senate resumed consideration of the bill (H.R. 505).

AMENDMENT NO. 967 TO AMENDMENT NO. 966

The PRESIDING OFFICER. The question now occurs on H.R. 505. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, before the Senate now is an amendment to the conference report on the VA health care bill.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Florida.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. CHILES. Does the majority leader want recognition?

Mr. DOLE. Mr. President, I was hoping we might have a quorum call. Maybe we will not continue with this bill.

Mr. CHILES. If I may have the right to be recognized.

Mr. DOLE. If we do the Senator from Florida will have the right to the floor.

Mr. CHILES. I will be happy to yield.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from California.

Mr. CRANSTON. Mr. President, I wish the attention of Senators on this floor.

Mr. President, this bill is not going to be dealt with further today apparently, but I would just like to stress one point. We are talking about a potential addition to the budget that would amount to at least $25 million initially for acquisition plus $35 million a year for 6 years to operate a hospital that the Veterans' Administrator, Mr. Walters, says is not needed, after having studied the matter with care. With inflation that's at least $250 million more in expenditures.

It is ironic, indeed, that this matter comes before us the day after the Senate voted by a narrow margin against an amendment to Gramm-Rudman that I offered with Senator RIEGLE that was designed to maintain the basic budget for medical care for veterans. That amendment was rejected. The Senator from Alabama voted against that amendment.

One day later the Senator from Alabama presents an amendment that could lead to that kind of a cost which would increase expenditures for veterans' medical care rather than decrease those costs.

Where would the money come from in a shrinking budget under Gramm-Rudman or even from the present budget? What hospital would be closed in what State in order to provide the funding for this new hospital which is not needed according to the Veterans' Administration.

I pose those questions to my fellow Members. We will be dealing with this issue in the future. I ask Members to consider carefully the matter of once again voting for increasing costs after we have had a vote to permit cuts in those expenditures.

I yield the floor.

Mr. STENNIS. Mr. President, the areas involved in this amendment, the areas where these hospitals are located, are partly in my State, and I am familiar generally with all of them and more particularly the one that is in my State.

But I go beyond my testimony or my statement of the facts to Mr. Walter's letter. He is the Administrator now nationwide of the Veterans' Administration. I am reading from a letter addressed to Hon. ALAN K. CRANSTON, a Senator from the State of California, dated June 24, 1985. The second sentence in that letter makes the statement:

"I have studied these findings—" referring to the investigation and review that had been made—

> I have studied these findings and agree with them. It is my decision that the proposal is not the most beneficial alternative for providing health care to veterans who reside in a wide geographic area along the Gulf coast of Mississippi, Alabama and northern Florida.

Now, of course, all of us want these veterans to have the facilities that are needed, the care and upkeep of the highest order, with highly competent medical people, men, personnel, all the way around, and the utmost treatment in the service and medical attention that these parties may need.

As far as Mobile, AL, I feel very friendly and very close toward the city there and the fine people. There is nothing involved that is influencing me except we just passed an amendment here involving billions and billions and billions of dollars, providing for the elimination of a great part of the benefits so-called that are in the bill, the reductions trying to hold down the deficit for years it will take to run, and we are talking about building. There is no shortage. There is no real requirement.

To the contrary, the certificate here from the administrator himself says he has been into these facts, that he has weighed them, and he has reached a decision and conclusion, and we do not have the need now for an additional hospital.

Mr. President, I am not trying to defeat anything that happens to be located somewhere else in some other

State. I would be ready any time that the need is there to vote for it, of course. But under the circumstances, we are going to have to get back in the habit of not voting money when it is not needed. So I trust that we will pass this up at the proper time and let it lay over. And if there comes a time in a short while or long while, whatever the need is, let it be met.

I yield the floor, Mr. President.

Mr. HEFLIN. Mr. President, I rise in support of the amendment requiring a feasibility study for the purchase of an existing hospital to use for veterans medical care. The Senate should give its approval to this amendment which would require the Veterans' Administration to follow a new direction with respect to the VA health care system. The Senate gave its approval to an identical amendment when S. 876 was pending before this body in July.

This amendment would, for the first time, require the VA to determine the feasibility of purchasing or leasing existing medical facilities instead of constructing costly new facilities. It also requires the VA to submit to Congress an analysis of the cost of constructing a new facility versus purchasing or leasing an existing hospital or nursing home when adding to the veterans health care system. While the VA has had the statutory authority to purchase or lease an existing facility, they have never seen fit to consider this cost saving option. This amendment would require that they consider this commonsense option.

I know firsthand of the one instance where the VA could purchase an existing hospital for 20 to 25 percent of the cost of constructing a new facility in a region of the country where a definite need for an additional VA medical center has been established by the Veterans' Administration. The VA should investigate purchasing the Providence Hospital in Mobile, AL. The Florida Panhandle study, developed by medical district 10, shows a minimum need for approximately 215 medical-surgical beds to serve the needs of the eight counties located in the Panhandle of Florida. VA medical district 10 studies also show a need for 87 hospital beds to serve the needs of the veterans in Baldwin, Clarke, Mobile, Monroe, and Washington Counties in southern Alabama. Using the VA figures, one could conclude that there is a need for a minimum of 302 additional medical-surgical beds to serve the veterans population living in the five Alabama post counties and eight Florida Panhandle counties. Other studies conclude that approximately 70 percent of the veterans along the central gulf coast live within 1½ hours driving time of Providence Hospital, which will be vacated by its current owners in 1986. Although the Veterans' Administration has established a need to construct a costly new facility in Ft. Walton Beach, FL, I believe the Providence Hospital facility could provide substantial savings.

Acting upon requests from myself and my distinguished colleague from Alabama, Senator DENTON, the Veterans' Administration conducted a study of the Providence Hospital to determine its suitability as a VA medical center. A report pulished after the study was completed concluded: ". . . if a programmatic determination was made to establish a Veterans Administration Medical Center in Mobile, Alabama, the Providence Hospital could be adapted to serve this role." Additionally, the University of South Alabama College of Medicine is located in close proximity to the site of Providence Hospital. The location of a Veterans' Administration medical center at the Providence Hospital site would greatly benefit both the Veterans' Administration and the University of South Alabama College of Medicine.

Mr. President, Alabama has a proud history of sending her sons to fight for our country. As a result, we have a comparatively large number of veterans located in Alabama who would benefit from a Veterans' Administration facility. These veterans, their families, and I support efforts to provide them with the health care they deserve. I urge my colleagues to support this amendment.

Mr. President, I hope that we can reach some amicable solution to this. There are a lot of matters involved on the gulf coast. I do not believe that that is a location where there is an existing or planned veterans' hospital that has a medical school, and there is a medical school at the University of South Alabama. There are a lot of factors involved. I hope that we can work out some sort of language relative to this feasibility study. I have been making some progress and have even contacted some people on the House side.

Under the circumstances, I believe a little more time here might work this problem out. And with that in mind, I would suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HAWKINS. Mr. President, while I do not oppose the purchase of an existing facility by the Veterans' Administration, the Denton amendment is a thinly veiled effort to force the Veterans' Administration to purchase a hospital which it has more than adequately considered and rejected as a waste of Veterans' Administration resources.

The Denton amendment puts the cart before the horse. It directs the VA to provide a feasibility study for the purchase of an existing facility before the need for a facility for the area has been established. Indeed, VA studies indicate that there is a need for a VA hospital in the Florida Panhandle and not in the Mobile, AL area. If the VA has not exercised its existing authority to purchase an existing facility, it may be that existing facilities have not been found in the part to meet VA needs.

The supporters of Senator DENTON's amendment have complained that building costs are high and that this measure would in some way force the VA to save money. Building costs are high, but they pale in the light of operating costs. Construction costs are a very small percentage of the overall VA budget. In 1984, the average construction cost per bed for new VA hospitals was about $188,000.

Mr. President, it should be pointed out that in 1984, the cost of operating a medical bed 1 year was $83,950 and $144,540 for a surgical bed. Savings in construction costs might not operate an acquired hospital more than a year or two, and waste VA resources in the long term. Continuing high operating costs dictate that any new VA facility be located to serve the greatest need.

In a few years, we in Florida are going to be faced with a catastrophe that I cannot stand here and explain to the Members who are listening in their offices.

Florida has one of the fastest growing veterans populations in the Nation. New VA records are being opened or transferred into the State of Florida at the rate of 5,000 a month. Think about the phenomenal rate of growth that reflects.

The panhandle is receiving its share of this rapid growth. Compounding the increase of resident veterans moving into the State is the large "snowbird" population or the great number of northern veterans who spend their winters in the State. The increase in the veteran population only exacerbates an already unacceptable situation which requires the area's many veterans to travel as much as 200 miles or more to receive necessary care at a VA hospital. Unable or unwilling to travel the great distance to get to a VA hospital, many of the panhandle veterans seek care in local, private hospitals.

Responding to the very real concern that Florida is not getting its share of the Veterans' Administration's resources, I have asked the Government Accounting Office to complete an analysis of the availability of health care in Florida as compared to northern States whose veterans populations are decreasing.

That study, I am told, should be completed late this fall. We have studied and studied and studied this question. This fall, we will have some figures that the committee can look at and, I hope, will be helpful in focusing attention to the health care needs of Florida's veterans.

Like all of Florida, the panhandle is projected to experience sustained growth through the year 2000. Of the 741,440 estimated veterans for medical district 10 in 1980, some 83,270 or 11.2 percent resided in the Florida Panhandle. By the year 2000, this number will have increased to 101,450 or 14.2 percent of the total veteran population in medical district 10. It is interesting to note that while the veterans population will increase in the panhandle, the remainder of district 10 will experience a decrease.

Within the area are three urban or metropolitan statistical areas: Fort Walton Beach, Panama City, and Pensacola. The more than 35,000 veterans living in Escambia County must travel either to Biloxi Medical Center or to the VA Montgomery Medical Center. The travel distance one way is in excess of 100 miles. The more than 17,000 veterans residing in Okaloosa County presently must travel more than 120 miles one way for treatment at the VA Medical Center at Montgomery, the nearest facility. The more than 14,000 veterans residing in Bay County must travel more than 150 miles to Montgomery or to the VA Medical Centers at Gainesville and Lake City.

To understand Florida's need for additional VA hospital beds is to understand why I oppose a measure that would force the VA to waste time and money on a feasibility study for an existing facility before it can be shown that there is a legitimate need for that facility in the area.

Mr. President, I ask that all our colleagues consider carefully the Denton amendment because we feel it would be a delay of any decisions being made at the Veterans' Administration and as it relates to the purchase of the Mobile Hospital would waste VA resources. We need the facilities. We needed them last year.

Mr. CHILES. Mr. President, I oppose the amendment offered by the Senator from Alabama. I do not believe it makes sense to move forward in a plan which contradicts what VA planners have indicated is in the best interest of veterans in the Southeast region of the United States. This amendment would do just that.

This legislation contemplates the purchase of an existing hospital in Mobile, AL. This idea, however, has been reviewed by the VA and rejected. It was rejected because the demographics do not support planning for a hospital in Mobile. In spite of being rejected by the planners, this proposal was incorporated in legislation to direct the VA to do what they had already said was not in the best interest of the veteran population. We need to continue efforts to meet the health care needs of our Nation's veterans and we need to do this by effectively planning future resource allocations and construction according to existing and projected veteran population figures. You can imagine the pressures I encounter from veterans throughout the State of Florida urging construction of new hospitals and outpatient clinics. I have attempted to address these concerns by looking to the VA planning process. I still contend we can do better in making sure the limited VA dollars flow to areas where the veterans are now residing, but we have made progress. This proposal thwarts that progress and violates the VA health care planning process and should be rejected.

Mr. SIMPSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, my understanding is that any time after 3:30 we could go to the Kozinski nomination. It is now 10 minutes of 4. We have in addition to this nomination other legislative matters we would like to proceed with, including military construction appropriations bill, civil service retirement, and D.C. appropriations.

Then I have been advised by the distinguished Senator from Nebraska [Senator ZORINSKY], that he has no objection at all to moving ahead on the farm bill. In fact, he feels we should move ahead because of farmers' needs and that we get some legislation passed. Hopefully we can, while we are doing the Kozinski nomination, round up something else to do this evening.

Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is the amendment offered by the Senator from California, for the Senator from Florida.

Mr. DOLE. When we complete action on the Kozinski nomination, that will again be the pending business.

The PRESIDING OFFICER. The majority leader is correct.

Mr. DOLE. Mr. President, I wonder if the distinguished Senator from California understands that it would come back up.

Mr. CRANSTON. Yes; that is perfectly fine with me.

Mr. DOLE. I hope by then we can work out some resolution of that problem.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of Alex Kozinski.

There being no objection, the Senate proceeded to the consideration of executive business.

THE JUDICIARY

NOMINATION OF ALEX KOZINSKI, OF CALIFORNIA, TO BE U.S. CIRCUIT JUDGE FOR THE NINTH CIRCUIT

The PRESIDING OFFICER. The nomination will be stated.

The bill clerk read the nomination of Alex Kozinski, of California, to be U.S. circuit judge for the ninth circuit.

Mr. DOLE. Mr. President, I understand that when the distinguished Senator from Michigan arrives we can reach a time agreement. I understand he is not here. We will wait until he arrives.

Mr. President, I ask unanimous consent that on this nomination there be 2 hours under the control of the Senator from Michigan, Mr. LEVIN, or his designee, and 30 minutes under the control of the President pro tempore, Mr. THURMOND, or his designee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I also ask unanimous consent that if the yeas and nays are ordered that the vote occur on tomorrow at 2 p.m.

Mr. METZENBAUM. Mr. President, reserving the right to object, it is my understanding that one Member on this side would like to have a vote tomorrow, and another person would like to have it today.

I believe Senator LEVIN would like to have it today.

I ask the majority leader if he would be good enough to withdraw that unanimous consent request until Senator LEVIN arrives.

Mr. DOLE. We are just trying to accommodate.

Mr. METZENBAUM. I understand. I am not suggesting anything to the contrary. I think it would be better if the majority leader would be good enough to withdraw it temporarily.

Senator LEVIN is on his way. But I think if Senator THURMOND wants to proceed with the debate, I see no reason that we should not. I would be happy to debate it.

Mr. THURMOND. Mr. President, I will make a brief statement. We will be glad to hear from those who oppose the nomination.

I rise today to voice my strong support and urge my colleagues' support for Judge Alex Kozinski, President Reagan's nominee to be a U.S. circuit

judge for the Ninth Circuit Court of Appeals.

Judge Kozinski was born in Bucharest, Rumania, on July 23, 1950, and became a naturalized United States citizen in 1968. He graduated cum laude from UCLA in 1972. In 1975 Judge Kozinski received his law degree from UCLA Law School graduating first in his class. He served as managing editor of the UCLA Law Review and received the outstanding achievement award at graduation. From 1975 to 1976 he was a law clerk to the Honorable Anthony M. Kennedy of the U.S. Court of Appeals for the Ninth Circuit. In 1976 and 1977 he was a law clerk to the Honorable Warren E. Burger, Chief Justice of the U.S. Supreme Court. Judge Kozinski has been a practicing private attorney, an assistant counsel to the President of the United States, and special counsel to the Merit Systems Protection Board. He is presently chief judge of the U.S. Claims Court.

The nomination hearing for Judge Kozinski was held on July 17, 1985, at which time he was questioned concerning his background and qualifications for the position to which he was nominated. I was satisfied with the responses given by Judge Kozinski. All persons requesting to testify at that hearing were given the opportunity to do so. Even after the hearing was concluded, Judge Kozinski willingly responded to many questions from several Senators which were propounded to him in writing. Judge Kozinski answered all questions raised in an honest and forthright manner.

On November 1, 1985, at the request of Senator METZENBAUM and Senator LEVIN, the Judiciary Committee held another day of hearings on Judge Kozinski. Judge Kozinski responded to an intensive line of questioning from various Senators. I heard nothing that day which would change my opinion of Judge Kozinski's qualifications, integrity, efficiency, and dedication. Quite frankly, I thought the charges that had been brought by other people to Senators were some of the puniest, most nitpicking charges that have ever been brought before any hearing I have held.

I am confident that Judge Kozinski will have a most successful tenure as a U.S. circuit judge. He has a fine record as a public servant, and is a man of high character. I support this nomination without reservation and I urge my fellow colleagues to vote in favor of Judge Alex Kozinski for the Ninth Circuit Court of Appeals.

There have been allegations made concerning Judge Kozinski's working relationship while he was special counsel. Let me read some comments that were made by former employees of Judge Kozinski.

First Mr. Lynn R. Collins, deputy special counsel, Merit Systems Protection Board, stated the following:

I have been an employee of the Office of the Special Counsel since that office was established in January of 1979. In December of that year, I was appointed by the First Special Counsel, H. Patrick Swiggert, to the Senior Executive Service position of Associate Special Counsel for Prosecution and I occupied that position in the office until February of this year when I assumed the responsibilities that I currently have.

Also, during that period and during the latter part of the administration of Acting Special Counsel Mary Eastwood, I was her acting deputy. I was the Associate Special Counsel for Prosecution during the time that Chief Judge Kozinski was the Special Counsel of the Merit Systems Protection Board and I had opportunity to observe him, his relationships with the staff, his work habits . . .

When Judge Kozinski came as Special Counsel to the Merit Systems Protection Board, he came from a background of being a law clerk to a judge on the Ninth Circuit Court of Appeals, from being a law clerk to the Chief Justice of the United States, from being an associate in a very prestigious and well-known Washington law firm, and he came with very high standards of what he expected of himself, of his supervisors, and of his staff in the way of legal research, legal writing.

Some of his criticisms of staff appeared, at that time to many, to be harsh.

He had some concerns and there had been public criticism by members of the Merit Systems Protection Board and others of the quality of the legal work being done by the staff of the Office of the Special Counsel. One of Judge Kozinski's goals was to improve the legal work product of the staff, to improve the supervisory review of that work product to the highest professional level possible.

The measure he took to point out problems, to point out shortcomings in that work may have seemed harsh to some. His management style may not have been my own personal management style.

But, in my view, it was necessary at that particular time in order to bring about the change that he felt was needed and that many others felt was needed in the work being done by the office.

As to his working relationships with staff, I was one of his senior staff members. He was always accessible to me. I never heard from any junior member of my staff that he was not accessible to them and, to my knowledge, he was always accessible to them.

His demanding style, his insistence on the highest standards of research and writing did cause some apprehensions amongst staff members, but those who demonstrated a willingness to work for his standards, to work towards his standards were applauded; those who did not demonstrate that willingness were subject to criticism.

Mr. President, I reserve the remainder of my time.

Mr. LAXALT. Mr. President, I take this opportunity to express my strong support for the nomination of Alex Kozinski to the ninth circuit bench. Given the circuit's mammoth workload and Judge Kozinski's highly productive record at the U.S. Claims Court, I know that his talents are much needed and eagerly awaited out West. I trust that he will shortly be able to put his skills to work at the post to which the President has nominated him and for which the Judiciary Committee has unanimously recommended him.

I will not belabor Judge Kozinski's manifest qualifications. Even if he did not already have considerable judicial experience an important asset indeed, his brilliant academic record, his outstanding service as a law clerk to the Chief Justice of the U.S. Supreme Court, and his public and private legal career would argue mightily for his prompt confirmation. It is my belief, too, that beyond the extraordinary qualities reflected in his resumé, Judge Kozinski will be aided in his service on the ninth circuit by his perspective as one who has known the terrors of totalitarian government. Although only a child when his family fled Eastern Europe, Alex Kozinski remains especially sensitive to the importance of striving to preserve our system of limited Government under the rule of law.

Judge Kozinski's nomination has been before the Senate for close to half a year. Last week's supplementary hearing, called in special deference to those who oppose confirmation, saw an enormous amount of hearsay testimony from absent parties read into the record—despite which unusual practice, the hearing in my view adduced little information of any real substance. While Judge Kozinski was criticized for demanding, as one complaining witness put it, "very high standards" of his subordinates at the Merit Systems Protection Board, other witnesses attested to the nominee's fine rapport with his MSPB staff. Other allegations against Judge Kozinski, as with those arising from the Saldano case, appear to have been flatly disproven by documented fact.

Still further charges seem hardly to disqualify Judge Kozinski for his post: He apparently sent to two friends, for example, transcripts of a radio editorial linking Kozinski's nemesis, the Government accountability project, to its founder, the Institute for Policy Studies. We are now told that GAP has recently disavowed its IPS roots, but Judge Kozinski did not know that when, upon request, he sent his friends the editorial. Indeed, the Judiciary Committee has heard no evidence as to the nature and extent of GAP's "disassociation" from IPS.

In short, I see no reason for denying a man of Judge Kozinski's qualifications a spot on the ninth circuit bench, and I urge his confirmation.

Mr. LEVIN. Mr. President, I understood there was a pending unanimous-consent request. If it has been adopted, I am happy to yield to my friend from Illinois. If it has not been, I have

no objection to the request of the majority leader. He is not on the floor at the moment to present the request again. Perhaps he should be here before it is entered as a matter of courtesy.

I have no objection to it. Senator METZENBAUM was not aware of that when he was protecting my interest. I have no objection to the unanimous-consent request of the majority leader.

Again I say, if it has been entered, I will yield as much time as necessary to the Senator from Illinois.

Mr. President, are we operating under a time agreement?

The PRESIDING OFFICER (Mr. PRESSLER). We are.

Mr. THURMOND. Mr. President, I ask unanimous consent that I may ask for the yeas and nays on the nomination.

The PRESIDING OFFICER. Is the Senator requesting the yeas and nays?

Mr. THURMOND. I request the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that the roll-call on the nomination of Judge Kozinski occur as soon as we have completed our debate. Would that be satisfactory?

Mr. LEVIN. The request of the majority leader was for 2 o'clock tomorrow afternoon, which is what I offered to accommodate. The majority leader is necessarily absent. The original request of Senator DOLE was that it be at 2 o'clock tomorrow afternoon. I have no objection to that.

Mr. THURMOND. The Senator would prefer to hold it over until tomorrow?

Mr. President, then I ask unanimous consent that the vote occur on the nomination of Judge Kozinski at 2 p.m., November 7, 1985, and that there be 10 minutes equally divided between this Senator and Senator LEVIN just prior to the vote.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Is there objection?

The Chair hears none. Without objection, it is so ordered.

Mr. THURMOND. So the vote will be at 2 o'clock tomorrow and there will be 10 minutes equally divided between the distingushed Senator from Michigan and myself prior to the vote.

Mr. LEVIN. Mr. President, I yield 5 minutes to the Senator from Illinois.

Mr. SIMON. I thank the Senator for yielding.

Mr. President, I have to confess this has been a nomination that has bothered me. I was there for the first questioning of Mr. Kozinski. I told him at that time that his nomination before us presented a real dilemma, that he would either become one of the best judges or one of the worst judges to be on the Federal bench, but I was not sure which.

I am still somewhat in that uneasy position. He is bright, no question about that. There is something good about his nomination—that he was born in Romania. It is an all-American story to see a young man like that come into this country and be nominated for the circuit court of appeals. I have no fundamental question about his integrity. I may differ from some of my colleagues on that. The bar association gave him a mixed review of qualified and not qualified—just barely passing.

The real question is whether he is mature enough, whether he has shown the judgment in the past to be a good Federal judge. There our colleague from Michigan [Mr. LEVIN] and his staff have done a great deal of work. I think the evidence is pretty substantial that we would be taking a real risk to name Mr. Kozinski or to approve Mr. Kozinski. My guess is that the votes in this body will be great enough to approve him. I am not going to vote in his behalf.

I think that, if he is approved by this body, he has the obligation, a special obligation, to those who have nominated him in this administration, to those who will vote for him, and to the people of this Nation to bend over backward to show a maturity and balance in judgment that is not always part of the record at this point.

On balance, Mr. President, I think the evidence that has been presented in committee and will be presented before this body shortly by Senator LEVIN is such that I am compelled to vote in the negative on advising and consenting to his nomination.

Mr. President, I thank my colleague from Michigan for yielding.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I ask the distinguished Senator from Michigan to yield me such time as I may need.

Mr. LEVIN. I am happy to yield, Mr. President.

Mr. METZENBAUM. Mr. President, I originally was one of those who did not raise an issue when Judge Kozinski was voted out of committee, but it is only fair to say that some of the matters that have now come out were not known at that time. I stand here this afternoon in opposition to the confirmation of Alex Kozinski to be a judge of the U.S. Court of Appeals for the Ninth Circuit, and I regret the fact that I feel constrained to do so. But the record developed before the Committee on the Judiciary demonstrates beyond a question of doubt that the nominee lacks the temperament and candor necessary to hold this critical office. One might be willing to make allowances for temperament, but no allowances can be made for candor, for being above board, and for telling all the facts, not just some of the facts, in connection with his nomination. The distinguished Senator from Michigan has been the person who has done most in raising the issues concerning Judge Kozinski and who brought to my attention his concerns with respect to Judge Kozinski. Then I, in turn, indicated to the majority leader as well as to the chairman of the Judiciary Committee that I felt an additional hearing was appropriate.

The person who brought the issue to the floor was Senator LEVIN. I know he is prepared to speak at length on the question of our confirming Alex Kozinski.

I shall only focus this afternoon on three incidents which I believe demonstrate the nominee's unfitness to serve.

First and of greatest concern to me as a member of the Committee on the Judiciary is that the nominee misled the committee in responding to objections raised to his confirmation. I want to repeat that, Mr. President, because it is a strong charge and I would not make it if it were not factual: The nominee misled the committee in responding to objections raised to his confirmation.

How did he do that, Mr. President? In a letter to Chairman THURMOND and Senator BIDEN, Judge Kozinski discussed the resignation of the senior career attorney in the Office of Special Counsel during Kozinski's tenure in that office. Mary Eastwood, an able attorney who appeared before our committee, had appealed her forced resignation. But she settled the case on the eve of the hearing. Judge Kozinski told Senators THURMOND and BIDEN that Miss Eastwood had repudiated her charges. His exact language is as follows:

> By repudiating her charges, Miss Eastwood bypassed the opportunity to make her case fully and fairly in open court and, if successful, to permanently get her job back.

I am absolutely shocked. I absolutely could not believe the facts when I learned them. This woman had not repudiated her charges. What she had done is what so often happens in litigation: She had settled her case. Settling your case means that there is some element of merit to it, that there is something to the case. There was enough merit in this woman's case that she was given $20,000 in backpay and $10,000 in attorneys' fees. Yes; they even paid her lawyer in return for her dropping her claim.

Can you believe it, Mr. President? That Judge Kozinski had the audacity and lack of candor to tell Senators THURMOND and BIDEN the whole story? But worse than that, deliberately saying she had repudiated her charges.

That is an untruth. It was not so. She did not repudiate her charges. She settled her case.

The youngest person out of law school knows that there is quite a difference between repudiating your charges and settling your case for $20,000 and the payment of legal fees.

If this were a mistake, Mr. President, or perhaps an overzealous attempt on the part of the nominee to secure his confirmation, this withholding of key facts might be excusable. But this was no mistake here. At last week's hearing, Judge Kozinski totally defended his lack of candor.

He said to the committee that the facts of the Eastwood settlement were already in the public record, so his summary to the committee could leave out half the truth. I do not know where Judge Kozinski learned his standards. I do not know what his ethics are, but I know that any lawyer, any individual, any person worth their salt would have more integrity than to say the facts are already in the public record so he could leave out half the truth. That is the man that we have before us this afternoon for confirmation to the Circuit Court of Appeals of the United States.

I can count. I am not dumb. I know that probably an overwhelming number of Members on the other side are going to vote for Judge Kozinski's confirmation because that is the political thing to do. But the right thing to do is to look at the facts and look at the record and listen to Senator LEVIN when he spells out all of the issues in this matter.

Mr. President, I do not believe that a nominee for a life tenured position on a court second only to the Supreme Court in jurisdiction should be approved with such a minimal level of candor and honesty.

Nor is Judge Kozinski's lack of candor limited to the legislative domain. As chief judge of the claims court, he issued an unprecedented opinion imposing sanctions against attorneys whom he found to have filed a frivolous complaint for judicial misconduct against a fellow judge. There is nothing wrong about imposing sanctions against attorneys who have filed frivolous complaints about judicial misconduct against a judge. That is entirely appropriate. But of key significance is that Judge Kozinski imposed these penalties without any prior notice or hearing. Now that is bad enough; albeit not necessarily a basis on which we should refuse to confirm this nomination. But in order to provide support for this unprecedented decision, what does Judge Kozinski do? This man, who now aspires to be, and in all probability will become, a Circuit Court of Appeals judge, cites a Federal circuit court case, Asberry against U.S. Postal Service. Once again, the nominee deals in half-truths. Asberry did not support Judge Kozinski's order. Asberry upheld the power of the court to impose sanctions against attorney misconduct, but see here. Listen to this. The court specifically reversed the penalties in that case because notice was not given.

That is what Judge Kozinski did. He did not give notice. And he has the audacity to cite that case as authority, when actually the case held exactly the opposite.

As with the Eastwood matter, if Judge Kozinski had admitted his error, it might be excusable. Judges are human. They have a right to misstate, or to misquote, or to misrely upon a particular decision. No judge is infallible. But Judge Kozinski did something different than that. He explained to the Judiciary Committee that he laid out his judgment, the parties were free to appeal, and that is the end of it.

That is the man this Senate may tommorrow afternoon confirm for a position on the Circuit Court of Appeals, the second highest bench in the United States.

He suggests that they can appeal. The Supreme Court only reviews 5 percent of the cases brought to them for decision. He knows that. He is smart. He is not dumb. We cannot rely on further appellate review to shield parties from the errors of a judge who has no explanation for misreading precedent.

Now, the final matter brought out in the hearing which I believe warrants a no vote concerns unfair, unjudicial and, yes, un-American guilt by association remiscent of the sad past of the McCarthy era, otherwise known as Red baiting. Kozinski was the subject of a radio editorial in Boston. That editorial was delivered by the husband of a person in Kozinski's employ. The editorial praises the nominee—no fault to find with that—but then goes on to blast the Government Accountability Project. Now, the Government Accountability Project opposes Judge Kozinski's confirmation, but in the editorial blast they indicate that the Government Accountability Project is sponsored by a revolutionary group with ties to Palestinian terrorists. The editorial worries that Kozinski's nomination may be sabotaged by "those who support terrorism and anti-Semitism," the latter a reference to the fact that Judge Kozinski happens to be Jewish.

Now, Judge Kozinski has no basis whatsoever for believing that GAP, the Government Accountability Project, in any way supports terrorism and anti-Semitism. That did not bother him in sending out the editorial. The Government Accountability Project is an independent group praised by Good Housekeeping magazine, among others, as defenders of whistleblowers.

Now, what does the nominee do about that editorial? Does he shrink from that support, written by a man who is the husband of one of his employees? No. He likes it so much he sends it out to a personal friend who is very active in Democratic Party politics, to give the friend an idea of who his opposition is.

In my opinion, Judge Kozinski's engaging in this kind of activity shows an unacceptable lack of sensitivity for the problems caused by guilt by association.

The issue is not Judge Kozinski's general philosophy, his policial views, or even his conduct as special counsel who perhaps let whistleblowers down when he was supposed to be their voice. Rather, the issue is whether a nominee should be confirmed to the Circuit Court of Appeals when doubt exists about his candor, about his temperment in endorsing contemptible guilt-by-association tactics. I believe his nomination should be rejected.

Mr. President, this body has the privilege under the U.S. Constitution to advise and consent. Sometimes I think we take our responsibilities very lightly. Sometimes we think that unless we can find that the nominee of the President is guilty of some heinous crime we ought to confirm him, that the President ought to have his appointees.

Generally speaking, I think there is some merit to the President having the right to name those whom he would choose as Cabinet appointees or as judicial appointees. But I believe that those who wrote the Constitution had in mind that we in the Senate would take our responsibilities seriously and that we would look at the facts and then we would decide whether we should consent, whether or not we should go along and approve the President's appointment.

The facts in this case, in my opinion, do not warrant our confirming the nomination of Judge Kozinski. I believe that if we do, we will err in our ways.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HECHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. HATCH. Mr. President, I yield 2 minutes to the distinguished Senator from Nevada.

Mr. HECHT. Mr. President, I know Judge Alex Kozinski well and have worked closely with him on community activities over the past year.

Not only is he held in high regard in the Jewish community, but also he is considered one of the finest legal minds on the bench today. Of equal importance, Judge Kozinski is a genuinely fine and decent man. He is warm and forthright and has a delightful sense of humor. His commitment to excellence carries over to everything he does. No one questions the sharpness of his mind or the dedication, energy, and devotion he brings to his judicial tasks.

We have heard some accusations which, to my mind, are largely without substance or significance, that a number of years ago the judge handled some administrative tasks without using sufficient tact. He refused to sugar-coat reprimands to subordinates who failed to do their work with the degree of professionalism Judge Kozinski required.

From what I have heard of the testimony before the Senate Judiciary Committee last week, these allegations that he was difficult to work for were resoundingly contradicted by a number of his former employees. But more importantly, they are largely besides the point.

Of my own personal knowlege, I can say that Judge Kozinski is a good man. In my judgment, he is going to be a superlative circuit court judge because he is an uncompromisingly fair man as well as a brilliant one. Letters and testimonials from numerous judges and attorneys and law school professors and bar associations, as well as his own record on the bench and as an attorney, all attest to this fact. I urge the Members of the Senate to join me in supporting a great judge and a great American. We should now get on with the job of confirming President Reagan's wise choice of Judge Alex Kozinski to the ninth circuit court of appeals.

Mr. HATCH. Mr. President, I understand that the distinguished Senator from Michigan is willing to allow me 10 minutes of his time, but he is not in the Chamber at this time.

The PRESIDING OFFICER. Is there objection?

Mr. HATCH. If it turns out otherwise, we will work out the time.

I ask unanimous consent that I have 10 minutes of the time allotted to the Senator from Michigan.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, today the Senate is considering the confirmation of the nomination of Alex Kozinski, currently chief judge of the U.S. Claims Court, to the U.S. Court of Appeals for the Ninth Circuit. As a member of the Judiciary Committee who has had occasion to thoroughly review Judge Kozinski's achievements, I can endorse without reservation his appointment to the Court of Appeals for the Ninth Circuit.

At only 35 years of age, he has been widely acclaimed for his well-reasoned decisions and the exceptional caliber of his legal scholarship. The New York Times has already spoken of him as a possible Supreme Court nominee. Moreover, Alex Kozinski's achievements are something this entire Nation can point to with pride.

Since its founding, our country has taken great and justifiable satisfaction in the principle that an individual's achievement does not depend on being born to wealth or power. Ability, perseverance, and hard work are supposed to be the key to success in America. There are those who challenge that supposition, but in my opinion, the phenomenal success of Alex Kozinski demonstrates that the idea still is alive in our society.

Born in Communist Rumania, Alex Kozinski came to this country as a child of 12. His parents, survivors of the Holocaust, arrived here penniless. At first, the family was supported by the generosity of concerned Jewish-Americans who wanted to help the new immigrants get a decent start. In the time-honored tradition of hundreds of thousands of Americans who came here with little but their hope of making a better life for themselves and their families, the Kozinskis entered American life on the lower rungs of the economic ladder. Told that his job was to learn, Alex applied himself to his studies and achieved an impressive scholastic record, graduating first in his class from UCLA Law School. He went on to clerk for Judge Kennedy of the ninth circuit and Warren Burger, Chief Justice of the United States. After a number of years in private practice and government service, President Reagan chose him to be the first chief judge of the new U.S. Claims Court. He served in that capacity for 3 years and received glowing reports from all quarters.

For example, Judge Harry Wood, who served as trial judge with the old Court of Claims since 1952, wrote that at first he was uncertain whether so young a man was really qualified to serve as chief judge of the U.S. Claims Court. However, after working with Judge Kozinski, he had this to say:

My doubts were totally unfounded. As a judge, administrator, and man, he rates very high in my book.

Judge Kozinski is possessed of high intellect, and is an outstanding legal scholar. He analyzes legal problems carefully and thoroughly, thinks them through, and resolves them with opinions which are models of clarity, precision and style. He is most diligent in the performance of his judicial duties.

His personal characteristics are also impressive. He is tactful in his dealings with bench and bar and with the employees of the court, and considerate of the opinions, values and feelings of others. He is scrupulously fair and he has shown me that he is patient and judicious. He has worked hard, and with imagination, to promote and enhance morale and unity at the court, and he has done an outstanding job in this area as well. He is a fine leader and human being.

Finally, his technological and organizational knowledge and skills . . . have been of incalculable value to the court and its judges in the discharge of their duties. Without . . . the procedures he has instituted, the Claims Court would not have accomplished nearly as much as it has. . . .

Throughout his entire service at this court, Judge Kozinski has, to my certain knowledge, displayed to those appearing before him as litigants or counsel, to the public and the bar generally, and especially to his colleagues, unfailing courtesy, patience and tact; tolerance of the differing views of others; a willingness to listen and to be persuaded by sound reasoning; high intellect; legal acumen; great energy; and above all, integrity. He has been fair, understanding, and judicious, even under circumstances where being so must have been hard; and he has shown me that he has a deep and abiding love and respect for the law.

It is a pleasure and a privilege to commend to you, your committee, and the Senate, without any hesitation, qualification, or equivocation whatsoever, Chief Judge Alex Kozinski.

In the same vein, Claims Court Judge Christine Cook Nettesheim also wrote supporting Chief Judge Kozinski's nomination, She said:

I thought it would be useful to share the perspective of the Chief Judge's colleagues on the United States Claims Court on his suitability for higher judicial office.

The Chief Judge's contribution to the court has been a rare combination of administrative and judicial skills, not the least of which is his abiding diplomacy. He has boundless enthusiasm for judicial endeavors. The United States Court of Claims was a sluggish institution burdened by a two-tier system of adjudication. Within two years under the Chief Judge's stewardship, the Claims Court has broken away from its former mold.

It is no overstatement to say that Chief Judge Kozinski's ability, temperament, and maturity won over the sitting judges when he came to the court in August 1982. I do not think that I am out of place in suggesting that you would receive the same assessment of Chief Judge Kozinski's suitability as a federal appellate judge should you speak with other judges of this court.

Judge Lawrence Margolis wrote that:

Chief Judge Kozinski has a keen intellect and voracious appetite for work. No one on the Court has worked as long and as hard as he has. He has carried a full caseload in addition to his numerous Chief Judge responsibilities.

Judge John Wiese had this to say:

Alex Kozinski was appointed as the first Chief Judge of the United States Claims Court in October 1982. The task he was charged with was not an easy one to fulfill: to honor the Congressional mandate of the

Federal Courts Improvement Act of 1982 by fashioning the newly-created Claims Court into a first-class judicial institution. There were formidable difficulties standing in the way of the realization of that goal. Confronting the new court were many problems: an inherited backlog of over 1,700 cases, the uncertain burden of coping with an expanded Tucker Act jurisdiction, a significant reduction in overall staffing, and, indeed, even the inefficiencies of a physical plant in drastic need of improvement.

Judge Kozinski met these problems head-on. New rules of practice were written, new procedures were adopted, improvements in plant and equipment were introduced that would allow the judges and their staff to meet the burdens of a large increase in workload and, finally, and most importantly, a note of inspiration was sounded. By personal example Chief Judge Kozinski showed that the court could manage its docket with efficiency and fairness: he performed the administrative duties of his office while concurrently maintaining a full trial docket and achieving one of the highest case disposition rates.

. . . Having observed other judicial administrations in office, I am fully convinced that, but for Chief Judge Kozinski's 'can do' philosophy, the Claims Court today would be confronting a growing backlog of cases rather than a diminishing one.

I do not mean to extol only Chief Judge Kozinski's administrative talents. Indeed, were that his forte alone, I would not consider it appropriate to urge his confirmation, for clearly the Federal Judiciary needs more than just administrative excellence among those who make up its ranks. Rather, what does persuade me to speak now is that Alex Kozinski offers that unique combination of a truly superb intellect tied to an unbending commitment to excellence. He is—if I may put it this way—a legal scholar of the first order with the dedication to task of a champion. Beyond any doubt, room should be made for him in the Federal appellate judiciary for his contribution to our legal system shall be both qualitatively and quantitatively great. Few will equal him.

These are pretty high phrases from judges who sat on the bench with him over the past 3 years, and I could get others.

Chief Judge Kozinski's performance at the Claims Court bears out these testimonials. Although a newcomer to the court and considerably younger than all of his associate judges, he was able to exert forceful leadership without sacrificing the esteem of his colleagues, as the numerous letters written by Claims Court judges show. His intelligent guidance set a wise course for the new court during its formative first years, and he is responsible for establishing it as one of the finest trial courts in the Nation. In fact, given the scope of the Claims Court's national jurisdiction and the difficulties involved in revamping it to bring the court into the 20th century, Judge Kozinski has to be credited with a superlative feat of judicial administration.

His performance on the bench was no less outstanding. A number of his opinions were ground breaking and already are being widely cited. Chief Justice Burger, in his yearend report of 1984, singled out Chief Judge Kozinski to commend a particularly notable recent decision.

Attorneys who are familar with Judge Kozinski's work have been uniformly impressed with his ability. Brice Clagett, a partner at Covington & Burling, wrote that:

He had occasion to give careful study to a number of Judge Kozinski's opinions * * * I can say without qualification that these opinions are of exceptionally high quality. Judge Kozinski is extremely thorough; he has an excellent grasp of the issues, and his analysis is superior. It is clear to me that he is one of the more powerful minds on the federal bench today.

Sheldon Cohen, an attorney with the law firm of Lewis & Bockius and a member of the board of directors of Common Cause, has this to say:

I have had the privilege of litigating a case before Judge Kozinski and found him to be extremely able. It was a pleasure to be in his court. He was well up to speed on all of the issues and had read and studied all of the pleadings in the case. He tried to move the case rapidly—but without undue pressure. My partner, Roger Pies, and I truly enjoyed working with a judge who was interested in the resolution of a controversy.

The last attorney I will cite is Daniel Gribbon, a senior partner at Covington & Burling, who has known Alex Kozinski for many years. Mr. Gribbon offered the following comments to the committee:

Following his clerkship with Chief Justice Burger and a brief period of practice on the West Coast, Judge Kozinski (then Mr. Kozinski) came to work for [Covington & Burling]. During much of the time he was with us he worked directly for me. In addition, I am quite familiar with the work he did for various of my partners.

* * * Almost from the beginning he was given responsibility for important work. In every instance he performed superbly. There can be no genuine question as to his legal qualifications.

From what I have observed of Judge Kozinski's performance on the U.S. Claims Court he has performed the duties of that important office with great distinction.

In short, the qualities of excellence that Judge Kozinski has shown as a student, as a law clerk on the Supreme Court, as a practicing lawyer and as Chief Judge of a busy and important federal court are ample evidence that he would fill with distinction the high position to which he has been appointed by the President.

Despite these and numerous other impressive testaments to his obvious qualifications, Judge Kozinski's career was subjected to exhaustive investigation by the Judiciary Committee, and a public hearing was held. His record was examined by the FBI, the ABA, and the Members of the Senate. It was given the careful scrutiny that is appropriate for those who would hold positions of responsibility in our society. No aspect of his public life remains unexamined. Objections to Judge Kozinski's appointment were fully aired before the members of the committee and the Senate. Those objections were found to be entirely without merit. They were pushed by a small group whose broader designs, I have noticed, have not gone unremarked in the press. I refer to a coalition whose avowed intent is to delay President Reagan's judicial appointments by whatever means they can contrive. There were some objections raised about his performance a number of years ago as special counsel. Testimony before the Senate Judiciary Committee revealed that of the approximately 3,000 cases handled by Alex Kozinski in his capacity as special counsel, there was not a single substantiated instance of mishandling or improper judgment. Every allegation was probed and refuted point by point. Our examination produced a complete and final validation of Judge Kozinski's superior qualifications for holding high judicial office, and for the confidence President Reagan and the Senate have reposed in him.

I would like to close with a reference to a perceptive comment that Senator SIMON made at Judge Kozinski's Judiciary Committee hearings. Senator SIMON said that he liked the idea of appointing a genuine legal scholar to the ninth circuit. I want to elaborate on this remark. I am convinced that Judge Kozinski's written opinions show the quality of legal scholarship that those of us on the Judiciary Committee, who are charged with maintaining the quality of the Federal judiciary, are most excited to see in people appointed to the bench.

I would add that he has won the enthusiastic backing of those of us on the Senate Judiciary Committee who have had the opportunity to get to know him. It is particularly appropriate that a man whose experience, quality, temperament, and integrity make him such an outstanding judge, who has accomplished so much in so short a time, should have passed the exhaustive review undertaken by the FBI, ABA, and this body over nearly 10 months of inquiry and scrutiny, and emerged as he has with flying colors.

Mr. President, let me just conclude my remarks at this particular point in the record by saying that I know this man. He is a brilliant legal scholar, a person with prodigious energy and ability who I think has respect and kindness for all people, even though there have been some criticisms of his criticisms of colleagues while he was at the Merit System Protection Board. I would question anyone and ask anyone to look at the criticisms that he did give and show me where they were wrong, even though you might disagree with some of the value judgment parts of it.

I think, having practiced law, having brought along a number of law clerks, a number of young lawyers, and having, myself, been very critical of their workmanship and their product,

I understand what he was doing. I cared enough for those young people to make sure that they had the best I could give, even though at times it was very hurtful to them to be criticized.

I have to admit that Alex Kozinski is a perfectionist. He does a terrific job. He has a great, keen intellect. He is a wonderful writer. He knows the English language as well, if not better than anyone I have met in the field of law.

I just have to say that he may have been a little too critical of some of his colleagues from time to time but I think that is to be commended.

We need perfectionists on the bench. We need people who know what they are doing.

Mr. SYMMS. Mr. President, will the Senator yield for a comment?

Mr. HATCH. My time is almost up. I yield for a comment.

Mr. SYMMS. I thank the Senator for yielding.

Mr. President, I compliment the Senator from Utah for his remarks. I listened to them.

I would only like to say that I have met Alex Kozinski through some mutual friends of mine. Mrs. Laura Nelson brought him to my office. I had an opportunity to meet him, to visit with him, to talk with him about the way he feels about this country, his appreciation for the law, his scholarly ability.

I agree with the Senator from Utah. Coming from the part of the country where he will be on the circuit I, as one Senator, am very happy to have him appointed and I am pleased that he will be on the circuit and I hope he will be confirmed by our colleagues here this afternoon.

The PRESIDING OFFICER. The Senator's time has expired.

Does the Senator from Michigan yield time?

Mr. SYMMS. Mr. President, I apologize. I did not know we were on controlled time.

Mr. LEVIN. I yield time.

Mr. HATCH. Mr. President, I thank my colleague from Michigan. I know he feels otherwise on this nomination. I respect his sincerity.

I do believe that all the questions he will raise here in the next hour or so were answered in the Judiciary Committee hearings. I do have respect for him and I will try to listen to what he has to say, even though I have to leave the Chamber temporarily. Hopefully, I can chat about some of those comments when I come back.

I thank my colleague for extending me this time.

Mr. LEVIN. Mr. President, I yield myself 60 minutes.

First, let me thank my friend from Utah. He has my mutual respect as he knows.

Mr. President, I oppose the nomination of Alex Kozinski to the Ninth Circuit Court of Appeals. I have analyzed his record and come to the conclusion that he is not qualified to serve as a Federal appellate judge. I will be discussing my reasons at some length in a few moments, but I want to preface the substantive discussion of Judge Kozinski's qualifications with a few comments.

First, I take no pleasure or satisfaction in opposing Alex Kozinski. When we participate in the "advise and consent" process established by the Constitution, we deal directly with individual human lives, and we, as a body or as individual members should act with great care.

But it is this very "advise and consent" responsibility that leads me to my second point. We do have an important, constitutionally established responsibility to participate actively in the selection of appointees to the Federal bench. The Constitution does not say "go along"—it says "advise and consent"—those are active words, requiring an active participation in the process by Senate Members. I am concerned that our view of our role in this process has been narrowed over the years, so that our standards for arriving at a decision have been minimized. It has been suggested that it requires, today, actual criminality or serious unethical conduct, explicity proved, in order to deny the Senate's consent. If that is in fact the case, then we urgently need to revisit those standards and reevaluate our role in this process. Our standards should be higher than that. It is our responsibility to ensure that truly qualified individuals serve on the Federal bench. I do not need to remind my colleagues that these are lifetime appointments with removal only by impeachment, and the power of these individuals over the document most sacred to our form of government and way of life—the Constitution—and the statutes and executive actions that flow therefrom—is enormous.

This brings me to my third point. I believe Judge Kozinski is a very intelligent—probably exceptionally so—academically superior, hard-working person. He has always, he said, wanted to be a Federal judge. He was born in 1950 which makes him perhaps the youngest person who would ever serve as a Federal appellate judge. He graduated cum laude from UCLA in 1972, was first in his class at UCLA law school, graduating in 1975. While at UCLA he served as the managing editor of the Law Review. He clerked for Judge Anthony Kennedy of the Ninth Circuit Court of Appeals and for Chief Justice Warren Burger of the U.S. Supreme Court. No one can argue that he is lacking academic excellence and achievement.

But there are a number of important qualifications required of a good judge—intellectual ability and academic training are important, of course. But judicial temperament is an equally important consideration, and this is where Judge Kozinski comes up unacceptably short. That is a matter I will discuss in a moment, but let me interject one more thought first.

The American Bar Association assesses the qualifications of nominees to Federal judgeships and places them in one of four categories—"exceptionally well qualified," "well qualified," "qualified," and "not qualified." Not one member of the ABA's Standing Committee on the Federal Judiciary rated Judge Kozinski as "exceptionally well qualified." Not one member of the committee rated Judge Kozinski as "well qualified." A majority of the committee rated Judge Kozinski as only "qualified" and a minority rated him as "not qualified." According to the ABA, the three factors it considers in assessing the qualifications of a judicial nominee are: Competence, integrity, and judicial temperament.

This minimal level of approval by the ABA makes a thorough review of Judge Kozinski's qualifications all the more compelling, and I turn to those issues now.

I oppose the nomination of Alex Kozinski because he lacks the consistent judicial temperament required for the position. The testimony, affidavits, and correspondence that has been exchanged among Senators THURMOND, BIDEN, and myself and Judge Kozinski, show that:

First, Alex Kozinski has misled the Senate;

Second, Alex Kozinski is at times intemperate, prone to anger, and lacking in compassion and sensitivity;

Third, Alex Kozinski has on occasion engaged in erratic behavior; and

Fourth, Alex Kozinski has unfairly attacked an organization that has opposed his nomination because of his treatment of Federal employees and utilized, by the way, official claims court stationery in the process. The affidavits I refer to were submitted to me and members of the Senate Judiciary Committee by six former employees of Judge Kozinski at the Office of Special Counsel [OSC] of the Merit Systems Protection Board [MSPB]. Judge Kozinski served as Special Counsel for a little over 1 year, from June 1981, to August 1982.

According to a GAO report on the OSC and the MSPB:

> OSC, headed by a presidentially appointed Special Counsel, is an independent office which shares with MSPB the responsibility of insuring that personnel practices in the Federal Government are consistent with merit system principles . . . OSC is headquartered in Washington, D.C. and has field offices in six locations. As of February 1983, OSC had a staff of 95.
>
> The Special Counsel is required to receive and investigate allegations or initiate, in the absence of an allegation, investigations of:

prohibited personnel practices, including reprisals against "whistleblowers" (Federal employees who report improper or illegal Government activities);

activities prohibited by other civil service laws, rules, or regulations;

arbitrary or capricious withholding of information under the Freedom of Information Act; and

prohibited political activity by Federal employees and certain State and local government employees.

The Special Counsel forwards allegations of mismanagement, gross waste of funds, and abuse of authority . . . to the head of the agency involved. The agency head reports to OSC on actions taken.

The Special Counsel may request MSPB to order a stay (a temporary halt) of any personnel action if there are reasonable grounds to believe that the personnel action was taken, or is to be taken, as a result of a prohibited personnel practice. MSPB can order the withholding of pay from employees who knowingly and willfully refuse or fail to comply with an MSPB order. Disciplinary action can also be taken against employees who have engaged in prohibited personnel practices. Also, the Special Counsel may request MSPB to order an agency to take appropriate corrective action whenever the agency does not take action recommended by the Special Counsel.

The former OSC employees who prepared affidavits are:

Mary Eastwood, an attorney who served for 18 years in the Office of Legal Counsel of the Justice Department, served as Acting Special Counsel from January 1980 to June 1981, when Judge Kozinski assumed his post, and remained closely involved with the operations of the Office of Special Counsel and Judge Kozinski for at least the first half of his tenure there.

Jesse James, Jr., an attorney who worked in the Office of Special Counsel in November 1979, and served as assistant special counsel for prosecution from approximately June 1980, until he left in January 1982, during which time he served under and worked closely with Judge Kozinski.

Laura Chin, the public information specialist for the Office of Special Counsel from June 1980, until September 1981, including the first 4 months of Judge Kozinski's term.

Horace Clark, an attorney at the Office of Special Counsel from May 1981, through September 1984, and currently employed as an attorney at the Department of the Interior.

John Hollingsworth, former director of administration and programs for the Office of Special Counsel where he was employed from September 2, 1979, until December 11, 1982.

Beth Don, an attorney who served in the Office of Special Counsel from 1980 to 1982 as a GS-15.

Mr. President, I understand that the squawkboxes are not working and that they are playing music instead of my melodious voice.

I ask unanimous consent that I may suggest the absence of a quorum and that the time for that quorum not be charged to either side, to give the engineers an opportunity to fix our squawkboxes.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered.

The bill clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

JUDGE KOZINSKI HAS MISLED THE SENATE

Mr. LEVIN. Mr. President, let me turn to my first of the four points I mentioned earlier—that Alex Kozinski has misled the Senate.

First, in Judge Kozinski's testimony before the Senate Judiciary Committee, he gave the following description of his working relationship with his OSC staff:

Well, Mr. Chairman, I believe that during my tenure, I had a very fine working relationship with most of the employees in the Agency . . . Now there were problem employees and I believe that we solved those problems and for the most part, I believe that I had an excellent working relationship with my staff.

The affidavits of the former employees tell a very different story. Ms. Eastwood had this to say:

As a result of Mr. Kozinski's harsh and demeaning treatment of OSC staff, many professional employees sought employment elsewhere. Six of the most senior attorneys (Grade 14 and above) in the Central Office resigned or retired during Kozinski's first year in office . . . Eight of the 15 investigators in the Central Office resigned, transferred or retired.

She added:

My observation was that despite his personal charm, Mr. Kozinski has an extremely poor working relationship with most of the OSC staff, especially those in the Central Office with whom he had more frequent, direct contact. His style as a manager was oppressive. His harsh and insulting treatment of OSC employees was unnecessary and destructive.

Mr. James made a similar assertion:

In spite of Mr. Kozinski's statements to the contrary during his confirmation hearing, staff morale was at an all-time low. Resignations from the office were higher than they had ever been and they were linked closely to the employee abuses made by Mr. Kozinski or under his direction.

And Ms. Chin had this to say:

Overall, the effect of Mr. Kozinski's behavior was to devastate the morale of the OSC staff and to cause severe depression among the individual employees.

Yet Judge Kozinski testified that his working relationship with the staff was "excellent," to use his words.

In a second example of misleading the Judiciary Committee, Judge Kozinski stated:

While I was Special Counsel, I initiated a program of monitoring Merit Systems Protection Board appeals for possible intervention by the Special Counsel's office.

Ms. Eastwood, however, states that during her 17-month term as acting special counsel, prior to Judge Kozinski's arrival, OSC intervened in 20 employee appeals pending before the MSPB, while OSC intervened in only three under Judge Kozinski, and that is proof that an intervenor program was already in place at the time Judge Kozinski arrived at OSC.

Mr. Clark also states that Judge Kozinski's statement on this subject is inaccurate. In his affidavit he stated:

Mr. Kozinski also testified that he "initiated" a program to monitor MSPB appeals for possible intervention by the Special Counsel. He added that this step was taken "to make sure that if intervention by the Special Counsel was required, that we would be there to serve." Those statements were inaccurate on two grounds. First, this had been done by his predecessor Ms. Eastwood. Second, we did not follow through to actually conduct the interventions, even when we again had "good" cases. An example from my own experience is enclosed as Exhibit 6. In this decision, *Lacy B. Ward and Renea A. Webb v. U.S. Consumer Product Safety Commission*, the MSPB Presiding Official clearly erred by holding that the requirement that job references must be based on personal knowledge only applied to references from Members of Congress. The holding flatly contradicted the legislative history and would have created a huge loophole, by exempting all members of the Executive branch from one of the prohibited personnel practices. 5 U.S.C. 2302(b)(2). On May 17, 1982 I submitted my analysis on the holding to Collins. I never heard anything more about the case, in which the Special Counsel did not intervene.

Judge Kozinski has failed to respond to these charges, either in his lengthy letter to Senators THURMOND and BIDEN or at the second hearing called by the Judiciary Committee.

A third example of misleading the Judiciary Committee is Judge Kozinski's statement on the extent to which OSC under Judge Kozinski's leadership pursued sexual harassment cases. Judge Kozinski stated the following at his nomination hearing:

We engaged in a new policy of combating sexual harassment in the workplace. On January 22, 1982, I circulated a memo to all investigators stating that sexual harassment was a very serious problem in the workplace, and it is one that we took incredibly seriously in the central office of the Special Counsel and requesting that no cases making allegations for sexual harassment be closed, unless and until special approval was received by the Assistant Special Counsel for investigation or by somebody designated within. We wanted to make sure there were no sexual harassment cases that somehow fell through the cracks and not being handled by our staff. That was in a November or January 22, 1982, memorandum.

The affidavit of Beth Don, by describing in detail the history of an "excellent" case for prosecution, refutes by specific example this statement by Judge Kozinski. I will read the entire affidavit at this time, because it is such a clear and succinct description

of Judge Kozinski's handling of this sexual harassment issue.

Here is what Beth Don says in her affidavit:

I served as a GS-15 attorney in the Office of the Special Counsel during 1980 to 1982.

While I was serving at the Office, in 1980 or 1981, a female federal employee filed a complaint of sexual harassment against her male supervisor.

After normal review, an indepth investigation of the complaint was undertaken by one of the Office's most experienced and highly thought of investigators.

The investigator interviewed dozens of people and obtained a large number of affidavits. It was the investigator's opinion that the complainant had been sexually harrassed by her supervisor.

At the point in time when the investigator became convinced that the sexual harrassment alleged had in fact occurred, the Acting Special Counsel decided to pair the investigator with an attorney since it seemed probable that the Office would file an action with the Merit Systems Protection Board (MSPB) to remedy the employee's complaint. The Acting Special Counsel believed that by teaming an attorney with the investigator the Office would achieve a very thorough investigation and a fully supportable complaint to initiate the action at the MSPB.

In the Spring of 1981, I was the attorney assigned to work with the investigator on this sexual harassment case. My review of it at the point I entered the case concurred with the views of my supervisor, the investigator and the Acting Special Counsel: The case was an excellent one to prosecute. The investigator had documentary evidence and affidavits and had discovered a pattern and practice of prior behavior on the part of the supervisor. Together we worked to fine tune the case and draft the complaint.

The investigator's second-line supervisor however made it very clear that he had no use for sexual harassment cases, and that the standard to be applied was that of "the virtuous woman." The second-line supervisor also admitted to me in the context of this case that he was a "male chauvinist."

As it became known in the Office that the Prosecution division was getting ready to file an litigate this case at the MSPB, the newly confirmed Special Counsel, Alex Kozinski, interjected himself into the decisions-making process.

While Mr. Kozinski professed to have a strong commitment to prosecute persons accused of sexual harassment, his actions were the direct opposite. First, he propounded a set of 46 questions to the investigator. To the best of my recollection, the questions served no useful purpose in terms of either strengthening an already strong case or pointing out areas of possible weakness. They served only to usurp hours and hours of the investigator's time, both professional and private. In the end, the questions were never all answered because she was ordered to stop work on the case by her second-line supervisor.

At the meeting held by Mr. Kozinski which was to decide the fate of the case, every attorney present and the investigator strongly supported the investigation and spoke of the exceptional strength of the case for prosecution purposes. The only opposition to going forward was expressed by the investigator's second-line supervisor, a non-lawyer. Mr. Kozinski then bypassed my recommendation as the attorney in charge of the case and also ignored the advice of both my supervisor and the former Acting Special Counsel. Instead, he delegated the decision-making authority not to the Prosecution division which would have been the normal and logical procedure, but told the investigator's second-line supervisor that the decision was his to make.

Every person in attendance at that meeting, and later nearly all, if not all the investigators and attorneys, knew that Mr. Kozinski's delegation amounted to his killing this sexual harassment case without personally having his name connected to the deed.

In recent conversations with the investigator and the complainant (to both of whom I have promised confidentiality), I have been told that (a) the case was "settled," and (b) the person complained of still works in the same agency and same building as the complainant; she is forced to pass him in the hallways; and she is terribly bothered that no action was taken against him as a result of her complaint.

Mr. Kozinski's decision not to prosecute in this instance was not just a decision involving one case but was rather seen in the Office as a statement of his view on sexual harassment cases in general—i.e., that he would not prosecute them in response to employees' complaints while he was Special Counsel. This decision made clear to the Office staff that if this case was closed without action, indeed no federal employee's sexual harassment case would ever stand a snowball's chance of being prosecuted by Special Counsel Kozinski.

I have read relevant portions of Alex Kozinski's testimony before the Senate Judiciary Committee regarding his efforts to combat sexual harassment in the federal work place. Any memo issued in May 1982 came, not shortly after Mr. Kozinski's confirmation as Special Counsel but rather more than halfway through the time he served in that office and nine months after the decision to close the case discussed above was made.

To my knowledge, the Office filed no sexual harassment cases for corrective or disciplinary action with the MSPB while Mr. Kozinski served as Special Counsel.

How could Judge Kozinski in good conscience state that he "wanted to make sure there were no sexual harassment cases that somehow fell through the cracks," in light of Ms. Don's affidavit? Again, Judge Kozinski leaves the question begging for a response, for he has failed to address these allegations either in his letter to Senators THURMOND and BIDEN or at the second hearing on his nomination.

A fourth example of misleading the Judiciary Committee is the following, in a comment on his commitment and actions to uphold the responsibilities of the OSC:

I can only represent to you that we brought every case that we had. I did not want to bring bad cases. I did not want to bring cases that would be burdensome to the employee the agency, and would make bad law. Every case that I thought could be brought, was brought. No one has suggested different.

No one has suggested differently? How misleading that representation to the committee is. It's certainly not true that no one has suggested differently. The affidavits which I have discussed here suggest exactly that—that Judge Kozinski failed to bring strong cases that otherwise should have been brought. I refer my colleagues back to the sexual harassment case discussed by Ms. Don in her affidavit and to a case described by Jesse James in his affidavit involving a mine safety expert. The name of that case was Spadero. Essentially, in this case, Mr. James alleges that Judge Kozinski attempted to counsel the agency to provide a lawful explanation for the firing of a mine safety expert who had talked with the press about his actions to protect the safety of miners. According to Mr. James' affidavit, what appeared to be a strong case of a realiatory-type firing for contact with the press was never prosecuted. And what about the 1982 press conference held by Congresswoman PAT SCHROEDER?

Congressman SCHROEDER wrote Chairman THURMOND on September 5, 1985, about a press conference that she held in 1982 complaining about Judge Kozinski's failure to bring cases.

Has she not suggested otherwise, or does she not count?

Here is what she wrote to the chairman of the Judiciary Committee:

The fact that the Office of Special Counsel under the leadership of Mr. Kozinski had failed to utilize its statutory powers together with the enormous number of complaints which I received from employees who tried to make use of the office convinced me to introduce legislation to abolish the Office of Special Counsel.

The data provided by Mr. Kozinski indicated that no legitimate whistle-blowers existed in the Federal Government. If this was the case, I reasoned, we ought to write off the Office as an expensive mistake.

In fact, I believe that there are legitimate whistle-blowers in the Federal Government. My experience as chairwoman of the House Subcommittee on Civil Service has convinced me that a substantial number of prohibited personnel practices are committed each week in the Government.

I have witnessed separations and reassignments of employees because their supervisors believed they blew the whistle or could not be trusted due to their work for the previous administration. As a result, I joined in the May 17, 1982 press conference with the American Federation of Government Employees, the Fund for Constitution Government, and the Government Accountability Project.

The data provided by Judge Kozinski was the basis for my disappointment with the Office of Special Counsel.

Has no one suggested otherwise? Has no one suggested he did not bring cases which could have been brought? I am not arguing that he should have brought a particular case.

I am arguing he was not fair and square with the Senate when he said no one ever suggested otherwise when PAT SCHROEDER surely suggested otherwise.

In addition to his misleading testimony and responses to written questions, Judge Kozinski has misled the committee in his response to my letter

to Senators THURMOND and BIDEN in which I discussed various aspects of his record. His discussion of numerous issues colors the truth and ends up painting quite a different picture from what really happened. Let me give you some significant examples.

In Judge Kozinski's letter of October 17, 1985, to Senators THURMOND and BIDEN, he discusses the settlement in Mary Eastwood's termination case. Ms. Eastwood was terminated by Judge Kozinski on May 3, 1982, for failure to accept a directed reassignment to the San Francisco office. Judge Kozinski had asked her to head the San Francisco regional office. Ms. Eastwood filed a complaint claiming that the termination violated the law because termination was based on political considerations as well as the views she expressed in the office. Judge Kozinski points out that the statements made by Ms. Eastwood in her affidavit are not new, and he notes that her appeal of her termination was publicized in 1982. He goes on to say, and I am quoting now from his letter:

In September 1982, on the eve of trial, Ms. Eastwood dropped her appeal and "abjure[d] her allegations that the Office of the Special Counsel, the Special Counsel or any employee of the Office of the Special Counsel engaged in any wrongdoing . . ." By repudiating her charges, Ms. Eastwood bypassed the opportunity to make her case fully and fairly in open court and, if successful, to permanently get her job back.

The facts of Ms. Eastwood's case are simple. When a vacancy occurred, I placed her in charge of our largest regional office in San Francisco, by any measure hardly a hardship assignment. In light of Ms. Eastwood's experience and familiarity with the office, I felt strongly that she could help bring our largest and most distant regional office closer to Washington. . . . For reasons never fully explained, Ms. Eastwood chose not to go to San Francisco, abandoning the responsibilities entrusted to her.

How is that for some allegation? Ms. Eastwood dropped her appeal, Judge Kozinski said, "dropped her appeal." She repudiated her charges, he says, for reasons never fully explained choosing not to go to San Francisco and abandoning the responsibilities entrusted to her.

Judge Kozinski then attached a copy of what appears to be the settlement agreement. Judge Kozinski is implying, to the average person reading this letter, that Ms. Eastwood lost her case. He says she dropped her appeal, repudiated her charges and bypassed the opportunity to be successful. The clear representation relative to the disposition of the matter is that Ms. Eastwood lost—she did not have the evidence necessary to succeed in her case.

At the Friday, November 1 hearing, I questioned Judge Kozinski on this subject and his answers only confirmed my earlier suspicions. Let me just read from the exchange since it speaks for itself:

Senator LEVIN. Judge Kozinski, you said that you have no quarrel with the statement in my letter to Senator THURMOND in which I indicated that Ms. Eastwood prevailed in her appeal. You said two or three times today that you have no quarrel at all with that statement.

Yet in your answer to my letter you wrote Senator THURMOND that Ms. Eastwood dropped her appeal and she repudiated her charges.

Now, do you see anything at all inconsistent, on the one hand, between my letter which says that she prevailed on her appeal, with which you have no quarrel, and your letter in which you say she dropped her appeal and repudiated her charges? You see no inconsistency there?

Judge KOZINSKI. I see some inconsistency. What I stated was that insofar as my response did not take issue with your statement, it remained unrebutted.

Senator LEVIN. Well, you said you had no quarrel with my statement that she prevailed on her appeal.

Judge KOZINSKI. That's right. I mean, I may have said that.

Senator LEVIN. Today.

Judge KOZINSKI. I guess I said that. Yes.

Senator LEVIN. Well, if you have no quarrel with the statement that she prevailed on her appeal, why did you represent to the committee in your letter to Senator THURMOND that she dropped her appeal and repudiated her charges, if there is an inconsistency which you now acknowledge there is?

Judge KOZINSKI. Well, I have no quarrel with the proposition that she prevailed. I have a quarrel with the proposition that she had a complete and unmitigated victory.

What I pointed out was that while she had a victory, her victory was a limited one.

Senator LEVIN. Is that what you said in your letter?

Judge KOZINSKI. That is what I am saying now.

Senator LEVIN. Is that what you said in your letter?

Judge KOZINSKI. Obviously not.

Mr. President, that comes right from the transcript of last Friday's hearing.

Let us look further at what Judge Kozinski did not tell us in his letter and what he did not attach in his appendix. In his letter, he did not tell us that Ms. Eastwood was provided with reinstatement and back pay from the date of her termination to the date of the settlement. And in the appendix, he failed to include a copy of the settlement agreement pertaining to attorney's fees.

This is a very meticulous person, almost an obsessively meticulous person. He has been credited with being an almost fanatic editor of his staff's work. He knows what he is saying and he knows what he is writing. He is proud of that. Yet, in the appendix that he forwarded to the committee—this is an appendix with—well, it looks like at least a half dozen tabs and may weigh a couple of pounds. In that appendix, he omitted a very important settlement agreement pertaining to attorneys' fees.

In that agreement, Mary Eastwood was awarded $10,000 in attorneys' fees—an award that was granted by the administrative law judge assigned to the case, who said he was empowered to make such an award to the prevailing party—the prevailing party—that means the winning party.

Judge Kozinski omitted that important fact and he omitted in his attachments a copy of the second settlement agreement in which the attorneys' fees were discussed. In short, Judge Kozinski told the Judiciary Committee in that letter only half the true story—that half which benefited his position.

In that same letter in which he said that Mary Eastwood, for reasons never fully explained, chose not to go to San Francisco, abandoning the responsibilities entrusted to her, he also said he did not know of the reasons that she chose not to go to San Francisco. It was for reasons never fully explained—that is what he wrote us—never fully explained.

Judge Kozinski is not being straight with that representation, either, because the memo sent to him by Ms. Eastwood at the time that she declined the transfer explicitly stated that she would not accept the transfer because she had lived in the Washington, DC, area for some 27 years and her friends and family were here. When I discussed this with Judge Kozinski in my office, he admitted that he did know the reasons for her refusal.

Why did he suggest something different in his letter to Senators THURMOND and BIDEN? He told us at the hearing, well, it was his hunch—it was his hunch. He did not say anything about a hunch in the letter. He just said "for reasons never fully explained," she abandoned her responsibilities to the office and did not go to San Francisco.

Mr. President, I ask unanimous consent that the memo from Mary Eastwood to Alex Kozinski giving him the reasons at the time for refusing the assignment to San Francisco be printed in the RECORD.

There being no objection, the memo was ordered to be printed in the RECORD, as follows:

[Memorandum]

OFFICE OF THE SPECIAL COUNSEL,
U.S. MERIT SYSTEMS PROTECTION BOARD.

Re: Potential reassignment to San Francisco.

To: Alex Kozinski, Special Counsel; H. Robert Mayer, Deputy Special Counsel.

From: Marie Eastwood, Associate Special Counsel for Investigation.

Date: February 16, 1982.

Over the weekend I gave considerable thought to your plan to move me to San Francisco to head the Western Regional offices if Bill Olivier leaves. I have lived in Washington, D.C. for almost 27 years. Most of my friends and part of my family live here. I therefore do not wish to leave here.

I understand your view that my present position in Washington, as you construct

and perceive it, is a "luxury." I do not agree. Nevertheless, to try to help you in your effort to conserve funds, I plan to actively seek employment elsewhere.

I thought you should know this right away so you can make other plans for the Western Region and so you will not be surprised if you receive any inquiry about me from a potential employer.

Mr. LEVIN. Mr. President, the letter to Senators THURMOND and BIDEN from Judge Kozinski is misleading in another way. This has to do with my criticism of his decision in a judicial misconduct case he considered while at the Claims Court. For background, the case is entitled *In Re Judicial Misconduct,* (2 Cl. Ct. 255 (1983)).

A 1980 statute governs the handling of judicial misconduct complaints; 28 U.S.C. 372 requires, in complaints involving U.S. Claims Court judges, that the chief judge of the U.S. Claims Court review these complaints. If the chief judge finds a complaint to be improperly filed, "directly related to the merits of a decision or procedural ruling," or frivolous, or it appropriate corrective action has already been taken, the chief judge is required to dismiss the complaint. If the chief judge does not dismiss the complaint, he is required to convene a special committee to investigate the charges. The statute on its face anticipates that there may be frivolous complaints filed and establishes a screening process for the prompt dismissal of them.

In March 1983, Judge Kozinski received a complaint against a U.S. Claims Court judge, signed by attorney Norman E. Hay. Named as "of counsel" was attorney Charles S. Gleason, whose signature did not appear on the complaint. Judge Kozinski, in a biting opinion, dismissed the complaint on the basis that it was frivolous and directly related to the merits of a pending case and fined attorneys Hay and Gleason $500 each for filing it. I will go into the details of this case later in my statement. The issue I want to discuss here, in this context of truthfulness, is how Judge Kozinski colored the facts in order to justify the action he took in that case. My criticism of his decision centers largely on his failure to provide notice or a hearing to these two attorneys before he fined them.

That was the gist of my critcism of his action, that he failed to provide notice or a hearing to the two attorneys before he fined them. But in his letter to Senator THURMOND and BIDEN, Judge Kozinski cites some 27 Federal Circuit cases to support the proposition that such a fine can be summarily imposed. What he fails to disclose is that each and every one of those cases he cites is based on and refers to the case of *Asberry* v. *U.S. Postal Service,* 692 F. 2d 1378. That case—and all the cases cited by Judge Kozinski—involve the filing of frivolous appeals with the Federal Circuit Court of Appeals, not complaints, much the less judicial misconduct complaints, in the trial court. And the authority for the imposition of the sanction, according to Asberry (at 1382), is rule 38 of the Federal Rules of Appellate Procedure—pertaining solely to courts of appeals and filing therein of frivolous appeals, not lower court activities.

Even more important is the action the court in Asberry took and the concerns it stated. One of the issues before the court in Asberry was whether the subject appeal was frivolous. The court found it to be so. It then considered a sanction and decided that pursuant to rule 38, it could impose a sanction on the appellant, and it did so in the amount of $500. But, it then rescinded the sanction, because the appellant did not have notice that such a sanction could be imposed. The court's language here is self-explanatory:

> Before the creation of this court on October 1, 1982, neither of its predecessor courts has adopted Rule 38 of the Federal Rules of Appellate Procedure or other rule providing for award of damages or costs in appeals determined by the court to have been frivolous. Nor had either court entered such an award. In light of those facts, appellants and counsel in cases originally filed in those courts may not have fully realized that the injury inflicted on the administration of justice by frivolous appeals was recognized in the Rules of Appellate Procedure or that those Rules would govern proceedings in this court. Though the present appeal would be for that reason no less frivolous, we consider it appropriate under all the circumstances to remit the costs and attorneys fees imposed in this case.

That court reversed the sanction because of the absence of notice. That is the case that Judge Kozinski cites, and all the other cases he cites are based on it. The court in that case withdrew the sanction against the attorneys rather than imposing it summarily.

Notice of the possibility of an imposition of a sanction is deemed to be so critical, in fact, by the Federal Circuit Court of Appeals, that the clerk of the court is required to routinely issue a letter of warning to each person filing an appeal.

Now in his letter to Senators THURMOND and BIDEN, Judge Kozinski wrote:

> Whatever the law may be elsewhere, it is firmly established in this circuit that a court may *summarily* (emphasis added) impose upon a party, its counsel or both, sanctions based upon a party, its counsel or both, sanctions based upon pleadings the court finds to be frivolous or otherwise inappropriate.

That is simply not what the Asberry case or the 27 cases cited by Judge Kozinski stand for. When questioned about this at last Friday's hearing, Judge Kozinski said he knew of no case that could serve as precedent. That is what he admitted in the hearing. Let me read that exchange for the RECORD:

> Senator LEVIN. . . . In the cases you cited, in the principal case, as a matter of fact, sanctions were first imposed and then because the attorneys were not notified the sanctions were withdrawn. I have asked the Library of Congress, American Law Division, to do some research for me to see whether or not a sanction has ever been imposed on a lawyer or lawyers for filing a frivolous or otherwise unsuccessful complaint against a judge without any notice, without any hearing.
>
> They can find no case.
>
> Now, maybe you can give us precedent for it. Your letter suggested a dozen cases.
>
> Judge KOZINSKI. I know of no case, Senator.

How, then, could Judge Kozinski have said what he said in his letter? Clearly, Judge Kozinski was less than candid in writing that what he did was precedented when it was by later admission unprecedented.

What is the sense that we get from this kind of record? I believe Judge Kozinski has misled the Senate. Judge Kozinski distorts the truth for his own purposes and that quality, in my book, makes Judge Kozinski unfit to serve on the Federal bench.

I wonder if I might ask the Chair how much of the time I have allotted to myself do I have remaining?

The PRESIDING OFFICER. The Senator has 26 minutes out of the hour remaining.

Mr. LEVIN. I appreciate that. I thank the Chair.

Next, Mr. President, Judge Kozinski has unfairly attacked an organization opposed to his nomination.

The organization in question is the Government Accountability Project [GAP], an independent organization whose principal purpose is to protect whistleblowers. Judge Kozinski's attack on GAP took place in letters he wrote on official Claims Court stationery soliciting help on his confirmation, in which he enclosed an editorial from a radio station in Boston saying that GAP is "sponsored by" the Institute for Policy Studies [IPS] which is a "revolutionary group hostile to the United States with ties to terrorist groups." In fact, whatever that radio station may think about IPS, GAP disassociated itself from IPS a year and a half ago. GAP is described by the Economist, in its July 5, 1985 issue, as follows:

> The main support for whistleblowers, apart from Congress and the press, comes from an independent organization, the Government Accountability Project (GAP). During the 1984 fiscal year, GAP represented more than 60 business and government whistleblowers plus some 14 public-interest groups in 10 states. It advises prospective whistleblowers of the pressures and perils of the vocation and sometimes redirects the less hardy to "third-party whistleblowing" otherwise known as an anonymous leak.

GAP is listed by Good Housekeeping magazine in the April 1985 issue as the

place to contact if you are contemplating whistleblowing. And the American Banker, in its July 30, 1984, edition lists in its Washington Whistleblowers Directory for persons in the banking industry the Government accountability project in addition to various congressional committees, investigatory units within executive branch and independent agencies and the American Banker Washington Bureau.

Going back to my previous point, Judge Kozinski also misled the Senate on this matter. In my letter to Senators THURMOND and BIDEN, I said:

Finally, Judge Kozinski has written letters on U.S. Claims Court stationery impugning persons questioning his qualifications and urging recipients to lobby on his behalf.

I then asked the Judiciary Committee to ask Judge Kozinski for copies of all such letters and enclosures to such letters.

In his letter to Senators THURMOND and BIDEN in response, Judge Kozinski said:

Finally, Mr. Chairman, Senator LEVIN raises a concern about my use of official stationery to write letters "impugning persons questioning (my) qualifications and urging recipients to lobby on (my) behalf." I am aware of no letter fitting this description and the records that I have reflect none.

Well, Mr. President, I did obtain copies of four of his letters, two of which meet this description. The only reason I was able to obtain these letters and their enclosure was because I was surprised by Judge Kozinski's response and I followed up with another letter directly to Judge Kozinski specifically asking for any letters on Claims Court stationery containing my name and which letters enclose a copy of a radio station editorial impugning persons questioning his qualifications.

Then and only then did Judge Kozinski acknowledge the existence of these letters.

I discussed this issue with Judge Kozinski at the Friday hearing. He agreed that the editorial impugns GAP. He admitted to enclosing it in at least one of the four letters he disclosed to me, and that he may have enclosed it in more than that one. Let me read my exchange with Judge Kozinski on this matter:

Senator LEVIN. You do agree that at least your judgment is that that editorial, impugns persons questioning your qualifications?

Judge KOZINSKI. Would you repeat the question?

Senator LEVIN. Is it your judgment that, in effect, that editorial impugns persons that are questioning your qualifications?

Judge KOZINSKI. I think, in effect, it does.

Senator LEVIN. So that part of my statement you would agree with.

Judge KOZINSKI. Right.

Judge Kozinski did not agree, however, that he wrote letters—because the editorial was only an enclosure. And, although our exchange was not completed because we were interrupted, he said he doesn't believe he asked the recipients of the letters to lobby on his behalf. Let me read parts of one of these letters and let my colleagues be the judge.

The opposition is being orchestrated by the government Accountability Project [GAP], an offshoot of the radical Institute for Policy Studies [IPS]. I understand that Senator CARL LEVIN has been the principal subject of their interest. I assure you that the issues they are raising have been thoroughly refuted before the Senate Judiciary Committee. As the enclosed press clips show, my appointment has received solid backing from the legal community as well as from the Jewish community. Any help you can provide would be genuinely appreciated.

At the bottom of that letter it has the word "enclosures." Judge Kozinski can't remember whether or not the Boston radio editorial was included in the enclosures with this letter.

And in another letter, which Judge Kozinski states did include the Boston radio editorial, Judge Kozinski wrote:

(1) Some press discussing my nomination and the nature of the opposition. The first piece, which just appeared in Washington Jewish Week, has a particularly good discussion of the GAP-IPS connection and their motives in opposing me * * *

If CARL is really concerned, he might find this interesting reading. In addition, I would be pleased to meet with him and discuss any of his concerns.

Do those fit the description of my letter to Senators THURMOND and BIDEN—writing letters on Claims Court stationery impugning persons questioning his qualifications and urging the recipients to lobby on his behalf?

I think they do, and Judge Kozinski was again not being straight with the Senate when he said he knew of no such letters.

Is there any doubt that those are letters within the ordinary meaning of the English language which impugn persons questioning his qualifications and urging the recipients to lobby on his behalf? They surely impugn persons, unless organizations are made up of nonpersons, and they clearly urge recipients to lobby on his behalf. Yet, he represents to the committee—to Senators THURMOND and BIDEN—that he does not know of any letters he wrote that meet that description. I do not think Judge Kozinski was being straight with the Senate when he said he knew of no such letters.

Let me add here that there is a significant inconsistency in Judge Kozinski's testimony at the Friday hearing on the issue of this Boston radio editorial.

In response to Senator METZENBAUM's questioning, Judge Kozinski stated that he enclosed the editorial in his letter to David Ifshin because David Ifshin had asked him for information about the GAP-IPS connection.

That is a critical point, because he told Senator METZENBAUM that the reason he enclosed the editorial to Mr. Ifshin was that Mr. Ifshin had asked him for information. About what? About the GAP-IPS connection.

Judge Kozinski said:

He asked me what I knew about that. I told him that as far as I knew the two organizations were affiliated. He asked me whether there was anything in writing I had that might identify that relationship. I said, "I think so." I was at home when he called me. I said I would look it up and if I did I would send him those materials at his request.

While we were talking—well, that's what brought about my sending it to Mr. Ifshin.

In that context, then, Judge Kozinski admitted he used and mailed the editorial for the purposes of informing the recipient, in this case David Ifshin, about the GAP-IPS connection.

But later in the hearing, when I questioned him about the editorial, there was this exchange:

Senator LEVIN. So when you send out an enclosure which impugns people's qualifications, you don't think that that is considered as part of the letter which people receive.

Judge KOZINSKI. Senator, this editorial contains five paragraphs—one, two, three, four, five—the two first of which say very positive things about me. I must tell you that what struck me about the editorial was the nice things it said about me.

I certainly do not mean to adopt every statement in every article I have ever sent with a letter. In fact, I have sent out articles that were highly critical of me and I would hope that when I do that it is understood that I am not endorsing those highly critical comments.

In response to my questions, Judge Kozinski tried to give us the impression that he used the editorial for the good things it said about him, and not the GAP-IPS connection. In light of his earlier comments to Senator METZENBAUM about why he sent out the editorial, his comments to me are at best disingenuous.

The circulation of such inaccurate and inflammatory materials by Judge Kozinski demonstrates poor judgment in the matter, and conduct unbefitting a Federal appeals court judge.

Mr. President, I ask unanimous consent to have printed in the RECORD the editorial to which I referred.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

EXHIBIT 2

Subject: The Nomination of Judge Alex Kozinski.

Broadcast: September 9, 1985: 4:12 AM, 7:39 AM, 11:42 AM, 4:39 PM; September 10, 1985: 6:39 AM, 1:35 PM, 5:39 PM.

This week the Senate Judiciary Committee is scheduled to vote on the nomination of Judge Alex Kozinski to the Federal Appeals Court. Judge Kozinski, 35, has had a meteoric career. He graduated first in his law school class at UCLA and later clerked for Chief Justice Warren Burger.

Judge Kozinski has built an impressive reputation on the insightfulness and scholarship of his decisions and on his understanding of jurisprudence. He is also an effective administrator. Since 1982 he has been Chief Judge of the U.S. Claims Court. There he has raised the level of professionalism and reduced the backlog of cases. For these reasons the Kozinski nomination has drawn support from legal scholars of ranging ideological perspectives.

Opposing confirmation is an organization called the Government Accountability Project, which is sponsored by the Institute for Policy Studies [IPS]. IPS is a revolutionary group hostile to the U.S. and with ties to terrorist groups such as the PLO and the Middle East Research and Information Project or MERIP. MERIP is perhaps best known for its leaflet after the massacre of Israeli Olympic athletes in Munich, praising "the achievements of the Munich action."

This takes on added significance in that Alex Kozinski is Jewish and still speaks with a slight Rumanian accent.

IPS types have spent a lot of money lobbying against confirmation; but we hope this radical opposition fails. Good judicial appointments are rare enough, and certainly we should permit no sabotage by those who support terrorism and anti-semitism. We urge the Senators to confirm Judge Kozinski.

I'm Avi Nelson, Editorial Director, WEEI.

JUDGE KOZINSKI IS INTEMPERATE AND LACKS COMPASSION AND SENSITIVITY

Mr. LEVIN. Mr. President, the former employees who submitted affidavits challenging Judge Kozinski's fitness to serve as a Federal judge, describe a man who was—and these are their words—"intemperate," "harsh," "cruel," "demeaning," "sadistic," "disingenuous," and "without compassion." The accounts by them of Judge Kozinski's actions while special counsel portray an unusual degree of hostility displayed by Judge Kozinski at times and an almost complete disregard for the human consequences of many of his actions.

Let me quote their words at greater length here.

John Hollingsworth in his affidavit concluded, "After 20 years of Federal personnel management experience, I cannot recall a more callous disregard for people than Mr. Kozinski exhibited." Mr. Hollingsworth's affidavit contains more material on this subject of abusive treatment.

Mr. President, I ask unanimous consent to have the entire affidavit printed in the RECORD.

There being no objection, the affidavit was ordered to be printed in the RECORD, as follows:

AFFIDAVIT

I, John F. Hollingsworth, being duly sworn, depose and state:

I was employed by the Office of the Special Counsel from 9/2/79-12/11/82. After Mr. Alex Kozinski was appointed Special Counsel in mid-1981, he took a number of adverse actions and humiliating actions toward many employees, myself included. First, he hired another individual, Mr. William Caldwell, to assume the duties of my position, Director of Administration and Program, GS-15, and threatened me with removal, downgrade, or loss of pay. I felt so harassed and intimidated that I accepted the change to a lower grade, GS-14, on 9/6/81. In spite of this treatment and many humiliating actions toward me by Mr. Kozinski (such as issuing and withdrawing a letter of reprimand), I believe that I remained loyal, conscientious and productive to the U.S. Government and to the Office of Special Counsel. However, I cannot help but question Mr. Kozinski's sense of fair-play, evenhandedness, and sensitivity or judgment in dealing with people.

After 20 years of Federal personnel management experience, I cannot recall a more callous disregard for people than Mr. Kozinski exhibited. Incidents included demanding that a messenger be fired when one piece of correspondence could not be located; issuing a notice of farewell to an employee who had cancer and had not yet finalized plans to leave the office and retire; insulting/belittling staff in front of others in written comments; and similar incidents.

In my own case, Mr. Kozinski displayed an uneven and sometimes ill temperament toward me. For example, in 8/82, he marked up with great criticism Directive No. 1400-1, enclosed as Attachment 1, in blue, yellow, green, and red colors. This type of marking-up was not unusual at the Office of the Special Counsel. In fact, his obsession with "proper writing" caused him to require all staff to attend a USDA-sponsored writing course from 9/8-11/81 at a course cost of $14,000 and travel costs for staff of $25,000.

Besides derisive remarks on writing, Mr. Kozinski was prone to berate the staff for items over which staff had no control or influence. For example, on 7/29/82, Mr. Kozinski called Mr. Caldwell and me to his office. He was very upset and angry. He shook when talked to and had a menacing look on his face. He reamed us out verbally about the following—lack of air conditioning; not fixing his squeaky, sticky door; not repairing his new lounge-seating group; and not acquiring new sectional desks. When we tried to explain that GSA or private companies had been continually urged to provide the services and that the delays were uncontrollable, Mr. Kozinski asked me: "Don't you have compassion for the girls in the word processing room who are burning up from lack of air-conditioning?" I replied, "Yes, besides trying to get air-conditioning on an expedited basis from GSA, I would have taken the girls out of the word-processing room months ago if allowed." Mr. Kozinski stated that I always had too many excuses and that he expected much more for my salary of $50,000. Also, he stated that he expected the impossible from me and that he didn't care how I got results, but he wanted results. Mr. Kozinski closed by demanding in a furious manner that air-conditioning and other mentioned repairs/adjustments/receipts be accomplished "by tomorrow."

Mr. Kozinski frequently directed and expected that I personally adjust or repair any of his furniture, move furniture or equipment, or clean-up areas. When I did this to avoid his wrath or castigation, he seemed to enjoy watching me do the manual labor as if he took pleasure in my subjugation. It was humiliating to do these chores as a GS-14 professional, but I wanted to keep my job and a satisfactory record until I could locate another position. Also, had I challenged Mr. Kozinski, the turmoil and actions against me would have left me in a bad situation personally, and would have left me ineffective in my efforts to protect the dignity and rights of others in the office.

Although Mr. Kozinski often got very upset at the staff for not somehow overcoming regulatory/procedural steps in impossible timeframes, he himself spent much time over a period of weeks and months having his chauffeur drive him around the D.C. area to look at numerous stores' and companies' offerings of carpet, furniture, computer equipment, curtains, and a microwave oven for his office. He seemed preoccupied with the interior appointments of his office.

While the Special Counsel, Mr. Kozinski approved the Merit Systems Protection Board (MSPB) using at least $200,000 of the Special Counsel's unobligated FY 81 funds for such MSPB items as a new kitchen, furniture, carpet, curtains, and computers. During FY 82, the MSPB used its funds to "reimburse" the Special Counsel for such costs as $200,000 for office space rent and $25,000 to OPM for OSC payroll services. These transactions seemed illegal to me since the Special Counsel and MSPB receive separate and distinct congressional appropriations. However, Mr. Caldwell worked confidentially with MSPB to effect these manipulations. In fact, he boasted of the maneuver. See Attachment 2 for record maintained at the time.

Mr. Kozinski's view/evaluation of staff members was that many were incompetent. He gave many staffers very low or unsatisfactory performance appraisals and kept them in a high-stress situation due to his ability to keep them in suspense as to his next adverse/unfavorable action to them. Many have verified this. However, in his notice to staff of 7/30/82, he announced 30 awards and 12 promotions for staff. Some of these very same employees previously had received unsatisfactory performance appraisals by Mr. Kozinski; others, including some who worked for me, had well-known performance shortcomings. None of these announced awards had been preceded by the required justification. I cannot account for Mr. Kozinski's action except to remember how the press and congressional sources were criticizing him for negative treatment of his staff, prior to these awards. In fact, in a 4/13/82 memo to staff, he had declared in effect that he was requiring a superior level of performance in lieu of the satisfactory level required by law and regulation for within-grade pay increases. His inconsistency on performance, awards and recognition for the staff baffled us.

JOHN F. HOLLINGSWORTH.

Mr. LEVIN. Mr. President, Laura Chin stated:

Overall I perceived Mr. Kozinski as a man without compassion. I believed that he engaged in sadistic behavior, because at the time he appeared to enjoy mistreating individuals. He simply did not treat the human beings at the Office with dignity and respect. He did not exhibit a sense of fairness, of proportion, or of the rational implications of his actions. Most fundamentally, his behavior displayed no sign that he realized the law deals with people.

I have reviewed closely two of the examples referred to in the affidavits of actions taken by Judge Kozinski which demonstrate his insensitivity to human concerns. One is the case of an OSC attorney who was a 25-year veteran of Federal employment with critically high blood pressure who, while

on sick leave, was terminated by Judge Kozinski.

Since that employee, Phillippe Neff, brought a successful suit in U.S. District Court for reinstatement and use of his sick leave, I was curious to see what the Federal judge in the case, as an impartial observer, had decided. The judge was William B. Bryant. Since the hearing had not been transcribed, I had to order a transcript. On page 33, Judge Bryant says:

If the Government is small enough to, you know, just line itself in this type of situation and stake out a war against this gentlemen—if they wanted to do it, let them do it. I think it is absolutely incredible to do something that way.

And on page 34 Judge Bryant concludes:

(T)here is no discernible, valid, legitimate, acceptable, governmental interest in doing anybody this way. A man with 235-over-130, he's almost prima facie mentally incapacitated.

The other example is that of Dessie Proctor, a long-time clerk typist who had contracted cancer. In that case, Judge Kozinski announced her departure 1 month before her retirement and without her knowledge. It was so offensive and unsettling to her that she immediately turned in her employee badge and left the office.

Both of these examples are described by Mr. James at some length in his affidavit.

I want to read a portion of that affidavit.

Examples of Mr. Kozinski's abuses include the following: At the time of Kozinski's confirmation as Special Counsel, the Office of Special Counsel employed, as a clerk-typist, an elderly female employee who had been a loyal and dedicated federal employee in excess of twenty years. Prior to Mr. Kozinski's arrival, the employee had been hospitalized for several months after learning that she had cancer. Her condition was such that we were uncertain whether she would live or even return to work. However, to our surprise, she regained her strength and managed to return to the office just about the time of Mr. Kozinski's confirmation. About three or four weeks after his confirmation, Mr. Kozinski summoned me and at least one or two individuals from the OSC Administrative Division and informed us that he was going to terminate the elderly employee. When I questioned the basis for the termination, Mr. Kozinski claimed that the employee was not performing her duties. I found that difficult to believe, because I knew what assignments she had received and was uncertain whether such a small number of assignments were sufficient to form a basis for termination. Further, the employee only performed duties as required by the staff attorneys she worked for. Because of her illness and age, she was slower and not as proficient as younger secretaries. But I did not feel her performance was such that it warranted removal. This was especially true because it was generally well known that she planned to retire shortly. When I determined that Mr. Kozinski was determined to terminate the employee, I questioned the basis for the termination and I suggested that he wait until the employee retired. Because no one in attendance at the meeting was certain when the employee would retire, I was asked to find out and to advise Mr. Kozinski. Upon checking with fellow employees, I learned that the employee planned to retire in October of 1981. This meant that Mr. Kozinski only had to wait two months and the employee would voluntarily leave the office. I subsequently advised Mr. Kozinski of my finding and he indicated that he would take no further actions. However, a few weeks later (some time during the first week of September), while I and all professional staff members were attending a training course, Mr. Kozinski circulated throughout the office one of his famous memos in which he stated that on that day, he was saying goodbye to the employee and he thanked her for her extensive number of years of government service. Prior to receiving the memo, there were no formal nor informal discussions with the elderly employee about leaving the office. She had made no formal statements about leaving at that time. When the employee received Mr. Kozinski's memo, she got up, placed her OSC government identification on her typewriter, walked out of the door and never returned to the office. When the employee's husband called and raised questions about Mr. Kozinski's actions, he claimed it was all a mistake.

In another situation involving another elderly employee, who had more than 25 years of government service, he too was forced out of the office. It began when Mr. Kozinski requested that the employee and I meet with him to discuss the employee's performance. During the meeting, Mr. Kozinski became very loud, caustic and threatening in tone. The employee listened without comment. After the meeting, the employee requested sick leave and left the office. The next day, the employee called me on the telephone and requested use of sick leave, which I granted. At the time, the employee had in excess of 300 hours of sick leave. During the telephone conversation, the employee stated that he was suffering from hypertension and a severe heart condition and his doctor had instructed him not to return to work because of the stressful conditions which the employee reported existed within the Office. According to the employee, his doctor had instructed him not to return to work until he (the doctor) gained control of his hypertension and could then treat his heart condition. Mr. Kozinski was later advised of this conversation and shortly thereafter, he (Mr. Kozinski) began to question whether the employee was actually ill. During this period, as immediate supervisor, I had several telephone conversations with the employee and I became convinced that the employee was ill.

Within two to three weeks of the employee leaving the office, Mr. Kozinski held a meeting to discuss the employee's absence. In attendance at the meeting was the Associate Special Counsel, a representative from OSC's Administrative Division and myself. Mr. Kozinski began the meeting by stating that he did not believe the employee was ill and that he therefore proposed to remove the employee immediately. I suggested that Mr. Kozinski could not terminate the employee if the employee was truly ill. I also suggested that if Mr. Kozinski did not believe the employee was ill, he should require the employee to take a fitness for duty physical prior to proposing any personnel action. Mr. Kozinski agreed and instructed the Administrative Office to issue a letter to the employee ordering him to take a fitness for duty physical immediately.

The letter requiring the fitness for duty physical contained a listing of about three or more OPM approved doctors for the employee to select from. After a few telephone conferences with the employee and the doctor's office, the employee selected one of the recommended doctors and scheduled an appointment. Because of the employee's condition, the physical was to be given in two parts over a two week period of time. On the day of the first part of the test, I called the doctor to learn of the results and to assure that he would submit a written report to the office. I was advised that the employee's condition was severe, that there was no need for the second part of the test, that the employee's condition was such that he should be hospitalized and that if the employee returned to the stressful conditions of our office, he could die. With that information, I requested the doctor to provide a written opinion and I advised Mr. Kozinski and the Associate Special Counsel of the doctor's comments.

I assumed the matter was closed. However, to my surprise, a few days after the arrival of the doctor's letter, I received a telephone call at home from Associate Special Counsel for Prosecution. In that telephone conversation, the Associate Special Counsel informed me that Mr. Kozinski had requested that he call me and ask if I would call the employee and advise him that Mr. Kozinski was thinking of removing him. I was told that by doing so, the employee might resign his position. I told the Associate Special Counsel that I would not be a party to such an action. The Associate Special Counsel stated that Mr. Kozinski would be most appreciative if I would assist him. I then stated that the only telephone call I would make would be to the employee to inform him of our conversation and Mr. Kozinski's attempt to force him to resign.

Mr. President, this was an employee who was later discharged and then went to Federal court and the Federal court's opinion is what I read before in the RECORD.

The Federal judge said, "there is no discernible, valid, legitimate, acceptable, governmental interest in doing anything this way."

Following that statement this matter was settled in that court.

When asked about these cases and those affidavits at the Friday hearing, Judge Kozinski said he did not have a specific recollection of the events described by Mr. James in his affidavit, that he had no recollection inconsistent with Mr. James, and at another point he said, quoting Judge Kozinski last Friday:

Such recollections as I have are consistent with Mr. James. As to the balance, I can neither affirm nor deny whether his version of the events is accurate.

Given the small size of the office and the nature of the illnesses and court case relating to these two employees, I find Judge Kozinski's answer a damning one indeed.

In response to allegations that Laura Chin, the Public Information Office for OSC, had been derogating Judge Kozinski's performance in her discus-

sions with OCS field staff, Judge Kozinski drafted a memo which, while it remained in draft form, apparently was used to explain to Ms. Chin just what she was and was not allowed to do.

The text of the memo is as follows:

MEMORANDUM: OFFICE OF THE SPECIAL COUNSEL

To: Laura Chin, Public Information Officer.
From: Alex Kozinski, Special Counsel.

Some field office personnel have told me that you have been spreading false and baseless rumors. This has created a serious morale problem. To deal with this problem, I am instituting the following policy.

Effective immediately, you may not communicate with OSC field or branch office employees unless you have specifically cleared the communication with the relevant field office chief.

This means:

(1) You will not use office telephones to call field or branch office personnel for any purpose, and you will not use any other telephones to discuss official business with field or branch office personnel, unless the conversation has first been cleared. Similarly, you will not correspond with field or branch office personnel on official business without passing the correspondence through the field office chief.

(2) If you should receive a telephone call from an employee in a field or branch office, and the relevant field office chief has not specifically told you that the telephone call is authorized, you will say *only* the following and then promptly hang up: "I am not authorized to speak to you unless your field office chief calls me and tells me it's o.k. Thank you. Good bye." Correspondence from field or branch office employees should be promptly referred to Bob Mayer.

You are, of course, free to discuss any matter not constituting official business with field or branch office personnel so long as both of you are in a non-duty status and are using private telephones and/or stationery.

This policy will be in effect until the present problem has been cleared up. Please give Bob Mayer any thoughts you may have on the subject.

According to Ms. Chin's affidavit her "do nots" extended to contact with the Congress and the press. I cite this as an example of the consequences that flowed from Judge Kozinski's anger with employee conduct. Clearly the tone and directive of this memo is something with which a normal employee cannot live. Either Judge Kozinski knew that, and it was a first step in his effort to terminate Ms. Chin, or he was insensitive to what motivates an employee. On top of that, if in fact Ms. Chin was directed to stop her contacts with the Congress and the press, if indeed she had any, Judge Kozinski's anger would have resulted in his ordering what is well known as a prohibited personnel practice—limiting the first amendment rights of a Federal employee.

An opinion Judge Kozinski issued while at the U.S. Claims Court shows the same intolerance and intemperate behavior.

I mentioned this case earlier. It is an unprecedented opinion issued by Judge Kozinski in a case involving the filing of a judicial misconduct complaint. I have described the basic facts and mentioned the concern I had over the issue of due process.

As I may have indicated, I have no quarrel with Judge Kozinski's decision to dismiss the complaint. It does seem to be lacking in merit. But Judge Kozinski, in his wrath over the filing of this complaint and apparent conduct by these two attorneys in cases pending before the Claims Court, ignores the basic concerns for and requirements of due process, and the sensitive nature of the judicial misconduct process. His anger got in the way of his judgment and fairness.

Judicial misconduct cases are not the same as ordinary civil litigation. These cases are matters in which the judiciary is policing itself, and the appearance of the fairness of the process is critically important, so that no one can claim that judges are unwilling to police their own colleagues. The Second Circuit Court of Appeals recently highlighted the importance of providing complete access to the judicial misconduct process. In that case *In Re Martin-Trigona*, 737 F.2d, 1254 (1984), the district court had issued an order prohibiting Anthony Martin-Trigona from filing any case in any court in the country, unless he was granted leave to file by the court. This was because Martin-Trigona had abused his access to Federal court by filing over 250 civil actions and appeals throughout the United States.

While the court of appeals upheld the concept of what the district court did, it created two exceptions to the order—one for State courts, over which it determined it did not have jurisdiction, and two, with regard to judicial misconduct cases brought under 28 U.S.C. 372. On the second point, the court said (at page 1263):

We believe the injunction should explicitly exempt complaints by Martin-Trigona or anyone acting in his behalf under 28 U.S.C. 372(c). This provision related to the complaints of judicial misconduct and, absent a finding that Martin-Trigona has abused such proceedings so as to impair the administration of justice, we believe access to this avenue of redress should not be limited at this time. Other litigants are not affected by such a proceeding and, since its purpose is to impose a form of monitoring upon the judiciary itself, we believe that enjoining resort to it can be justified only by a finding of abuse impairing the administration of justice. Moreover, consideration of whether the process established under Section 372(c) is being abused and, if so, what remedies are appropriate may best lay with the judicial council of the circuit.

Mr. President, Judge Kozinski simply ignores this distinction. He not only fined the attorneys without notice or a hearing, for the filing of the complaint, but he writes a scathing opinion, orders it sent to their clients, and publishes the opinion, with the names of the attorneys disclosed. Let me discuss here why those actions are so offensive to due process.

Neither I nor the American Law Division of the Congressional Research Service could find one other judicial misconduct case in which such a sanction was imposed for the mere filing of a complaint. This is true even though there are numerous cases of dismissals based on the same reasons used by Judge Kozinski. In fact, the statute itself anticipates the filing of frivolous complaints, which is why it allows for immediate and summary dismissal.

It is the sanction, without notice or a hearing, which is unprecedented. Had there been notice or a hearing, Judge Kozinski could have learned that Attorney Gleason claimed that he was not even aware of the filing of the complaint over his name by the other attorney. That is what Attorney Gleason has represented in a court document and to us. Whether that is correct or not is not the issue. The issue is, had Judge Kozinski given notice to people before he imposed sanctions on them, he would have learned of the allegation that one of the people that he was imposing a sanction on did not even know that the complaint had been filed.

The absence of notice or a hearing is also contrary to the stated case law on the subject, particularly the appellate court governing the Claims Court. I have discussed already the Federal circuit's opinion in the Asberry case. The Supreme Court in *Roadway Express, Inc.* v. *Piper*, 447 U.S.C., had similar concerns. The Court in that case said:

Like other sanctions, attorney's fees certainly should not be assessed lightly or without fair notice and an opportunity for a hearing on the record.

In Judge Kozinski's deposition in the case of Mary Eastwood's challenge to her termination, Judge Kozinski said this: "I tend to be very single-minded when I go after things." He is—to the detriment of an open and complete view of the facts, and in the end, to the detriment of justice.

In this case involving a claim of judicial misconduct, Judge Kozinski was angry. There is no doubt in my mind. I would have been, too, probably. Its easy for anyone to act with outrage. What is not easy, but what is expected and must be demanded of a judge, is a higher degree of self-control and a commitment to due process and the law. Judge Kozinski was lacking in this area as demonstrated by this case.

Let me add that I am well aware that competency of a judge should not and cannot be fairly assessed on the basis of one opinion or decision, alone. Judge Kozinski's opinion in this case is important, however, because it confirms what some others have said about him—that he is intemperate,

partial in situations where he has already made up his mind, and impatient.

JUDGE KOZINSKI HAS SEEMED AT TIMES TO ENGAGE IN ERRATIC BEHAVIOR

I am also troubled by a slew of reports of actions taken by Judge Kozinski which can only be described as erratic. The most famous of these is probably the technicolor memos. Judge Kozinski, when at the OSC, used four or five different colors of ink to edit the staff's work. It is that coupled with the intensity of the editing which shocks the viewer when he or she sees one of these memos. I have an example here at my desk. Mary Eastwood described these edited memos in her affidavit:

The caustic, handwritten criticisms made by Mr. Kozinski on that brief (which he called "technicolor") were typical of numerous cruel and intemperate comments he repeatedly wrote on drafts of work and on routing slips to the professional staff in OSC after he became Special Counsel.

She also stated that her early introduction to Judge Kozinski, before he was even on board at the OSC, was a rather public critique of a brief she had supervised, which was subject to this technicolor editing.

There are additional instances described in the affidavits in which Judge Kozinski tried to fire a messenger when one piece of material could not be located and reprimanded an employee for allowing a room partition to fall and scrape the wall in the process. Mr. James discusses this and another incident in his affidavit. I quote from that affidavit:

In a third incident, an employee who was very loyal to Mr. Kozinski unintentionally caused a portable partition to fall against the wall, leaving a small scar on the wall. When Mr. Kozinski learned of the incident, he initially discussed the matter with the employee in what the employee described as a caustic and demeaning tone. He then gave the employee a written reprimand for causing the partition to fall.

Finally, in an incident involving my selection of summer law clerks, Mr. Kozinski requested that I get some digs in on an employee who had not taken any improper actions. The incident arose during a discussion between the clerk and Mr. Kozinski, after being hired. The clerk indicated that the processing of her selection had taken a long period of time and she wondered why. Mr. Kozinski, subsequently, requested that I find out why it took so long. I explained that I made my selection prior to his confirmation hearings and afterward the Acting Special Counsel suggested that we put a hold on filling positions until after Mr. Kozinski was confirmed. At that point, Mr. Kozinski told me to discuss the matter with personnel in the Administrative Division and see what they had to say for themselves. Pursuant to his request, I did discuss the matter with the Administrative Division and I was told exactly what I told Mr. Kozinski had caused the delay. That same day, I again discussed the matter with Mr. Kozinski and I again advised him that the Administrative Division was not at fault. He then stated he knew, but I should, in his words, "get some digs in on personnel." I shook my head and walked away.

These descriptions are not those of a sensitive or compassionate individual. Rather, they suggest an absence of patience, a high degree of intolerance, and a continuing disregard for the human consequences of one's actions.

I am well aware of the letters of support for Judge Kozinski that the Judiciary Committee has received, and the respect of some members of the legal community who praise this appointment. And I am aware of the extent to which Judge Kozinski has improved the operation of the Claims Court by reducing the backlog and shortening the time to disposition. He is to be commended for those accomplishments. But I am also aware of the record I have described today and it is a record that does not and cannot support nomination to the second highest court in this country. It falls far below the standard for judicial temperament required by the office.

Ultimately, what we are talking about here are the essential, bottom-line qualifications that we expect of Federal judges. What we mean by the term "judicial temperament," at the very least, is fairness, decency, and forthrightness. But I suggest that what every Member of the Senate—which has the obligation, on behalf of the American people, to consider these nominations—has a right to expect of every nominee is, at the very least, demonstrated fairness, decency, and forthrightness. And I must conclude that Alex Kozinski has not adequately demonstrated these qualities. He may develop them

Indeed, if this review of and debate upon his conduct up to this point accomplishes nothing more than to make Alex Kozinski aware that these qualities are what the American people expect of their judges, I believe it will have been useful. But so far, at least, he has not adequately demonstrated them. He has not been decent to employees of the Office of Special Counsel when he has not considered the impact of his discipline upon them as individuals. He has not been forthright with the Senate in describing his behavior at OSC or at the Claims Court, when he has given only part of the story on some things and been silent in the face of challenges to his testimony on other things. And he has not been fair to certain lawyers practicing before the Claims Court when he has not given them notice and a chance to respond before imposing discipline upon them.

Alex Kozinski is a bright young man, maybe even brilliant. Alex Kozinski has excellent academic credentials. And, yes, Alex Kozinski has impressive testimonials from a lot of people. But I hope that today, in deciding how to vote on this nomination, all of us in the Senate—whatever conclusion we might have reached up to this point—will examine this nomination in the light of a fundamental question: Do we want to put on the Federal bench—indeed, the second-highest bench in the country—a person who has not adequately demonstrated qualities which I believe are essential for those empowered to pass judgment on other Americans—fairness, decency, and forthrightness?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. LEVIN. Mr. President, how many minutes do we have remaining?

The PRESIDING OFFICER. The Senator has 10 minutes and 30 seconds remaining.

Mr. LEVIN. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. LEVIN. Mr. President, I have already yielded to Senator THURMOND, I believe, 10 minutes. I would rather not yield more time. I believe I could safely, and perhaps with the help of staff, take some action here if I was sure he supported it. He did ask me to protect his time on the floor. I do want to do that to the best of my ability.

Does the Senator from California need some time?

Mr. WILSON. Yes; I would request 5 minutes of Senator THURMOND's time.

Mr. LEVIN. I see the Senator from South Carolina is here now and he can respond to that request.

The PRESIDING OFFICER (Mr. TRIBLE). The Senator from South Carolina has 19 minutes and 56 seconds remaining.

Who yields time? Absent the yielding of time, the time will be assessed against both sides equally.

Mr. THURMOND. Mr. President, I yield 5 minutes to the Senator from California.

The PRESIDING OFFICER. Five minutes is yielded to the Senator from California.

Mr. WILSON. I thank the Chair and I thank the distinguished chairman of the Judiciary Committee.

Mr. President, I come to the floor reluctantly. I had hoped that this nomination would be accorded relatively routine passage. But when I learned that there were some concerns, I did not object to the request of some Senators on the other side for a special hearing, although it seemed to be strange because they conceded that they could find no fault with the candidate's intellect. Indeed, they accorded him the unquestioned status of a brilliant student of the law. They found no problem with the way that, as a court administrator, he had conducted the Court of Claims. Indeed, no complaint emerges from the record. To the contrary, his colleagues have praised him for his conduct on the

bench and as the chief judge of the Court of Claims.

It seems that their unhappiness with this young and brilliant, conservative judge is that he has offended some along the way; that his style is such that they question his judicial temperament.

So, Mr. President arises: On what evidence are Senators made unhappy about Judge Kozinski's judicial temperament?

Well, it seems that some who have worked for the judge have not found him to be "Miss Congeniality." If we are to condition our approval of judicial candidates on their having never offended counsel or even other judges, or certainly those on their staffs to whom they have held to a high standard, or perhaps being stern taskmasters, then we are going to greatly narrow the ranks of those who are eligible for elevation to the bench. And I do not think that is what we wish to do.

I believe we should be concerned with the knowledge of a candidate of the law, with the candidate's experience, and with the candidate's ability to deal with difficult cases fairly. And no one has contended that, as a judge sitting, Judge Kozinski has been guilty of the kind of conduct that has rendered an unfair decision.

He has been accused of being a stern taskmaster. He has been accused of running a taut ship. Apparently part of the motive in sending him to the Office of Special Counsel was to clean up an office that needed some discipline. He, evidently, exerted that discipline and there were some who objected to his managerial style. He was known as a tough, no-nonsense manager, who set high standards and, thereby, raised everyone's performance.

But, Mr. President, Judge Kozinski was already confirmed by the Senate to serve on the Claims Court. No one came forward then to question his judicial temperament. Judge Kozinski appeared before the Judiciary Committee in July for his confirmation hearings and, even with testimony then in the record questioning his temperament, based on this work of his at the Office of Special Counsel, he was reported out by the committee unanimously.

Nonetheless, when the request for a special hearing was made, the chairman of the committee was inclined to grant it, and I did not raise an objection. It seemed to me better and, if there were questions, they would be clarified.

The chairman of the Judiciary Committee and Senator HATCH have quite bluntly assessed what went on at that hearing last Friday as inconsequential, as a waste of time, as a rather petty flyspecking.

I hope we do not on this floor come to the point where we ask questions that would tax anyone's memory, and then hold the respondent to an absurdly high standard of whether or not he accurately remembered petty details. Because if we do that, Mr. President, I think we are not being fair.

Mr. President, in conclusion, I will say that I do not think judicial confirmation hearings, or debate on this floor, should have the character of Prometheus' ordeal where he was tied to the rock and pecked to death by those who were endlessly full of questions that really do not relate to the basic character, to the basic ability, and the knowledge of the law of the judicial candidate.

We have in this young man an extraordinary candidate, one able to give long, and distinguished service.

I hope the Senate will fulfill its mandate to give careful consideration, but not to engage in flyspecking.

I thank the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I yield 6½ minutes to the distinguished Senator from Utah.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, we have heard allegations that Judge Kozinski "misled the Senate when he testified at his confirmation hearing that he had had 'an excellent working relationship with his staff' at OSC."

In fact that is not what Judge Kozinski said at all. The full statement reads as follows: "Now there were problem employees and I believe that we solved those problems and for the most part, I believe that I had an excellent working relationship with my staff." Even this qualified statement came after two pages of discussion, where he informed the committee of problems that existed with employee morale when he got to the agency because a few employees "were not pulling their weight." He also informed the committee that he advised employees that "those who could not or would not perform would not be entitled to stay on the Federal payroll."

Now I just cannot see where Judge Kozinski's statements can be characterized as misleading in the slightest. In fact, what is misleading is to take out a small snippet of what he has said, not even a full sentence, and hold it up as if that were his complete representation to the committee. It plainly is not, and I would challenge anyone to read Judge Kozinski's full discussion of his relationship of his employees and then declare it any way misleading. By the way, Judge Kozinski's successor, Mr. O'Connor, and several other witnesses confirmed the difficulties with problem employees faced by the judge.

As further clarification of the judge's statement, I asked former employees of Judge Kozinski at OSC during the second hearing—held at the request of Senators LEVIN and METZENBAUM—what their relationship was with the special counsel. They described their relationship with Judge Kozinski as "excellent." Two of these former employees were Mr. Lynn Collins and Mr. William Olivier. Numerous other letters were received by the Judiciary Committee confirming Judge Kozinski's assessment of his relationship.

The lack of evidence supporting this charge of "misleading the Senate" is apparent, as I think there is lack of evidence on all of the charges.

SALADANA CASE

We have heard allegations that Judge Kozinski misled the Senate in connection with his statements about a Saladana case handled by OSC during his tenure. Judge Kozinski testified that he had no knowledge of the circumstances surrounding the Saladana case because it was handled by the staff far below his level of consideration. A Mr. Horace Clark contended by memorandum, not in testimony before the committee, that his recommendations to drop the prosecution were overruled. In checking the written record of the Saladana case, however, the committee—in its second hearing—found several memos bearing on the question. In particular, the committee located two memos by Mr. Clark. The first recommended prosecution because Mr. Clark found a clear violation; the second spoke favorably about the case and recommended that certain be considered relevant to its adjudication. There was no indication that Mr. Clark ever recommended against prosecution.

In order to be thorough, the committee asked Mr. Clark's supervisor at the time, Mr. Collins, to testify. He had no recollection whatsoever of Mr. Clark ever recommending against prosecution. Moreover, he testified that Judge Kozinski was correct; that to his, Mr. Collins', knowledge the special counsel never was involved in the case.

Once again after exhaustive examination of the evidence, it became very clear that there was no substance whatsoever to the charge that Judge Kozinski had misled the Senate. In fact, the evidence was directly to the contrary.

SETTLEMENT QUESTION

We have also heard charges that Judge Kozinski misled the Senate, when in a letter to Senators THURMOND and BIDEN * * * he implied that Ms. Eastwood lost her case. In the first place, I would question whether we could make much of a case for misleading out of a mere implication which was all that the charge against the judge states. In this case, however, even the implication of the judge was entirely understood and far from mis-

leading. In fact, he attached with the letter one of the settlement documents which clarified the Eastwood case status. He did not attach the second, independent settlement document dealing with attorney fees only because that document was already before the Senate Judiciary Committee. He was hiding nothing. This case was entirely on the public record. The entire case was in the committee files. It had been discussed in the first hearing of the committee. This is hardly a case of misleading.

The faultiness of this claim goes even further, however. What I think is striking about the Eastwood case is not Judge Kozinski's conduct but Ms. Eastwood's. In the settlement agreement she stated that she "abjure[d] her allegations that Judge Kozinski or his staff engaged in any wrongdoing," the very same charges she now made before the committee. The American Heritage Dictionary defines that word "abjure" as follows:

To repudiate, or recant solemnly; to renounce under oath; forswear.

What I think is misleading is for Ms. Eastwood now to come in and make these same charges and not inform the committee that she had solemnly repudiated them in the past, and not to explain why she has now taken back her solemn oath. Ms. Eastwood did, in fact, "repudiate" her case as Judge Kozinski stated with all the facts on the record and before the committee. I fail to find, and think most any dispassionate observer would agree, that this is any basis for a charge of "misleading."

HARSH, CRUEL, "TECHNICOLOR" MEMOS

The two witnesses mustered against Judge Kozinski in response to the call of Senators LEVIN and METZENBAUM both agreed on one thing: He was "observed with proper writing," to use the words of one of them. They used words like "harsh" and "without compassion" to describe the efforts he put into correcting their written drafts. Frankly, I cannot think of a better commendation for a judicial candidate than that he is concerned enough about proper writing and legal argument to correct his employees.

AWARDS

During the hearing, it was noted that Judge Kozinski had given special achievement awards to 22 members of his staff while at the Office of Special Counsel. We heard allegations that Judge Kozinski gave awards to employees who had previously received unsatisfactory performance appraisals and that Judge Kozinski might have given out awards without the prior required justification. To clarify that issue, Senators METZENBAUM and LEVIN asked for the personnel records on all those employees given awards. At random, I picked the record of one employee who had been specifically identified by a prior witness in the hearing as someone who had received prior unsatisfactory performance assessments. In that record, we found the required prior justification. We read it into the record and clearly the individual in question did merit the recognition of the award.

In order to preclude someone from "second guessing" whether the justification was sufficient for an award, however, we called to testify Mr. O'Connor, Judge Kozinski's successor at OSC. He testified that the discretion to give an achievement award would lie entirely with the senior supervisor, in this case Judge Kozinski. He further testified:

I don't think he could give an award that was not justified if he decided to give it. The fact that he decided to give it justifies it.

Once again we have looked at allegations and find that they are not supported by the least evidence. If anything, these allegations ought to strengthen the Senate's resolve to support this nominee as worthy of the office to which he has been appointed.

LETTERS ON OFFICIAL STATIONERY

We heard further allegations that Judge Kozinski might have violated some sense of fair play by sending out letters concerning his nomination. He was accused of "lobbying on official stationery." Upon further examination and questioning, we learned that the judge had written to a few friends, the number of letters mentioned in the hearing was four, in response to written questions from them about the status of his nomination. In these letters, Judge Kozinski had commented upon the status of his nomination and, in one case at least, enclosed information about the nomination, but these were not instances of unsolicited lobbying. Once again, the allegations lack any merit.

WEEI EDITORIAL

We also heard allegations that the judge had somehow become involved in making an error of fact by enclosing with one of his letters of response to a friend requesting information about the nomination an editorial from radio station WEEI. I will read the relevant part of that editorial:

Opposing confirmation is an organization called the Government Accountability Project, which is sponsored by the Institute for Policy Studies (IPS). IPS is a revolutionary group hostile to the U.S. and with ties to terrorist groups such as the PLO and the Middle East Research and Information Project or MERIP. MERIP is perhaps best known for its leaflet after the massacre of Israeli olympic athletes in Munich, praising "the achievements of the Munich action."

In response to questions, however, it was made clear that Judge Kozinski did not ask WEEI to write the article, neither had he participated in any way in the radio broadcast of this editorial. He further testified that he sent it solely as a piece of information to a friend without necessarily endorsing its contents. If Senators were held to have fully endorsed everything they put in the RECORD, we might have some embarrassed colleagues. This charge is almost frivolous. Its relevance to this entire process is speculative at best.

AGE AND EXPERIENCE

We have heard suggestions that Judge Alex Kozinski lacks the age and experience to serve on the bench.

Judge Kozinski's ability and legal acumen more than compensate for his lack of age. Even though the ABA has a cardinal rule that requires a minimum of 12 years of bar membership before ascending to the bench, Judge Kozinski—with only 9 years as an attorney—was rated "qualified" by the ABA. In truth, he had to be exceptionally qualified to overcome the presumption raised by his youth. He did that to the satisfaction of the ABA.

Moreover, Justice William O. Douglas was about the same age as Judge Kozinski when he joined the Supreme Court. Justice Story was several years younger when he joined the Supreme Court. William Howard Taft was younger when he began his service on the U.S. Court of Appeals.

The Senate is not convened to judge age, but qualifications which Judge Kozinski has, and those are outstanding.

I would add that Judge Kozinski has had more experience than most Americans and has done a terrific job. He has lived behind the Iron Curtain and learned, from an absence of freedom, to appreciate the Constitution. His parents survived the Holocaust, teaching him to recognize and deplore tyranny and injustice to minorities.

He has clerked for Chief Justice Burger, finished No. 1 in his class at UCLA, edited his law review, and served with distinction for 3 years as chief judge of the Claims Court. We must also acknowledge his experience on the Claims Court.

Judge Kozinski took over a new court with new jurisdiction, few resources, and myriad unanticipated problems that accompany the inauguration of a new Federal court. He has earned the respect and loyalty of all the judges and staff of his court. In only 3 years, he has established that court as one with a fine reputation. He has reduced the backlog it was born with, despite being short one judge for more than a year. He has carried a full caseload in addition to his administrative duties as chief judge. In 3 years, he has published 56 opinions, disposed of over 170 cases, and handled countless motions and hearings. He has already logged 110 days of trial on the bench.

JUDICIAL MISCONDUCT CASE

We have heard allegations that Judge Kozinski "without the basic

procedural fairness * * * fined two attorneys * * * for filing a complaint he found to be without merit."

Once again, the facts disclosed by lengthy hearings show no evidence of unfairness or mishandling.

Judge Kozinski held that charges brought against Claims Court judges were not only groundless, but represented a serious abuse of the judicial process. In accord with well-established precedent in the Federal circuit, he imposed monetary sanctions and reprimanded the responsible attorneys. Both sanctions and reprimand fully complied with Claims Court rules and ABA standards.

The decision was affirmed by the full Claims Court and not appealed.

Only 4 months later, the same attorneys were reprimanded for the same practices by the chief judge of the seventh circuit in a related case.

Moreover, in the 1984 yearend report on the judiciary, Chief Justice Warren Burger singled out Judge Kozinski for praise for imposing sanctions on attorneys who abused the judicial process.

CONCLUSION

In sum, no allegation raised against Judge Kozinski has been shown to have probative evidence backing it up. The Senate has held three hearings on Judge Kozinski, has already confirmed him once as chief judge of the U.S. Court of Claims, has posed innumerable questions to him in writing and face to face, has requested vast piles of documents from offices he has served, and has inquired into minutiae of his life for the 5 months this confirmation has been pending. The Senate has reviewed all these allegations, lacking in substance though they may be.

After all these prolonged efforts to find some reason to fault Judge Kozinski, his record still rises above all criticism. I repeat, no allegation remains unrebutted, no criticism unexplained.

Without reservation and after examining every detail involved with this nomination, I can pronounce Judge Kozinski, in every way, an outstanding nominee worthy of the confirmation of the Senate.

I believe that he will make one of the finest judges this country has ever seen.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. McCONNELL. Mr. President, I am pleased to join in support of the nomination of Mr. Alex Kozinski, Chief Judge of the U.S. Claims Court, for appointment to a position on the U.S. Court of Appeals for the ninth circuit. Chief Judge Kozinski is one of the most qualified individuals to be nominated for this position in recent times, notwithstanding the fact that he is only 35 years of age. Because of his extraordinary background, and because of the extraordinary measures that those who oppose his nomination have taken, I would like to review both his background and the course of his nomination for the benefit of my colleagues.

Chief Judge Kozinski was born in 1950 in Bucharest, Rumania. I'm informed he came to the United States at the age of 12, and become a naturalized U.S citizen in 1968. After receiving his bachelors degree from UCLA in 1972, Chief Judge Kozinski took his law degree from that same institution in 1975. He graduated first in his class.

Following graduation from UCLA, Chief Judge Kozinski served as law clerk to Hon. Anthony M. Kennedy of the U.S. Court of Appeals for the Ninth Circuit, the same court to which he is now nominated to be a judge himself. The following year, he served as law clerk to Hon. Warren E. Burger, the Chief Justice of the U.S. Supreme Court. For the next 3 to 4 years, Chief Judge Kozinski was employed at prestigious law firms in Los Angeles and in Washington.

Following the election of President Reagan, he served as deputy legal counsel and as assistant counsel in the Office of the Counsel of the President. He became special counsel for the Merit Systems Protection Board in 1981. In August 1982, he became chief trial judge of the U.S. Court of Claims, and, when that court was abolished and the new U.S. Claims Court created, Chief Judge Kozinski assumed his current position. He has held that position for the past 3 years.

Throughout this period, Chief Judge Kozinski has displayed remarkable legal talent, and has demanded the highest standards of both himself and of those employed by him. At various times, he has been an innovative, effective and dedicated law clerk, attorney, special counsel, and chief judge.

Nevertheless, a small but dedicated group of opponents has gone to extraordinary lengths to sabotage Chief Judge Kozinski's nomination. An organization called the Government Accountability Project has steadfastly sought to elicit damaging testimony against Chief Judge Kozinski. Its legal director testified against him at the first Senate Judiciary Committee hearing in July of this year. In conjunction with that group, a number of former employees of the Office of Special Counsel of the Merit Systems Protection Board testified against Mr. Kozinski. Some, however, chose not to testify, but to air their grievances at a news conference conducted under the auspices of the Government Accountability Project. None of the allegations raised by these opponents to Chief Judge Kozinski's nomination had any serious merit, but served instead to highlight the demanding standards maintained by the judge, as well as, it must be admitted, the impatience the judge has displayed with those who worked under him who were unwilling to go about their professional obligations with the same sort of dedication.

On September 12, 1985, the Judiciary Committee unanimously, by a 17 to 0 vote, voted to report Chief Judge Kozinski's nomination favorably to the full Senate. Notably, at that hearing, the distinguished Senator from Illinois, Senator SIMON, whose staff had worked closely with the Government Accountability Project in connection with the nomination, stated that he knew of no reason to oppose this nomination.

Nevertheless, long after the nomination had been reported to the Senate floor, the distinguished chairman of the Senate Judiciary Committee agreed with the Senator from Ohio, Senator METZENBAUM, to hold a second hearing. That hearing, held on November 1, of course, had no bearing on the committee's recommendation to the full Senate, since the nomination had already been reported to the floor. Nevertheless, following a recently developed pattern concerning administration nominees to the higher Federal courts or to high positions in the Justice Department, that hearing focused not on the substance of the nominee's testimony or even on the qualifications of the nominee. Those issues had been considered and resolved in the prior hearing.

No, the November 1 hearing, much like the June 22 hearing on the nomination on William Bradford Reynolds to be Associate Attorney General, focused on the question of whether the nominee had misled, in any respect, the Judiciary Committee in its deliberations. In his Dear Colleague letter of October 30, 1985, the distinguished Senator from Michigan, in reference to affidavits provided by former employees of the Office of Special Counsel, as well as to certain other letters and documents, suggested that Chief Judge Kozinski "has misled, in a number of instances, the Senate Committee and its members."

I am happy to report today that far from such a state of affairs, I believe it can safely be said that Chief Judge Kozinski's critics, in their affidavits, had misled the Senator from Michigan. From my understanding of the testimony presented in that nearly full day of hearing, none of the allegations raised about Chief Judge Kozinski's integrity or his judicial temperament proved to have any merit. Moreover, as the Senator from Utah, Senator HATCH, so ably demonstrated at the hearing, the Judiciary Committee was never misled in its evaluation of the nominee's suitability for the office.

As the Senator from Michigan himself pointed out in his October 30, 1985, Dear Colleague letter, he was "well aware of support that Judge Ko-

zinski has gotten from well-respected members of the legal community." That support is well founded, for Chief Judge Kozinski has demonstrated his intellectual and temperamental suitability for the U.S. Court of Appeals beyond question. If there are those Government employees who found his standards too demanding, so be it. The U.S. Government could well do with more managers of Judge Kozinski's caliber, managers who demand performance and results in exchange for GS-15 level salaries and the perquisites and protections that go with them. More importantly, if Chief Judge Kozinski takes to the Federal court of appeals the same dedication to scholarship, hard work and respect for traditional values that he has displayed in his prior roles, then we are all the better for it.

SCHEDULE

Mr. DOLE. Mr. President, I had a number of inquiries from Senators from both sides about whether or not there would be votes tonight. I am advised that there was unanimous consent given to vote on this nomination to occur at 2 o'clock, but that prior to the vote there would be 10 minutes equally divided for debate. So I am prepared to announce there will be no more votes this evening.

We will be on the military construction bill tomorrow by 10 a.m. We will have votes probably before noon. This vote on the nomination will occur at 2 p.m.

We hope to do military construction; civil service—we are close to a time agreement on that—and D.C. appropriations. If we can conclude all those, plus get an agreement on reconciliation, we will not be in on Friday. But I do not want anybody to misunderstand what I just said. The "if" is conditional on the disposition of those items and getting an agreement on reconciliation. Otherwise, we will be in on Friday and votes can be expected.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, I reserve the balance of our time.

The PRESIDING OFFICER. If neither side yields time, time will run equally against both sides.

Mr. HATCH. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the quorum call not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, how much time remains?

The PRESIDING OFFICER. There are 9 minutes to each side remaining.

Mr. THURMOND. Mr. President, I yield myself such time as I may require.

Mr. William K. Olivier, former attorney-in-charge of the Office of Special Counsel, stated at the special hearing held on November 1, 1985:

I was the attorney in charge of the San Francisco field office of the Office of the Special Counsel from October 1979 until May of 1982.

I served under three separate Special Counsels: Patrick Swiggert, Mary Eastwood and Alex Kozinski. During that period of time, I enjoyed a good working relationship with all of the Special Counsels.

I think my best working relationship was with Alex Kozinski, himself. In fact, it was an excellent working relationship.

I have talked with the other field office chiefs—P.J. Windsor and Lennie Gavinski—and they have also echoed my sentiments regarding their working relationship with Alex as an excellent one.

I would like to address myself to a few comments that were made earlier today during this testimony as far as management of the office. In addition to a law degree, I have a Master's degree in Judicial Administration.

I have served as a management consultant to the Federal Judges for about three years while working with the Administrative Office of the U.S. Courts, as well as being in charge of the San Francisco field office of Special Counsel. I believe I am qualified to exercise an opinion as to Judge Kozinski's management ability, and I think he is an excellent manager.

I did leave the Office of the Special Counsel while Judge Kozinski was in charge. I advised him, as soon as he took over the Office of the Special Counsel, of my intentions to leave the office. It has nothing to do with Alex Kozinski whatsoever.

In fact, I stayed longer with the Office of the Special Counsel because of Alex Kozinski than I would have otherwise. It was a pleasure and a privilege to work for Alex Kozinski and I would work for him again.

Some of the comments earlier in the testimony today regarded morale of the office. I would say that, in my experience, morale during Mary Eastwood's tenure was the lowest in the Office of the Special Counsel while I was there.

I am not sure it had anything to do with Mary Eastwood so much as circumstances of the office; and the criticism of the office as being ineffective was widespread and brought by Congresswoman Patricia Schroeder as well as others.

This criticism of the office generally, as well as the office's inability to secure any successes with the Merit Systems Protection Board, since decisions had come down against us, had a large amount to do with the disatisfaction and frustration of the staff, and the consequent low morale of the staff.

Prior to Alex Kozinski even coming to the office I had many of my staff members talk to me about leaving the Office of the Special Counsel and pursuing some other careers, and these are very dedicated individuals.

In working with Judge Kozinski, I found that his judgment and his decisions were well-reasoned. He often required extensive reasons for us to pursue things. If I made a recommendation to him, he would always examine me very carefully on it and explore all avenues before he made a decision.

In my experience in working with him, everything he did was well-reasoned and well thought out. He was a very caring individual and he thought very much about the morale of the staff as well as the care of the staff in pursuit of their jobs.

Mr. President, I think that absolutely refutes any charge here that this man did not care about his staff.

The whole thing was this man, Judge Kozinski, is a perfectionist. He demanded high standards. Those who did not want to produce and live up to those high standards were unhappy.

I admire Judge Kozinski. I wish we had more people in the Federal Government like him who would set high standards for employees. We would have a much more efficient administration of the Government than we have otherwise.

Again, I want to say that Judge Kozinski is an able man. He is a man of character. No one questions his ability. No one questions his professional attainments. No one questions his integrity. No one questions his efficiency.

He is an absolutely fine man who sets high standards and those who lived up to high standards and agreed to high standards are all for him.

Here is a man who served with a number of the special counsel and he puts Judge Kozinski at the top. To me it is unthinkable that the Senate would not confirm this fine, outstanding young man who has done so well in everything he has undertaken.

Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator has 4 minutes remaining.

Mr. THURMOND. Mr. President, Mr. John Erck, former attorney in charge of Hatch Act enforcement for the Office of Special Counsel, informed the committee by affidavit on November 1, 1985:

I regret that I am unable to attend this hearing and testify in person concerning Alex Kozinski's qualifications to be a judge on the Ninth Circuit Court of Appeals. I am currently on Reserve duty at Fort Drum, New York, and will not return to the Washington, DC, area until November 2nd.

If I were present, I would testify, under penalty of perjury, that Alex Kozinski was an outstanding Special Counsel. He was demanding, but he was fair.

He set high standards for himself and for everyone who worked for him. In my opinion, the standards were neither impossible nor unreasonable.

He was always available and always eager to teach everyone who demonstrated a willingness to meet his standards. I cannot recall a single time when Alex did not make himself available to discuss legal issues, office matters or personal concerns.

I worked harder for Alex Kozinski than any attorney for whom I have ever worked. I would hasten to add that I learned more and enjoyed my work more than I have before or since.

I would like to comment briefly on his professional ethics. He would not allow at-

torneys to prepare briefs advancing specious or frivolous arguments, and he would require us to include citations to case authority which was contrary to the position being argued by our office.

He constantly emphasized a high standard of objectivity that he required of a Government attorney.

I was the attorney primarily in charge of Hatch Act enforcement during the time that Alex Kozinski was Special Counsel. I learned early that Alex did not want to know the political party of the respondent in a case being investigated.

Because he made it clear on so many occasions that he wanted to make decisions regarding prosecutions in Hatch Act cases without knowing the political affiliation of the person being charged, political affiliation was an item of information that was never discussed.

With regard to the case involving Guadalupe Saldanna, I recall discussing the fact-finding strategy with the investigator. I do not recall the investigator or anyone else recommending against prosecution.

After the investigation was completed, I discussed the case with Alex and we agreed that the prosecution should go forward. He did not demonstrate any peculiar interest in the facts of the case that would cause Saldanna to be singled out for special treatment.

In this case, as in others, Alex was concerned with whether there was sufficient evidence to establish a violation of the law. Saldanna's party affiliation never entered the discussion.

Mr. President, there is a statement by another former attorney, one in charge of the Hatch Act enforcement for the Office of Special Counsel, Mr. John Erck.

Mr. President, that, again, corroborates the statement that I just gave by Mr. William K. Olivier.

Mr. President, these are lawyers who admired Mr. Kozinski for setting high standards, who were willing to work hard and did work hard under him, harder than they did before or afterward, according to their statements.

Judge Kozinski is a man of principle. He is a man of dedication. He worked harder than most people. He sets standards higher than most people. It is because of that that some of these employees who did not want to work as hard or to those high standards complain against him.

These people whose statements I have read have said he was caring of people.

I think sometimes employees who did not want to exert the last effort that Judge Kozinski required of them complain about it. That is natural, I guess.

We have all kinds of people in public service, some who will work and do what they have to, some who will do less than they ought to, and some who will do more than they ought to.

Judge Kozinski is a man who would do more than required of him; who would go the extra mile and who would fight for his Government, for the Government for which he was working. I admire Judge Kozinski for the high standards he set and the great principle for which he stood.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. THURMOND. Mr. President, I ask unanimous consent to have a statement of allegations and responses printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ALLEGATIONS AND RESPONSES

1. Allegation: Judge Kozinski misled the Senate in a letter to Senators Thurmond and Biden describing a settlement agreement arrived at with former Acting Counsel Mary Eastwood and the OSC.

Response: Judge Kozinski responded:

"As you are aware * * * my letter of October 17, 1985, was a response. It was response to a letter written earlier by Senator Levin to the Committee. It is an October 8th letter.

"At page 8 of that letter Senator Levin stated the following:

* * * 'Ms. Eastwood, herself, was terminated by Judge Kozinski after being isolated by him from the rest of the staff and ordered to accept reassignment out of town. Her appeal of the termination was settled in her favor, however, after Mr. Kozinski left office.'

"Now, I took no issue with that statement. That was a statement that was presented to the Committee and I had no quarrel with it. I simply added two facts:

"The first one, that she had repudiated her charges as part of the settlement; the second one, that she did not get her job back permanently.

"When taken together with Senator Levin's statement—which, again, I did not dispute—my statement simply completed the record * * *

"Senator Levin's statement obviously disclosed to the Committee that she had gotten a lot. She won the appeal, Senator Levin said, was settled in her favor.

"I did not dispute that. I did not say it was not settled in her favor. I took that as a given * * *

'What I stated was—the question, I believe, Senator Levin asked me is whether my characterization was fair. What I said to him are that standards of fairness depend on the context and the type of document.

"If this were a judicial opinion, I would, of course, have to disclose the evidence on both sides, set it forth in the same document, and then reach a conclusion. I felt that this was not that kind of document, that this was an advocatorial document: that allegations had been made to him and, through him, to the Committee, and that the purpose in my letter was to respond and add such facts that I thought would give a clearer, fuller, more accurate and, yes, more favorable picture of the situation to me * * * taking as given that what Senator Levin had said and what I had not disputed would stand unrebutted * * *

"I think that one has to be fair with the Committee. I think one has to be honest with the Committee. One has to disclose any fact that the Committee is not otherwise aware of that might be relevant.

"The Mary Eastwood appeal has been a matter of public record. All those documents have been a matter of public record.

"It was clear to me that Senator Levin had either talked to Ms. Eastwood or was otherwise fully advised of the situation and, through him, the Committee had been fully advised of the situation.

"I am simply pointing out, as I said, the parts of the record that I thought might have been overlooked and that might have been favorable to me."

2. *Allegation:* Judge Kozinski did not advise the two attorneys sanctioned in a judicial misconduct complaint by notice or give them a hearing on the matter or the opportunity to respond. *Eash* v. *Riggins Trucking* (1985) was cited as the case of precedent in this matter.

Response: Judge Kozinski's ruling on this complaint occurred in 1983, two years prior to the *Eash* case. Therefore, how could Judge Kozinski have been bound by this ruling? On this same allegation, Judge Kozinski also stated that:

"It may be significant to note that only four months later, Chief Judge Cummings of the Court of Appeals for the Seventh Circuit imposed a monetary sanction upon the very same counsel in a case involving the same subject matter (*Reid* v. *United States*). In so doing the chief judge stated: 'In these cases it is not the obstinacy of the appellants but rather that of their attorney which is of more concern. The record suggests that this litigation was commenced to harass the government. In addition, counsel for the appellants' argument that federal condemnation authority can be preempted by state regulation and counsel's response to the appellees' motion to correct a clerical error in *Winkler* are both so meritless as to amount to further evidence of bad faith.' "

3. *Allegation:* On the Claims Court, Judge Kozinski angrily and summarily—without the basic procedural fairness of notice or an opportunity for a hearing—fined two attorneys $500 each for merely filing a judicial misconduct complaint he found to be without merit, and widely distributed copies of his opinion castigating the attorneys.

Response: Judge Kozinski responded:

"I discussed that case at some length. Eight pages of my letter of November 17th dealt with that case.

"Now, I wrote a lengthy opinion in the case because, like you, I thought the issue was a difficult one. I don't think it is an easy issue, but it is the nature of trial judges that we can get reversed on appeal and I wanted to be very careful that my reasons, my methodology were laid out in case I should be wrong.

"Now, the attorneys in question could have, had they thought me wrong, taken appeal and, if successful, they would have had their fine suspended or reversed. They did not.

"The fines were paid. My action became final.

"That doesn't make it 100 percent free from doubt because law simply is not like that. We do our best. We try to lay it out. And then we let a higher authority decide whether or not we were correct * * *

"Senator Levin and I had discussed our differences about this case when we spoke in private and we have different views as to what is relevant precedent. He points out, and I think he is absolutely right, that there are no precedents involving complaints of judicial misconduct cases; and he views—and I think this is a very respectable view—he views these types of cases as inherently different from other cases.

"I view judicial misconduct cases as simply another pleading before a court and, therefore, that precedents relevant in other contexts are applicable. I would suggest that my view is at least worthy of respect; per-

haps in Senator Levin's view not equal respect, but as a different view * * *

"In any case, I pointed out to Senator Levin, I laid it all out. It was a very lengthy opinion. I invited the view, as I do with all of my opinions.

"I have written almost sixty opinions since I have been at the Claims Court. I have decided numerous cases. And I try to be very careful in my rulings to lay out my reasons so that if the appellate court should disagree I want to be reversed.

"I don't want to be affirmed because it misunderstands my reasons because it is important that the law be developed in an intelligent, fair and honest fashion. I would much rather be reversed because the appellate court disagrees with me than be affirmed because it misunderstands my reasoning.

"That is what I did in this case. There was no appeal so we do not know what the appellate court would have done.

"I cannot warranty to this body that had an appeal been taken I would have been affirmed. Obviously, if I did not think I would be affirmed in an eventual appeal I would not have issued the opinion.

"I still think it's right."

4. *Allegation:* An employee of the Office of Special Counsel with critically high blood pressure, while on sick leave, was terminated by Judge Kozinski. This employee brought suit in the U.S. District Court for reinstatement and use of his sick leave.

Response: Judge Kozinski's response states:

"As to the case involving Philippe Neff, I can add very little to what is disclosed in the transcript of the hearing before Judge Bryant. As the transcript makes clear, the question in that case was not whether the employee would continue working in the office; it was clear that he was permanently disabled and that he could not return. At issue was whether he would continue on the payroll while 'running out' his sick leave. The employee would have had a right to do so if he had applied for disability retirement, an option that my staff had strenuously urged upon him. The case was finally settled when Mr. Neff agreed to pursue this course of action. It is regrettable that a lawsuit was required to persuade Mr. Neff to take the course we urged upon him to begin with, although I recognize that members of my staff could have been more careful and thorough in explaining to him (and to me) his rights in the circumstances. As head of the office I must, of course, accept responsibility for any shortcomings in the agency's treatment of Mr. Neff."

5. *Allegation:* Judge Kozinski is described as an individual who was "intemperate," "harsh," "cruel," "demeaning," "disingenious," and "without compassion" while serving as Special Counsel to the Merit Systems Protection Board.

Response: Judge Kozinski stated:

"I do not, Mr. Chairman, claim that my performance as Special Counsel approached perfection; I am human and therefore neither omniscient nor immune from error. There are certainly things I did as Special Counsel that, although defensible, I might do differently with the benefit of hindsight and experience. While I believe that I did a good job as Special Counsel, I hope that I would do a better job today if entrusted with a similar responsibility."

6. *Allegation:* Judge Kozinski allegedly sought the dismissal of an employee who had contracted cancer. Judge Kozinski allegedly issued a memo, approximately one month prior to her retirement, announcing her immediate departure.

Response: Judge Kozinski stated:

"This was an unfortunate clerical error. It is my practice to issue memoranda announcing the arrival and departure of staff; I have continued this practice at the Claims Court. These memoranda promote fellowship among employees by keeping them advised of each other's arrival, departure and future plans. As best I can reconstruct events, the person in charge of preparing such memos for my signature made an error as to the employee's proposed departure date and the memo was issued about a week prematurely. Instead of bringing the error to my attention, the employee left without a word. As Mr. James' affidavit notes, a subsequent call from her husband brought the matter to my attention and I advised him of the error. Embarrassing as this incident is to me personally, there is no claim that the employee in question suffered an early termination or loss of pay. My memorandum was not an official personnel action and could have no effect for purposes of pay or employment. While I do not have access to the employee's personnel file to verify this, my understanding is that she remained on the payroll until her scheduled departure date."

7. *Allegation:* An employee was terminated by Judge Kozinski after being isolated by him from the rest of the staff and ordered to accept reassignment out of town.

Response: Judge Kozinski stated that:

"The facts of Ms. Eastwood's case are simple. when a vacancy occurred, I placed her in charge of our largest regional office in San Francisco, by any measure hardly a hardship assignment. In light of Ms. Eastwood's experience and familiarity with the Office, I felt strongly that she could help bring our largest and most distant regional office 'closer' to Washington. For reasons never fully explained, Ms. Eastwood chose not to go to San Francisco, abandoning the responsibilities entrusted to her. While I cannot quarrel with Ms. Eastwood's personal decision, a small agency such as the Office of the Special Counsel cannot always accommodate employees in their geographic preferences; indeed, geographic flexibility is one of the hallmarks of the Senior Executive Service, of which Ms. Eastwood was a member. Upon Ms. Eastwood's refusal to serve, we were forced to hire an attorney from the outside to head the office, obviously, a much less desirable alternative. I might add that, contrary to Ms. Eastwood's charges of discrimination on the basis of political affiliation, the person hired turned out to have probably been a Democrat."

8. *Allegation:* A former employee of the Office of Special Counsel stated that Judge Kozinski placed a "gag order" on her activities.

Response: Judge Kozinski responded to this allegation that:

"The matter of Ms. Chin and the so-called 'gag order' was considered by the Committee, having been raised in the testimony of Thomas M. Devine on July 17, 1985. I am pleased that a copy of the so-called 'gag order' has found its way to the Committee because, on its face, the order refutes the claims made about it. In the first place, the memo was a draft never actually issued to Ms. Chin; she herself admits she had to obtain a copy through FOIA. Moreover, the memo does not bear my manuscript initials, the *sine qua non* of final approval.

"More importantly, the memorandum simply is not a gag order. It is a supervisory directive as to matters within the employee's *official* responsibilities; it circumscribes only intra-agency communications concerning government business, conducted by use of government facilities. The memorandum specifically left Ms. Chin 'free to discuss any matter not constituting official business with field or branch office personnel * * *' Even had the memorandum been issued to Ms. Chin, it would not have impaired her right to speak to the press, to Congress, to other government employees or to anyone else, so long as she did so on her own time as a private individual."

Mr. CRANSTON. Mr. President, will the Senator from Michigan yield me some time?

Mr. LEVIN. Mr. President, I yield to my friend from California that portion of the remaining time he may need.

Mr. CRANSTON. I thank the Senator from Michigan. I shall not use all the time and shall yield back the remainder of it.

Mr. President, several months ago, when Alex Kozinski was nominated for the ninth circuit court, I was contacted by several friends and attorneys from California who recommended Judge Kozinski as a man whose high intellect and superior legal ability qualified him eminently for the court. At the time I advised the Judiciary Committee of my confidence in the recommendations I had received and indicated that I supported his nomination.

Since then, the continuing allegations and revelations about Judge Kozinski have persuaded me to reconsider my earlier judgment about his qualifications. I feel I must, in good conscience, vote against his confirmation.

The case against Judge Kozinski's confirmation has been adequately presented by Senator LEVIN and others. I will not rehearse it here. Moreover, I presume that Judge Kozinski will be confirmed and soon will be a judge on the ninth circuit—my opinion notwithstanding.

Since our focus should always be on the future, my major concern today is the kind of judge Alex Kozinski will be. There is no question in my mind about his intellect or his legal ability. But intellectual strength, like any God-given ability, can be misused and abused. When a highly intelligent judicial candidate exhibits qualities that can be described as overbearing, disingenuous, hostile, without compassion, and even sadistic, it is reasonable to question whether intellectual arrogance has diverted that individual from the pursuit of wisdom, which should be the foremost activity of any judge. Although Alex Kozinski appears to be thus diverted, he is clearly intelligent enough to learn from his confirmation experience and to understand that he will never be a superior judge unless he remedies these failings.

I sincerely hope he does so.

Mr. President, I yield back whatever time remains to the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. I thank the Chair. I believe all the time on the other side has been utilized. I yield back the remainder of my time.

Mr. DOLE. Mr. President, I am pleased to support Alex Kozinski to serve on the Ninth Circuit Court of Appeals.

Judge Kozinski has an extensive legal background which will serve him well as Federal court of appeals judge. A graduate of the University of California Law School, he has clerked for both Judge Anthony Kennedy on the ninth circuit and Chief Justice Burger on the Supreme Court. He is a member of both the California and District of Columbia bars. He also has a number of years of experience practicing law with the firm of Forry, Golbert, Singer, & Gelles in Los Angeles and the local firm of Covington & Burling. Finally, he has also served as a legal counsel to President Reagan, as well as head of the U.S. Claims Court—experience which gives him a solid base of experience in both the public and private sectors.

An immigrant from Bucharest, Romania, Alex Kozinski has overcome language and cultural barriers to excel in his chosen profession. Few attorneys at his young age, or any age, can claim such a broad range of experience.

Regrettably, there was some measure of controversy which surrounded his confirmation during the Judiciary Committee's hearings. However, after extensive scrutiny, I believe the record compiled by the committee amply demonstrates that Judge Kozinski is a man of integrity and honor who will be a great asset to the Federal judiciary.

My congratulations to him, his wife, Marcy Jane Tiffany, and their two children.

The PRESIDING OFFICER. All time having expired, the majority leader is recognized.

Mr. DOLE. Mr. President, I ask unanimous consent that the vote on the nomination occur, following 10 minutes evenly divided, at 2 p.m., tomorrow.

The PRESIDING OFFICER. The vote will occur at 2 p.m. tomorrow.

Mr. LEVIN. Mr. President, following the 10 minutes that will be equally divided.

The PRESIDING OFFICER. After 10 minutes debate as indicated by the majority leader.

Mr. DOLE. No, Mr. President, the vote will be at 2 p.m. The 10 minutes start at 1:50 p.m.

The PRESIDING OFFICER. That is correct.

Mr. DOLE. I thank my colleague.

ORDER OF BUSINESS

Mr. DOLE. Mr. President, I have already indicated there will be no more votes this evening. I am not sure whether the distinguished chairman wishes to move to the Cooper nomination tonight.

LEGISLATIVE SESSION

Mr. DOLE Mr. President, I ask unanimous consent the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

At 10:22 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bill and joint resolutions:

H.R. 1210. An act to authorize appropriations to the National Science Foundation for the fiscal year 1986, and for other purposes;

H.J. Res. 126. Joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Drug Abuse Education Week"; and

H.J. Res. 282. Joint resolution designating the week beginning October 27, 1985, as "National Alopecia Areata Awareness Week."

The enrolled bill and joint resolutions were subsequently signed by the President pro tempore [Mr. THURMOND].

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1968. A communication from the Secretary of the Interstate Commerce Commission transmitting, pursuant to law, a report on decisions to extend time periods for action by the Commission on certain pending appeals; to the Committee on Commerce, Science, and Transportation.

EC-1969. A communication from the Secretary of Transportation and the President of the National Railroad Passenger Corporation, transmitting, pursuant to law, a report on the progress of the Northeast corridor improvement project; to the Committee on Commerce, Science, and Transportation.

EC-1970. A communication from the Administrator of the National Oceanic and Atmospheric Administration transmitting, pursuant to law, the Federal plan for ocean pollution research, development, and monitoring, 1985-89; to the Committee on Environment and Public Works.

EC-1971. A communication from the assistant legal adviser for treaty affairs, Department of State, transmitting, pursuant to law, copies of international agreements, other than treaties, entered into by the United States within the 60 days previous to November 4, 1985; to the Committee on Foreign Relations.

EC-1972. A communication from the Attorney General of the United States transmitting, pursuant to law, the 1984 report of the Attorney General on the administration of the Foreign Agents Registration Act; to the Committee on Foreign Relations.

EC-1973. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Implementing the Small Business Innovation Development Act—the First Two Years"; to the Committee on Small Business.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STEVENS, from the Committee on Appropriations, with amendments:

H.R. 3629: A bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-176).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Finance:

Ronald E. Robertson, of Virginia, to be general counsel of the Department of Health and Human Services.

(The above nomination was reported from the Committee on Finance with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BUMPERS:

S. 1834. A bill for the relief of Manuel S. Nzambi, his wife, Beatrice Nzambi, and their children, Edward Nzambi, Immanuel

Nzambi, Paul Nzambi, and Wakanwa Nzambi; to the Committee on the Judiciary.

By Mr. METZENBAUM:

S. 1835. A bill to provide assistance in alleviating the suffering of victims of Alzheimer's disease and their families; to the Committee on Finance.

By Mr. SIMON (for himself, Mr. BOREN, Mr. BRADLEY, Mr. BUMPERS, Mr. CHILES, Mr. COCHRAN, Mr. D'AMATO, Mr. DECONCINI, Mr. DOLE, Mr. EAST, Mr. EXON, Mr. GORE, Mr. HELMS, Mr. HOLLINGS, Mr. INOUYE, Mr. KASTEN, Mr. KERRY, Mr. MCCLURE, Mr. MELCHER, Mr. MURKOWSKI, Mr. NUNN, Mr. PELL, Mr. PRYOR, Mr. QUAYLE, Mr. STAFFORD, Mr. STENNIS, and Mr. THURMOND):

S.J. Res. 232. Joint resolution to designate October 6, 1986, through October 10, 1986, as "National Social Studies Week"; to the Committee on the Judiciary.

By Mr. COHEN (for himself and Mr. MITCHELL):

S.J. Res. 233. Joint resolution disapproving the decision of the President to deny import relief to the domestic footwear industry; to the Committee on Finance.

By Mr. WILSON (for himself, Mr. DOLE, and Mr. BRADLEY):

S.J. Res. 234. Joint resolution to designate the week of February 9, 1986, through February 15, 1986, as "National Burn Awareness Week"; to the Committee on the Judiciary.

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. CHAFEE, Mr. HOLLINGS, and Mr. KASTEN):

S.J. Res. 235. Joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. METZENBAUM:

S. 1835. A bill to provide assistance in alleviating the suffering of victims of Alzheimer's disease and their families; to the Committee on Finance.

ALZHEIMER'S DISEASE DEMONSTRATION, RESEARCH, RESPITE, AND ASSISTANCE ACT

● Mr. METZENBAUM. Mr. President, I am today introducing the Alzheimer's Disease Demonstration, Research, Respite, and Assistance Act, legislation designed to strengthen and to make more coherent our national response to Alzheimer's disease, an affliction that has devastated the lives of millions of Americans.

Alzheimer's disease, Mr. President, is a neurological disorder that, before killing its victims, renders them incapable of caring for themselves.

How widespread is it?

Approximately 2.5 million to 3 million Americans suffer today from Alzheimer's.

According to the Public Health Service, this terrible disease strikes 1 of every 20 people between the ages of 65 and 75. And beyond the age of 80, it afflicts one person in every five. But it has been known to strike people in their thirties, too, and people at the peak of their careers and contributions to society.

Alzheimer's is a deadly disease—the fourth leading killer of adults in this country. Each year, 150,000 Americans die from this disorder and related complications.

But these are only numbers, Mr. President. And numbers cannot begin to convey the tragedy of Alzheimer's—the tragedy for those who contract this affliction, and for their families, who must not only watch the mental and physical disintegration of a loved one, but in many cases, provide the round-the-clock care to the victim.

Mr. President, in the past few years, several Members of the House and the Senate, myself included, have sponsored a variety of efforts to address one or another facet of Alzheimer's disease. And from these efforts, we have learned that, to deal with the very broad impact of Alzheimer's requires bringing together in a coordinated manner a wide, wide range of programs and services.

The legislation I am introducing today will establish basic guideposts in order to promote a coordinated program.

NATIONAL ADVISORY COUNCIL

Two years ago, the Secretary of HHS established an interagency task force to help coordinate Government efforts pertaining to Alzheimer's disease. The task force has served in many ways as a catalyst for agency programs and activities.

The legislation I am introducing today would take the task force concept a step further, by establishing in statute for a period of 6 years, an advisory council that would report to the President and the Congress.

This advisory council would be composed of representatives from Government, the research and medical communities, health care providers, researchers, and representatives of families whose members have been stricken with Alzheimer's. One of the council's primary functions would be to help develop, encourage, and guide research on Alzheimer's disease. But beyond that, the council would serve as a "switching station"—a mechanism for conveying new information and ideas to physicians, nurses, care givers, and family members.

RESEARCH, STATISTICS, AND INFORMATION EXCHANGE

To begin with, this legislation would underscore the critical need for both basic and clinical research on Alzheimer's disease. It would promote research partnerships between Government agencies such as the National Institutes of Health and the Veterans' Administration and, at the same time, encourage collaborative efforts among Government agencies, university research centers, pharmaceutical houses, and others throughout the medical and scientific community. And it would establish five additional research centers.

I hasten to add that while medical research offers the only real hope for finding a cure, we cannot overlook the desperate needs of those who are already struggling to cope with the day-to-day ravages of this disease. For that reason, the legislation I am introducing would also encourage long-overdue research and demonstration on delivering health services.

The legislation would designate the National Institute on Aging as the agency responsible for collecting and disseminating information on Alzheimer's disease.

DEVELOPMENT AND COORDINATION OF SERVICES

Approaches that may be helpful to Alzheimer's patients are often beyond the reach of too many people, owing to a lack of income, and absence of community resources, and shortages of trained personnel.

Rather than establish a whole new system of community-based services, this legislation would make use of mechanisms already in place throughout the country. The administration on aging's extensive network of State and area agencies, the VA's medical and nursing facilities, and the family support systems of national voluntary organizations, such as the Alzheimer's Disease and Related Disorders Association, would all be utilized in a coordinated way to assist victims and their families. The legislation provides also for low-cost loans to those private individuals who will establish day care centers for Alzheimer's families.

Among other things, the National Institute on Aging and the National Institute on Mental Health with the advice of the National Advisory Council would be assigned responsibility for designing and implementing training programs for those professionals whose job it is to care for victims of the disease.

LONG-TERM CARE STRATEGIES

Mr. President, since the turn of this century our Nation has made tremendous strides in the fields of health and medical science. New drugs, new technologies, and improved procedures have all helped to raise the health standards of our citizens.

Still, our system of social protections—particularly for the elderly—is not reaching all of the target population. In the case of Alzheimer's patients, families most often bear the full burden of care with little help from others. Medicare does not cover the long-term costs of caring for victims, nor do most private insurance plans. For that matter, few local communities are either able or willing to assume at least a part of the responsibility for care.

Under the legislation I am introducing today, there would be tax relief for the short term, but for the longer term, the appropriate Government agencies such as the Health Care Financing Administration, would, with the assistance of the National Council,

assume responsibility for developing systems to provide long-term care and alternative financing mechanisms specifically for victims of Alzheimer's disease and related disorders. An advisory subpanel of the National Council would work with HCFA, providing recommendations and expertise.

In order to encourage new and innovative approaches to care, the Secretary of HHS is directed to authorize Medicare waivers for home health care and other support services. The Secretary will also promulgate regulations to prohibit discrimination against Alzheimer's patients who are eligible for Medicaid assistance.

At the same time, the National Institute on Aging and the National Center for Health Statistics are directed by the legislation to collect, maintain and provide for the exchange of medical information and the development of a national data base on Alzheimer's disease.

UNIFORM VETERANS' ADMINISTRATION POLICY

It is not easy to believe, Mr. President, but it is a fact that the Veterans' Administration currently has no consistent policy with respect to veterans with Alzheimer's disease. As a consequence, some victims of the disease are admitted to VA medical facilities, while others are either denied admission or are referred to State-run or private facilities.

The legislation I am proposing today will address this problem by requiring the VA to set fair and consistent guidelines regarding veterans with Alzheimer's disease. As part of that effort, VA facilities will be required to provide at least minimum services, including assessment and diagnosis, counseling, and tracking for veterans over age 55 who suffer from Alzheimer's disease. The VA is also required to develop a limited number of high quality demonstration projects in order to explore the most effective means of providing care outside of institutional settings. Such services would include adult day care, respite care, hospital-based home care, and home intervention teams.

SOCIAL SECURITY DISABILITY BENEFITS

Yet another problem confronting most victims of Alzheimer's disease pertains to the Federal Disability Insurance Program.

Currently, the statutes authorizing disability benefits do not preclude benefit payments to individuals suffering from Alzheimer's disease. Nevertheless, the guidelines used by State examiners to evaluate benefit claims are rather vague when it comes to this ailment. This, in turn, has led to what can only be described as unfair treatment of those who have a rightful claim to benefits.

This legislation charges the National Advisory Council with responsibility for channeling the most current scientific and medical information to the Social Security Administration. The information will then be used to update Social Security guidelines on the Disability Program, as well as on supplemental security income [SSI]. And, in addition to putting the latest information in the hands of those who need it most—the claims examiners—the Social Security Administration will be required, periodically, to train and retrain examiners.

TAX-RELATED PROVISIONS

In addition, this legislation will extend tax relief to families. First, it increases the dependent adult day care tax credit allowed while caring for a victim at home. Second, it provides a deduction for dependent adult home health care services and equipment. And finally, it allows a tax deduction for nursing home care prescribed by specified health professionals.

EDUCATION AND TRAINING

Finally, this legislation provides for the development and dissemination of curricula on Alzheimer's disease and for the training of various care givers, including clinical care providers, patient families, home health aides, nursing home personnel, and safety and transportation personnel. This month is national Alzheimer's Disease Awareness Month, and we must continue to raise public awareness to the tragic need to provide assistance for its victims and to move toward its elimination. Mr. President, the intent of this legislation is to promote a coordinated and compassionate approach to the problem of Alzheimer's disease. I hope that we will be able to act expeditiously on this legislation, and ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1835

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Alzheimer's Disease Demonstration, Research, Respite, and Assistance Act of 1985".

SEC. 2. NATIONAL COUNCIL ON ALZHEIMER'S DISEASE.

(a) ESTABLISHMENT.—There is established the National Council on Alzheimer's Disease (hereafter in this Act referred to as the "National Council").

(b) DUTIES.—The National Council shall be responsible for planning, coordinating, and monitoring activities carried out by Federal agencies under this Act and shall carry out the duties assigned to the National Council by this Act.

(c) COMPOSITION.—(1) The National Council shall be composed of twenty-four members as follows:

(A) Eight members appointed by the President.

(B) Eight members appointed by the President pro tempore of the Senate, upon the recommendations of the majority leader and the minority leader of the Senate.

(C) Eight members appointed by the Speaker of the House of Representatives, upon the recommendations of the majority leader and the minority leader of the House of Representatives.

(2) Of the eight members appointed by the President under paragraph (1)(A), of the eight members appointed by the President pro tempore of the Senate under paragraph (1)(B), and of the eight members appointed by the Speaker of the House of Representatives under paragraph (1)(C)—

(A) three shall be physicians or scientists involved in the treatment of, or research relating to, Alzheimer's disease; and

(B) five shall be from representatives of family members of patients with Alzheimer's disease, individuals providing health and social services to patients with Alzheimer's disease, individuals conducting health services research with respect to Alzheimer's disease, private insurers, national voluntary organizations, and the general public.

(d) TERM OF OFFICE.—The term of office of a member of the National Council shall be four years, except that—

(1) of the members first appointed to the National Council under subsection (c)(1)(A), four shall be appointed for a term of two years and four shall be appointed for a term of four years, as designated by the President at the time of appointment;

(2) of the members first appointed to the National Council under subsection (c)(1)(B), four shall be appointed for a term of two years and four shall be appointed for a term of four years, as designated by the President pro tempore of the Senate at the time of appointment; and

(3) of the members first appointed to the National Council under subsection (c)(1)(C), four shall be appointed for a term of two years and four shall be appointed for a term of four years, as designated by the Speaker of the House of Representatives at the time of appointment.

(e) CHAIRMAN.—The National Council shall elect a Chairman from among its members.

(f) MEETINGS.—The National Council shall meet four times each year, as well as at the call of the Chairman.

(g) QUORUM.—Fourteen members of the National Council shall constitute a quorum, but a lesser number may hold hearings. A vacancy in the National Council shall not affect its powers.

(h) HONORARIUM.—Each member of the National Council who is not an officer or employee of the United States shall receive an honorarium of $100 for each meeting of the National Council which such member attends. Any member of the National Council who is an officer or employee of the United States shall receive no compensation for service as a member of the National Council.

(i) EXPENSES.—While away from their homes or regular places of business in the performance of services for the National Council, all members of the National Council shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under section 5702 of title 5, United States Code.

(j) PERSONNEL.—(1) The Chairman of the National Council may, without regard to the civil service laws, rules, and regulations, appoint and fix the compensation of an executive secretary and such other additional personnel as may be necessary to enable the National Council to carry out its functions.

(2) Any Federal employee may be detailed to the National Council without reimbursement, and such detail shall be without interruption or loss of civil service status or privilege.

(3) The National Council may produce temporary and intermittent services under section 3109(b) of title 5, United States Code, at rates of individuals which do not exceed the daily equivalent of the annual rate of basic pay prescribed for GS-18 of the General Schedule under section 5332 of such title.

(k) POWERS.—(1) The National Council may, for the purpose of carrying out this Act, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the National Council considers appropriate.

(2) The National Council may secure directly from any department or agency of the United States information necessary to enable the National Council to carry out this Act. Upon request of the Chairman of the National Council, the head of such department or agency shall furnish such information to the National Council.

(3) The National Council may accept, use, and dispose of gifts or donations of services or property.

(4) The National Council may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(l) SUPPORT SERVICES.—The Administrator of General Services shall provide to the National Council on a reimbursable basis such administrative and support services as the National Council may request.

(m) ANNUAL REPORT.—Within one year after the date of enactment of this Act, and annually thereafter, the National Council shall prepare and transmit to the President and the Congress a report which describes the activities of the National Council under this Act.

(n) AUTHORIZATION.—There are authorized to be appropriated such sums as may be necessary to carry out the activities of the National Council under this Act.

(o) TERMINATION.—The National Council shall terminate six years after the date of enactment of this Act.

SEC. 3 EXPANSION AND COORDINATION OF RESEARCH ON ALZHEIMER'S DISEASE.

(a) RESEARCH PARTNERSHIPS.—(1) To facilitate research with respect to Alzheimer's disease, the National Council shall develop and encourage partnerships between—

(A) Federal agencies, particularly the National Institute on Aging, the National Institute on Mental Health, the Health Care Financing Administration, and the Veterans' Administration; and

(B) academic institutions, pharmaceutical companies, nursing homes, providers of day care services and respite services for patients with Alzheimer's disease, private insurers, and other private entities.

(2) Under paragraph (1), the National Council shall facilitate partnerships for research in areas such as—

(A) the etiology, diagnosis, clinical course, treatment, and epidemiology of Alzheimer's disease;

(B) the psychological and social functioning of patients with Alzheimer's disease; and

(C) effective methods of raising or sustaining the quality of life for patients with Alzheimer's disease, means of financing each such method, and the cost-effectiveness of each such method.

(3) To facilitate research partnerships under this subsection, the National Council shall establish a scientific and medical advisory panel on Alzheimer's disease, which shall consist of biomedical researchers and health services researchers, including health economists and medical sociologists, who are conducting research with respect to Alzheimer's disease.

(b) DATA COLLECTION.—The National Center for Health Statistics, in cooperation with the National Institute on Aging, shall collect, maintain, and provide for the exchange of medical information necessary to—

(1) diagnose and evaluate individuals with Alzheimer's disease; and

(2) develop and establish a national data base concerning Alzheimer's disease, including accurate information on Alzheimer's disease as a cause of death.

(c) RESEARCH.—The Director of the National Institutes of Health shall establish five research centers on Alzheimer's disease and related disorders for basic and clinical research into, training in, and demonstration of advanced diagnostic, prevention, and treatment methods for Alzheimer's disease and related disorders, which shall be in addition to the number of such centers which have been established prior to the date of enactment of this Act. For such additional centers, there are authorized to be appropriated $3,500,000 for fiscal year 1987.

SEC. 4. SPECIAL PROJECTS IN ALZHEIMER'S DISEASE SERVICES.

The Older Americans Act of 1965 is amended by adding after section 426 the following new section:

"SPECIAL PROJECTS IN ALZHEIMER'S DISEASE SERVICES

"SEC. 427. (a)(1) The Commissioner is authorized, directly or through grants or contracts, to develop programs which are designed to assist elderly victims of Alzheimer's disease and other related neurological and organic brain disorders, whether living independently or with their families to meet their day-to-day needs including—

"(A) home health care for such victims, including functional health care, physical therapy, and occupational therapy;

"(B) adult day care for such victims;

"(C) home management assistance, transportation to access services, and in-home respite care for the families, particularly spouses of such families;

"(D) referral services to appropriate community services for such victims and their families throughout the continuum of care; and

"(E) the conduct of workshops for health care professionals and other personnel in the field of aging relating to the provision of functional and skilled care to individuals who suffer from Alzheimer's disease and other related neurological and organic brain disorders.

"(2) The Commissioner may, whenever appropriate, provide for the charging of fees for services under paragraph (1).

"(3) The Commissioner is authorized to make grants and to enter into contracts under this section with State agencies, area agencies on aging, and appropriate nonprofit private organizations in the private sector, including the Alzheimer's Disease and Related Disorders Association.

"(b) In carrying out the provisions of this section, the Commissioner shall, in addition to agencies specified in section 402(b), request the technical assistance and cooperation of the Veterans' Administration.".

SEC. 5. LOANS TO FINANCE NONPROFIT ADULT DAYCARE CENTERS AND RESPITE CARE PROGRAMS.

(a) AUTHORIZATION OF LOANS.—The Small Business Administration is authorized to make loans to private, nonprofit corporations to finance the development of adult daycare centers and respite care programs for Alzheimer patients and their families.

(b) TERMS OF LOANS.—A loan under this section shall have—

(1) a maximum principal amount of $60,000;

(2) an interest rate equal to the lesser of 9 per centum per annum or 2 percentage points less than the average of the prime rates as established from time to time by the three largest United States commercial banks from which such data are available; and

(3) be repayable over a period of not to exceed ten years.

(c) CONSULTATION AND TECHNICAL ASSISTANCE.—In carrying out this section, the Small Business Administration shall provide technical assistance relative to establishing and maintaining a small business (i.e., adult day care or respite care center), and shall consult and coordinate with, and make referrals as necessary to, the Administration on Aging and the National Institutes of Health for additional technical assistance.

(d) RESEARCH.—The nonprofit corporate owner of each center assisted under this section shall enter into appropriate arrangements with the Administration on Aging or the National Institutes of Health to permit research designed to measure the cost effectiveness of centers assisted under this section as well as the effectiveness of the diverse therapeutic modalities of the programs established.

(e) SOURCE OF LOAN FUNDS.—For the purpose of this section, loans may be made from the business and investment loan fund of the Small Business Administration.

SEC. 6. RESEARCH AND DEMONSTRATION PROGRAMS ON SYSTEMS AND FINANCING FOR LONG-TERM CARE FOR ALZHEIMER'S DISEASE VICTIMS.

(a) RESEARCH.—(1) The National Council, in cooperation with the Health Care Financing Administration, shall conduct research relating to methods for financing systems for providing long-term care to victims of Alzheimer's disease and related disorders.

(2) For purpose of conducting research under paragraph (1), the National Council shall establish a subpanel of the National Council. The National Council shall include on the subpanel such representatives as may be necessary from—

(A) State and Federal agencies involved in providing long-term care;

(B) private health insurers;

(C) health services researchers, including health economists and medical sociologists;

(D) health specialists skilled in functional assessment and management, including occupational therapists and physical therapists;

(E) national voluntary organizations concerned with Alzheimer's disease and related disorders; and

(F) health care consumers.

(3) Within one year after the date of the enactment of this Act and annually thereafter, the National Council shall prepare and transmit a report to the Congress describing the results of the research conducted under this subsection and containing such recommendations as the National Council considers appropriate.

(b) DEVELOPMENT OF DATA BASE.—The National Council, in cooperation with the Health Care Financing Administration, the Administration on Aging, the National Institute on Aging, the National Institute on Mental Health, the National Center for Health Statistics, and the Veterans' Administration, shall develop a data base on needs (current and projected) for long-term care, and on costs of alternative funding strategies for such care through a mix of private and governmental resources. The National Council shall report to the Congress with respect to the development of such data base within one year after the date of the enactment of this Act and annually thereafter.

(c) MEDICARE WAIVERS.—(1) The Secretary of Health and Human Services shall conduct demonstration projects pursuant to the authority in section 402(a) of the Social Security Amendments of 1967 and section 222 of the Social Security Amendments of 1972 under which home care and other support services are provided under the Medicare program for victims of Alzheimer's disease and related disorders who could otherwise not be cared for at home. Such services shall be prescribed through the hospital discharge planning office at the point of discharge, or shall be prescribed, implemented, or provided by a social work agency or by a certified occupational or physical therapist skilled in the assessment and management of functional impairment. The Secretary may, whenever appropriate, provide for the charging of fees for such services.

(2) The Commissioner of the Administration on Aging, through the State agencies designated under section 305(a)(1) of the Older Americans Act of 1965, shall direct the area agencies on aging to maintain—

(A) registries for referrals to certified skilled professionals to provide the services described in paragraph (1), including social workers, physical therapists, occupational therapists, nurses, psychologists, and psychiatrists; and

(B) registries of other community services.

(3) The Secretary of Health and Human Services shall report annually, beginning one year after the date of the enactment of this Act, to the Congress and to the National Council with respect to the results of demonstration projects conducted under this subsection.

SEC. 7. NONDISCRIMINATION BY NURSING HOMES AGAINST MEDICAID-ELIGIBLE ALZHEIMER'S DISEASE VICTIMS.

(a) NONDISCRIMINATION.—No skilled nursing facility or intermediate care facility which receives payments under title XVIII of the Social Security Act or under a State plan approved under title XIX of such Act may discriminate in the acceptance or refusal of individuals as patients on the grounds that an individual is eligible for medical assistance under a State plan approved under title XIX of the Social Security Act, or on the grounds that an individual is a victim of Alzheimer's disease.

(b) FUNCTIONAL ASSESSMENT.—Skilled nursing facilities and intermediate care facilities receiving payments under title XVIII or a State plan under title XIX of the Social Security Act shall be required to include in the initial admission evaluation a functional assessment of the Alzheimer's patient prepared by an occupational or physical therapist with respect to management of functional impairment. Such assessment shall be reviewed periodically, but not less than three times per year, by the administrator of the skilled nursing facility or the intermediate care facility with the occupational or physical therapists.

(c) ANNUAL REPORT.—The Secretary of Health and Human Services shall report annually, beginning one year after the date of the enactment of this Act, to the Congress with respect to implementation of this section.

SEC. 8. VETERANS' HEALTH CARE.

(a) IN GENERAL.—(1) Subchapter II of chapter 17 of title 38, United States Code, is amended by adding at the end thereof the following new section 620B:

"§ 620B. Care and treatment for Alzheimer's disease; demographic information; demonstration project

"(a) The Administrator shall promulgate consistent national policies for treatment of eligible veterans who have Alzheimer's disease and are at least 55 years of age. The policy and procedures shall include provisions for unified case management for each such veteran. Unified case management under such procedures shall include medical, functional, and psychological assessment, diagnosis, referral, and followup monitoring.

"(b) In order to assist in demographic research on Alzheimer's disease, the Administrator shall compile information on the cases of Alzheimer's disease in which care and services are furnished under this chapter, and shall provide such data to the National Council on Alzheimer's Disease, the National Institute on Aging, and the National Center for Health Statistics.

"(c)(1) The Administrator shall conduct a demonstration project to furnish comprehensive community-based care and related services to eligible veterans who have Alzheimer's disease and are at least 55 years of age and to their families in order to delay the need for hospital or nursing home admissions of such veterans. The Administrator may, whenever appropriate, provide for the charging of fees for such services.

"(2) Under the demonstration project, the Administrator shall, as the Administrator considers appropriate—

"(A) furnish day care and respite care to veterans referred to in paragraph (1) of this subsection; and

"(B) furnish home intervention services to such veterans' and their families, including medical and functional assistance.

"(3) The Administrator, with the advice and consent of the National Council on Alzheimer's Disease, shall prescribe regulations to carry out this subsection. The regulations shall specify the respite care services and home intervention services which are to be furnished under the demonstration project.

"(d)(1) The Administrator shall transmit an annual report to the Committees on Veterans Affairs of the Senate and the House of Representatives and to the National Council on Alzheimer's Disease on the Administrator's actions under this section and on the administration of the provisions of this section and the policy and procedures prescribed under subsection (a) of this section during the fiscal year ending on the day before the fiscal year in which the report is transmitted to such committees.

"(2) Each report made under paragraph (1) of this subsection for a fiscal year during which the demonstration project required by subsection (c) of this section is conducted shall include—

"(A) a description of the experience under such demonstration project and actions taken in conducting such demonstration project during such fiscal year; and

"(B) any recommendations for legislation on the care and treatment of veterans who have Alzheimer's disease which the Administrator considers appropriate.".

(2) The chapter analysis at the beginning of such chapter is amended by inserting after the item relating to section 620A the following new item:

"§ 620B. Care and treatment for Alzheimer's disease; demographic information; demonstration project.".

(b) SUBMISSION OF REPORT.—The first report required by section 620B(d) of such title, as added by subsection (a), shall be submitted not later than one year after the date of enactment of this Act.

SEC. 9. DISABILITY GUIDELINES.

(a) UPDATING GUIDELINES.—The National Council shall review current information relating to Alzheimer's disease which may be relevant with respect to establishing and updating eligibility criteria for the disability programs under titles II and XVI of the Social Security Act on the basis of such disease. The National Council shall report its findings to the Congress not less often than annually.

(b) DISSEMINATION OF INFORMATION AND TRAINING.—The Secretary of Health and Human Services shall establish a mechanism for prompt dissemination of information and guidelines relating to Alzheimer's disease, and for providing training relating to work evaluation of individuals with such disease, to personnel of the Social Security Administration, and of the State agencies making disability determinations pursuant to section 221 of the Social Security Act, who are involved in the disability determination process. Such information shall be geared to enhancing the understanding of such personnel with respect to Alzheimer's disease as an organic brain malfunction.

SEC. 10. CREDITS FOR ADULT DEPENDENT CARE FOR ALZHEIMER PATIENTS.

(a) INCREASE IN CREDIT ALLOWABLE FOR EXPENSES FOR HOUSEHOLD AND DEPENDENT CARE SERVICES.—Paragraph (2) of section 21(a) of the Internal Revenue Code of 1954 (relating to allowance of credit) is amended by striking out "30 percent" and inserting in lieu thereof "40 percent".

(b) CREDIT ALLOWABLE FOR HOME CARE AND NURSING HOME CARE EXPENSES FOR DEPENDENTS WITH ALZHEIMER'S DISEASE.—(1) Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to nonrefundable personal credits) is amended by inserting after section 22 the following new section:

"SEC. 22A. CREDIT FOR HOME CARE AND NURSING HOME CARE EXPENSES FOR DEPENDENTS WITH ALZHEIMER'S DISEASE AND RELATED NEUROLOGICAL AND ORGANIC BRAIN DISORDERS.

"(a) ALLOWANCE OF CREDIT.—

"(1) IN GENERAL.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the applicable percentage of qualified dependent care expenses paid by such individual for the care of a qualifying family member during the taxable year.

"(2) APPLICABLE PERCENTAGE DEFINED.—For purposes of paragraph (1), the term 'applicable percentage' means 40 percent reduced by 1 percentage point for each $1,000 (or fraction thereof) by which the adjusted gross income of the taxpayer for the taxable year exceeds $25,000.

"(b) DOLLAR LIMITATIONS ON AMOUNT OF CREDIT.—For purposes of this section—

"(1) MAXIMUM QUALIFIED DEPENDENT CARE EXPENSES TAKEN INTO ACCOUNT.—The amount of qualified dependent care expenses taken into account under subsection (a) by any taxpayer for any taxable year shall not exceed $20,000, except that not more than $10,000 may be taken into account with respect to any one qualifying family member.

"(2) 2 OR MORE INDIVIDUALS MAKING EXPENDITURES WITH RESPECT TO SAME QUALIFYING FAMILY MEMBER.—If 2 or more individuals have qualified for dependent care expenses with respect to any qualifying family member during any calendar year, then—

"(1) the amount of the qualified dependent care expenses taken into account with respect to such qualifying family member shall be determined by treating all of such individuals as one taxpayer whose taxable year is such calendar year, and

"(ii) the amount of such expenditures taken into account by each of such individuals for the taxable year in which such calendar year ends shall be equal to the amount which bears the same ratio to the amount determined under paragraph (1) as the amount of such expenditures made by such individual during such calendar years bears to the aggregate of such expenditures made by all of such individuals during such calendar year.

"(c) DEFINITIONS.—For purposes of this section—

"(1) QUALIFYING FAMILY MEMBER.—The term 'qualifying family member' means any individual who—

"(A) is the spouse (as determined under section 143) or a dependent (as defined in section 152(a)) of the taxpayer, and

"(B) suffers from Alzheimer's disease or a related neurological or organic brain disorder, and is physically or mentally incapable of caring for himself, as determined by a physician.

"(2) QUALIFIED DEPENDENT CARE EXPENSES.—The term 'qualified dependent care expenses' means payments by the taxpayer for home health agency services provided by an organization certified by the Health Care Financing Administration, including functional care and management services provided by a physician, certified occupational or physical therapist, nurse, psychologist, or social worker, homemaker services, adult day care, respite care, health-care equipment and supplies, or care in a nursing home which—

"(A) are provided to such qualifying family member,

"(B) are provided by an organization or individual not related to the taxpayer or to the qualifying family member,

"(C) are not compensated for by insurance or otherwise, and

"(D) are prescribed by a physician, certified social worker, nurse, psychologist, or certified occupational or physical therapist.

"(3) PHYSICIAN.—The term 'physican' has the meaning given much term by section 1861(r) of the Social Security Act.

"(d) SPECIAL RULES.—

"(1) DENIAL OF DOUBLE BENEFIT.—No deduction or credit shall be allowed under any other provision of this chapter with respect to any amount for which a credit is allowed under subsection (a).

"(2) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—In the case of a married individual filing a separate return, subsections (a)(2) and (b)(1) shall be applied by substituting for each dollar amount contained therein an amount equal to 1/2 of such dollar amount.".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 22 the following new item:

"Sec. 22A. Credit for home care and nursing home care expenses for dependents with Alzheimer's disease."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

SEC. 11. TRAINING PROGRAMS.

(a) DEVELOPMENT OF CURRICULA.—The National Institute on Aging and the National Institute on Mental Health, in cooperation with the Veterans' Administration, shall—

(1) develop curricula for the training of personnel who provide health services to patients with Alzheimer's disease; and

(2) disseminate such curricula, and provide consultation services with respect to such curricula, to health care providers who provide such services.

(b) CLINICAL CARE.—The National Institute on Aging, through the centers for research on Alzheimer's disease and related disorders, and in cooperation with appropriate national voluntary organizations, shall develop and implement programs—

(1) to train providers of clinical care services (such as physicians, psychologists, nurses, social workers, occupational therapists, and physical therapists) to patients with Alzheimer's disease; and

(2) to train families of patients with Alzheimer's disease to provide care for such patients in their homes.

(c) LONG-TERM CARE.—The Secretary of Health and Human Services shall develop and implement programs to train personnel (including home health care aides) who provide long-term care services to patients with Alzheimer's disease, including continuing in-service training programs.

(d) NURSING HOME PROGRAMS.—The Secretary of Health and Human Services shall make grants to schools of medicine to establish training programs for physicians and other health care personnel who provide health services to patients with Alzheimer's disease who reside in nursing homes.

(e) SAFETY AND TRANSPORTATION PERSONNEL.—The Secretary of Health and Human Services shall conduct training programs on Alzheimer's disease for safety and transportation personnel, such as police, security guards, bus drivers, and other operators of, and attendants on, public conveyances.

(f) MEDICAL EXAMINERS.—(1) The Secretary of Health and Human Services shall conduct training programs for medical examiners, coroners, and pathologists in the proper conduct of an autopsy to determine whether Alzheimer's disease was a contributing factor to the death of an individual.

(2) The Secretary of Health and Human Services shall promulgate regulations encouraging medical examiners, coroners, and pathologists to provide reports concerning the findings of autopsies in which Alzheimer's disease contributed to the death of an individual to the Director of the National Institute of Aging, the Director of the National Center for Health Statistics, and the family of such individual. The Director of the National Center for Health Statistics shall include information from such reports in the data base established under section 3(b)(2).

(g) ADVICE AND COOPERATION.—In carrying out this section, the Secretary of Health and Human Services shall obtain the advice and cooperation of appropriate national organizations concerned with Alzheimer's disease and shall work in cooperation with the National Council.

(h) AUTHORIZATION.—To carry out this section, there are authorized to be appropriated such sums as may be necessary.●

By Mr. SIMON (for himself, Mr. BOREN, Mr. BRADLEY, Mr. BUMPERS, Mr. CHILES, Mr. COCHRAN, Mr. D'AMATO, Mr. DECONCINI, Mr. DOLE, Mr. EAST, Mr. EXON, Mr. GORE, Mr. HELMS, Mr. HOLLINGS, Mr. INOUYE, Mr. KASTEN, Mr. KERRY, Mr. MCCLURE, Mr. MELCHER, Mr. MURKOWSKI, Mr. NUNN, Mr. PELL, Mr. PRYOR, Mr. QUAYLE, Mr. STAFFORD, Mr. STENNIS, and Mr. THURMOND):

S.J. Res. 232. Joint resolution to designate October 6, 1986, through October 10, 1986, as "National Social Studies Week"; to the Committee on the Judiciary.

NATIONAL SOCIAL STUDIES WEEK

● Mr. SIMON. Mr. President, I wish to introduce today a joint resolution which will recognize and commemorate the role of the social studies teacher in the United States. We have all known social studies as different things through our years in school. The social studies include; anthropology, sociology, geography, history, political science, psychology, economics, philosophy, arts, music, law, urban studies, folklore, area studies, government, and citizenship, among other subject areas. The social studies teacher must be a master of not one, but several of these areas within this list. These teachers must not only be bright, creative, and inquisitive, but they must also possess a world view and be committed to democratic values such as freedom, equality, peace, and justice. This knowledge is necessary in addition to the basic qualities needed to be a teacher: Strong interpersonal skills, flexibility, tolerance of divergent viewpoints, and the ability to withstand the pressures of conflicting values within the classroom and the community. Social studies teachers are the ones who present the basics of our Government to the children of our Nation. They initiate an interest of the world and its peoples and cultures.

One group which assists social studies teachers in these numerous and difficult duties is the national council for the social studies. This group assists in the formulation of curriculum, presents criteria for qualification in the profession, and coordinates, nationwide, the national issues forum. They also offer professional publications to the membership, including a newsletter and a monthly journal as well as monographs on education and the social studies professional. This group should also be commended for its efforts in support of the social studies professions.

In the view that national attention should be focused on the exemplary efforts of social studies teachers in the United States, I would like to set aside October 6 through October 10, 1986 as "National Social Studies Week." During this week, social studies classes nationwide may undertake special projects, give recognition to their social studies teachers, and achieve a renewed spark of interest in their government, their country, and their world.

Mr. President, I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 232

Whereas national attention should be focused on the exemplary efforts of social studies teachers in the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 6, 1986, through October 10, 1986, is designated as "National Social Studies Week", and that the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate ceremonies, programs, and activities.●

By Mr. WILSON (for himself, Mr. DOLE, and Mr. BRADLEY):

S.J. Res. 234. A joint resolution to designate the week of February 9, 1986 through February 15, 1986 as "National Burn Awareness Week"; to the Committee on the Judiciary.

NATIONAL BURN AWARENESS WEEK

● Mr. WILSON. Mr. President, I rise this morning to speak of a problem little noticed in America—except by those who are its victims. For them, it is literally life-shattering in its implications. I rise to introduce a Senate Joint Resolution designating the week of February 9, 1986 as "National Burn Awareness Week." And in so doing, I would suggest that this is but the first small step on a journey of many miles, a journey which must be taken by all of us who live in a country with the worst burn problem of any industrialized nation in the world.

Burns exact a tremendous toll of human life, suffering, disability, and financial loss. Burn injuries continue to be one of the leading causes of death in the United States. Of the 2 million people who are victims of burn injury each year, 70,000 are hospitalized and another 12,000 suffer death as a result of their burns. An even more tragic statistic of this problem is the fact that children, elderly, and the disabled represent a majority of burn victims, with a death rate of five times that of any other group. Finally, the severe psychological impact of burn rehabilitation for the victim cannot be measured in simple economic terms.

Each year millions of dollars are spent trying to remedy the effects of burns and burn-related incidents. Recent studies conclude, however, that approximately 75 percent of all burns could be prevented by proper education of children and adults. For this reason, the resolution provides for a public awareness program designed to familiarize the public with methods of burn prevention.

I ask my colleagues support in this resolution by cosponsoring the establishment of "National Burn Awareness Week."

Mr. President, I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 234

Whereas the burn problem in the United States is the worst of any industrialized nation in the world;

Whereas burn injuries are one of the leading casues of accidental death in the United States;

Whereas every year approximately two million people are victims of burn injury in the United States;

Whereas of these injuries, seventy thousand are hospitalized and account for nine million disability days annually;

Whereas approximately twelve thousand people die from burn injuries;

Whereas the rehabilitative and psychclogical impact of burns are devastating;

Whereas children, the elderly, and the disabled are most likely to suffer serious burns;

Whereas it is estimated that approximately 75 percent of all burns could be prevented by proper education of children and adults; and

Whereas there is a need for an effective national program that deals with all aspects of burn prevention: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of February 9, 1986 through February 15, 1986 is designated as "National Burn Awareness Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States and all Federal, State, and local government officials to observe such week with appropriate programs and activities.●

By Mr. DANFORTH (for himself, Mr. PACKWOOD, Mr. CHAFEE, Mr. HOLLINGS, and Mr. KASTEN):

S.J. Res. 235. Joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week"; to the Committee on the Judiciary.

TRUCK AND BUS SAFETY WEEK

● Mr. DANFORTH. Mr. President, today I am introducing legislation on behalf of myself and Senators PACKWOOD, CHAFEE, HOLLINGS, and KASTEN to designate the week of January 26 through February 1, 1986, as "Truck and Bus Safety Week." This is an especially important time to be focusing attention on the issue of truck and bus safety. Increased emphasis is being placed on enhancing motor carrier safety within the motor carrier industry and at all levels of government. We have now a unique opportunity to give this issue the national visibility it deserves.

The trucking and intercity bus industries play vital roles in our Nation's transportation system. The trucking industry provides extensive service throughout America. Further, this industry employs 7.4 million Americans, operates 5 million trucks, logs 138 billion miles of travel each year on our Nation's roads, and generates annual revenues in excess of $200 billion.

The intercity bus industry is smaller than the trucking industry, but the service provided by bus companies is crucial to Americans. The intercity bus industry provides more passenger service than Amtrak and the airlines, linking together some 10,000 cities and communities, from rural America to our major cities.

Mr. President, because of the importance of motor carrier transportation in this country, and the extensive nature of this transportation system, we must be increasingly vigilant to ensure the safest operations possible. Important steps have been taken to this end. As part of the Surface Transportation Assistance Act of 1982, Congress created the Motor Carrier Safety Assistance Program. Under this program, the Federal Government provides grants to States to enable the States to build and deploy their own truck and bus inspection forces to ensure compliance with and enforcement of Federal and compatible State motor carrier safety regulations. Testimony presented on October 29 to the Commerce Committee by the Department of Transportation [DOT], motor carrier associations, and representatives of State government show that this program is working well. In fact, according to DOT's testimony, this program has enabled State personnel to perform an estimated 300,000 inspections over and above what otherwise would have been performed. The growth in State inspection forces will enable DOT's Bureau of Motor Carrier Safety to focus its efforts where they belong—on conducting safety audits and in facilitating full implementation of this important grant program.

Last year, additional action was taken to improve motor carrier safety with the enactment of the Motor Carrier Safety Act of 1984, which I was proud to sponsor. This legislation comprehensively addressed the motor carrier safety issue by providing DOT with new civil penalty authority to prosecute violators of Federal motor carrier safety regulations, requiring periodic inspections of motor carrier equipment, and strengthening the safety fitness procedure for motor carriers entering the industry. The legis-

lation also requires a complete review of both Federal and State safety regulations to ensure that we have the most effective regulatory system in place and take steps toward achieving uniformity between Federal and State motor carrier safety regulations.

Mr. President, these two pieces of legislation clearly are positive steps toward improving motor carrier safety. Nevertheless, motor carrier safety remains a serious problem. This week, the St. Louis Post-Dispatch is running a series of articles on truck safety which document the fact that more must be done to improve safety in this industry. Current regulations must be enforced effectively and we must continue to seek new and better ways to enhance safety.

The truck and bus industries, along with others, are working hard to promote and foster safer operations. The American Trucking Associations [ATA], for one, is taking a major leadership role in promoting truck safety and is undertaking several important safety initiatives. The Teamsters, the Private Truck Council of America, and others, also are working hard to improve truck safety. In the intercity bus industry, the American Bus Association and the United Bus Owners of America both have important safety activities underway.

Designation of the week of January 26 through February 1 as "Truck and Bus Safety Week" will add emphasis to efforts on motor carrier safety already planned for the month of January. These include a symposium on increasing the effectiveness of State commercial driver licensing, jointly sponsored by the American Association of Motor Vehicle Administrators and the Highway Users Federation; selection of a safe driver of the year award by the American Trucking Associations; truck safety seminars and technical workshops by the Transportation Research Board; and the first substantive session of the Commercial Motor Vehicle Safety Regulatory Review Panel established by the Motor Carrier Safety Act of 1984.

Mr. President, I urge my colleagues to join me in supporting this legislation.●

ADDITIONAL COSPONSORS

S. 1061

At the request of Mr. PRESSLER, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 1061, a bill to amend title 38, United States Code, to establish a program of delayed reentry and psychological readjustment assistance and vocational rehabilitation for Vietnam veterans.

S. 1174

At the request of Mr. MCCONNELL, the name of the Senator from Florida [Mrs. HAWKINS] was added as a cosponsor of S. 1174, a bill to amend the Juvenile Justice and Delinquency Prevention Act of 1974 to provide States with assistance to establish or expand clearinghouses to locate missing children.

S. 1742

At the request of Mr. TRIBLE, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of S. 1742, a bill to improve the enforcement of the restrictions against imported pornography.

S. 1754

At the request of Mr. SIMON, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Hawaii [Mr. INOUYE], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of S. 1754, a bill to ensure adequate verification of peaceful uses of nuclear exports from the United States to the People's Republic of China, and for other purposes.

S. 1794

At the request of Mr. THURMOND, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of S. 1794, a bill to amend Revised Statutes section 722 (42 U.S.C., sec. 1988) to exempt State judges and judicial officers from assessment of attorneys' fees in cases in which such judge or judicial officer would be immune from actions for damages arising out of the same act or omission about which complaint is made.

S. 1795

At the request of Mr. HATCH, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of S. 1795, a bill to provide that in judicial actions against State judges, such judges shall not be held liable for attorney fees.

SENATE JOINT RESOLUTION 222

At the request of Mr. D'AMATO, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Senate Joint Resolution 222, a joint resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists abroard the cruise ship Achille Lauro, because he did not submit to the demands of these terrorists.

SENATE JOINT RESOLUTION 229

At the request of Mr. NUNN, the names of the Senator from New York [Mr. MOYNIHAN], The Senator from Illinois [Mr. SIMON], the Senator from Alabama [Mr. DENTON], and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of Senate Joint Resolution 229, a joint resolution designating the week of January 13 through January 19, 1986, as "National Productivity Improvement Week."

SENATE CONCURRENT RESOLUTION 78

At the request of Mr. BRADLEY, the names of the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Virginia [Mr. WARNER], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of Senate Concurrent Resolution 78, a concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases.

SENATE CONCURRENT RESOLUTION 83

At the request of Mr. D'AMATO, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of Senate Concurrent Resolution 83, a concurrent resolution expressing the sense of the Congress that Federal tax reform legislation not take effect until its date of enactment, but in no case earlier than July 1, 1986.

SENATE RESOLUTION 212

At the request of Mr. GORTON, the names of the Senator from Louisiana [Mr. LONG], the Senator from Ohio [Mr. GLENN], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Michigan [Mr. LEVIN], and the Senator from Pennsylvania [Mr. HEINZ] were added as cosponsors of Senate Resolution 212, a resolution expressing the sense of the Senate concerning violence against health care facilities.

AMENDMENTS SUBMITTED

VETERANS' ADMINISTRATION HEALTH-CARE AMENDMENTS

DENTON (AND OTHERS) AMENDMENT NO. 966

Mr. MURKOWSKI (for Mr. DENTON for himself, Mr. MURKOWSKI, and Mr. HEFLIN) proposed an amendment to the amendment of the House to the amendment of the Senate to the bill (H.R. 505) to amend title 38, United States Code, to improve the delivery of health care services by the Veterans' Administration, and for other purposes; as follows:

In table of contents in section 1(b), after the item relating to section 304 insert the following:

SEC. 305. FEASIBILITY PLAN FOR THE PURCHASE OF A FACILITY FOR FURNISHING HOSPITAL AND NURSING HOME CARE

At the end of title III, add the following:

SEC. 305. FEASIBILITY PLAN FOR THE PURCHASE OF A FACILITY FOR FURNISHING HOSPITAL AND NURSING HOME CARE

In the document submitted by the Administrator of Veterans' Affairs to the appropriate committees of the Congress at the time of and in connection with the submission, pursuant to section 1105 of title 31, United States Code, of the Budget for fiscal year 1987, the Administrator shall provide a feasibility plan for the purchase for Veterans' Administration use of a medical facility that is located in an urban area and is suitable for furnishing both hospital and nursing

home care services, and meets the current and projected needs and specifications of the Veterans' Administration for furnishing health care to eligible veterans. In such Budget, the President, as warranted by such feasibility plan, shall include a request for an appropriate amount to purchase such a facility which meets those needs and specifications.

CHILES AMENDMENT NO. 967

Mr. CRANSTON (for Mr. CHILES) proposed an amendment to amendment No. 966 proposed by Mr. MURKOWSKI (for Mr. DENTON and others) to the amendment of the House to the amendment of the Senate to the bill H.R. 505, supra; as follows:

Amend the amendment of Mr. Murkowski by striking out "specifications." and insert in lieu thereof "specifications: *Provided,* That this section shall not be construed to require the Administrator to provide a feasibility plan with respect to the purchase of a facility that would have the effect of making it infeasible to construct, acquire, or lease a medical facility in the Northern Florida panhandle to furnish health care to veterans in that area."

INCREASE IN PUBLIC DEBT LIMIT

MOYNIHAN AMENDMENT NO. 968

Mr. MOYNIHAN proposed an amendment to amendment No. 957 proposed by Mr. PACKWOOD to the amendment of the House to the amendment of the Senate No. 2 to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; as follows:

At the end of the Amendment, add the following new section:

SEC. . Exemption for Agencies Involved With Economic Forecasting.

Owing to the extraordinary dependence on economic forecasts required by this legislation, government agencies or programs involved with economic forecasting, including the relevant branches of the Intelligence Community, shall be exempt from budget reductions as otherwise provided in this Act.

NOTICES OF HEARINGS

SUBCOMMITTEE ON AGRICULTURAL RESEARCH, CONSERVATION, FORESTRY, AND GENERAL LEGISLATION

Mr. HELMS. Mr. President, I wish to announce that the Subcommittee on Agricultural Research, Conservation, Forestry, and General Legislation of the Committee on Agriculture, Nutrition, and Forestry has scheduled a hearing to receive testimony on S. 703, the Kentucky Wilderness Act of 1985.

The hearing, to be chaired by Senator MCCONNELL, will begin at 9 a.m. on Wednesday, November 13, in room 328-A Russell Senate Office Building.

Please contact the committee staff at 224-2035 if further information is needed.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. MCCLURE. Mr. President, I would like to announce for the information of the Senate and the public that the public hearing scheduled before the Committee on Energy and Natural Resources has been moved from November 19 to Tuesday, December 3, at 9:30 a.m. in room SD-366 of the Senate Dirksen Building in Washington, DC.

Testimony will be received on Senate Joint Resolution 192, to authorize financial assistance for the Northern Mariana Islands, and for other purposes and S. 1441, to amend the Guam Organic Act, and for other purposes.

Those wishing to testify or who wish to submit written statements should write to the Committee on Energy and Natural Resources, U.S. Senate, Room SD-358, Dirksen Senate Office Building, Washington, DC 20510. For further information, please contact Debbi Rice or Al Stayman at 202-224-2366.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, November 6, in order to receive testimony concerning the following nominations:

U.S. CIRCUIT JUDGE

Frank X. Altimari, of New York, to be U.S. circuit judge for the second circuit.

John T. Noonan, Jr., of California, to be U.S. circuit judge for the ninth circuit.

Glenn L. Archer, Jr., of Virginia, to be U.S. circuit judge for the Federal circuit.

U.S. DISTRICT JUDGE

Morris S. Arnold, of Arkansas, to be U.S. district judge for the western district of Arkansas.

Partick A. Conmy, of North Dakota, to be U.S. district judge for the district of North Dakota.

Lynn N. Hughes, of Texas, to be U.S. district judge for the southern district of Texas.

U.S. COURT OF INTERNATIONAL TRADE

Nicholas Tsoucalas, of New York, to be a judge of the U.S. Court of International Trade.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON STRATEGIC AND THEATER NUCLEAR FORCES

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Strategic and Theater Nuclear Forces of the Committee on Armed Services be authorized to meet in executive session, during the session of the Senate on Wednesday, November 6, to conduct a hearing on policy and technology objectives of the strategic defense initiative.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON SCIENCE, TECHNOLOGY, AND SPACE

Mr. DOLE. Mr. President, I ask unanimous consent that the Space Subcommittee of the Committee on Commerce, Science and Transportation be authorized to meet during the session of the Senate on Wednesday, November 6, to conduct a meeting on the Space World Administrative Radio Conference.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, November 6, to hold a hearing on matters relating to the Deputy Director of OMB.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, November 6, to conduct a business meeting to consider the following bills: S. 1517, S. 595, H.R. 1185, S. 1503, S. 1596, H.R. 2776, S. 1116, Senate Joint Resolution 187, H.R. 3003, and other pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE PLIGHT OF SOVIET JEWRY

● Mr. CHAFEE. Mr. President, on the eve of the first meeting between President Reagan and General Secretary Gorbachev, I believe the Senate should again express its deep concern for the plight of Soviet Jews who have sought to emigrate from behind the Iron Curtain.

In 1979, the Soviets allowed 51,320 Jews to emigrate. In the last 5 years, fewer than 36,000 Jews have been issued emigration visas. This travesty reached a low point in 1984 when the Soviets permitted only 896 Jews to emigrate. All too many horror stories have been heard in the Western world of bright young Soviet Jews who have been forced out of their jobs, arrested on false charges, and often placed in Soviet mental hospitals for "observation," solely because they or members of their family have sought emigration visas. This must not be allowed to continue.

Despite international outrage, including a tremendous amount of pressure from this Congress, the Soviet Union has maintained its prejudicial policies toward Soviet Jews. I believe now, however, we have an opportunity

at the Geneva summit for President Reagan to express to Chairman Gorbachev—face to face—our country's distress at the treatment of Soviet Jews.

Mr. President, those of us who have grown up with, and respect, the freedom that America represents, cannot condone this kind of persecution to which Soviet Jews are subjected on a regular basis. Religious freedom is a doctrine upon which our Nation was built, and for which the United States has traditionally fought. It is for this reason that I join the Jewish Federation of Rhode Island's women's plea for Soviet Jewry in condemning Soviet intransigence on the question of the emigration of Soviet Jews.

The women's division of the Jewish Federation of Rhode Island has planned a special Shabbat service on December 13, in conjunction with the celebration of Hanukkah, to "recognize the desperate plight of Soviet Jews." Hanukkah—the festival of lights—celebrates the miracle of light that was bestowed on the Maccabees as a miracle from God. This is a most fitting observance to strive for the miracle of light for those Soviet Jews so long in the darkness of religious persecution. I join with the members of the Jewish Federation of Rhode Island in their commitment to alleviate the plight of Soviet Jews, and will continue to press for these goals in the Senate.●

CALL TO CONSCIENCE

● Mr. LEVIN. Mr. President, I am speaking today again in support of the Congressional Call to Conscience to draw attention to those who are unable to exercise their basic human rights of freedom and safety.

One particular case about which I remain gravely concerned, as do many of my colleagues, is that of Abe Stolar in the Soviet Union. Abe Stolar is an American citizen, born in Chicago, who has repeatedly been denied permission to emigrate with his entire family.

Abe Stolar's wife Gita has an Israeli passport, and their son Michael has an American one. They have tried for over a decade to emigrate. Earlier this year, they thought they might finally have that opportunity, but instead were offered a cruel choice. The Soviet Government finally offered the Stolars three exit visas, but not one for Michael's wife Julia. The Stolars faced the impossible decision of splitting up their family, or passing up perhaps their last chance at freedom.

Members of Congress were active in contacting the Soviet Union and urging a humanitarian resolution to this case. A telegram signed by 21 Senators asked General Secretary Gorbachev to intervene in this matter. I sent an urgent letter to Ambassador Dobrynin. Unfortunately, these efforts were to no avail. The Soviets were inflexible in refusing to grant Julia a visa. The Stolars ultimately did not use their exit visas, because Abe and Gita did not want Michael to leave his wife, and they did not want to leave Michael behind.

I am very concerned about the uncertain future of the Stolars, particularly Abe and Gita who are quite elderly.

Another family facing a similar plight is that of Sandra Gubin, an American citizen separated from her husband in the Soviet Union.

Sandra met Aleksei Lodisev while participating in the International Research and Exchanges Board Program. This program is part of an official cultural exchange between the U.S. and the U.S.S.R. They were married in April 1981, and Ms. Gubin returned to the United States that summer. She subsequently submitted an invitation to her husband to join her, and he applied for an exit visa. He was denied, and has continued to be denied.

I have worked to help reunite this couple for several years. They are eager to begin a normal married life together, and there is no reason for them to be kept apart.

Leonid Volvovsky is yet another case which warrants our attention. The harassment and arrest of this man is, regrettably, indicative of the treatment frequently afforded those who try to emigrate.

Leonid Volvovsky has a scientific degree in cybernetics and was elected a member of the New York Academy of Sciences. In 1974, Leonid and his wife Ludmilla applied to repatriate to Israel. After the application, both the Volvovskys lost their jobs and have had difficulty since finding steady employment.

Leonid is self-taught in Hebrew and has taught others, and was involved with Jewish cultural activities in Moscow. Evidently because of this, the family was exiled to Gorky in 1980. That same year, Leonid was granted Israeli citizenship. Their home has been searched several times, and all Jewish materials confiscated.

On June 26, 1985, Leonid Volvovsky was arrested. Charged with defaming the Soviet State, he has recently been sentenced to 3 years of imprisonment. His family and friends were barred from his trial, at which he conducted his own defense.

We must continue to speak out on behalf of people like Abe Stolar, Sandra Gubin, and Leonid Volvovsky, and we must be willing to seek out and pursue any other ways of helping them. As a humanitarian nation, we must work to resolve the frustrating and tragic problem of those who are imprisoned or whose family lives are torn apart because of restrictive human rights policies.●

SQUEEZE ON FEET

● Mr. HEINZ. Mr. President, as Senator COHEN has also done, I would like to draw attention to a recent article in the Wall Street Journal which reaffirms rumors that swift congressional action could save hundreds of thousands of American feet, taken hostage by tenacious and oppressive foreign shoes. The results of these efforts could bring about a happy ending on more than one front. Beyond the positive results which would be experienced by the American shoe industry, American feet would slowly be rescued from their insensitive foreign captors. We could all take great pride in the legislation which may be passed to restrict foreign shoe imports. Such restrictions would become known throughout the United States by podiatrists and others, as the "neat feat that saved U.S. feet."

I acknowledge that my view of this Wall Street Journal article is somewhat whimsical, but I think it makes an important point: American shoes fit Americans better. Let's make sure that Americans have the opportunity to purchase American shoes.

Mr. President, I ask that this article be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Oct. 28, 1985]

CHEAP IMPORTS PUT THE SQUEEZE ON U.S. FEET

(By Teri Agins)

NEW YORK.—For Jakki Gill, a medical-records clerk, shopping for footwear has become an exasperating and ultimately painful experience.

Most of the modestly priced shoes she tries on are imported, she says, and "fit strangely." They're too tight across the toes or too wide at the heels, she explains, and make her feet and legs ache after a few hours.

Foot specialists across the country are seeing an increase in patients with similar complaints. As more Americans, especially women, buy imported shoes, they're finding it tough to get a good fit. But because imports—which will account for 77% of all footwear sales in the U.S. this year according to Commerce Department estimates—offer a wide range of fashionable styles at low prices, consumers wear them anyway.

PAYING WITH PROBLEMS

"People are compromising more on shoe fit these days," says Jerome J. Erman, a Union, N.J., podiatrist. "and we're paying for it with more foot problems." Paul Taylor, a podiatrist in Silver Spring, Md., adds, "I see patients wearing cheap imported shoes made of hard plastics who complain they get blisters and a burning sensation on the soles of their feet."

Eugene Milosh, president of the New York-based American Association of Exporters and Importers, feels that imports aren't alone to blame. "The quality is quite high for the medium range and high-quality range from places like Italy," he says. As for cheaper models, he adds, "shoe for shoe and price range for price range," imports stack up well against domestic shoes.

Too tight or too loose, shoes can cause leg pains, backaches and the thick heel calluses that doctors call "pump bumps." Ill-fitting shoes also aggravate hereditary foot problems, such as flat feet, bunions and hammertoes. Podiatrists have even traced an outbreak of one kind of dermatitis to the dyes and glues used in some imported athletic shoes. (The 121.6 million pairs of imported athletic shoes sold in the U.S. last year represented 91.5% of the market.)

BLAME IT ON CHEAP SHOES

Shoes that cost less than $30 a pair are responsible for most of the problems, doctors say. And this end of the market is dominated by imported shoes. In the early 1970s, says Buddy Katz, president of Encore Shoe Inc. in Rochester, N.H., "when women started regarding shoes as throwaway fashion items, they wanted more style at all price levels." Foreign shoemakers, who were able to meet the demand more cheaply than American companies, flooded the market with their products.

But the sizing system used for most imported shoes, foot specialists say, isn't as refined as the U.S. system. American shoes, for instance, are ordinarily available in two or three widths. Imports are typically made in one standard width, which is often too wide for the average American foot. In the countries of manufacture, where people are apt to be less ethnically diverse than in the U.S., says Nathaniel Gould, a Manchester, Vt., orthopedist, "more feet tend to fall within a limited range of sizes."

To cater to the U.S. trade, some foreign shoemakers have bought American lasts, the forms on which shoes are built. But many of the 10 to 150 hand operations required to produce a shoe can affect the fit, and some makers "don't make the shoe with accuracy," says David Serling, president of Serling Lasts in New York. "They make it for price. We get calls from people who have worn a model made with our lasts for years, which is now made abroad with our lasts but doesn't fit the same."

Rockport Co. in Marlboro, Mass., which imports 70% of the shoes it sells, has found European makers that will supply shoes in half sizes and three widths. Rockport is one of only two brands to have won the American Podiatric Medical Association's seal of acceptance.

But Rockport's shoes aren't considered stylish and usually retail for around $70 a pair. "We just can't make a good shoe for any less," says Jens Bang, Rockport's vice president of marketing.

Some consumers and podiatrists think retailers share the blame for misfits. Part of the reason it's harder to get a good fit from all shoes nowadays, says Donald Skorr, a Memphis podiatrist, is that "salespeople who used to fit shoes aren't around anymore."

Wayne Muller, a longtime shoe retailer in Grand Rapids, Mich., believes children are growing up with no notion of proper fit. "There's a younger generation who're being raised in sneakers, which are fairly easy to fit, and they don't understand fit," he says. "They'll just cram their foot in a shoe and wear it."●

BILINGUAL EDUCATION

● Mr. SIMON. Mr. President, on September 26, the Secretary of Education spoke to the Association for a Better New York on bilingual education. In 1984, when Congress reauthorized the Bilingual Education Act, the problems and successes of bilingual education were fully examined, and we approved bilingual programs as a necessary response to the large population of limited English-speaking students in our Nation. The idea behind bilingual education is sound as or reauthorization of the program affirmed last year.

The Secretary misunderstands the purpose of bilingual education. No one can quarrel with the Secretary's statement that

• • • we expect our schools to help teach all of our students English, the common language that will enable them to participate fully in our political, economic, and social life.

Bilingual education is more than the method by which schools teach English. The student needs an opportunity to learn math, science, and history while learning English language skills. We all must see that knowledge of a subject is imperative and central to education. The Secretary does; he speaks convincingly about education and excellence.

If we attack bilingual education, and focus entirely on the acquisition of English language skills, we forsake the criteria of excellence in education held by Dr. Bennett. We would not provide the opportunity for excellence by limiting the skills our students are taught. We would be denying opportunities for excellence. Worse, we would be denying equity. Worse still, we would enter a period of outright neglect of over 4 million limited English-speaking students in this Nation.

That is not my goal, nor do I suspect it is the goal of Secretary Bennett. There is room for debate on how best to achieve a literate and skilled population of all backgrounds. What should be foremost in our minds, however, should be access to necessary skills which are the very opportunities that our schools promise. There is room for debate, but that debate should not artificially be limited to the teaching and learning of English. English language skills are critical, but so is the knowledge of math and science and history.

Most of us can point to immigrant ancestors and point to their "sink or swim" immersion in our English-speaking culture. The opportunities of the last century and the first quarter of this century were not always dependent on knowledge of the English language—rather, they were opportunities of hard work in the Pennsylvania coal mines, Massachusetts factories, and Illinois farmlands. Opportunities still exist today, but today's opportunities involve more than hard work. They involve knowledge of technology, marketing, finance, engineering, and the humanities as well as the English language.

Secretary Bennett has labled bilingual education a failure. I do not agree. The purpose of bilingual education is twofold—teaching English and teaching academic course content. Bilingual education does even more. It keeps students in the classroom. Concepion Valdez, professor of education at UCLA states:

Bilingual education is not what's keeping kids from learning English. What keeps students from learning English is flunking them out or making them feel inferior by thrusting them into classes where they don't understand the language.

Dr. Paul Ylvisaker, dean emeritus of the Harvard Graduate School of Education takes this statement further in a report he coauthored, "Make Something Happen":

The major problem non-English-speaking students experience is that of falling behind in course content while they are in the process of acquiring English competency.

This is exactly the problem addressed through bilingual education. And bilingual education provides one answer to another problem in the schools.

A 1983 hearing before the House Education and Labor Committee during consideration of bilingual education legislation, disclosed some statistics, among them the statistics for New York City's Brandeis Bilingual School, where 85 percent of the students in bilingual programs are admitted to institutions of higher education, while only 75 percent of their peers who are not in bilingual programs are admitted to postsecondary institutions. Secretary Bennett's predecessor at the Department of Education, Terrel Bell, cited many successes of bilingual education at the same hearing.

Bilingual education also helps address a foundation of academic success which is, simply, attendance. Attendence rates and dropout rates have everything to do with the basis of learning and subsequent success in finding employment. The President's Commission on Industrial Competitiveness issued a report this year, "Global Competition: The New Reality." The Commission says:

The high dropout rate in our secondary schools is contributing to the development of a growing, permanent underclass in our society. Twenty six percent of students enrolled in school drop out. At this rate, our Nation is producing in excess of 1 million dropouts annually. Minorities are the fastest growing segment of the young worker population that is most likely to drop out of school and enter the work force without critical basic skills.

Bilingual education teaches not only English and academic and vocational knowledge, but encourages the basics the President's Commission deems crucial to economic success as a Nation. Bilingual education has an impact on dropout rates.

The 1983 House hearing on bilingual education also received evidence that bilingual education teaches more than

English and academics. In a sample New York school, attendence in bilingual classes is 90 percent, while the school norm for students not enrolled in bilingual programs in 75 percent. Nationally, a 1981 study shows that students in bilingual classes have half the dropout rate as their peers who are not in bilingual classes. Based on these statistics, and the findings of the President's own Commission on Industrial Competitiveness, the advantages of continuing bilingual education should be clear.

The Ninth Annual Report of the National Advisory and Coordinating Council on Bilingual Education (1984–85) finds that 82 percent of the local bilingual project directors thought that their services would be reduced or dropped if Federal bilingual education funds were reduced or discontinued. We can get some sense of the repercussions of this when we compare the attendance and dropout rates of those bilingual programs and those not in bilingual programs. When cities such as New York have an Hispanic dropout rate, for example, of 80 percent; Chicago, 70 percent; Los Angeles, 50 percent; we have a compelling reason to reaffirm our commitment to bilingual education.

National policy affirms that all students have the right to learn. This includes our limited English-speaking students. The right to learn means the right to learn English and the right to learn academic and vocational subjects. Bilingual education is a successful way to provide the educational rights we guarantee all young people in the Nation.

Secretary Bennett's speech last month on bilingual education noted that we expect our schools to prepare youth to fully participate in the opportunities and challenges of American society. He then says bilingual education fails at this task. I say it does not. For if we expect students to participate in society, in the economy, in the political process, we must give them the tools to do these things. English skills are only one tool. We must provide more; we must educate in math, science, and history, and we must provide students an opportunity to learn whether their native language is English or Tagalog. We must make sure our students stay in school and graduate into productive roles in our economy and society. We should support bilingual education as it brings young people into the mainstream, and helps them achieve the dreams of opportunity which Americans, native born and immigrant, have shared for centuries.●

BARRIERS TO U.S. SODA ASH EXPORTS IN JAPAN, TAIWAN, AND SOUTH KOREA

● Mr. HEINZ. Mr. President, we have seen this year no dearth of statements from both Congress and the administration on our country's trade problems. Both are taking action to address the issues, one of which continues to be unfair government barriers to U.S. exports. Although we are aware of many of these difficulties, there is one example I have discussed before that is particularly troublesome. It concerns the U.S. soda ash industry, one of America's most competitive internationally, and the market access barriers it faces in Japan, Taiwan, and South Korea, countries enjoying major trade surpluses with the United States.

Soda ash is the raw material used to make glass. The U.S. export industry is thriving. It will grow 9 percent this year with sales exceeding $225 million. It is responsible for 20,000 U.S. jobs and over 60 percent of the world's nonregional trade in soda ash worldwide. Where fair market access is available, the U.S. industry has captured over 50 percent of demand in foreign markets. It has achieved this success despite a strong dollar. The two key reasons we have a large comparative advantage are enormous U.S. reserves of the raw material to make soda ash—enough to supply world demand for over 1,000 years—and technological superiority. U.S. production uses half the energy and half the manpower required by manufacturers elsewhere.

Yet despite these positive factors, the industry faces tremendous foreign government barriers in exporting its product. This is particularly the case in Asia, where growth in demand for soda ash is highest; and specifically in Japan, Taiwan, and South Korea, where there is large market potential.

At this time, U.S. soda ash exports comprise merely 20 percent of Japanese and Taiwanese consumption, and only 5 percent of South Korean consumption. The reasons for this are varied.

In Japan, the U.S. industry is so clearly barred from competition that the Japan Fair Trade Commission itself found in 1983 that domestic soda ash producers banding together had violated Japan's antimonopoly laws on numerous counts. Despite these findings, virtually no punishment or damages have been levied and many of the unlawful practices continue to the detriment of U.S. sales and U.S. jobs.

Regarding Taiwan, the licensing procedure required to approve soda ash imports requires that the sole Taiwanese soda ash manufacturer consent to the license. Worse yet, licenses are unavailable to potential local distributors of soda ash who would supply many small end users of soda ash. These smaller firms, mostly glass manufacturers, comprise over 50 percent of the market for soda ash demand. U.S. product basically is excluded from reaching that market, which also happens to be where high profit margins exist.

In South Korea, U.S. exports face a tight import embargo and an excessive tariff. The embargo prohibits import of soda ash unless the importer, such as a glass producer, can demonstrate that he has exported an equivalent amount of finished product. And where limited amounts of imports are allowed, they face a stiff 25-percent tariff in a commodity where average duty levels of 10 percent are considered high.

Korea has announced it will lift the embargo and reduce the tariff to 20 percent in July 1986. That is encouraging but not good enough. The tariff will still be among the highest in the world, and the industry fears the embargo will be replaced by other trade-restricting measures which would slow down imports.

Soda ash is a prime example of America's natural resource capability being exported with state-of-the-art technology. It shouldn't have to lose its sales potential because of discriminatory government barriers, especially when these countries receive considerable trade benefits from the United States. Ours is a relatively open market to their exports, certainly in areas where they have a comparative advantage. I am hopeful our Government's trade negotiators will give the soda ash problem higher visibility and action in their talks with these countries.●

VETERANS DAY

● Mr. LAUTENBERG. Mr. President, on November 11, Veterans Day, the contributions of our veterans will be honored across the Nation.

On November 11, Americans will gather to pay tribute to the 28½ million men and women who have proudly worn the military uniform of our country in time of war. On November 11, we will take a moment to say "thank you" to them for keeping our country free. As a veteran myself, I am proud of the contributions that veterans have made to the security of our Nation.

I had a special opportunity to remember the contributions of our country's fighting men this year. In May, I traveled to an American military cemetery in Europe. The cemetery is near the small Belgian village of Henri-Chapelle, just west of the German border. Almost 8,000 Americans lie at rest in that Belgian field—297 of those men called New Jersey home. Most gave their lives repelling the Nazi counteroffensive at the Battle of the Bulge. Some died just before the sur-

render was announced, even as the back of the German Army was completely broken.

That cemetery was filled with a pure, still quiet. Row after row of white marble headstones, topped with crosses or stars of David fan down a slope of lush woods. The scene was profoundly tranquil. Tranquility is what our veterans fought for. We fought for peace.

I went to Henri-Chapelle to honor the heroism and the sacrifice of those who died fighting Nazi tyranny. Those brave Americans fell defending democracy. As a nation, we owe our freedom, our spirit, and our progress to their sacrifice, and the sacrifice of other veterans before and since.

On May 9, when we celebrated the 40th anniversary of V-E Day, America publicly honored the many American servicemen who willingly risked their lives for their country. Our veterans left their homes and their loved ones to save Western civilization. They were ordinary men called to do extraordinary things. They answered that call. They accomplished that goal. And they did it, inch by inch, bullet by bullet, foxhole by foxhole. They put their lives on the line to defend the democratic ideals on which this country was founded.

To honor these contributions, I introduced legislation to pay tribute to World War II veterans on V-E Day. That resolution acknowledged the enormous debt this country owes our veterans for their patriotism and bravery on the battlefields of World War II. On May 9, V-E Day, that resolution passed the Senate unanimously.

This year also marked the 10th anniversary of the end of the Vietnam war. For many Vietnam veterans, the recognition and thanks that poured out on that anniversary were long overdue. For those who returned from Vietnam, the aftereffects of that war linger on. Vietnam veterans with the most intense combat exposure are still paying a heavy price for their war service. Vietnam veterans also suffer from posttraumatic stress disorder and from exposure to agent orange.

Honoring veterans with monuments, resolutions, and public recognition on the anniversaries of their victories is important. It is a public way to say thank you. But symbols alone are not enough. A democratic society should say thank you to its war heroes in the way they did—not only with words, but with deeds.

Veterans gave of themselves when our country asked. Our country needs to keep its commitment to its veterans now that they are coming to a point in their lives when they need our help the most. That commitment does not end when Federal budget dollars are being given out. I do not believe the red ink of the Federal deficit should be balanced on the red blood of our American veterans.

On Veterans Day, we should take the opportunity not only to praise our veterans for their contributions but to affirm our commitment to their needs. Only then can we truly honor our veterans in a fitting and meaningful way.●

JOHN B. ZELLARS COMPLETES TERM AS CHAIRMAN OF U.S. LEAGUE OF SAVINGS INSTITUTIONS

● Mr. MATTINGLY. Mr. President, today brings to a close the 1-year term of a fellow Georgian—John B. Zellars—as chairman of the U.S. League of Savings Institutions, the national trade association representing this Nation's savings and loan associations and savings banks. Mr. Zellars can be proud of his year of national association service, because he has presided over his industry during a period of remarkable rebound from the traumas it experienced just a few short years ago.

Consider, Mr. President, that savings institutions this year are virtually certain to post record earnings; that the pace of mortgage lending—the primary investment of savings institutions—continues at record levels; that the proportion of institutions insured by the Federal Savings and Loan Insurance Corporation operating in the black during the second quarter of 1985—the most recent period on which the Federal Home Loan Bank Board has reported—was the highest since 1979; and that savings institutions this year have recorded the widest spread between the cost of funds and portfolio yield since 1956. By anybody's standard, that has got to be considered a banner year.

Mr. Zellars played a major role in his industry's accomplishments during the period of his chairmanship. His contributions were many, but I'd like to single out one for particular mention—the role of Mr. Zellars and his U.S. League colleagues in the effort to reduce the Federal budget deficits which have threatened to cripple this Nation.

In his inaugural address, delivered here in Washington just a year ago, Mr. Zellars vowed that the first priority of his chairmanship would be to assure passage of a budget plan that would reduce the size of the Federal deficit. Following through on that pledge, Mr. Zellars saw to it that the U.S. League launched a massive, nationwide campaign to raise the level of public awareness of the deficit problem. It was a campaign aimed at the grassroots and designed in such a way as to provide public support for us in Congress as we faced up to the difficult and sometimes unpopular task of Federal belt-tightening.

There is still much to be done in this regard, and Mr. Zellars is well aware of that. Indeed, in a message to delegates to the U.S. League's 93rd annual convention this week in Dallas, Mr. Zellars wrote:

> The beginning that Congress and the administration made has helped to keep the financial markets calm and interest rates below the disastrous levels of just a few years ago. But more must be done in the years ahead.

The legacy of Mr. Zellars' chairmanship of the U.S. League no doubt will be one of innovative leadership, of which his adamant pursuit of Federal fiscal responsibility will be remembered as the hallmark.

John B. Zellars, chairman and president and chief executive officer of Georgia Federal Bank, F.S.B., of Atlanta, has served his industry proudly and with great distinction. In the process, he also has shown himself to be a loyal and unselfish contributor to the economic well-being of these United States.

The State of Georgia is proud of her native son, Mr. President, and we wish Mr. Zellars and his wife, Julia, best wishes as they enjoy his deserved position as a senior statesman of the savings institutions community.●

NEWARK RALLY AGAINST APARTHEID

● Mr. LAUTENBERG. Mr. President, this weekend there will be a mass rally and march against apartheid in Newark, NJ, that will begin at Essex County College and proceed to Military Park. The rally, projected to be the largest of its kind in New Jersey, is expected to draw 20,000 people from all walks of life.

The expected success of this rally and march clearly reflects the dedicated efforts of its sponsors and organizers, the United Auto Workers District 65 and the New Jersey Anti-Apartheid Mobilization Coalition. It also demonstrates the deep and continuing commitment of New Jerseyans to ending apartheid in South Africa.

Public demonstrations at the South African Embassy first awakened American public opposition to the evils of apartheid. Public demonstrations like this one will keep the pressure of American public opinion on South Africa, and will let our own Government know that Americans do not support the continuing repression in South Africa.

During the historic struggle to secure equal rights for American blacks, the Reverend Martin Luther King wrote from the Birmingham Jail: "Injustice anywhere is a threat to justice everywhere." Americans know this to be true. That is why 20,000 New Jerseyans will participate in this march.

In South Africa, injustice is a way of life under the yoke of apartheid. As a matter of official policy, South Africa routinely deprives blacks of their civil and political rights.

Black South Africans have no right to vote or to participate in the Government. They live where they are told, in areas assigned to them by whites. They still must carry passbooks whenever they move beyond that area, despite talk of reform.

South Africa robs its blacks of educational opportunity. The Government spends 11 times more on a white child's education than on a black child's. Blacks have minimal job opportunities, and the results are stark.

Black South Africans earn, on average, less than a third what white workers do. No matter how much education a black South African receives, or how hard he or she works, the chance for advancement is nonexistent. And workers risk jail, or even death if they strike for better wages or justice on the job.

If this country's commitment to equality means anything, then we must speak out forcefully against apartheid. And we must do it now. We must make it very clear where we stand on this issue. The system of racism known as apartheid is an affront to all our country stands for.

Anyone who remembers the civil rights struggle in this country knows that. When South African police used whips to smash a peaceful protest by nonwhite students singing "We are the World," I was reminded of how Martin Luther King and his supporters were subjected to the brutality of Birmingham Police Commissioner Bull Connor and his police force. The Birmingham police used attack dogs to scare the protestors. They sprayed protestors with high powered hoses to try to extinguish the fires of freedom burning within them. It did not work in Birmingham. And it will not work in Capetown.

The American people reacted in revulsion at the violence in Birmingham defenseless blacks fighting to be free. From these events flowed landmark civil rights legislation.

Millions of Americans feel the same revulsion today. Our sense of justice is offended by the arrest and jailing of hundreds of black South African children because they did not attend a school that denies them an equal education.

Our sense of fair play is outraged by the deaths of almost 700 blacks this year in the fight against a racist, repressive regime.

And Americans are incredulous at a South African leader who refuses to realize the need for real reform even when his country is under attack from all sides. The black South African fight against apartheid, with its historic parallels to the civil rights struggles in America, is in some measure our fight. It touches a wellspring in the American experience.

This is a time to step forward, not a time to retreat. We must stand with South Africa's blacks and not with their oppressors. The upcoming rally in Newark expresses that solidarity.

As is true so often, New Jersey has provided leadership to the Nation by approving Assemblyman Willie Brown's legislation to take State pension funds out of South Africa. This rally shows a real commitment to continue that leadership, and to keep the pressure on.

Now is the time to stand with South African blacks in their fight to be free. With Alan Boesak, who has suffered in solitary confinement. With Nelson Mandela, who has sacrificed more than two decades of his life for his dream. And with the hundreds of blacks who have died this year. Without such a stance, our commitment to equality is nothing more than empty words. We've had enough words. We need to act. I pledge my full support for strong action to end apartheid. And I commend each and every participant in the Newark rally for putting him or herself out today to express opposition to the evils of apartheid.●

DEATH OF SPENCER W. KIMBALL

● Mr. SYMMS. Mr. President, I rise today to honor one of America's greatest leaders who passed away last night. He was not a leader in the ordinary usage of the word because he held no elected office, commanded no army, or performed no feat that accorded him celebrity status.

I refer to Spencer W. Kimball, the president of the Church of Jesus Christ of Latter-day Saints, the Mormon Church.

Spencer Kimball achieved the true greatness that often eludes world leaders because he was completely true to the highest principles known to mankind. He taught and lived genuine God-like charity to all people, empathy and compassion, sound work ethics, pride in country, and the fundamental importance of the family to society.

At an advanced age Spencer Kimball set an example for all Americans by asking his church members to follow him and lengthen their stride in their service to others. Then, lest they become too comfortable, he asked them to join him and quicken their pace.

Owing to the vision of this remarkable man, the Mormon Church not only grew in numbers and stature worldwide, but expanded its mission to assist the world's less fortunate. In a single, special fast the church responded to President Kimball's call for help by raising some $6 million for impoverished Ethiopians.

Perhaps Spencer Kimball's greatest contribution to his church, to his Nation, and indeed the nations of the world, was his continued emphasis on the family. He taught that true love at home had greater power to heal society's wounds than all the government programs and all the wisdom of the so-called experts combined.

With the passing of President Spencer W. Kimball the world has lost a great man of vision and understanding—a prophet to his people.●

HONORING IGNACY JAN PADEREWSKI

● Mr. RIEGLE. Mr. President, today marks the 125th anniversary of the birth of one of Poland's greatest citizens, Ignacy Jan Paderewski. I am pleased to be a cosponsor of Senate Joint Resolution 208, to declare November 6 "Ignacy Jan Paderewski Day.

Paderewski's varied interests and unusual abilities took him down many paths during his lifetime. A world-renowned musician, statesman and humanitarian, Paderewski's accomplishments continue to inspire us.

Combining his great musical ability with diligent hard work, Paderewski launched a career that made him, for 50 years, the best-known and best paid pianist of all time. His musical compositions include the opera "Manru," a symphony, a piano concerto, a sonata for violin and piano and a work entitled "Fantasy on Polish Melodies." Paderewski's use of themes based on Polish folk music places him among the other nationalistic composers of the time.

Beyond making his mark in the musical world, Paderewski became a leading spokesman for the cause of a free Poland and a free world. In that effort, he was drawn into the political arena, and, in 1915, he became the representative of the wartime Polish National Committee in the United States. With the help of President Taft, Paderewski set up a relief committee which raised over $9 million. Two years later, as a result of Paderewski's efforts, permission was granted to recruit in America a Polish Army to fight in France. Over 27,000 Polish-Americans volunteered to join the ranks of the Allied Forces.

During a concert tour of the United States at the time of the Great Depression, Paderewski's commitment to helping his fellow man was poignantly demonstrated. Concerned with the plight of Polish victims of the war, he raised large sums of money for them through benefit concerts. He also skillfully united Polish-American groups to work for the same end. Contributing over $28,000 in concert receipts to help veterans groups and the unemployed

in the United States, Paderewski became the largest single contributor to the American Legion Fund. As a result, he was named honorary member of the Legion, thus becoming the only civilian foreigner to receive this distinction.

Convinced that a strong Poland was vital for the future peace of Europe, Paderewski prevailed upon President Wilson to include in his famous "Fourteen Points" the provision that a free Poland should emerge following World War I.

Back in Poland, Paderewski, in 1919, was elected and served for 11 months as Premier and Minister of Foreign Affairs. During his term in office, he represented Poland at the Paris Peace Conference, where he successfully convinced the other statesmen that a united Poland was necessary.

Mr. President, as a musician, Paderewski understood that artistic expression can only flourish in a free society. His involvement in the political world flowed from his desire to preserve the essential freedoms of thought and expression.

Today, the fight for human rights and political freedom continues in Poland. Courageous and committed individuals in that country, supported by Polish people around the world, continue the struggle. Through their efforts, and our undying commitment, we will bring closer the day when freedom reigns in Poland, and Paderewski's remains, in accordance with his wishes, can finally be returned home.●

IN MEMORY OF BOB CRAWFORD

● Mr. ANDREWS. Mr. President, it is with great sadness that I must rise to recognize the passing of Bob Crawford, an outstanding young Indian leader who dedicated his life to improving health care for American Indian people. Bob was 42 when he died of a massive heart attack at his home on the Colorado River Indian Reservation on Sunday. He had been in Washington last week for an unprecedented meeting between representatives of tribal governments and officials of the Department of Health and Human Services on Indian health care matters. It has been Bob's hope that Department officials would agree to work with the tribal governments to develop a statement of Indian health policy that would guide the Department's administration of health care services for Indian people.

At the meeting last week, Bob implored the Department to make a commitment to the President's policy of Indian self-determination and to the goal of raising the health status of Indian people to parity with that of the general population. He had asked the Department representatives, "Can you make a commitment to me, and to my children, that we can live as long as you can live?" Unfortunately, like so many Indian people, Bob did not live long enough to hear his question answered.

Bob was a member of the Cherokee Nation of Oklahoma, serving as the director of the Cherokee Nation Health Department from 1978 to 1980, and for the last 5 years, as executive director of Health and Social Services for the Colorado River Indian Tribe. Bob had been honorably discharged following 4 years of service in the U.S. Air Force, and had worked with the Bureau of Indian Affairs social services program on the Mississippi Choctaw Indian Reservation after completing a bachelor's degree at Northwestern Oklahoma State University and additional training in the administration of social services at the University of Wyoming and Arizona State University. Like his father, Bob led his people in the struggle to assure that future generations of Indian children would not face the same fate of early death, poverty and disease that their ancestors have endured.

Bob will be remembered for his unbridled honesty, his contagious energy and enthusiasm, and his persevering dedication to the cause of improving Indian health. He had a vision of quality health care for all Indian people—he fought tirelessly to see that vision realized—and those whose lives he touched in the process will remember his question and seek to have it answered.

Bob Crawford is survived by his mother Glenna, by the children of his first marriage to Reva Crawford, his son Bretley, his daughter Lacey, his brother Gary, his sister Judy Vann, and by his wife Sherrie, and her children Jennifer and Jerome. Funeral services will be held at the Parker Methodist Church at 7 p.m. on November 6, 1985, in Parker, AZ, and burial services will be held at the Reed Culver Funeral Home at 11 a.m. on November 8, 1985, in Tahlequah, OK.●

RALPH NEAS

● Mr. MOYNIHAN. Mr. President, I rise today to call my colleagues' attention to an article that appeared in Tuesday's Wall Street Journal, describing an extraordinary and courageous man, Ralph Neas, and the organization that he skillfully helps lead, the Leadership Conference on Civil Rights.

Mr. President, all of us long involved with and concerned about social justice and economic progress in America know well Ralph Neas and his contributions. As executive director of the Leadership Conference on Civil Rights since 1981, Ralph has helped win important victories for the 185 national organizations representing blacks, women, the disabled, the elderly, and other important groups. He has earned new admiration from those who have known him as an effective advocate, and the respect of those he has opposed.

Those of us who have been in the Senate for a while remember Ralph as one of the Senate's most gifted legislative aides—first with our former colleague from Massachusetts, Senator Edward Brooke, and, then, with the distinguished Senator from Minnesota, DAVID DURENBERGER.

Just as notable as his service to this body is the consistent courage Ralph demonstrated during his struggle with Guillain-Barre syndrome or French polio, a near-fatal illness that paralyzes the victim's body, which struck him in 1979.

Everyone who knows Ralph Neas admires his courage and his ability to get things done, and I ask that the article from the Journal be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Nov. 5, 1985]

VETERAN POLITICAL OPERATIVE ARRANGES CAMPAIGN TO SAVE ANTI-BIAS RULES FOR FEDERAL CONTRACTORS

(By Joann S. Lublin)

WASHINGTON.—Civil-rights lobbyist Ralph Neas slouches comfortably in a congressional office chair, one foot draped over a marble coffee table. A Democratic House staffer tells him the congressman is ready to introduce a bill blocking Reagan administration efforts to weaken federal affirmative-action rules.

Mr. Neas suggests that any possible legislation be carefully timed. The staffer agrees to weigh that advice.

The lobbyist understands timing is key. But the current flap over affirmative-action policy sorely tests the talents of even this skillful political operative. As executive director of the Leadership Conference on Civil Rights, Mr. Neas is orchestrating a campaign to prevent changes in a 1965 anti-bias order that covers companies with a total of $100 billion in yearly federal work. President Reagan soon may issue a new executive order that would end the requirement that government contractors use hiring goals and timetables for minorities and women.

Mr. Neas challenges an administration with an unprecedented commitment to alter most traditional civil-rights remedies. And he operates in a highly conservative congressional climate. Civil rights "no longer is a burning issue with most members of the House and Senate," says Linda Williams, a researcher at the Joint Center for Political Studies, a think tank on black issues.

Critics fault the 39-year-old lawyer for alienating past civil-rights supporters by his championship of racial preferences, such as hiring goals. "His cause isn't in the American tradition" of civil rights, contends Morris Abram, a conservative Democrat who is vice chairman of the U.S. Civil Rights Commission. "He has turned (the Leadership Conference) into a special-interest group."

Mr. Neas doesn't always prevail in Congress. Despite the Leadership Conference's opposition, the Senate Judiciary Committee last week voted to confirm Charles Cooper,

a deputy assistant attorney general, to become an assistant attorney general.

Few Reagan officials, however, under-estimate Ralph Neas, a tireless ex-Senate staffer who once aspired to the priesthood, nor the clout of the Leadership Conference, a longstanding coalition of 185 national groups representing blacks, women, the disabled, the elderly and others. In a rare action last June, the Republican-led Senate committee killed the presidential nomination of William Bradford Reynolds, the department's civil-rights chief, to become associate attorney general. Mr. Neas "set about lobbying to achieve it (the defeat), and he did an effective job," Mr. Reynolds admits.

Ralph Neas's odd credentials—he's a white, Republican male—stirred debate within the black-dominated coalition when he became its first full-time director in 1981. But his political pragmatism and personal ties with many congressional Republicans have helped the nation's biggest civil-rights coalition to win bipartisan support in other fights, such as the 1982 extension of the voting-rights act.

Yet Mr. Neas differs from well-heeled Washington lobbyists who often sway Congress through computerized direct-mail drives and big political contributions. He runs the Leadership Conference from a drab, bunkerlike basement with four staffers and a shoestring $200,000 annual budget. Shadowing Mr. Neas for a few days shows how financially pinched interest groups nevertheless can stir up considerable pressure over hot issues like the possibility of a new executive order altering the affirmative-action program.

He alternately acts as a gung-ho cheerleader or a harsh drill sergeant, exhorting the coalition to reach agreement and then rally their millions of members with petition drives and phone banks.

On a recent morning, Mr. Neas gives marching orders to 30 Leadership Conference representatives: Ask senators to sign one of two letters urging President Reagan to keep the hiring-goals mandate. Minnesota GOP Sen. David Durenberger is circulating a milder version than one pushed by California Democrat Alan Cranston.

"Just call these 10 to 20 people," Mr. Neas says, handing out lists of names. "If they are Republican, ask them to sign the Durenberger letter. If they're Democrat, ask them to sign the Cranston letter." The tactic's failure could mean, he warns, "another legislative battle ahead of us in 1985 and 1986."

Mr. Neas also tries to foster the impression that most employers share the civil-rights coalition's view. In a Democratic Senate staffer's office, he rattles off the names of major corporations, such as International Business Machines Corp. and Monsanto Co., fighting any rollback of the executive order. Many Senate aides he used to work with are now corporate lobbyists, he notes, "and they tell me their CEOs are making the calls" to top administration officials. These business believe goals and timetables have advanced minorities and women and protected management against private job-bias suits.

But he doesn't mention that most small businesses oppose hiring goals as de facto quotas.

On his way out, he commandeers the receptionist's desk to call a Republican senator's office and to arrange other congressional visits that evening. The lobbyist's 14-hour work day ends at 10 p.m. He doesn't stop pressing his case until the last possible minute. On another day, he arrives late for a women's group speech, his curly black hair awry and ruddy cheeks redder than usual. Senate Majority Leader Robert Dole (R., Kans.) has just announced his support for keeping the 1965 executive order intact.

The statement comes just before a cabinet session on the affirmative action rules. "I made a dozen phone calls before I left the office to let people going to the meeting know what was said (by Sen. Dole)," the civil-rights activist says.

Letters signed by nearly 200 members of Congress have arrived at the White House by the time the session begins. Cabinet moderates and conservatives split over the draft executive order; they decide to let the president resolve the politically sticky question without any firm recommendation from them.

The next day, the lobbyist rapidly calls one congressional staffer after another to exult about the White House stalemate. "Let's get today's press coverage (of the cabinet meeting) to our target group" of senators, he tells a GOP Senate aide.

Mr. Neas uses the media extensively to promote his cause, often appearing on network TV and radio programs. He leaked word of the draft executive order in August, overcoming reluctance from other Leadership Conference officials. The civil rights advocate who wants to run for Congress someday, clearly relishes the limelight.

"He has become a real personality in this town," says a friend, American Jewish Committee lobbyist Hyman Bookbinder. There are "great ego-satisfying aspects to his job."●

COMMENDATION OF ROGER DUFOUR

● Mr. SPECTER. Mr. President, I wish to call the Senate's attention to the exemplary life of public service of Mr. Roger Dufour, councilman from Uniontown, Fayette County, PA, who is retiring after many dedicated years of community service.

Mr. Dufour has served western Pennsylvania for more than 27 years—as city councilman in charge of parks and public property and as councilman in charge of public safety. In June 1980, Mr. Dufour received an award from the Pennsylvania League of Cities for having served consecutive terms for over 21 years. This is the longest tenure on record in Pennsylvania.

A member of Laurel Lodge No. 651 of the Free and Accepted Masons, Mr. Dufour has attained the status of 32d degree Mason, Pennsylvania Consistory. He is also a life member of the Syria Temple of Pittsburgh as well as a 35-year member of the Rotary International and a member of the BPO Elks No. 370. In 1984, Mr. Dufour was chosen as the Paul Harris fellow by the Rotary International.

I am sure my colleagues join me in commending Mr. Roger Dufour for his long and devoted service to western Pennsylvania.●

JAPANESE AUTO IMPORTS ARE TOO HIGH

● Mr. RIEGLE. Mr. President, distinguished colleagues, I would like to draw your attention to a news report in today's Washington Post that is entitled "Imports Take 30 percent of October's U.S. Car Sales." I ask permission that this article be inserted into the RECORD at the end of my remarks. I am concerned because this is not a single occurrence, but part of an accelerating trend that will have a devastating effect on our domestic auto industry, and also on steel, rubber, electronics, textiles, and auto parts suppliers here in the United States.

The U.S. auto industry has made great strides in the last several years: It has been striving to improve product quality and productivity by investing nearly $70 billion in product improvement and modernizing U.S. plants and equipment. There have been major productivity gains and technological advances. Massive additional expenditures are needed to meet intense world competition. Failing to renew the export restraint agreement with Japan this past April now threatens the industry just at the time when it needs a strong and sustained capital recovery to continue modernizing.

In April of this year, the voluntary restraint agreement negotiated by our two governments expired. Under that arrangement, 1.85 million Japanese imports were allowed in this country. In March of this year, imports accounted for only 20 percent of the market, a vast improvement from 28 percent at the end of 1982.

President Reagan, in a very damaging trade decision did not renew the agreement, signaling his approval for a higher level of Japanese imported cars. That was a serious mistake.

Clearly, the present import level of 30 percent is not acceptable. While the Japanese have agreed internally to limit auto exports to the United States to 2.3 million vehicles for the year that will end April 1, 1986, the additional 450,000 units will mean the loss of 100,000 auto and other directly related jobs. And if current predictions for an import total of 40 percent within the next few years come true, then another 300,000 American manufacturing jobs will be lost to Japanese imports.

We cannot allow this Japanese trade invasion to continue. The President should undertake immediate steps to bring Japanese car imports back to a level that is less than 2 million vehicles, and he should act now before more damage is done to the U.S. economy and our international financial position.

The article follows:

IMPORTS TAKE 30 PERCENT OF OCTOBER U.S. CAR SALES

(By Edward Miller)

DETROIT, Nov. 5.—Imports, led by Japanese models, captured 30 percent of the U.S. car market in October as domestic auto makers foundered with low inventories, according to company reports released today.

Sales of Japanese-made imports shot up 25 percent from a year ago and accounted for one-fourth of all October new-car sales. Sales of European-made cars were up 19.4 percent from a year ago, capturing 5.7 percent of the market.

Sales of cars produced by U.S. auto makers were down 13.2 percent from a year ago.

Analysts at the domestic companies said the weak performance was caused by the artificially high sales of late August and September, when General Motors Corp. set off a rebate and cut-rate financing war among the Big Three.

In September, at the height of the price clash, Japanese-made cars accounted for less than 17 percent of the market as U.S. car sales soared.

GM sales in October were off by the same amount as the total market, 13.2 percent, and sales for the No. 2 producer, Ford Motor Co., were off 26.9 percent. Chrysler Corp. sales rose in October by 8.5 percent.

"There are crummy-looking sales, and we don't think it's going to get significantly better unless and until the [U.S.] companies come back with incentives," said automotive industry analyst Harvey Heinbach of Merrill Lynch in New York.

However, Louis Lataif, Ford's vice president for sales, said that domestic sales showed signs of recovery late in the month and that "sales will continue to move upward as [dealer] inventories are replenished."

For the month, U.S. auto makers sold 598.363 autos, 13.2 percent below the 689.563 sold a year ago.

Among the small producers, American Honda Motor Co. Inc.'s sales of Ohio-made cars were down 19.5 percent, American Motors Corp. sales were off 30.1 percent and Volkswagen of America Inc. sales rose 51.3 percent from depressed levels of a year ago.●

PROPOSED ARMS SALES

Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in two of the covering letters are available to Senators in the office of the Foreign Relations Committee, SD-423.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington DC, November 1, 1985.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 86-09 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Egypt for defense articles and services estimated to cost $24 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 86-09]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Egypt.

(ii) Total estimated value:

	Million
Major defense equipment[1]	$16
Other	8
Total	24

[1] As defined in section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: Two AN/TPQ-37 Radar Systems with ancillary and support equipment.

(iv) Military department: Army (UGT).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Included in report for quarter ending 30 September 1985.

(viii) Date report delivered to Congress: November 1, 1985.

POLICY JUSTIFICATION

Egypt—AN/TPQ-37 radar systems.—The Government of Egypt (GOE) has requested the purchase of two AN/TPQ-37 Radar Systems with ancillary and support equipment. The estimated cost is $25 million.

The proposed sale supports the American foreign policy and national security objectives of assisting the GOE in its program of modernizing its armed forces so that it may provide for its own security and self-defense and contribute to regional security and stability. A strong and independent Egypt will be able to participate in the Middle East peace process and resist incursions of Soviet client states in the region.

The Egyptian Army needs these weapon-locating radar systems as a primary means of locating the source of hostile artillery fire. Egypt will have no difficulty absorbing these systems into its armed forces.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Hughes Aircraft Corporation of Fullerton, California.

Implementation of this sale will require the assignment to Egypt of five additional U.S. Government personnel for two weeks and one contractor representative for one year.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, November 1, 1985.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding under separate cover Transmittal No. 86-08, concerning the Department of the Air Force's proposed Letter of Offer to Switzerland for defense articles and services estimated to cost $14 million or more. Since most of the essential elements of this proposed sale are to remain classified, we will not notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 86-08]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective purchaser: Switzerland.

(ii) Total estimated value:

Major defense equipment[1]	$[Deleted]
Other	[Deleted]
Total	[Deleted]

[1] As defined in section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: [Deleted.]

(iv) Military Department: Air Force [YAP].

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Included in report for quarter ending September 30, 1985.

(viii) Date report delivered to Congress: November 1, 1985.

POLICY JUSTIFICATION

[Deleted.]

[Deleted.]

(U) This sale will further the foreign policy goals of the United States by helping to assure the defense of a friendly country whose avowed neutrality has long contributed to the security of Western Europe. It is consistent with the U.S. policy of assisting other nations to provide for their own defense and security. Switzerland has traditionally based its independence on a strong and ready military establishment.

[Deleted.]

(U) The prime contractor will be the Ford Aerospace Corporation of Newport Beach, California.

(U) Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Switzerland.

(U) There will be no adverse impact on U.S. defense readiness as a result of this sale.●

ORDERS FOR THURSDAY

RECESS UNTIL 9 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that once the

Senate completes its business today, it stand in recess until 9 a.m. on Thursday, November 7, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. I further ask unanimous consent, Mr. President, that following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators PROXMIRE, BRADLEY, and BAUCUS.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Following the special orders just identified, Mr. President, I ask unanimous consent there be a period for the transaction of routine morning business not to extend beyond 10 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following morning business, it will be the intention of the majority leader to turn to the consideration of Calendar No. 380, H.R. 3327, the military construction appropriations bill, and votes can be expected in relation to that measure.

By unanimous consent, at 1:50 we will return to the nomination of Alex Kozinski to be U.S. circuit judge for the ninth circuit. Following 10 minutes of debate equally divided, at 2 p.m. there will be a rollcall vote on that nomination.

Also, following the vote on the nomination, we will either return to the military construction bill or move to the consideration of S. 1527, the civil service retirement bill, hopefully under a time agreement.

Mr. LEVIN. Mr. President, I want to make clear one point Senator CRANSTON asked me to protect. As I understand it, the pending legislative business is H.R. 505. My inquiry of the Chair is, does the majority leader's proposal require that we set aside H.R. 505?

The PRESIDING OFFICER. There is no request pending to do that.

ORDER TO SET ASIDE HOUSE MESSAGE H.R. 505

Mr. DOLE. Mr. President, I ask unanimous consent that the House message on H.R. 505 be set aside until the closing of morning business on Wednesday, November 13.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT SUBJECT TO APPROVAL OF THE MINORITY LEADER

Mr. DOLE. Mr. President, I have a rather lengthy unanimous-consent request which will be implemented unless the distinguished minority leader should raise an objection tomorrow morning. I ask unanimous consent that that be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. On that basis, I ask unanimous consent that when the Senate turns to the consideration of S. 1527, the Civil Service retirement bill, it be considered under the following time agreement: 3 hours total on the bill, on all debate, and amendments, to be equally divided between the chairman of the Governmental Affairs Committee and the ranking minority member, or their designees; that the following amendments be the only amendments in order, with the exception of the committee report amendment in the nature of a substitute for S. 1527, and each amendment be limited to 10 minutes, to be equally divided:

Mr. TRIBLE, second election for survivor's benefits; Mr. CHILES, increase disability protection; Mr. GORE, loosen restrictions on loan arrangements; Mr. LUGAR, cover Foreign Service under retirement program; Mr. EAGLETON, cover CIA under the retirement program; Mr. DURENBERGER, second degree amendment to Eagleton CIA amendment to increase accrual rate for CIA; Mr. STEVENS, makes transfer provisions consistent among Federal Retirement, Foreign Service, and CIA systems; and Mr. ROTH, technical amendments en bloc.

I also ask unanimous consent that there be no time on debatable motions, appeals, or points of order, and that no motions to recommit with instructions be in order, and that the agreement be in the usual form.

I further ask unanimous consent that once S. 1527 has been advanced to third reading, the Senate immediately turn to the consideration of H.R. 2672, to redesignate the New York International and Bulk Mail Center, and the only action in order prior to third reading be an amendment which will be the text of S. 1527, as amended, if amended, and committee reported technical amendment.

Finally, I ask unanimous consent that following adoption of the two amendments in order to H.R. 2672, the Senate proceed to third reading and final passage of H.R. 2672, without any intervening action.

Before the Chair rules on the request, I again state that this would be subject to an objection by the distinguished minority leader at any time before the bill comes up tomorrow.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RECESS UNTIL 9 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move we stand in recess until 9 a.m. Thursday, November 7, 1985.

The motion was agreed to; and, at 6:48 p.m., the Senate recessed until Thursday, November 7, 1985, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate November 6, 1985:

DEPARTMENT OF STATE

Paul Matthews Cleveland, of Florida, a career member of the Senior Foreign Service, class of minister-counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to New Zealand.

DEPARTMENT OF THE INTERIOR

J. Steven Griles, of Virginia, to be an Assistant Secretary of the Interior, vice Garrey Edward Carruthers, resigned.

DEPARTMENT OF ENERGY

Sylvester R. Foley, Jr., of Florida, to be an Assistant Secretary of Energy (Defense Programs), vice William W. Hoover, resigned.

IN THE NAVY

The following-named permanent limited duty officers, to be reappointed permanent lieutenant as limited duty officers in the line of the U.S. Navy, pursuant to title 10, United States Code, section 5589(a):

Alexander, Lewis M.
Allen, Jimmie S.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 6, 1985:

DEPARTMENT OF COMMERCE

Orson G. Swindle, III, of Georgia, to be an Assistant Secretary of Commerce.

DEPARTMENT OF STATE

Alan Lee Keys, of Maryland, to be an Assistant Secretary of State.

DEPARTMENT OF AGRICULTURE

Vance L. Clark, of California, to be Administrator of the Farmers Home Administration.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Wednesday, November 6, 1985*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Oh God, teach us to appreciate each day and Your wonderful gifts which are on every side. We admit we so easily see the dangers and fears of our time and we recognize the problems of life. Yet, we know that You allow us light to brighten the darkness of despair and You give hope to every person. May Your spirit make glad our hearts that our eyes may see the beauty of our world and the opportunities for service to others that surround us each day. This we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House with an amendment to a joint resolution of the Senate of the following title:

S.J. Res. 29. Joint resolution to designate the week of November 11, 1985, through November 17, 1985, as "National Reye's Syndrome Week."

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1124. An act to amend title 49, United States Code, to reduce regulation of surface freight forwarders, and for other purposes.

YESTERDAY VIRGINIA HAD A RENDEZVOUS WITH HISTORY

(Mr. BOUCHER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOUCHER. Mr. Speaker, yesterday Virginia had a rendezvous with history.

Building on the effective leadership of Gov. Chuck Robb, Virginians elected Jerry Baliles, a man of great ability, to guide the Commonwealth for the next 4 years.

The election of Doug Wilder as Lieutenant Governor, the first black candidate elected to statewide office in the South since Reconstruction, and Mary Sue Terry, only the second woman attorney general in American history, confounded the skeptics.

Virginia showed the Nation that in our State neither race nor gender will stand as a barrier to election to high public office.

Our success is a tribute to Governor Robb's administration, which set a standard of excellence to which all Virginians aspire. We are all very proud of Governor Robb and the victory he is largely responsible for engineering.

Our Nation's democratic roots reach deep into the Old Dominion. There are many who believe today that our soil is fertile ground from which national leadership will again blossom.

HHS CONTINUES TO IGNORE CONGRESS ON ELDER ABUSE FUNDING

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, it has been called granny bashing and the King Lear syndrome.

It is estimated to strike over 1 million senior citizens annually.

We know it as elder abuse.

Last Congress we approved, for the first time, legislation to address this problem.

Last year, for the first time ever, Congress provided $6 million to fund a new prevention and treatment program for victims of family violence, including elderly family members.

To date, the Department of Health and Human Services has continued to ignore this funding and has steadfastly refused to issue regulations in order to implement this program.

Mr. Speaker, as an original member of the Select Committee on Aging which has been deeply involved in this issue and one of the authors of the family violence legislation, I remain shocked and dismayed at the arrogant and callous attitude of the Department in this matter.

While seniors are being victimized, physically and financially, the Department does nothing.

I call upon the Department to act immediately to issue regulations and release these funds to combat one of the most immediate and pressing health problems facing our vulnerable elderly today.

PERMISSION FOR SUBCOMMITTEE ON MERCHANT MARINE OF THE COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT DURING THE 5-MINUTE RULE ON THURSDAY, NOVEMBER 7, 1985

Mr. BIAGGI. Mr. Speaker, I ask unanimous consent that the Subcommittee on Merchant Marine of the Committee on Merchant Marine and Fisheries be permitted to sit at 10 a.m. on Thursday, November 7, 1985, for the purpose of continuing hearings on H.R. 277, a bill to amend the laws on limitation of a shipowner's liability, and on chapter 311 of H.R. 3156 pertaining to limitation of liability.

The ranking minority member of the committee, the gentleman from New York [Mr. LENT], and the ranking minority member of the subcommittee, the gentleman from Kentucky [Mr. SNYDER], have been apprised of the hearing date and time and are in accord with this request.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

A TRIBUTE TO CHRIS PEDERSON

(Mr. SABO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SABO. Mr. Speaker, I rise today in memory of Chris Pederson. Chris, you were a free spirit; you excited all of us who knew you. In an age of conformity, you questioned. You were young, but a friend to many. You leave us wondering about the mysteries of life, and learning to accept what we cannot understand.

To his parents, Dwight and Marion, and his sister, Denise, I offer my sympathy and concern.

Chris, you will be remembered and missed.

GUATEMALA'S FIRST ROUND ELECTIONS

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, I am pleased to report that there is good news from Guatemala. Vinicio Cerezo and Roberto Carpio were declared the top two finishers in the No-

vember 4 first round Presidential elections.

This sets the stage for a runoff election to be held on December 8. The winner will be sworn in on January 14 as Guatemala's first elected civilian President in 15 years.

This historic occasion took place without any interference by the military, and a bipartisan delegation of election observers from this country unanimously agreed that the election was fairly and efficiently conducted.

Mr. Speaker, this is a big step toward real democracy in Guatemala, and I urge my colleagues to join with me in cosponsoring House Concurrent Resolution 200, which commends the current military government of Guatemala for its commitment to returning that country to civilian rule.

APPOINTMENT OF CONFEREES ON H.R. 3038, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT-INDEPENDENT AGENCIES APPROPRIATION ACT, 1986

Mr. SABO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3038), making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota? The Chair hears none, and appoints the following conferees: Messrs. BOLAND, TRAXLER, and STOKES, Mrs. BOGGS, and Messrs. SABO, BONER of Tennessee, WHITTEN, GREEN, COUGHLIN, LEWIS of California, and CONTE.

THE SOCIAL SECURITY TRUST FUND INTEGRITY BILL

(Mr. FORD of Tennessee asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORD of Tennessee. Mr. Speaker, in an attempt to address the problem of Social Security Trust Fund disinvestment and other Federal trust fund disinvestments, I am introducing today the Social Security Trust Fund integrity bill, which would restore to the Social Security Trust Funds and other Federal retirement trust funds losses resulting from the recent noninvestments, redemptions, and disinvestments in connection with efforts to meet the public debt limit. Most importantly, it would require prior congressional approval of any further disinvestment of trust funds in connection with efforts to meet the public debt limit.

Last week, the Secretary of the Treasury violated the old age and survivors trust fund by removing $13 billion. These funds represented over one-third of the $37 billion value of the trust. The Secretary's action was a serious breach of his fiduciary responsibility as a trustee of the fund threatening the fund's integrity and possibly costing Social Security beneficiaries $1.1 billion—CBO estimate—over the next 5 years in lost revenues.

We cannot continue to compromise the economic safety of the elderly and disabled to avoid confronting the Federal deficit. Senior citizens and the disabled who rely on the availability of Social Security for their future are justly outraged and frightened by the potential loss of $1.1 billion to the fund. Although payments to beneficiaries were unaffected, the long-term fiscal health of the trust fund was jeopardized.

This legislation will renew our commitment to the American people to safeguard the Social Security Trust Fund, particularly from the annual debt limit battle. Contrary to the glib remarks of several administration officials, Social Security beneficiaries should not be pawns or scapegoats whenever the Government is faced with an economic crisis.

The Social Security Trust Fund surplus is a necessary source of financing for Government programs. However, we owe the trust fund and its beneficiaries the same treatment that private lenders receive—the payment of interest on debt. To do less would be blatantly unjust.

JUST ANOTHER FORM OF CREATIVE FINANCING?

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, this morning's media reports that the Federal Home Loan Bank Board chartered, without public discussion or comment or involvement by the Congress, a thrift to manage and dispose of savings and loan assets owned by the financially troubled Federal Savings and Loan Insurance Corporation. I support whatever help we can give to FSLIC, but these reports that I have seen raise more questions than they provide answers to how this new quasi-governmental organization will be structured and who will provide the capital necessary to transfer assets from FSLIC's books to the new corporation. We must know the long-range implications of this proposal. Let me mention just a few concerns that must be resolved:

Is this liquidating thrift just another form of creative accounting that moves assets from one place to another? The asset character at the ski resorts, condos and mushroom farms which FSLIC has inherited from insolvent thrifts will not change because they are held by a new corporation. Another unresolved question is how much liquidity will this new organization provide the FSLIC? And how much will the district banks be required to ante up to finance this liquidating thrift? Any contribution by the district banks must not endanger their credit standing in the financial markets, adversely affecting and influencing the cost of funds for the entire thrift industry.

We must insure, Mr. Speaker, that this proposal is not just a new, modern version of the pea and shell game. I hope the Congress will provide oversight to the Bank Board's new liquidating corporation.

□ 1010

THE NOTHING BURGER OF 1985

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, one important contribution the Reagan administration has made to political dialog in this country is the now famous concept of the nothing burger.

Yesterday's elections, coupled with other special elections this year, offer convincing proof that the highly touted realignment of Democratic voters to the Republican Party is the Nothing Burger of 1985. Yesterday, in Virginia, the voters of that great Commonwealth—targeted by Republicans for realignment—resoundingly rejected the rightwing Republican ticket strongly supported by Mr. Reagan and Rev. Jerry Falwell.

Only 1 month ago the voters of Honolulu voted to recall three Democratic city councilmen who switched to the Republican Party in an attempt to bring about a realignment by Mr. Reagan. And, of course, let us not overlook the election of our newest colleague from Texas, who withstood the most expensive Republican challenge of the year in this House race.

Mr. Speaker, based on all of these key tests of realignment, we Democrats can only look at Mr. Reagan's paltry Nothing Burger and wonder "Where's the beef?"

DEATH OF PRESIDENT SPENCER W. KIMBALL

(Mr. MONSON asked and was given permission to address the House for 1 minute.)

Mr. MONSON. Mr. Speaker, I rise today to pay tribute to a true man of God—the revered and loved prophet and president of the Church of Jesus

Christ of Latter-day Saints, Spencer W. Kimball. President Kimball, the respected leader of the so-called Mormon Church since 1973, died late last night in Salt Lake City, UT. President Kimball has presided over the church during years of unprecedented growth. At the time of his death, the church flourished as the fastest growing church in the world—now almost 6 million members strong.

President Kimball, the 12th president of the Mormon Church, has been one of the most energetic leaders of the church since its early days in the 1800's. At 90 years of age and in a frail state of health, President Kimball continued to serve as he had for decades giving strength and courage to the church members he so loved. He served as an example of honesty, truth, and love to all who knew him and exemplified his life's motto, which was simply: Do it. He delivered practical messages for the good of men and women all over the world, not just members of the Mormon Church. He advised people to be prepared; to have a house of order; to strengthen and cherish family relationships; to be energetic and true to the best that is in us. His sweet and loving presence will long be remembered and savored by those touched by his influence.

A TRIBUTE TO THE LATE DEACON JOHN H. ROEBUCK

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, I rise today to honor a gentleman who died yesterday morning, the father of one of our faithful employees, Raymond Roebuck.

Ray's father, Deacon John Roebuck, who was affectionately known as Papa Roebuck by his fellow Canaanites, was one of the original organizers of the Canaan Baptist Church. As a result of his calling, Deacon Roebuck was appointed the first deacon and the first chairman of the deacon board in the history of Canaan.

Prior to his affiliation with Canaan, Deacon Roebuck lived in Madison County, VA, where he was born on February 18, 1894. While there, he found joy in his work as a farmer before migrating to Washington, DC, in 1930. He attended Oak Grove Baptist Church and served as deacon there. Along his journey, Deacon Roebuck met and married Ms. Lillian Chivas, who became the mother of his 11 children.

Upon moving to the Washington area, Deacon Roebuck decided to work for the D.C. Park Service. He later accepted a position with the U.S. Post Office, and retired from there. He also became a deacon at the 1st Baptist Church of Mount Pleasant.

All of his 11 children, 14 grandchildren, and 15 great-grandchildren share mutually warm feelings toward him, as do all of us today.

AN EXPRESSION OF SYMPATHY TO RAYMOND ROEBUCK ON THE DEATH OF HIS FATHER

(Mr. LELAND asked and was given permission to address the House for 1 minute.)

Mr. LELAND. Mr. Speaker, let me join with my colleague, the gentleman from California [Mr. COELHO], in paying tribute to the father of our good friend, Raymond Roebuck.

Raymond, of course, has been a friend to many of us here in the Congress, Democrats and Republicans alike. Those who have traipsed through the Democratic Cloakroom know of the faithful and loyal service he has rendered to all of us. Even today, the day after his father passed away, Raymond is back there working.

We not only want to memorialize his father, but also pay tribute to Raymond for the contributions he has made to all of us. We want Raymond to know that he is indeed our friend and we his friend, and we want to say to him that if indeed he needs a shoulder or a hand, from this day forward, he has got many, many of those.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on each motion to suspend the rules on which further proceedings were postponed on Monday, November 4, 1985, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.J. Res. 36, by the yeas and nays;

H.R. 2205, by the yeas and nays; and

H.J. Res. 142, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic vote after the first such vote in this series.

MEMORIAL TO HONOR WOMEN WHO HAVE SERVED IN OR WITH THE ARMED FORCES

The SPEAKER. The unfinished business is the question of suspending the rules and passing the joint resolution, House Joint Resolution 36, as amended.

The Clerk read the title of the joint resolution.

The SPEAKER. The question is on the motion offered by the gentlewoman from Ohio [Ms. OAKAR] that the House suspend the rules and pass the joint resolution, House Joint Resolution 36, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 405, nays 0, not voting 29, as follows:

Mr. LEWIS of California and Mr. DICKINSON changed their votes from "nay" to "yea."

Mr. TORRICELLI and Mr. FRANK changed their votes from "present" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the joint resolution was amended so as to read: "Joint resolution authorizing establishment of a memorial to honor women who have served in or with the Armed Forces of the United States."

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

KOREAN WAR MEMORIAL ACT

The SPEAKER. The unfinished business is the question of suspending the rules and passing the bill, H.R. 2205, as amended.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentlewoman from Ohio [Ms. OAKAR] that the House suspend the rules and pass the bill, H.R. 2205, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 406, nays 0, not voting 28, as follows:

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to authorize the American Battle Monuments Commission to establish a memorial to honor members of the Armed Forces of the United States who served in the Korean conflict."

A motion to reconsider was laid on the table.

□ 1045

BLACK REVOLUTIONARY WAR PATRIOTS MEMORIAL

The SPEAKER. The unfinished business is the question of suspending the rules and passing the joint resolution, House Joint Resolution 142, as amended.

The Clerk read the title of the joint resolution.

The SPEAKER. The question is on the motion offered by the gentlewoman from Ohio [Ms. OAKAR] that the House suspend the rules and pass the joint resolution, House Joint Resolution 142, as amended, on which the yeas and nays were offered.

The vote was taken by electronic device, and there were—yeas 408, nays 0, not voting 26, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended, and the joint resolution, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "Joint resolution authorizing establishment of a memorial to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom."

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. RODINO. Mr. Speaker, during the vote on H.R. 2205, the Korean War Memorial, I was in the Chamber but failed to vote. Had I voted, I would have voted "aye."

PERSONAL EXPLANATION

Mr. AKAKA. Mr. Speaker, during the vote on House Joint Resolution 36, I was unavoidably detained.

Had I been here, I would have voted "yes."

VACATING 60-MINUTE SPECIAL ORDER AND AUTHORIZING 5-MINUTE SPECIAL ORDER

Mr. PARRIS. Mr. Speaker, I ask unanimous consent that my 60-minute special order for today be vacated, and that I be permitted to address the House for 5 minutes and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

There was no objection.

WATER RESOURCES CONSERVATION, DEVELOPMENT, AND INFRASTRUCTURE IMPROVEMENT AND REHABILITATION ACT OF 1985

The SPEAKER. Pursuant to House Resolution 305 and rule XXIII, the Chair declares the House in the Committee of the Whole on the State of the Union for the further consideration of the bill, H.R. 6.

□ 1058

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 6) to provide for the conservation and development of water and related resources and the improvement and rehabilitation of the Nation's water resources infrastructure, with Mr. TRAXLER [Chairman pro tempore] in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee of the Whole rose on Tuesday, November 5, 1985, all time for general debate had expired.

Pursuant to the rule, an amendment in the nature of a substitute consisting of the text of H.R. 3670 is considered by titles as an original bill for the purpose of amendment under the 5-minute rule in lieu of the committee amendments now printed in the bill, and each title is considered as having been read. Prior to title I, there are six sections which will be designated separately.

No amendments to the substitute are in order to title XV.

It is in order to consider en bloc the amendments to the substitute printed in the CONGRESSIONAL RECORD of November 4, 1985, by, and if offered by Representative HOWARD or his designee, and said amendments are in order although changing portions of the substitute not yet considered for amendment, and said amendments are not subject to a demand for a division of the question.

The Clerk will designate section 1.

The text of section 1 is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985".

The CHAIRMAN pro tempore. Are there any amendments to section 1?

If not, the Clerk will designate section 2.

The text of section 2 is as follows:

SEC. 2. In order to insure against cost overruns, each estimated cost set forth in this Act for a project shall be the maximum amount authorized to pay for the Federal share of the cost of that project, except that such maxium amount shall be automatically increased for—

(1) changes in construction costs (including real property acquisitions, preconstruction studies, planning, engineering, and design) from October 1984 as indicated by engineering and other appropriate cost indexes;

(2) modifications which do not materially alter the scope or functions of the project as authorized; and

(3) additional studies, modifications, and actions (including mitigation and other environmental actions) authorized by this Act or required by changes in Federal law.

□ 1100

The CHAIRMAN pro tempore. Are there any amendments to section 2?

The Clerk will designate section 3.

The text of section 3 is as follows:

SEC. 3. For purposes of this Act, the term "Secretary" means the Secretary of the Army, acting through the Chief of Engineers.

The CHAIRMAN pro tempore. Are there amendments to section 3?

The Clerk will designate section 4.

The text of section 4 is as follows:

SEC. 4. Sections 201 and 202 and the fourth sentence of section 203 of the Flood Control Act of 1968 shall apply to all projects authorized by this Act.

The CHAIRMAN pro tempore. Are there any amendments to section 4?

The Clerk will designate section 5.

The text of section 5 is as follows:

SEC. 5. Any spending authority under this Act shall be effective only to such extent and in such amounts as are provided in appropriation Acts. For purposes of this Act, the term "spending authority" has the meaning provided in section 401(c)(2) of the Congressional Budget Act of 1974, except that such term does not include spending authority for which an exception is made under section 401(d) of such Act.

The CHAIRMAN pro tempore. Are there any amendments to section 5?

The Clerk will designate section 6.

The text of section 6 is as follows:

SEC. 6. If any provision of this Act, or the application of any provision of this Act to any person or circumstance, is held invalid, the application of such provision to other persons or circumstances, and the remainder of this Act, shall not be affected thereby.

The CHAIRMAN pro tempore. Are there any amendments to section 6?

The Clerk will designate title I.

The text of title I is as follows:

TITLE I—PORT DEVELOPMENT

SEC. 101. DEEP-DRAFT PORT PROJECTS.

The following projects for ports are hereby authorized to be prosecuted by the Secretary substantially in accordance with the plans and subject to the conditions recommended in the respective reports hereinafter designated in this section, except as otherwise provided, or in accordance with such plans as the Secretary determines advisable in any case in which there is no report designated.

NORFOLK HARBOR AND CHANNELS, VIRGINIA

The project for navigation, Norfolk Harbor and Channels, Virginia: Report of the Chief of Engineers, dated November 20, 1981, at an estimated cost of $252,700,000 including such modifications as may be recommended by the Secretary in the report or reports transmitted under this paragraph. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study the effects that construction, operation, and maintenance of each segment of the proposed project will have on fish and wildlife resources and the need for mitigation of any damage to such resources resulting from such construction, operation, and maintenance. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study with respect to the project or separate reports on the results of such study with respect to each segment of the project, along with recommendations for modifications in any such segment which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of such construction, operation, and maintenance on such resources. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, any such segment if such acquisition and actual construction have not been approved by resolution adopted by each such committee.

MOBILE HARBOR, ALABAMA

The project for navigation, Mobile Harbor, Alabama: Report of the Chief of Engineers, dated November 18, 1981, at an estimated cost of $387,000,000, including such modifications as may be recommended in a plan transmitted under this paragraph; except that if non-Federal interests construct a bulk material transshipment facility in lower Mobile Bay, the Secretary, upon request of such non-Federal interests, may limit construction of such project from the Gulf of Mexico to such facility and except that, for reasons of environmental quality, dredged material from such project shall be disposed of in open water in the Gulf of Mexico in accordance with all provisions of Federal law. For reasons of environmental quality, not later than one year after the date of enactment of this Act, the Secretary, the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Administrator of the Environmental Protection Agency, and appropriate non-Federal interests shall develop, and transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate, a plan to dispose of dredged material from such project in the Brookley disposal area, referred to in such report of the Chief of Engineers, and a plan to mitigate damages to fish and wildlife from disposal of such material in the Brookley disposal area. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project unless such plans have been approved by resolution adopted by each such committee or unless the non-Federal sponsor of such project transmits, in the one-year period beginning on the date of enactment of this Act, a letter to each such committee indicating that the Secretary, the United States Fish and Wildlife Service, the Administrator of the Environmental Protection Agency, and the non-Federal interests are not able to develop such plans. Notwithstanding any other provision of law, no dredged or fill material shall be disposed of in the Brookley disposal area, referred to in such report of the Chief of Engineers unless such plans have been approved by resolution adopted by each such committee.

MISSISSIPPI RIVER SHIP CHANNEL, GULF TO BATON ROUGE, LOUISIANA

The project for navigation, Mississippi River Ship Channel, Gulf to Baton Rouge, Louisiana: Report of the Chief of Engineers,

dated April 9, 1983, at an estimated cost of $175,100,000. Nothing in this paragraph and such report shall be construed to affect the requirements of Public Law 89-669, as amended.

TEXAS CITY CHANNEL, TEXAS

The project for navigation, Texas City Channel, Texas: Report of the Board of Engineers for Rivers and Harbors, dated January 19, 1983, at an estimated cost of $118,000,000, including such modifications as may be recommended by the Secretary with respect to such project under section 103. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, any portion of the project (other than reaches six, seven, eight, and nine of the Common Entrance Channel) if such acquisition and actual construction have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

NEW YORK HARBOR AND ADJACENT CHANNELS, NEW YORK AND NEW JERSEY

The project for deepening of the Ambrose Channel feature of the navigation project, New York Harbor and Adjacent Channels, to a depth of 55 feet and widening such channel to 770 feet, and for deepening of the Anchorage channel feature of such navigation project to a depth of 55 feet and widening such channel to 660 feet, at an estimated cost of $178,000,000, including such modifications as may be recommended by the Secretary with respect to such project under section 103. Disposal of beach quality sand from construction, operation, and maintenance of such features of such project shall take place at the ocean front on Staten Island, New York, and Sea Bright and Monmouth Beach, New Jersey, at full Federal expense. No disposal of dredged material from construction, operation, and maintenance of such features of such project shall take place at Bowery Bay, Flushing Bay, Powell's Cove, Little Bay, or Little Neck Bay, Queens, New York. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

LOS ANGELES AND LONG BEACH HARBORS, SAN PEDRO BAY, CALIFORNIA

The project for deepening of the entry channel to the harbor of Los Angeles, California, to a depth of 65 feet and for deepening of the entry channel to the harbor of Long Beach, California, to a depth of 76 feet, including the creation of 800 acres of land with the dredged material from the project, as Phase I of the San Pedro Bay development, at an estimated cost of $230,000,000.

SEC. 102. GENERAL CARGO PORT PROJECTS.

The following projects for ports are hereby authorized to be prosecuted by the Secretary substantially in accordance with the plans and subject to the conditions recommended in the respective reports hereinafter designated in this section, except as otherwise provided, or in accordance with such plans as the Secretary determines advisable in any case in which there is no report designated.

PORTSMOUTH HARBOR AND PISCATAQUA RIVER, NEW HAMPSHIRE

The project for navigation, Portsmouth Harbor and Piscataqua River, New Hampshire: Report of the Chief of Engineers, dated February 25, 1985, at an estimated cost of $17,000,000, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph or with respect to such project under section 103. The Secretary, in consultation with Federal, State, and local agencies, shall study the adequacy of potential disposal sites necessary for construction, operation, and maintenance of the project. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for modifications in the project which the Secretary determines to be necessary and appropriate to assure that adequate disposal sites are available for construction, operation, and maintenance of such project. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee.

NEW HAVEN HARBOR, CONNECTICUT

The project for navigation, New Haven Harbor, Connecticut: Report of the Chief of Engineers, dated July 26, 1982, with such modifications as may be recommended by the Secretary in the report submitted under this paragraph, at an estimated cost of $18,600,000. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study the effects that construction, operation, and maintenance of the proposed project will have on oyster beds and the production of oysters in New Haven Harbor. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for modifications in the project which the Secretary determines to be necessary and appropriate to mitigate adverse effects of such construction, operation, and maintenance on such beds and production. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project unless such acquisition and actual construction have been approved by resolution adopted by each such committee.

GOWANUS CREEK CHANNEL, NEW YORK

The project for navigation, Gowanus Creek Channel, New York: Report of the Chief of Engineers, dated September 14, 1982, at an estimated cost of $1,610,000.

KILL VAN KULL, NEW YORK AND NEW JERSEY

The project for navigation, Kill Van Kull and Newark Bay Channels, New York and New Jersey: Report of the Chief of Engineers, dated December 14, 1981, at an estimated cost of $260,000,000. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

ARTHUR KILL, NEW YORK AND NEW JERSEY

The project for navigation, Arthur Kill, New York and New Jersey: Draft report of the District Engineer for New York, dated May 1983, at an estimated cost of $59,000,000, including any modifications that may be recommended by the Secretary with respect to that project under section 103 of this Act.

NEW YORK HARBOR AND ADJACENT CHANNELS, NEW YORK AND NEW JERSEY

The project for (1) an access channel 45 feet deep below mean low water and generally 450 feet wide with suitable bends and turning areas to extend from deep water in the Anchorage Channel, New York Harbor, westward approximately 12,000 feet along the southern boundary of the Port Jersey peninsula to the head of navigation in Jersey City, New Jersey, at an estimated cost of $29,700,000; and (2) for a channel 42 feet deep below mean low water and generally 300 feet wide with suitable bends and turning areas to extend from deep water in the Anchorage Channel westward approximately 11,000 feet to the head of navigation in Claremont Terminal Channel, at an estimated cost of $16,000,000, including such modifications as may be recommended by the Secretary with respect to such project under section 103. No disposal of dredged material from construction, operation, and maintenance of such project shall take place at Bowery Bay, Flushing Bay, Powell's Cove, Little Bay, or Little Neck Bay, Queens, New York. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

WILMINGTON HARBOR-NORTHEAST CAPE FEAR RIVER, NORTH CAROLINA

The project for navigation, Wilmington Harbor-Northeast Cape Fear River, North Carolina: Report of the Chief of Engineers, dated September 16, 1980, at an estimated cost of $7,160,000.

CHARLESTON HARBOR, SOUTH CAROLINA

The project for navigation, Charleston Harbor, South Carolina: Report of the Chief of Engineers, dated August 27, 1981, including construction of an extension of the harbor navigation channel in the Wando River to the State port authority's Wando River terminal, Report of the Chief of Engineers, dated May 1, 1985, at an estimated cost of $65,700,000.

SAVANNAH HARBOR, GEORGIA

The project for navigation, Savannah Harbor, Georgia: Report of the Chief of En-

gineers, dated December 19, 1978, at an estimated cost of $15,125,000, except that non-Federal interests shall be reimbursed by the Secretary for moving or modifying docks, bulkheads, warehouses, towers, and railroad facilities necessary for project construction, at an estimated cost of $3,160,000. Such reimbursement at total Federal expense shall be based on the replacement costs, exclusive of betterment, minus the fair market value of the existing structures.

MANATEE HARBOR, FLORIDA

The project for navigation, Manatee Harbor, Florida: Report of the Chief of Engineers, dated May 12, 1980, at an estimated cost of $10,800,000, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study the effects that construction, operation, and maintenance of the proposed project will have on the benthic environment of the area to be dredged. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for modifications in the project which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of such construction, operation, and maintenance on such benthic environment. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such Committee. The Secretary shall monitor the effects of construction, operation, and maintenance of the project on the benthic environment of the dredged area.

TAMPA HARBOR, EAST BAY CHANNEL, FLORIDA

The project for navigation, Tampa Harbor, East Bay Channel, Florida: Report of the Chief of Engineers, dated January 25, 1979, at an estimated initial cost of $2,860,000. The Secretary shall monitor the effects of construction, operation, and maintenance of the project on water quality and the environment.

SAN JUAN HARBOR, PUERTO RICO

The project for navigation, San Juan Harbor, Puerto Rico: Report of the Chief of Engineers, dated December 23, 1982, at an estimated cost of $63,000,000, including the acquisition of 22 acres of land for mitigation of the loss of algal beds associated with the project, as recommended in the report of the District Engineer, Jacksonville, Florida, entitled "Phase I: General Design Memorandum on San Juan Harbor, Puerto Rico".

CROWN BAY CHANNEL—ST. THOMAS HARBOR, VIRGIN ISLANDS

The project for navigation, Crown Bay Channel—St. Thomas Harbor, Virgin Islands: Report of the Chief of Engineers, dated April 9, 1982, at an estimated cost of $3,560,000. The Secretary shall monitor the turbidity associated with construction, operation, and maintenance of the project and establish a program to maintain, to the extent feasible, such turbidity at a level which will not damage adjacent ecosystems. In selecting a configuration for the disposal area for dredged material from the project, the Secretary shall consider configurations which will minimize, to the extent feasible, the loss of shallow water habitat.

LAKE CHARLES, LOUISIANA

The project for deepening of the project for navigation, Lake Charles, Louisiana, to a depth of 45 feet, at an estimated cost of $60,000,000, including such modifications as may be recommended by the Secretary with respect to such project under section 103. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

GULFPORT HARBOR, MISSISSIPPI

The project for navigation, Gulfport Harbor, Mississippi: Report of the Chief of Engineers, House Document Numbered 96-18, at an estimated cost of $59,100,000; except that, for reasons of environmental quality, dredged material from such project shall be disposed of in open water in the Gulf of Mexico in accordance with all provisions of Federal law. For the purpose of economic evaluation of this project the benefits from such open water disposal shall be deemed to be at least equal to the costs of such disposal. If the Secretary determines, after competitive bidding and pursuant to the provisions of Public Law 95-269, that transportation and disposal of dredged material cannot be carried out by contract at reasonable prices and in a timely manner, the Secretary is authorized to acquire any dredged material transport equipment necessary for prosecution of the project.

CLEVELAND HARBOR, OHIO

The project for harbor modification, Cleveland Harbor, Ohio: Report of the Board of Engineers for Rivers and Harbors, dated January 22, 1985, including bulkheading and other necessary repairs at pier 34 and approach channels and necessary protective structures for mooring basins for transient vessels in the area south of pier 34 and including such modifications as may be recommended by the Secretary with respect to such project under section 103. The existing dredged material containment site known as site 14 may be used for the containment of excavated material from construction of the project. There are authorized to be appropriated not to exceed $36,000,000 to carry out this paragraph.

LORAIN HARBOR, OHIO

The project for navigation, Lorain Harbor, Ohio: Report of the Chief of Engineers, dated February 5, 1985, at an estimated cost of $4,020,000.

GRAND HAVEN HARBOR, MICHIGAN

The project for navigation, modifications to Grand Haven Harbor, Michigan: Report of the Chief of Engineers, dated October 9, 1979, at an estimated cost of $13,000,000.

MONROE HARBOR, MICHIGAN

The project for navigation, Monroe Harbor, Michigan: Report of the Chief of Engineers, dated November 25, 1981, at an estimated cost of $114,300,000, including, for reasons of environmental quality, the formation of a 700 acre marsh in Plum Creek Bay, as described in the report of the District Engineer, Detroit District, dated February 1980, as revised December 15, 1980. The formation of such marsh shall be a Federal responsibility.

BRAZOS ISLAND HARBOR, TEXAS—BROWNSVILLE CHANNEL

The project for navigation, Brazos Island Harbor, Texas—Brownsville Channel: Report of the Chief of Engineers, dated December 20, 1979, at an estimated cost of $22,600,000. The Secretary shall study, in consultation with appropriate Federal, State, and local agencies, the need for additional measures to mitigate losses of estuarine habitat and productivity associated with the project. The Secretary is authorized to undertake any measures which he determines to be necessary and appropriate to mitigate such losses.

DULUTH-SUPERIOR, MINNESOTA AND WISCONSIN

The project for navigation, Duluth-Superior, Minnesota and Wisconsin: Report of the Chief of Engineers, dated August 16, 1984, at an estimated cost of $9,410,000, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary shall study, in consultation with appropriate Federal, State, and local agencies, the need for measures to mitigate losses of fish and wildlife habitat and productivity. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for modifications in the project which the Secretary determines to be necessary and appropriate to mitigate such losses. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee.

OAKLAND OUTER HARBOR AND OAKLAND INNER HARBOR, CALIFORNIA

The project for navigation, Oakland Outer Harbor, California: Reports of the Chief of Engineers, dated January 7, 1980, and July 1, 1983, at an estimated cost of $28,800,000. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study alternative dredged material disposal plans, including but not limited to plans which include marsh formation. The Secretary is authorized to undertake and monitor the effects of such dredged material disposal measures, including but not limited to such measures as will result in fish and wildlife habitat enhancement, as the Secretary determines are necessary and appropriate. Any measures required for construction of the project to protect the Bay Area Rapid Transit facilities shall be a Federal responsibility.

The project for navigation, Oakland Inner Harbor, California, as described in the Report of the Board of Engineers for Rivers and Harbors, dated January 28, 1985, at an estimated cost of $19,700,000, including such modifications as may be recommended by the Secretary with respect to such project under section 103. The Secretary, the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Administrator of the Environmental Protec-

tion Agency, the State of California, and the Port of Oakland shall develop, and transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate, a plan for a turning basin for such project. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study the existence of, and possible adverse effects of project dredging on, any underground freshwater aquifer in the project area.

RICHMOND HARBOR, CALIFORNIA

The project for navigation, Richmond Harbor, California: Report of the Chief of Engineers, dated August 8, 1982, at an estimated cost of $26,500,000.

SACRAMENTO DEEP WATER SHIP CHANNEL, CALIFORNIA

The project for navigation, Sacramento Deep Water Ship Channel, California: Report of the Chief of Engineers, dated November 20, 1981, at an estimated cost of $92,500,000.

HILO HARBOR, HAWAII

The project for navigation, Hilo Harbor, Hawaii: Report of the Chief of Engineers, dated December 4, 1984, at an estimated cost of $3,160,000.

BLAIR AND SITCUM WATERWAYS, TACOMA HARBOR, WASHINGTON

The project for navigation, Blair and Sitcum Waterways, Tacoma Harbor, Washington: Report of the Chief of Engineers, dated February 8, 1977, House Document Numbered 96-26, at an estimated cost of $25,900,000; except that a permanent bypass road for the Blair Waterway may be constructed in lieu of construction of the East 11th Street bridge replacement recommended in such report if (1) the Secretary determines that construction of the bypass road is economically and environmentally feasible, (2) construction of the bypass road is approved by the Governor of the State of Washington, and (3) the bypass road is approved through adoption of resolutions by both the Tacoma City Council and the Tacoma Port Commission. If the bypass road is constructed in lieu of the bridge replacement project, the Federal share of the cost of construction of the bypass road shall not exceed an amount equal to the amount which would have been the Federal share of the cost of the bridge replacement project if the bridge replacement project had been carried out in accordance with such report.

GRAYS HARBOR, WASHINGTON

The project for navigation, Grays Harbor, Washington: Report of the Chief of Engineers, dated May 4, 1985, at an estimated cost of $61,500,000.

EAST, WEST, AND DUWAMISH WATERWAYS, WASHINGTON

The project for navigation, East, West, and Duwamish Waterways, Navigation Improvement Study, Seattle Harbor, Washington: Report of the Chief of Engineers, dated May 31, 1985, at an estimated cost of $36,700,000.

SAIPAN HARBOR, COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS

The project for navigation and harbor modification, Saipan Harbor, Commonwealth of the Northern Mariana Islands: Report of the Secretary of the Interior, pursuant to Public Law 96-597, prepared by the Army Corps of Engineers dated July 22, 1981, at an estimated cost of $14,000,000.

SEC. 103. GENERAL PROVISIONS.

(a) FINAL EIS AND SECRETARIAL RECOMMENDATIONS FOR CERTAIN PROJECTS.—In the case of any project authorized by this title for which a final report of the Chief of Engineers has not been completed before the date of enactment of this Act, the Secretary shall, as soon as possible after the date of enactment of this Act, transmit a copy of any final environmental impact statement required by section 102(2)(C) of the National Environmental Policy Act of 1969, and any recommendations of the Secretary, with respect to such project to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by such committees.

(b) LIMITATION ON APPLICABILITY OF CERTAIN PROVISIONS IN REPORTS.—If any provision in any report designated by this title recommends that a State contribute in cash 5 percent of the construction costs allocated to non-vendible project purposes and 10 percent of the construction costs allocated to vendible project purposes, such provision shall not apply to the project recommended in such report.

SEC. 104. DESIGN AND CONSTRUCTION OF PROJECTS BY NON-FEDERAL INTERESTS.

(a) DESIGNING AND PLANNING.—

(1) SUBMISSION TO SECRETARY.—A non-Federal interest may plan and design any navigation project for a port not authorized by Federal law and submit such plan and design to the Secretary for review under paragraph (2).

(2) REVIEW BY SECRETARY.—The Secretary shall review each plan and design submitted under paragraph (1) for the purpose of determining whether or not such plan and design and the process under which such plan and design were developed comply with Federal laws and regulations applicable to the planning and designing by the Secretary of navigation projects for ports.

(3) SUBMISSION TO CONGRESS.—Not later than 180 days after receiving any plan and design submitted under paragraph (1), the Secretary shall transmit to the Congress, in writing, the results of such review and any recommendations the Secretary may have concerning the project described in such plan and design.

(4) CREDIT AND REIMBURSEMENT.—If a project for which a plan and design have been submitted under paragraph (1) is authorized by any provision of Federal law enacted after the date of such submission, the Secretary shall credit toward the non-Federal share of the cost of construction of such project an amount equal to the portion of the cost of developing such plan and design that would be the responsibility of the United States if such plan and design were developed by the Secretary. If the amount of such portion exceeds such non-Federal share, the Secretary shall reimburse the non-Federal interest for the amount of such excess. Such reimbursement shall be subject to appropriation of funds.

(b) CONSTRUCTION AND ACQUISITION OF LANDS.—

(1) APPROVAL OF PLANS; COST SHARING AGREEMENTS.—A non-Federal interest may—

(A) construct, in whole or in part, any navigation project for a port authorized by this title or any other provision of Federal law enacted before, on, or after the date of enactment of this title, and for which appropriations may be made for acquisition of interests in real property and actual construction; and

(B) acquire lands for disposal of dredged material, and make relocations of utilities, structures, and other improvements, necessary for such construction;

if the Secretary first approves the plans for construction of such project by the non-Federal interest and if the non-Federal interest enters into an agreement to pay the non-Federal share (if any) of the cost of operation and maintenance of such project.

(2) MONITORING.—The Secretary shall regularly monitor and audit any project for a port being constructed under this subsection by a non-Federal interest in order to ensure that such construction is in compliance with the plans approved by the Secretary.

(3) REIMBURSEMENT.—Subject to appropriation of funds, the Secretary shall reimburse any non-Federal interest for the Federal share of the cost of any port project carried out substantially in accordance with the plans approved by the Secretary under this section.

(c) COORDINATION AND SCHEDULING OF FEDERAL, STATE, AND LOCAL ACTIONS.—

(1) NOTICE OF INTENT.—The Secretary, on request from an appropriate non-Federal interest in the form of a written notice of intent to construct a navigation project for a port under subsection (b) or this subsection, shall initiate procedures to establish a schedule for consolidating Federal, State, and local agency environmental assessments, project reviews, and issuance of all permits for the construction of the project, including associated access channels and berthing areas, and onshore improvements, before the initiation of construction. The non-Federal interest shall submit with the notice of intent studies and documentation, including environmental reviews, that may be required by Federal law for decisionmaking on the proposed project.

(2) PROCEDURAL REQUIREMENTS.—Within 15 days after receipt of notice under paragraph (1) of this subsection, the Secretary shall publish that notice in the Federal Register. The Secretary also shall provide written notification of the receipt of a notice under paragraph (1) of this subsection to all State and local agencies that may be required to issue permits for the construction of the project or related activities. The Secretary shall solicit the cooperation of those agencies and request their entry into a memorandum of agreement described in paragraph (3) of this subsection. Within 30 days after publication of the notice in the Federal Register, State and local agencies that intend to enter into the memorandum of agreement shall notify the Secretary of their intent in writing.

(3) SCHEDULING AGREEMENT.—Within 90 days after receipt of notice under paragraph (1) of this subsection, the Secretary of the Interior, the Secretary of Commerce, the Administrator of the Environmental Protection Agency, and any State or local agencies that have notified the Secretary under paragraph (2) of this subsection shall enter into an agreement with the Secretary establishing a schedule of decisionmaking for approval of the project and permits associated with it and with related activities. The

schedule of compliance may not exceed two and one-half years from the date of the agreement.

(4) CONTENTS OF AGREEMENT.—The agreement entered into under paragraph (3) of this subsection, to the extent practicable, shall consolidate hearing and comment periods, procedures for data collection and report preparation, and the environmental review and permitting processes associated with the project and related activities. The agreement shall detail, to the extent possible, the non-Federal interest's responsibilities for data development and information that may be necessary to process each permit, including a schedule when the information and data will be provided to the appropriate Federal, State, or local agency.

(5) PRELIMINARY DECISION.—The agreement shall include a date by which the Secretary, taking into consideration the views of all affected Federal agencies, shall provide to the non-Federal interest in writing a preliminary determination whether the project and Federal permits associated with it are reasonably likely to receive approval.

(6) REVISION OF AGREEMENT.—The Secretary may revise the agreement once to extend the schedule to allow the non-Federal interest the minimum amount of additional time necessary to revise its original application to meet the objections of a Federal, State, or local agency which is a party to the agreement.

(7) PROGRESS REPORTS.—Six months before the final date of the schedule, the Secretary shall provide to Congress a written progress report for each navigation project for a port subject to this section. The Secretary shall transmit the report to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. The report shall summarize all work completed under the agreement and shall include a detailed work program that will assure completion of all remaining work under the agreement.

(8) FINAL DECISION.—Not later than the final day of the schedule, the Secretary shall notify the non-Federal interest of the final decision on the approval of the project and related permits.

(9) REPORT ON TIMESAVINGS METHODS.—Not later than one year after the date of enactment of this Act, the Secretary shall prepare and transmit to Congress a report estimating the time required for the issuance of all Federal, State, and local permits for the construction of navigation projects for ports and associated activities. The Secretary shall include in that report recommendations for further reducing the amount of time required for the issuance of those permits, including any proposed changes in existing law.

(d) NONAPPLICABILITY TO SAINT LAWRENCE SEAWAY.—This section does not apply to any port project for that portion of the Saint Lawrence Seaway administered by the Saint Lawrence Seaway Development Corporation.

SEC. 105. COST SHARING.

(a) GENERAL RULE FOR CONSTRUCTION.—The non-Federal share of the cost of construction of general navigation features, including but not limited to navigation channels and turning basins, for a navigation project for a port shall be the sum of—

(1) the amount required to be paid in cash for such project under subsection (b)(1), plus

(2) the lands, easements, and rights-of-way required to be contributed under subsection (b)(2).

(b) NON-FEDERAL INTERESTS' RESPONSIBILITY FOR CONSTRUCTION.—

(1) PAYMENTS DURING CONSTRUCTION.—The non-Federal interests for a navigation project for a port shall pay, during the period of construction of the project—

(A) in the case of a shallow port, 10 percent of the cost of construction of the project;

(B) in the case of a general cargo port, the sum of—

(i) 10 percent of the cost of construction of the portion of the project which has a depth not in excess of 20 feet; plus

(ii) 25 percent of the cost of construction of the portion of the project which has a depth in excess of 20 feet; and

(C) in the case of a deep-draft port, the sum of—

(i) 10 percent of the cost of construction of the portion of the project which has a depth not in excess of 20 feet; plus

(ii) 25 percent of the cost of construction of the portion of the project which has a depth in excess of 20 feet but not in excess of 45 feet; plus

(iii) 50 percent of the cost of construction of the portion of the project which has a depth in excess of 45 feet.

An amount equal to amounts paid with respect to a project under this paragraph is authorized to be appropriated to the Secretary to carry out such project. Amounts appropriated pursuant to the preceding sentence are in addition to, and not in lieu of, amounts authorized by any other provision of this Act for construction of a project to which this section applies.

(2) LANDS, EASEMENTS, AND RIGHTS-OF-WAY.—The non-Federal interests shall provide all lands, easements, and rights-of-way required for a navigation project for a port, except that the value of lands, easements, and rights-of-way required to be provided by non-Federal interests by this paragraph shall not exceed 5 percent of the cost of the project. For purposes of this section, "lands, easements, and rights-of-way" include dredged spoil disposal areas.

(3) FEDERAL RESPONSIBILITY FOR LANDS, EASEMENTS, AND RIGHTS-OF-WAY.—If the Secretary estimates, before the beginning of construction of any navigation project for a port, that the value of all lands, easements, and rights-of-way required for such project, will be a percentage of the cost of such project, which is greater than 5 percent, the Secretary shall, upon request by the non-Federal interests, acquire such lands, easements, and rights-of-way, except that the aggregate amount of the value of lands, easements, and rights-of-way acquired by the Secretary shall be limited to the amount by which such estimated value exceeds an amount equal to 5 percent of the estimated cost of the project.

(4) FEDERAL REIMBURSEMENT.—If the sum of—

(A) the cash contributed under paragraph (1) with respect to a navigation project, plus

(B) the value of lands, easements, and rights-of-way provided by the non-Federal interests for such project,

exceeds the non-Federal share of the cost of construction of the general navigation features of such project (as determined under subsection (a)), the Secretary shall pay to the non-Federal interests an amount equal to such excess, plus interest from the date of such determination. Such payment shall be subject to the general availability of appropriations for that purpose.

(5) TRANSFER OF LANDS TO NON-FEDERAL INTERESTS.—After completion of a navigation project for a port, the Secretary shall transfer, without consideration, to the non-Federal interests any lands, easements, and rights-of-way acquired by the Secretary under paragraph (3).

(6) INTEREST RATE COMPUTATION FOR FEDERAL REIMBURSEMENT.—The interest rate used for purposes of computing interest under paragraph (4) shall be determined by the Secretary of the Treasury as of the date on which the project is substantially completed and provides the navigation benefits for which such project is designed, as determined by the Secretary. Such interest rate shall be determined on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations, which are neither due nor callable for redemption for 15 years from the date of issue.

(7) Notwithstanding another law, the cost of removal, alteration, and reconstruction of the armor (protective covering) of an existing bridge tunnel attendant to dredging a channel deeper than 45 feet for a port navigation project authorized by this Act or by the Supplemental Appropriations Act, 1985 (Public Law 99-88, 99 Stat. 293) shall be borne by the Secretary.

(8) Notwithstanding another provision of this Act, the non-Federal share for projects for deep-draft ports authorized prior to January 1, 1985 shall be fully credited for the acquisition, construction, and operation of lands, easements, rights-of-way, and dredged spoil disposal sites that were constructed to comply with the terms of the original authorization and related purposes.

(c) OPERATION AND MAINTENANCE.—The Federal share of the cost of operation and maintenance of each navigation project for a port shall be—

(1) in the case of a shallow port, 100 percent;

(2) in the case of a general cargo port, 100 percent; and

(3) in the case of a deep-draft port, an amount equal to the sum of—

(A) an amount equal to 100 percent of the cost which the Secretary determines would be incurred for operation and maintenance of such project if such project had a depth of 45 feet, and

(B) an amount equal to 50 percent of the excess of the cost of the operation and maintenance of such project over the cost which the Secretary determines would be incurred for operation and maintenance of such project if such project had a depth of 45 feet.

(d) UTILITY RELOCATIONS.—The Federal share of the cost of relocation of any oil, natural gas, or other pipeline, any electric transmission cable or line, any communications cable or line, and facilities related to such pipeline, cable, or line the relocation of which is necessary for construction, operation, and maintenance of each navigation project for a port and which may only be built or commenced if authorized by the Secretary under section 10 of the Act of March 3, 1899 (30 Stat. 1151; 33 U.S.C. 403), shall be—

(1) in the case of a shallow port, 50 percent;

(2) in the case of a general cargo port, 50 percent; and

(3) in the case of a deep-draft port, an amount equal to the sum of—

(A) an amount equal to 50 percent of the cost the Secretary determines would be incurred for such relocations if such project had a depth of 45 feet, and

(B) an amount equal to 25 percent of the excess of the cost of such relocations over the cost which the Secretary determines would be incurred for such relocations if such project had a depth of 45 feet.

In the case of any relocation to which the Federal share established by this subsection applies, the non-Federal share shall be paid by the owner of the facility being relocated; except that in the case of a deep-draft port, two-thirds of the non-Federal share shall be paid by such owner and one-third of the non-Federal share shall be paid by the non-Federal interest.

(e) OTHER COSTS.—The Federal share of any cost of a navigation project for a port, including reasonable mitigation measures, for which cost a Federal share is not provided in subsection (a), (b), (c), or (d) of this section, shall be the share of such cost otherwise provided by law.

(f) APPLICABILITY.—This section shall apply to any navigation project for a port authorized by this title (except as provided in subsection (g)) or any other provision of Federal law enacted before, on, or after the date of enactment of this title, except that subsections (a), (b), and (d) shall not apply to any project for which Federal funds have been obligated for actual construction before January 1, 1985.

(g) EXCEPTION.—Subsections (a), (b), (c), and (d) of this section shall not apply to the project for Gowanus Creek Channel, Brooklyn, New York, authorized by section 102 of this title.

SEC. 106. NON-FEDERAL PAYMENTS DURING CONSTRUCTION.

The amount of any non-Federal share of the cost of any navigation project for a port authorized by this title or any other provision of Federal law enacted before, on, or after the date of enactment of this title shall be paid to the Secretary and shall, in the case of the non-Federal share of the cost of construction, be paid on an annual basis during the period of construction, beginning not later than one year after construction is initiated.

SEC. 107. GUARANTEE OF OBLIGATIONS TO FINANCE PORT PROJECTS.

(a) AUTHORITY OF SECRETARY TO GUARANTEE OBLIGATIONS.—On application by the appropriate non-Federal interest and notwithstanding another law, the Secretary may guarantee and enter into commitments to guarantee, the payment of the interest on, and the unpaid balance of the principal of, any obligation issued by a non-Federal interest to finance a navigation project authorized for a port by this title or another law of the United States enacted after the date of enactment of this Act, that is subject to a requirement for non-Federal contribution to the cost of project construction, operation, and maintenance under section 105 of this Act and with respect to which the non-Federal interest elects to construct the project with the approval of the Secretary under section 104 of this Act.

(b) AMOUNT OF GUARANTEES.—The Secretary may guarantee the payment of any obligation in the amount of 90 percent of the principal of that obligation.

(c) FULL FAITH AND CREDIT.—The full faith and credit of the United States Government is pledged to the payment of a guarantee made under this section, including interest as provided for in the guarantee accruing between the date of default on a guaranteed obligation and the payment in full of the amount guaranteed.

(d) REIMBURSEMENT OF CERTAIN INTEREST COSTS.—The Secretary, to the extent provided for in appropriations laws, may reimburse a non-Federal interest for not to exceed one-half of the interest cost incurred by the non-Federal interest on any obligation which is guaranteed under subsection (a) of this section and the interest on which is subject to Federal income taxes, during the period of project construction and until the level of project-derived revenues equals those amounts necessary to make payments of principal and interest on such obligations for the project.

(e) INCONTESTABILITY OF GUARANTEE.—A guarantee made by the Secretary under this section is conclusive evidence of the eligibility of the obligation for that guarantee, and the validity of any guarantee so made is incontestable.

(f) LIMITATION ON AMOUNTS GUARANTEED.—The unpaid principal amount of the obligations which are guaranteed, or for which commitments to guarantee have been entered into, under this section and which are outstanding at any time may not exceed $1,000,000,000.

(g) FEES.—The Secretary shall assess a guarantee fee of not less than one-quarter of 1 percent per year of the average principal amount of a guaranteed obligation outstanding under this section. All amounts received by the Secretary shall be deposited in the Federal Port Navigation Project Financing Fund established by subsection (h) of this section.

(h) FEDERAL PORT NAVIGATION PROJECT FINANCING FUND.—There is established in the Treasury of the United States a fund to be known as the "Federal Port Navigation Project Financing Fund" (hereinafter in this section referred to as the "Fund"), consisting of such amounts as may be deposited in the Fund under subsection (g). Amounts in the Fund shall be available to the Secretary, as provided by appropriation Acts, for making payments under subsection (i) of this section. Amounts in the Fund which are not needed for current withdrawals shall be invested in bonds or other obligations of, or guaranteed as to principal and interest by, the Federal Government.

(i) DEFAULTS.—

(1) DEMAND FOR PAYMENT.—For a default that has continued for thirty days in a payment by the obligor of principal or interest due under an obligation guaranteed under this title—

(A) the Secretary may assume the obligor's rights and duties under the guarantee or agreement related to the guarantee before a demand is made under subparagraph (B) of this paragraph; or

(B) the obligee or the obligee's agent, not later than the period specified in the guarantee or related agreement (but not later than ninety days from the date of the default), may demand payment by the Secretary of the unpaid principal amount of that obligation and the unpaid interest on the obligation to the date of payment, except when the Secretary—

(i) has assumed the obligor's rights under subparagraph (A) of this paragraph and the Secretary has made the payments in default;

(ii) finds there was not a default by the obligor in the payment of principal or interest; or

(iii) finds that the default has been remedied before the demand.

(2) PAYMENT ON GUARANTEES; ISSUANCE OF OBLIGATIONS.—Any amount required to be paid by the Secretary under this section shall be paid in cash from the Fund. If the amounts in the Fund are not sufficient to pay any amount the Secretary is required to pay under this subsection, the Secretary may issue to the Secretary of the Treasury notes or other obligations in any form and denomination, bearing any maturities and subject to any terms and conditions that are prescribed by the Secretary, with the approval of the Secretary of the Treasury. Those notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the Federal Government of comparable maturities during the month preceding the issuance of those notes or other obligations. The Secretary of the Treasury shall purchase any notes and other obligations to be issued under this paragraph. For that purpose the Secretary of the Treasury may use as a public debt transaction the proceeds from any securities issued under chapter 31 of title 31, United States Code. The purposes for which securities may be issued under that chapter include purchase of those notes and obligations. The Secretary of the Treasury may sell the notes or other obligations acquired by the Secretary of the Treasury under this section. All redemptions, purchases, and sales by the Secretary of the Treasury of those notes or other obligations shall be treated as public debt transactions of the Federal Government. Amounts borrowed under this section shall be deposited in the Fund, and redemptions of those notes and obligations shall be made by the Secretary of the Treasury from the Fund.

(3) ACTIONS BY SECRETARY.—For a default under a guaranteed obligation or a related agreement, the Secretary shall take any action against the obligor or any other liable parties that the Secretary believes is required to protect the interests of the Federal Government. A suit may be brought in the name of the Federal Government or in the name of the obligee, and the obligee shall make available to the Federal Government all records and evidence necessary to prosecute that suit. The Secretary may accept a conveyance of title to and possession of property from the obligor or other parties liable to the Secretary, and may purchase the property for an amount not to exceed the unpaid principal amount of the obligation and interest thereon. If the Secretary receives, through the sale of property, money in excess of any payment made to an obligee under this section and the expenses of collection of those amounts, the Secretary shall pay that excess to the obligor.

SEC. 108. CONSTRUCTION IN USABLE INCREMENTS.

Any navigation project for a port authorized by this title or any other provision of law enacted before, on, or after the date of enactment of this title may be constructed in usable increments.

SEC. 109. PORT OR HARBOR DUES.

(a) CONSENT OF CONGRESS.—Subject to the following conditions, a non-Federal interest may levy port or harbor dues (in the form of tonnage duties or fees) on a vessel engaged in trade entering or departing from a port and on cargo loaded on or unloaded from that vessel under clauses 2 and 3 of section 10, and under clause 3 of section 8, of article 1 of the Constitution:

(1) PURPOSES.—Port or harbor dues may be levied only in conjunction with a port

navigation project whose construction is complete (including a usable increment of the project) and for the following purposes and in amounts not to exceed those necessary to carry out those purposes:

(A)(i) to reimburse the United States Government for the non-Federal share of construction and operation and maintenance costs of a navigation project for a port under the requirements of section 105 of this Act; or

(ii) finance the cost of construction and operation and maintenance of a navigation project for a port under section 104(b) or 104(c) of this Act, less any reimbursement by the Secretary from the Port Infrastructure Development and Improvement Trust Fund under section 111 of this Act; and

(B) provide emergency response services in the port, including contingency planning, necessary personnel training, and the procurement of equipment and facilities, less any reimbursement by the Secretary from the Port Infrastructure Development and Improvement Trust Fund under section 113 of this Act.

(2) LIMITATION ON PORT OR HARBOR DUES FOR EMERGENCY SERVICE.—Port or harbor dues may not be levied for the purposes described in paragraph (1)(B) of this subsection after the dues cease to be levied for the purposes described in paragraph (1)(A) of this subsection.

(3) GENERAL LIMITATIONS.—(A) Port or harbor dues may be levied only on a vessel entering or departing from a port and its cargo if the vessel—

(i) requires a channel with a depth of more than 14 feet in the case of a port navigation project greater than 14 feet and not greater than 20 feet in depth;

(ii) requires a channel with a depth of more than 20 feet in the case of a port navigation project greater than 20 feet and not greater than 45 feet in depth; and

(iii) requires a channel with a depth of more than 45 feet in the case of a port navigation project in excess of 45 feet in depth.

(B) Port or harbor dues may not be levied in conjunction with a port navigation project on any vessel if that vessel, when fully loaded, could have utilized the port or harbor before construction of such project.

(C) Port or harbor dues may not be levied on a vessel entering or departing from a port and its cargo if the vessel—

(i) is engaged in intraport movement; or

(ii) is owned and operated by the United States Government, a foreign country, a State, or a political subdivision of a country or State, unless engaged in commercial service.

(4) FORMULATION OF PORT OR HARBOR DUES.—Port or harbor dues may be levied only on a vessel entering or departing from a port and its cargo on a fair and equitable basis. In formulating port and harbor dues, the non-Federal interest shall consider—

(A) the direct and indirect cost of construction, operations, and maintenance, and providing the facilities and services under paragraph (1) of this subsection;

(B) the value of those facilities and services to the vessel and cargo;

(C) the public policy or interest served; and

(D) any other pertinent factors.

(5) NOTICE AND HEARING.—(A) Before the initial levy of or subsequent modification to port or harbor dues under this section, a non-Federal interest shall transmit to the Secretary—

(i) the text of the proposed law, regulation, or ordinance that would establish the port or harbor dues, including provisions for their administration, collection, and enforcement;

(ii) the name, address, and telephone number of an official to whom comments on and requests for further information on the proposal are to be directed;

(iii) the date by which comments on the proposal are due and a date for a public hearing on the proposal at which any interested party may present a statement; however, the non-Federal interest may not set a hearing date earlier than 45 days after the date of publication of the notice in the Federal Register required by subparagraph (B) of this paragraph or set a deadline for receipt of comments earlier than 60 days after the date of publication; and

(iv) a written statement signed by an appropriate official that the non-Federal interest agrees to be governed by the provisions of this section.

(B) On receiving from a non-federal interest the information required by subparagraph (A) of this paragraph, the Secretary shall transmit the material required by clauses (i) through (iii) of subparagraph (A) of this paragraph to the Federal Register for publication.

(C) Port or harbor dues may be imposed by a non-Federal interest only after meeting the conditions of this paragraph.

(6) REQUIREMENTS ON NON-FEDERAL INTEREST.—A non-Federal interest shall—

(A) file a schedule of any port or harbor dues levied under this subsection with the Secretary and the Federal Maritime Commission, which the Commission shall make available for public inspection;

(B) provide to the Comptroller General of the United States on request of the Comptroller General any records or other evidence that the Comptroller General considers to be necessary and appropriate to enable the Comptroller General to carry out the audit required under subsection (b) of this section;

(C) designate an officer or authorized representative, including the Secretary of the Treasury acting on a cost-reimbursable basis, to receive tonnage certificates and cargo manifests from vessels which may be subject to the levy of port or harbor dues, export declarations from shippers, consignors, and terminal operators, and such other documents as the non-Federal interest may by law, regulation, or ordinance require for the imposition, computation, and collection of port or harbor dues; and

(D) consent expressly to the exclusive exercise of Federal jurisdiction under subsection (c) of this section.

(b) AUDITS.—The Comptroller General of the United States shall—

(1) carry out periodic audits of the operations of non-Federal interests that elect to levy port or harbor dues under this section to determine if the conditions of subsection (a) of this section are being complied with;

(2) submit to each House of the Congress a written report containing the findings resulting from each audit; and

(3) make any recommendations that the Comptroller General considers appropriate regarding the compliance of those non-Federal interests with the requirements of this section.

(c) JURISDICTION.—(1) The district court of the United States for the district in which is located a non-Federal interest that levies port or harbor dues under this section has original and exclusive jurisdiction over any matter arising out of or concerning, the imposition, computation, collection, and enforcement of port or harbor dues by a non-Federal interest under this section.

(2) On petition of the Attorney General or any other party, that district court may—

(A) grant appropriate injunctive relief to restrain an action by that non-Federal interest violating the conditions of consent in subsection (a) of this section;

(B) order the refund of any port or harbor dues not lawfully collected; and

(C) grant other appropriate relief or remedy.

(d) COLLECTION OF DUTIES.—

(1) DELIVERY OF CERTIFICATE AND MANIFEST.—

(A) UPON ARRIVAL OF VESSEL.—Upon the arrival of a vessel in a port in which the vessel may be subject to the levy of port or harbor dues under this section, the master of that vessel shall, within forty-eight hours after arrival and before any cargo is unloaded from that vessel, deliver to the appropriate authorized representative appointed under subsection (a)(6)(C) of this section a tonnage certificate for the vessel and a manifest of the cargo aboard that vessel or, if the vessel is in ballast, a declaration to that effect.

(B) BEFORE DEPARTURE OF VESSEL.—The shipper, consignor, or terminal operator having custody of any cargo to be loaded on board a vessel while the vessel is in a port in which the vessel may be subject to the levy of port or harbor dues under this section shall, within forty-eight hours before departure of that vessel, deliver to the appropriate authorized representative appointed under subsection (a)(6)(C) of this section an export declaration specifying the cargo to be loaded on board that vessel.

(e) ENFORCEMENT.—At the request of an authorized representative referred to in subsection (a)(6)(C) of this section, the Secretary of the Treasury may:

(1) withhold the clearance required by section 4197 of the Revised Statutes of the United States (46 App. U.S.C. 91) for a vessel if the master, owner, or operator of a vessel subject to port or harbor dues under this section fails to comply with the provisions of this section including any non-Federal law, regulation or ordinance issued hereunder; and

(2) assess a penalty or initiate a forfeiture of the cargo in the same manner and under the same procedures as are applicable for failure to pay customs duties under the Tariff Act of 1930 (19 App. U.S.C. 1202 et seq.) if the shipper, consignor, consignee, or terminal operator having title to or custody of cargo subject to port or harbor dues under this section fails to comply with the provisions of this section including any non-Federal law, regulation, or ordinance issued hereunder.

(f) MARITIME LIEN.—Port or harbor dues levied under this section against a vessel constitute a maritime lien against the vessel and port or harbor dues levied against cargo constitute a lien against the cargo that may be recovered in an action in the district court of the United States for the district in which the vessel or cargo is found.

SEC. 110. INFORMATION FOR NATIONAL SECURITY.

Any non-Federal interest shall provide the United States the information necessary for military readiness planning and port and national security, including information necessary to obtain national security clearances for individuals employed in critical port positions.

SEC. 111. AUTHORIZATIONS OF APPROPRIATIONS FROM TRUST FUND.

There is authorized to be appropriated from the Port Infrastructure Development and Improvement Trust Fund for fiscal years beginning after September 30, 1985, such sums as may be necessary to make reimbursements under section 104 and to pay the Federal share of the cost of projects authorized by sections 101 and 102 and of navigation projects for ports authorized by any other provision of Federal law enacted before the date of enactment of this title.

SEC. 112. ALTERNATIVES TO MUD DUMP FOR DISPOSAL OF DREDGED MATERIAL.

(a) DESIGNATION OF ALTERNATIVE SITES.—Not later than four years after the date of enactment of this Act, the Administrator of the Environmental Protection Agency shall designate one or more sites in accordance with the Marine Protection, Research, and Sanctuaries Act of 1972 for the disposal of dredged material which, without such designation, would be disposed of at the Mud Dump (as defined in subsection (g)). The designated site or sites shall be located not less than 20 miles nor more than 40 miles from the shoreline. The Administrator, in determining sites for possible designation under this subsection, shall consult with the Secretary and appropriate Federal, State, interstate, and local agencies.

(b) USE OF NEWLY DESIGNATED SITE.—Beginning on the 30th day following the date on which the Administrator of the Environmental Protection Agency makes the designation required by subsection (a), any ocean disposal of dredged material (other than acceptable dredged material) by any person or governmental entity authorized pursuant to the Marine Protection, Research, and Sanctuaries Act of 1972 to dispose of dredged material at the Mud Dump on or before the date of such designation shall take place at the newly designated ocean disposal site or sites under subsection (a) in lieu of the Mud Dump.

(c) INTERIM AVAILABILITY OF LAWFUL SITES.—Until the 30th day following the date on which the Administrator of the Environmental Protection Agency makes the designation required by subsection (a), there shall be available a lawful site for the ocean disposal of dredged material by any person or governmental entity authorized pursuant to the Marine Protection, Research, and Sanctuaries Act of 1972 to dispose of dredged material at the Mud Dump on or before the date of such designation.

(d) STATUS REPORTS.—Not later than one year after the date of enactment of this Act and annually thereafter until the designation of one or more sites under subsection (a), the Administrator of the Environmental Protection Agency shall submit a report to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate describing the status of such designation.

(e) FUTURE USE OF MUD DUMP RESTRICTED TO ACCEPTABLE DREDGED MATERIAL.—Notwithstanding any other provision of law, including any regulation, the Secretary shall ensure that, not later than the 30th day following the date on which the Administrator of the Environmental Protection Agency makes the designation required by subsection (a), all existing and future Department of the Army permits and authorizations for disposal of dredged material at the Mud Dump shall be modified, revoked, and issued (as appropriate) to ensure that only acceptable dredged material will be disposed of at such site and that all other dredged material determined to be suitable for ocean disposal will be disposed of at the site or sites designated pursuant to subsection (a) of this section.

(f) DEFINITION OF ACCEPTABLE DREDGED MATERIAL.—For purposes of this section, the term "acceptable dredged material" means rock, beach qualify sand, material excluded from testing under the ocean dumping regulations promulgated by the Administrator of the Environmental Protection Agency pursuant to the Marine Protection, Research, and Sanctuaries Act of 1972, and any other dredged material (including that from new work) determined by the Secretary, in consultation with the Administrator, to be substantially free of pollutants.

(g) DEFINITION OF MUD DUMP.—For purposes of this section, the term "Mud Dump" means the area located approximately 5¾ miles east of Sandy Hook, New Jersey, with boundary coordinates of 40 degrees 23 minutes 48 seconds N, 73 degrees 51 minutes 28 seconds W; 40 degrees 21 minutes 48 seconds N, 73 degrees 50 minutes 00 seconds W; 40 degrees 21 minutes 48 seconds N, 73 degrees 51 minutes 28 seconds W; and 40 degrees 23 minutes 48 seconds N, 73 degrees 50 minutes 00 seconds W.

SEC. 113. EMERGENCY RESPONSE SERVICES.

(a) GRANTS.—The Secretary is authorized to make grants to any non-Federal interest operating a project for a port for provision of emergency response services in such port (including contingency planning, necessary personnel training, and the procurement of equipment and facilities either by the non-Federal interest, by a local agency or municipality, or by a combination of local agencies or municipalities on a cost-reimbursable basis, either by a cooperative agreement, mutual aid plan, or mutual assistance plan entered into between one or more non-Federal interests, public agencies, or local municipalities).

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated from the Port Infrastructure Development and Improvement Trust Fund for fiscal years beginning after September 30, 1985, such sums as may be necessary to carry out subsection (a) of this section.

SEC. 114. PORT OFFICE AT MORRO BAY, CALIFORNIA.

(a) GRANT.—For reasons of navigation safety, the Secretary is authorized to make a grant to the non-Federal interest operating Morro Bay Harbor, California, for construction of a new port office at such harbor.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated from the Port Infrastructure Development and Improvement Trust Fund for fiscal years beginning after September 30, 1985, such sums as may be necessary to carry out subsection (a) of this section.

SEC. 115. DEFINITIONS.

For purposes of this title—

(1) the term "deep-draft port" means a port which is authorized to be constructed to a depth of more than 45 feet (other than a port for which a project is authorized by section 102 of this title);

(2) the term "general cargo port" means a port for which a project is authorized by section 102 of this title and any other port which is authorized to be constructed to a depth of more than 20 feet but not more than 45 feet;

(3) the term "non-Federal interest" has the meaning such term has under section 221 of the Flood Control Act of 1970;

(4) the term "port" means (A) any port or channel in the United States with a depth authorized by law of more than 14 feet, including any channel administered by the Saint Lawrence Seaway Development Corporation and any channel connecting the Great Lakes, and (B) any lock or other improvement on any such channel; except that such term does not include an entrance channel providing access solely to a harbor with an authorized depth of fourteen feet or less and does not include the Bonneville Lock and Dam project on the Columbia River;

(5) the term "shallow port" means any port which is authorized to be constructed to a depth of not more than 20 feet; and

(6) the term "United States" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

SEC. 116. SHORT TITLE.

This title may be cited as the "Port Development and Navigation Improvement Act of 1985".

AMENDMENTS OFFERED BY MR. ROE

Mr. ROE. Mr. Chairman, I offer the amendments in bloc made in order under the rule.

The Clerk read as follows:

Amendments offered by Mr. ROE: At the end of title XI, add the following new section:

SEC. 1199k. (a) The Secretary shall make a grant of $50,000, subject to an appropriation for that purpose, to the Governor of the State of Florida for the establishment of a Miami River Management Commission to develop a comprehensive plan for improving the water quality of the Miami River, Florida, and its tributaries and managing all activities which affect the water quality and use of such river and tributaries. The commission shall be composed of seven members appointed by the Governor.

(b) There is authorized to be appropriated to carry out this section $50,000 for fiscal years beginning after September 30, 1985.

Page 3, line 21, after the period insert the following: "Notwithstanding section 105(d) of this Act, the cost of any relocations described in such section which are necessary for construction of such project shall be at full Federal expense.".

Page 6, line 3, after "Service," insert "the National Marine Fisheries Service,"

Page 8, line 15, strike out "65" and insert in lieu thereof "70".

Page 11, strike out line 9 and all that follows through line 2 on page 12 and insert in lieu therof the following:

KILL VAN KULL AND ARTHUR KILL, NEW YORK AND NEW JERSEY

The project (1) for navigation, Kill Van Kull and Newark Bay Channels, New York and New Jersey: Report of the Chief of Engineers, dated December 14, 1981, at an estimated cost of $260,000,000, and (2) for navigation, Arthur Kill, New York and New Jersey: Draft report of the District Engineer for New York, dated May 1983, except that such project shall extend the Arthur Kill Channel at a depth of 40 feet to the Fresh Kills in Carteret, New Jersey, and such easing of bends as the Secretary determines are necessary to enhance navigation, at an estimated cost of $85,000,000. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall

be made for the acquisition of any interest in real property for, or the actual construction of, the project described in clause (1) if such acquisition and actual construction have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. The project described in clause (2) shall include any modifications that may be recommended by the Secretary with respect to such project under section 103 of this Act.

Page 16, line 17, strike out "$60,000,000" and insert in lieu thereof "$145,000,000".

Page 35, after line 23, insert the following:

(9) Notwithstanding any other provision of law, the Secretary shall not collect fees or other charges from non-Federal interests for the disposal of dredge material resulting from the construction, operation, or maintenance of any project authorized by this Act into the Craney Island dredge disposal facility, Virginia.

Page 38, line 12, insert "(1)" after "to".

Page 38, line 14, strike out the period and insert in lieu there of the following: ", (2) the construction or modification of the four anchorages authorized as part of the Channel to Newport News, Norfolk Harbor, and Thimble Shoal Channel, Virginia, project, authorized by the Rivers and Harbors Act of 1965, and (3) the construction of the anchorage authorized as part of the project for navigation, Norfolk Harbor and Channels, Virginia, authorized by section 101 of this Act.".

Page 66, line 2, after the period insert the following: "The Secretary shall include as part of the non-Federal contribution of the project any local flood protection work carried out by non-Federal interests after January 1, 1978, and before the date of the enactment of this Act which work the Secretary determines is reasonably compatible with the project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.".

Page 68, after line 12, insert the following:

RIO PUERTO NUEVO, PUERTO RICO

This project for flood control, Rio Puerto Nuevo, Puerto Rico: Report of the Board of Engineers for Rivers and Harbors, dated September 4, 1985, at an estimated cost of $180,000,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (f) of this section.

Page 104, strike out lines 3 through 12.

Page 104, line 13, strike out "(2)" and insert in lieu thereof "(m)".

Page 93, strike out line 15 and all that follows through line 8 on page 95 and insert in lieu thereof the following:

The project for flood control, Santa Ana River Mainstem, including Santiago Creek, California: Report of the Chief of Engineers, dated January 15, 1982, and as modified by the Report of the District Engineer, dated September, 1985, at an estimated cost of $1,100,000,000, including such measures as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary shall study (1) the feasibility and environmental impact including conservation storage at the end of the winter storm season at Prado Dam as a project purpose, (2) the effects of such storage on recreation and leasehold interests at Prado Reservoir and on riparian rights downstream of such dam, and (3) any water supply benefits associated with such storage. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study. The right-of-way taking line for Prado Reservoir shall be limited to elevation 566 feet. Funds may be appropriated to the Environmental Protection and Mitigation Fund pursuant to Section 1104 of this Act and to the construction fund for engineering and acquisition of real property. Actual physical construction of the project may commence upon adoption of resolutions of agreement for said construction by the non-federal sponsoring agencies. Any relocation of the Talbert Valley Channel undertaken in connection with the project shall be constructed with a channel capacity sufficient to accommodate a 100-year flood.

Page 99, line 3, after the period insert the following: "The Secretary is authorized to undertake reasonable measures for mitigation of fish and wildlife losses in connection with the measures undertaken under this paragraph.".

Page 99, line 9, after the period insert the following: "The Secretary is authorized to accept funds from a project co-sponsor in connection with construction of such project.".

Page 115, after line 2, insert the following:

SEC. 308. The Secretary shall include as part of the non-Federal contribution of the project for flood control, Fairfield Vicinity Streams, California, authorized in accordance with section 201 of the Flood Control Act of 1965, the cost of any work carried out by non-Federal interests on the project after December 31, 1973, and before the date of the enactment of this Act, if the Secretary determines such work is reasonably compatible with the project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

Page 115, after line 21, insert the following:

ORCHARD BEACH, NEW YORK

The project for beach erosion control, Orchard Beach, New York: Draft Report of the District Engineer, New York District, dated July 1985, at an estimated cost of $2,480,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (b) of this section.

Page 119, after line 20, insert the following:

PINELLAS COUNTY, FLORIDA

The project for beach erosion control for Pinellas County, Florida: Report of the Board of Engineers for Rivers and Harbors, dated April 23, 1985, at an estimated cost of $14,000,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (b) of this section.

Page 124, line 24, after the period insert the following: "In addition, the Secretary is authorized and directed to conduct necessary reconnaissance studies and feasibility studies on extending such project from Lawrence, Massachusetts, to Haverhill, Massachusetts, and from Haverhill, Massachusetts, to the mouth of the Merrmack River.".

Page 129, line 14, after the second comma insert the following: "except that such project shall be constructed, operated, and maintained at full Federal expense,".

Page 141, strike out lines 3 through 6.

Page 152, line 4, after the period insert the following: "In addition, for the purpose of providing improved flood protection, the Secretary, on an emergency basis, shall alter Beatties Dam in Little Falls, New Jersey, by installation of flood gates or make other improvements to such dam and shall remove the existing rock shelf in the vicinity of such dam, at an estimate cost of $15,000,000.".

Page 168, line 25, strike out "consisting" and all that follows through the period on line 4 of page 169 and insert in lieu thereof the following: "consisting of one or more of the reclamation project alternatives (other than the ocean outfall alternative) included in the Final Environmental Impact Report, Sonoma County Wastewater Reclamation Project, adopted by the Sonoma County Board of Supervisors, April 21, 1981, that the Secretary considers appropriate, at an estimated cost of $150,000,000. Such project shall only be constructed after consultation with affected local governments.".

Page 173, line 3, after "of" insert "the Virgin Islands,".

Page 173, line 8, strike out "four" and insert in lieu thereof "five".

Page 173, line 19, after the period insert the following: "Any funds made available under this section for a study for any such jurisdiction which is not needed for such study shall be available to the Secretary to construct authorized water resources projects in such jurisdiction and to implement the findings of such study.".

Page 176, line 19, strike out "in response to" and insert in lieu thereof "subsequent to".

Page 186, after line 24, insert the following:

(d) Notwithstanding any other provision of law (including the Water Supply Act of 1958), the Secretary may not enter into any contract for the sale of storage to be reassigned to water supply in any water resource project under the jurisdiction of the United States that is not based on—

(1) repayment of the portion of the original construction cost of such project, including interest during construction that has been reallocated to water supply, and

(2) the interest accrued on the construction cost from the date of construction to the date of such reallocation,

until completion of the study under this section and enactment of a law after the date of enactment of this Act which authorizes the Secretary to enter into such a contract. The interest rate during construction and accrued construction cost interest shall be determined by the Secretary of the Treasury for the fiscal year in which construction of such project was initiated.

At the end of title V, add the following new section:

SEC. 542. The Secretary is authorized to take such measures as may be necessary to maintain a harbor of refuge in Port Ontario, Sandy Creek, New York. Non-Federal interests shall provide a public wharf and such other facilities as may be necessary for a harbor of refuge which shall be open to all on equal terms and such other requirements as the Secretary deems necessary.

Page 192, line 8, strike out "restore" and insert in lieu thereof "construct".

Page 193, line 23, strike out "$425,000" and insert in lieu thereof "$1,600,000".

Page 204, line 25, after "River" insert "and take such other actions as may be necessary".

Page 205, line 6, after the period insert the following: "The Secretary is authorized and directed to conduct further study and design on such project.".

Page 209, line 1, strike out "to" and all that follows through "facility," on line 4 and insert in lieu thereof "to dredge the modified harbor area,".

At the end of title VI, add the following new section:

SEC. 631. (a) The Secretary shall conduct a feasibility study on providing flood protection along the James River, South Dakota.

(b) Not later than two years after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the results of such study together with such recommendations as the Secretary determines to be appropriate.

Page 213, strike out line 23 and all that follows through line 2 on page 214 and insert in lieu thereof the following: "Secretary to dredge and maintain a 250-foot wide channel in the Upper Newport Bay to the boundary of the Upper Newport Bay State Ecological Preserve to a depth of 15 feet mean lower low water, and to deepen the channel in the existing project below the Pacific Coast Highway bridge to a depth of 15 feet mean lower low water, at an estimated cost of $2,500,000.".

Page 220, line 6, after the period insert the following: "The Secretary is authorized to reimburse the non-Federal interest for the cost of the dredging and maintenance incurred by the non-Federal interest in advance of this modification if the Secretary determines that such work is reasonably compatible with the project.".

Page 226, after line 23, add the following new section:

SEC. 782. The project for Fishtrap Lake, Pike County, Kentucky, authorized as part of the flood control project for the Ohio River Basin by section 4 of the Flood Control Act approved June 28, 1938 (52 Stat. 1217), is modified to authorize the Secretary, notwithstanding the completion of such project in 1968, to acquire by purchase any property in the drainage area for Fishtrap Lake, Kentucky, which is being used as a residence and any property in such drainage area which is being used as a cemetery and to relocate the owners of any property so acquired and any cemetery so acquired.

Page 226, after line 23, insert the following:

SEC. 782. The Sabine River channel of the Sabine-Neches Waterway, Texas, authorized by the River and Harbor Act of 1954, is modified to authorize an extension of such channel at a depth of 30 feet and a width of 200 feet, from its present upstream terminus opposite Green Avenue in Orange, Texas, generally following the present river alignment a distance of approximately one and one-quarter miles to a point opposite Little Cypress Bayou.

At the end of title VII, insert the following new section:

SEC. 782. The project for flood control, Clarks Hill Reservoir, Savannah River Basin, Georgia and South Carolina, authorized by the Flood Control Act approved December 22, 1944, is modified to include recreation and fish and wildlife management as project purposes. Project lands which are managed or reserved as of the date of the enactment of this section for the conservation, enhancement, or preservation of fish and wildlife and for recreation shall be considered as lands necessary for such purposes.

At the end of title VII, insert the following new section:

SEC. 782. The project for flood control, Red Rock Dam and Lake, Iowa, authorized by the Flood Control Act approved June 28, 1938, is modified to authorize the Secretary—

(1) to acquire by purchase fee simple interest in real property, and

(2) to acquire additional flowage easements in real property,

Which is subject to periodic flooding in connection with the operation of the project.

At the end of title VII of the bill, insert the following new section:

SEC. 782. The project for navigation, Cape Charles City Harbor, Virginia, authorized by the River and Harbor Act approved March 2, 1945 (59 Stat. 15), is modified to provide that the local interests shall not be required—

(1) to provide bulkheads, or

(2) to reserve berthing space for general public use,

along a greater distance of the shoreline than such bulkheads are provided or such berthing space is reserved on the date of the enactment of this Act.

Page 226, after line 23, insert the following:

SEC. 782. The project for navigation, East Chester Creek, New York, authorized by the River and Harbor Act of 1950, is modified to provide that the Secretary, out of any amounts made available to the Secretary for operation and maintenance of water resources projects, shall dredge within two years after the date of the enactment of this Act, and maintain thereafter, the Y-shaped portion of such project, at an estimated cost of $500,000.

Page 286, strike out lines 15 through 17.

At the end of title IX, add the following new section:

SEC. 916. The Patoka Reservoir, Wabash River, Indiana, authorized by the Flood Control Act of 1965 shall hereafter be known and designated as the "Vance Hartke Reservoir". Any law, regulation, document, or record of United States in which such reservoir is referred to shall be held to refer to such reservoir as the "Vance Hartke Reservoir".

At the end of title IX, add the following new section:

SEC. 916. The Stinson Creek Recreation Area which is to be constructed by the Army Corps of Engineers as part of the Columbus Lake portion of the Tennessee-Tombigbee Waterway project and which is located in Lowndes County, Mississippi, shall hereafter be known and designated at the "DeWayne Hayes Recreation Area". Any law, regulation, document, or record of the United States in which such recreation area is referred to shall be held to refer to such recreation area as the "DeWayne Hayes Recreation Area".

Page 256, strike out lines 11 through 13.

Page 260, strike out lines 15 through 19.

Page 264 after line 9, insert the following:

That portion of the project for navigation, Tampa Harbor and Hillsborough Bay, Florida, authorized by the Act of August 8, 1917, which portion consists of the turning basin at the junction of Garrison Channel, Seddon Channel, and Hillsborough River.

Page 265, strike out lines 17 through 19.

Page 269, strike out lines 4 through 6.

Page 269, strike out lines 16 through 22.

Page 287, strike out lines 12 through 16.

Page 299, strike out lines 3 and 4.

Page 306, strike out lines 9 through 11.

Page 309, after line 20 insert the following:

(c) The interest rate used for purposes of analyzing the costs and benefits of any water resources project for which an agreement under section 215 of the Flood Control Act of 1968 has been entered into before the date of the enactment of this Act shall be the applicable interest rate at the time such agreement was entered into.

Page 323, line 13, strike out "2,400" and insert in lieu thereof "2,500".

Page 325, line 17, after the period insert the following: "Such approval shall not constitute authorization of any recommendation contained in such master plan.".

Page 326, after line 13, insert the following:

(3) For the purpose of ensuring the coordinated planning and implementation of of programs authorized under subsections (e) and (h)(2) of this section, the Secretary shall enter into an interagency agreement with the Secreatary of the Interior to provide for the direct participation of the Fish and Wildlife Service and any other agency or bureau in the Department of the Interior in the planning, design, implementation, and evaluation of such programs.

Page 326, line 14, strike out "(3)" and insert in lieu thereof "(4)".

Page 326, line 20, after "recommendations" insert "and offer other recommended changes to the master plan".

Page 326, line 22, after "comments" insert "and other recommended changes".

Page 326, line 23, after "comments" insert "and other recommended changes".

Page 327, line 1, after "with" insert "the Secretary of the Interior and".

Page 327, line 14, after "with" insert "the Secretary of the Interior and".

Page 328, strike out line 18 and all that follows through line 2 on page 329.

Page 329, line 3, strike out "(7)" and insert in lieu thereof "(6)".

Page 330, line 13, after "with" insert "the Secretary of the Interior and".

Page 330, lines 22 and 23, strike out "for each of the ten fiscal years beginning after the date of the enactment of this Act".

Page 331, strike out lines 10 through 18.

Page 331, line 19, strike out "(2)" and insert in lieu thereof "(j)".

Page 331, line 20, strike out "paragraph (1) of this subsection," and insert in lieu thereof "subsection (d)(3) of this section,".

Page 332, after line 3, insert the following:

(k) Any sum authorized to be appropriated for a specific fiscal year by this subsection but not appropriated during such fiscal year is authorized to be appropriated for succeeding fiscal years until such sum has been appropriated. Any funds appropriated to carry out this section shall remain available until expended.

(l) This section may be cited as the "Upper Mississippi River Management Act of 1985".

Page 358, line 22, strike out the comma and all that follows through the period on line 24 and insert in lieu thereof a period.

Page 359, line 1, strike out "Hydroelectric" and all that follows through the period on line 4 and insert in lieu thereof the following: "The Secretary shall include in this study funds appropriated by previous Congresses, as well as any funds appropriated by the 99th Congress, as sunk costs.".

Page 359, line 19, after the period insert the following: "As part of such study the

Secretary shall consider appropriate measures to increase reliance on the private sector in the conduct of the water resources program of the Corps of Engineers.".

Page 359, line 20, strike out "such capabilities" and insert in lieu thereof "the capabilities referred to in the first sentence of this section".

Page 360, line 25, strike out "to" and all that follows through the period on line 3 on page 361 and insert in lieu thereof the following: "may be used to pay the non-Federal share of any other Federal grant-in-aid program.".

Page 395, line 9, after "jurisdiction" insert "or by a regulated public utility".

Page 396, lines 14 and 15, strike out "the purchase" and all that follows through the period on line 23 and insert in lieu thereof "$32,000,000.".

Page 397, strike out line 11 and insert in lieu thereof the following:

(g) Subsection (b) shall become effective on the earlier of—

(1) the 90th day following the date on which the Governor of the State of Florida certifies to the Secretary that such State has met the conditions set forth in subsection (h) unless the Secretary determines within such 90-day period that the State has not met such conditions; or

(2) the date of the final order in any action commenced by such State in a Federal district court for such State which includes a finding that such State has met such conditions.

(h) In order for subsection (b) to become effective the following conditions must first be met:

Page 397, line 25, after "such State" insert "or the Canal Authority of such State".

At the end of title XI of the bill, add the following new section:

SEC. 1199K. The Secretary shall remove from the Miami River and Seybold Channel in Miami, Florida, between the mouth of the Miami River and the salinity control structure of 36th Street, any abandoned vessels and any vessels under the control of the United States by reason of their seizure or forfeiture. The Secretary shall enter into an interagency agreement to facilitate the removal of any vessel under the control of the United States with the head of any Federal department, agency, or instrumentality which has control of such vessel.

At the end of title XI, add the following new section:

SEC. 1199K. The Secretary is authorized to undertake streambank erosion protection measures in Illinois along the Ohio River, from the mouth of the Ohio River to Uniontown Dam, and along the Wabash River, from the mouth of the Wabash River to its confluence with the Little Wabash River.

Page 399, after line 5, insert the following:

SEC. 1199K. Any funds appropriated after the date of the enactment of this Act to complete the Brewerton Extension of the Baltimore Harbor and Channels (connecting channels to the Chesapeake and Delaware Canal), authorized by the River and Harbor Act of 1958, which are not needed to complete such project because of savings resulting from the redesign of the project shall be used to carry out maximum maintenance dredging of the Inland Waterway from the Delaware River to the Chesapeake Bay, Delaware and Maryland (Chesapeake and Delaware Canal), authorized by the River and Harbor Act of 1954.

At the end of title XI, add the following new section:

SEC. 1199K. Section 88(c) of the Water Resources Development Act of 1974 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: ", except for encroachments which are transportation facilities or other public facilities and which do not significantly change the flood plain boundaries or significantly reduce the capability for recreation of such areas.".

At the end of title XI, add the following new section:

SEC. 1199K. The Secretary is authorized to construct necessary repairs on the Marsh Creek Bridge near Foster Joseph Sayers Lake, Centre County, Pennsylvania, at an estimated cost of $47,000.

Page 399, after line 5, insert the following:

SEC. 1199K. That portion of the waterway in which is located Dark Head Creek in the community of Middle River, Baltimore County, Maryland, lying northwest of a line extending south 68 degrees 37 minutes 56 seconds west from a point (227.50 feet from the northeast corner of the existing bulkhead and pier line) whose coordinates in the Maryland State Coordinate System are north 544967.24 and east 962701.05 (latitude north 39 degrees 19 minutes 42 seconds and longitude west 76 degrees 25 minutes 29.5 seconds) and thence south 44 degrees 48 minutes 20 seconds west, 350.12 feet to a point (at the southwest corner of the existing bulkhead and pier line) whose coordinates in the Maryland State Coordinate System are north 544635.94 and east 962242.46 (latitude north 39 degrees 19 minutes 39 seconds and longitude west 76 degrees 25 minutes 35.4 seconds), is declared to be a nonnavigable water of the United States for purposes of the navigation servitude.

(b) The line described in subsection (a) shall be established as a combined pierhead and bulkhead line of Dark Head Creek.

(c) Any project heretofore authorized by any Act of Congress, insofar as such project is within the boundaries of Dark Head Creek as described in subsection (a), is not authorized after the date of enactment of this Act.

(d) The right to alter, amend, or repeal this section is hereby expressly reserved.

Page 399, after line 5, insert the following:

SEC. 1199K. (a) Notwithstanding any other provision of law, if the agreement described in subsection (b) is executed by all parties described in subsection (b), the Cherokee Nation of Oklahoma may design and construct hydroelectric generating facilities (described in the report of the Chief of Engineers dated December 23, 1981) at the W.D. Mayo Lock and Dam on the Arkansas River in Oklahoma, in conformance with design and construction standards established by the Secretary.

(b) The Secretary and the Secretary of Energy shall enter into a binding agreement with the Cherokee Nation of Oklahoma under which—

(1) the Cherokee Nation of Oklahoma agrees—

(A) to design and initiate construction of the generating facilities referred to in subsection (a) within three years after the date of such agreement;

(B) to reimburse the Secretary for the costs incurred in—

(i) approving such design and inspecting such construction, and

(ii) providing any assistance authroized under subseciton (c) (2); and

(C)(i) to release the Federal Government from any claim or cause of action which may arise from such design or construction, and

(ii) to indemnify the Federal Government from any liability which may arise from such design or construction;

(2) the procedures and requirements for approval and acceptance of such design and construction are set forth;

(3) the rights, responsibilities, and liabilities of each party to the agreement are set forth; and

(4) the amount of the payments under subsection (g), and the procedures under which such payments are to be made, are set forth.

(c)(1) No Federal funds may be expended for the design or construction of the generating facilities referred to in subsection (a) before the date on which title to such facilities are accpted by the Secretary under subsection (e).

(2) Notwithstanding any other provision of law, the Secretary may provide, on a reimbursable basis, any assistance requested by the Cherokee Nation of Oklahoma in connection with the design and construction of the generating facilities referred to in subsection (a).

(d) The Secretary is authorized—

(1) to approve the design of the generating facilities referred to in subsection (a), and

(2) to inspect (as may be necessary) the construction of such facilities.

(e) Notwithstanding any other provision of law, upon completion of the construction of the generating facilities referred to in subsection (a) and final approval of such facilities by the Secretary—

(1) the Cherokee Nation of Oklahoma shall transfer title to such facilities to the United States; and

(2) the Secretary shall—

(A) accept the transfer of title to such generating facilities on behalf of the United States, and

(B) operate and maintain such facilities.

(f) The Southwestern Power Administration shall market the power produced by the generating facilities referred to in subsection (a) in accordance with seciton 5 of the Act of December 22, 1944 (58 Stat. 890; 16 U.S.C. 825s).

(g) Notwithstanding any other provision of law, the Secretary of Energy may pay to the Cherokee Nation of Oklahoma, in accordance with the terms of the agreement entered into under subsection (b), out of the revenues from the sale of power produced by the generating facilities of the interconnected systems of reservoirs operated by the Secretary and marketed by the Southwestern Power Administration—

(1) all of the costs incurred by the Cherokee Nation of Oklahoma in the design and construction of the generating facilities referred to in subsection (a), including the capital investment in such facilities and interest on such capital investment; and

(2) for a period not to exceed 50 years, a reasonable annual royalty for the design and construction of the generating facilities referred to in subsection (a).

(h) Notwithstanding any other provision of law, the Secretary of Energy may—

(1) construct such transmission facilities as necessary to market the power produced at the generating facilities referred to in subsection (a) with funds contributed by non-Federal sources; and

(2) repay those funds, including interest and any administrative expenses, directly from the revenues from the sale of power produced by the generating facilities of the interconnected systems of reservoirs operat-

ed by the Secretary and marketed by the Southwestern Power Administration.

(i) As used in this section, the term "Secretary of Energy" means the Secretary of Energy, acting through the Southwestern Power Administration.

(j) There are authorized to be appropriated for the fiscal year in which title to the generating facilities is transferred and accepted under subsection (e), and for each succeeding fiscal year, such sums as may be necessary to operate and maintain such facilities and to market the power from such facilities.

Page 399, after line 54, insert the following:

SEC. 1199K. The Secretary of the Interior, acting through the Fish and Wildlife Service, is authorized and directed to sell surplus water which may be available at the Devil's Kitchen Lake project, Illinois, for municipal use to the city of Marion, Illinois, on such terms and at such rates as such Secretary determines to be reasonable based upon comparable rates in the area of southern Illinois.

Page 399, after line 5, insert the following new section:

SEC. 1199K. The property described in subsection (b) of this section is declared to be not a navigable water of the United States within the meaning of the Constitution and the laws of the United States.

(b) The property referred to in subsection (a) of this section consists of the following two parcels of land:

(1) All that piece or parcel of land, containing 120.54 acres, situate, lying and being in the city of Jersey City, Hudson County, State of New Jersey, upon or around that certain lot or piece of land known as the Caven Point Area, being more particularly described as follows:

Beginning at a point in the southeasterly right-of-way line of Caven Point Road, said point being the southwesterly corner of a tract of land owned now or formerly by Tankport Terminals, Inc.;

thence along the southwesterly line of the aforesaid tract of land south 52 degrees 39 minutes 04 seconds east, a distance of 733.07 feet to a point, said point being marked by a found galvanized nail set in concrete;

thence along lands now or formerly of the State of New Jersey (Department of Environmental Protection) south 27 degrees 13 minutes 11 seconds east, a distance of 364.72 feet to a point, said point being marked by a found monument;

thence still along said lands south 54 degrees 22 minutes 11 seconds west, a distance of 155.40 feet to a point, said point being marked by a found monument;

thence still along said lands south 13 degrees 06 minutes 47 seconds east, a distance of 197.51 feet to a found monument;

thence still along said lands south 11 degrees 10 minutes 08 seconds east, a distance of 202.01 feet to a point in the center of Caven Creek;

thence along the centerline of Caven Creek in a general northeasterly direction the following ten courses:

north 72 degrees 56 minutes 02 seconds east, a distance of 0.67 feet;

north 62 degrees 23 minutes 54 seconds east, a distance of 7.44 feet;

north 64 degrees 27 minutes 24 seconds east, a distance of 14.20 feet;

north 68 degrees 20 minutes 06 seconds east, a distance of 9.14 feet;

north 66 degrees 13 minutes 24 seconds east, a distance of 44.49 feet;

north 65 degrees 55 minutes 31 seconds east, a distance of 18.62 feet;

north 52 degrees 14 minutes 36 seconds east, a distance of 32.36 feet;

north 47 degrees 53 minutes 41 seconds east, a distance of 33.25 feet;

north 52 degrees 44 minutes 00 seconds east, a distance of 18.17 feet;

north 63 degrees 21 minutes 24 seconds east, a distance of 5.62 feet;

thence still along a new line south 04 degrees 53 minutes 00 seconds west, a distance of 141.80 feet to a point;

thence still along a new line south 10 degrees 11 minutes 02 seconds east, a distance of 203.89 feet to a point;

thence still along a new line south 04 degrees 53 minutes 00 seconds west, a distance of 350.00 feet to a point;

thence still along a new line south 02 degrees 42 minutes 32 seconds east, a distance of 410.00 feet to a point;

thence still along a new line south 19 degrees 14 minutes 44 seconds east, a distance of 105.40 feet to a point;

thence still along a new line south 05 degrees 44 minutes 29 seconds east, a distance of 151.21 feet to a point;

thence still along a new line south 09 degrees 29 minutes 34 seconds east, a distance of 270.90 feet to a point;

thence still along a new line south 0 degrees 45 minutes 47 seconds east, a distance of 224.44 feet to a point;

thence still along a new line south 06 degrees 49 minutes 07 seconds west, a distance of 123.96 feet to a point;

thence still along a new line south 22 degrees 04 minutes 07 seconds west, a distance of 531.58 feet to a point in the southerly edge of an existing 41.30 foot wide concrete pier;

thence south 44 degrees 26 minutes 38 seconds west, a distance of 6.87 feet to a point;

thence north 47 degrees 47 minutes 04 seconds west, a distance of 231.00 feet to a point;

thence south 44 degrees 16 minutes 49 seconds west, a distance of 26.34 feet to a point;

thence along the northeasterly line of lands now or formerly of the United States Government (Caven Point Marine Base) north 45 degrees 30 minutes 22 seconds west, a distance of 1,000.000 feet to a point;

thence along the northwesterly line of lands now or formerly of the United States Government (Caven Point Marine Base) south 43 degrees 36 minutes 47 seconds west, a distance of 100.00 feet to a point in the northeasterly line of an existing 100 foot sewer easement granted to the City of Jersey City (Richard Street Sewer) as set forth in Deed Book 1402, Page 449;

thence along the same north 45 degrees 37 minutes 46 seconds west, a distance of 553.25 feet to an angle point;

thence still along said sewer easement line north 14 degrees 24 minutes 21 seconds west, a distance of 195.88 feet to a point, said point being the intersection of the sewer line with the projection of the northeasterly line of the above mentioned lands now or formerly of the United States Government (Caven Point Marine Base);

thence along said projected new line north 45 degrees 30 minutes 22 seconds west, a distance of 186.13 feet to a point;

thence along a new line north 88 degrees 14 minutes 02 seconds west, a distance of 1,184.70 feet to a point;

thence along lands now or formerly of the Trustee of the Lehigh Valley Railroad north 49 degrees 07 minutes 25 seconds west, a distance of 340.40 feet to a point in the southeasterly right-of-way line of Route 185;

thence along a new line north 54 degrees 19 minutes 18 seconds east, a distance of 253.59 feet to a point;

thence still along the same north 54 degrees 53 minutes 41 seconds east, a distance of 100.00 feet to a point;

thence still along the same north 54 degrees 19 minutes 18 seconds east, a distance of 395.99 feet to a point;

thence still along the same south 86 degrees 50 minutes 15 seconds east, a distance of 177.10 feet to a point;

thence still along the same south 45 degrees 31 minutes 04 seconds east, a distance of 57.24 feet to a point;

thence still along the same north 44 degrees 28 minutes 56 seconds east, a distance of 50.00 feet to a point;

thence still along the same north 05 degrees 16 minutes 41 seconds east, a distance of 210.44 feet to a point;

thence still along the same north 54 degrees 19 minutes 18 seconds east, a distance of 444.08 feet to a point;

thence still along the same north 53 degrees 44 minutes 55 seconds east, a distance of 100.00 feet to a point;

thence still along the same north 54 degrees 19 minutes 18 seconds east, a distance of 233.24 feet to a point of tangency;

thence still along the same and along a curve to the left having a radius of 10,061.00 feet, an arc distance of 100.61 feet to a point of compound curvature;

thence still along the same and along a curve to the left having a radius of 4,061.00 feet, an arc distance of 50.76 feet to a point of compound curvature;

thence still along the same and along a curve to the left having a radius of 2,661.00 feet, an arc distance of 102.35 feet to a point of compound curvature;

thence still along the same and along a curve to the left having a radius of 2,061.00 feet, an arc distance of 428.08 feet to a point in the southwesterly line of Caven Point Road;

thence still along the same south 52 degrees 42 minutes 47 seconds east, a distance of 48.66 feet to an angle point;

thence still along the same south 37 degrees 17 minutes 13 seconds east, a distance of 50.00 feet to an angle point;

thence still along the same south 52 degrees 42 minutes 47 seconds east, a distance of 47.22 feet to an angle point;

thence still along the same north 31 degrees 21 minutes 52 seconds east, a distance of 359.61 feet to the point and place of beginning.

(2) All that piece or parcel of land, containing 18 acres more or less, situate on the northwesterly side of New Jersey State Highway Route 185, more particularly described as follows:

Beginning at a point in the southeasterly right-of-way line of lands now or formerly of Lehigh Valley Railroad Company (Natinal Docks Branch), said point being the intersection of said line with the southwesterly lines (if projected) of lands now or formerly of the United Sates Government (Caven Point Army Trminal);

thence south 45 degrees 37 minutes 46 seconds east along said southwesterly line of U.S. Government property 830.84 feet to a point in the northwesterly right-of-way line of New Jersey State Highway Route 185;

thence along the same line south 44 degrees 28 minutes 56 seconds west along a line 39.06 feet to a point;

thence along the same line south 05 degrees 16 minutes 48 seconds west along a line 210.45 feet to a point;

thence along the same line south 54 degrees 19 minutes 18 seconds west along a line 427.65 feet to a point;

thence along the same line south 53 degrees 44 minutes 55 seconds west along a line 100.00 feet to a point;

thence along the same line south 54 degrees 19 minutes 18 seconds west, along a line 182.76 feet to a point of intersection with a northeasterly line of land now or formerly of the trustee of the Lehigh Valley Railroad;

thence north 49 degrees 07 minutes 25 seconds west along said line and also along lands now or formerly of the Linden urban Renewal Association 724.48 feet to a point in the aforesaid southeasterly right-of-way of the Lehigh Valley Railroad Company;

thence north 37 degrees 13 minutes 52 seconds east along the same line 953.84 feet to the point or place of beginning.

Page 399, after line 5, insert the following:

SEC. 1199K. (a) The Secretary may enter into a contract providing for the payment or recovery of an appropriate share of the costs of a project under his responsibility with a Federal Project Repayment District or other political subdivision of a State prior to the construction, operation, improvement, or financing of such project. The Federal Project Repayment District shall include lands and improvements which receive identifiable benefits from the construction or operation of such project. Such districts shall be established in accordance with State law, shall have specific boundaries which may be changed from time to time based upon further evaluations of benefits, and shall include the power to collect a portion of the transfer price from any transaction involving the sale, transfer, or change in beneficial ownership of lands and improvements within the district boundaries.

(b) Cost recovery pursuant to the provisions of this section shall be deemed to meet cost recovery requirements of other provisions of Federal law if the economic study required by subsection (c) of this section demonstrates that income to the Federal Government equals or exceeds that required over the term of repayment required by that cost recovery provision.

(c) Prior to execution of an agreement pursuant to subsection (a) of this section, the Secretary shall require and approve a study from the State or political subdivision demonstrating that the revenues to be derived from a contract under this section, or an agreement with a Federal Project Repayment District, will be sufficient to equal or exceed the cost recovery requirements over the term of repayment required by Federal law.

(d) The Secretary is authorized to participate with appropriate non-Federal sponsors in a project to demonstrate the feasibility of non-Federal cost sharing for ports and harbors under the provisions of subsections (a) through (c). Such project shall consist of the project for navigation, flood control, and protection of the Seal Beach Naval Weapons Station at Sunset Beach Harbor, Bolsa Chica Bay, California at an estimated cost of $89,600,000. Including such modifications as the Secretary may determine are advisable and upon execution of agreements by the State of California and/or local sponsors for preservation and mitigation of wetlands areas and appropriate financial participation. The Secretary may not undertake construction without the concurrence of the Secretary of the Navy on measures to protect the Naval Weapons Station. The Secretary shall, not later than two years after the date of enactment of this Act, make a determination of financial feasibility of the project and transmit a copy of a final feasibility study and a copy of an final environmental impact statement required by section 102(2)(c) of the National Environmental Policy Act of 1969, and any recommendations of the Secretary, with respect to such project to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. No appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee. Agreements for local financial participation shall include the repayment agreements set forth in subsection (a) so as to meet up front cost contributions as required by Federal law together with full amortization of the remaining federal investment including costs of project feasibility studies.

At the end of title XI, insert the following new section:

SEC. 1199K. The Secretary is authorized and directed to remove polluted bottom sediments, at full Federal expense, from the Miami River and Seybold Canal in Miami, Florida, between the mouth of the Miami River and the salinity control structure at 36th Street. Local interest shall furnish all lands, easements, rights-of-way, relocations, and alterations necessary for initial dredging and subsequent maintenance before the Secretary removes any such sediments.

At the end of title XI, add the following new section:

SEC. 1199K. The Secretary is authorized to rehabilitate the Eishenhower and Snell Locks, Saint Lawrence River, Massena, New York, in accordance with the Reconnaissance Report prepared for the Saint Lawrence Seaway Development Corporation by the district engineer for the Buffalo District, dated November 1984 and revised February 1984, at full Federal expense.

Mr. ROE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROE. I thank the chairman for recognizing me on the committee substitute. This substitute has been printed in the RECORD. The committee substitute that we are working with now contains a number of items that clear up a number of points that were made requiring different adjustments throughout the bill.

This is an enormous bill, and we have had to come back and readjust this bill to meet those points. I think that the Members know about this substitute. It was printed in the RECORD.

I yield to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. I certainly concur in what the chairman has said, and fully support taking these amendments up en bloc.

Mr. LIVINGSTON. Would the gentleman yield?

Mr. ROE. I yield to the gentleman.

Mr. LIVINGSTON. Will the gentleman inform me whether or not an amendment involving the West Bank Hurricane Protection Levee of Jefferson Parish, LA, is in his bulk amendment?

Mr. ROE. Is this the one you are working on now?

No; we have not gotten to that point yet. We will consider that. This is only the first stop.

Mr. LIVINGSTON. I appreciate the gentleman's response.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent to delete, as a modification of the amendments offered by the gentleman from New Jersey [Mr. ROE] before the Committee at this time, as follows:

On page 148, line 3 of the text of H.R. 3670 delete the word "shall" and insert the word "may".

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. SAXTON. Reserving the right to object, Mr. Chairman.

If I may enter into a colloquy with the gentleman from New Jersey.

Mr. Chairman, I understand that the thrust of the amendment would be to make discretionary on the part of the Corps of Engineers as to whether or not a certain fishing pier would be built, at the cost of about $500,000 on a project modification at Barnegat Inlet. Is that correct?

Mr. HOWARD. Will the gentleman yield?

Mr. SAXTON. I yield to the gentleman.

Mr. HOWARD. Yes; in language now concerning Barnegat Inlet in the State of New Jersey toward the dredging and reconstruction of the pier, there is a provision that says that the corps shall construct a fishing pier on the southern jetty.

We understand that there may be some objection locally, in that area, and so what this would do would just leave it open, rather than lock it in, so that the Corps of Engineers and local interests may have some input in this. That is all the change would do.

Mr. SAXTON. Mr. Chairman, I appreciate very much the gentleman's cooperation in this matter. There is a significant objection on the part of many municipalities in the area who are fearful of traffic congestion and it is a very, very serious matter to many small communities; particularly in light of the infrastructure which is not probably capable of taking care of much of the traffic and parking problems that would occur.

In addition to that, I might point out to the gentleman from New Jersey [Mr. HOWARD], and again thanking him for his cooperation, that the State

of New Jersey would fund approximately half of this fishing pier, which would be about $250,000, and there has been some objection raised by the State Department of Environmental Protection relative to that matter.

Mr. Chairman, I withdraw my reservation of objection and support the measure wholeheartedly.

The CHAIRMAN pro tempore. Is there objection to the modification of the gentleman from New Jersey [Mr. HOWARD]?

There was no objection.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, during preparation for the dedication ceremonies for the Tennessee-Tombigbee Waterway, a young National Guardsman lost is life in a tragic accident. Pvt. L. DeWayne Hayes was killed while helping to install a pontoon bridge as part of the grand opening of the Tenn-Tom at the Stinson Creek Recreation Area in Columbus, MS. Private Hayes was a resident of West Blocton, AL, and was a member of the National Guard unit from Centreville, AL.

I propose to rename the Stinson Creek Area the "DeWayne Hayes Recreation Area" in honor of the 20-year-old private. My amendment would pay tribute to this young serviceman, whose contributions and hard work are remembered by his fellow guardsmen, area residents, and Tenn-Tom officials. Private Hayes' death is a sad loss, and renaming the Stinson Creek Area for him is a fitting memorial.

I would like to thank subcommittee Chairman ROE; the ranking minority member, Mr. STANGELAND; full committee Chairman HOWARD; and the ranking minority member of the full committee, Mr. SNYDER, for their help and cooperation in accepting this amendment.

Mr. ROE. Mr. Chairman, I commend the gentleman on that. I want to say that I think that the suggestion that he offered and the amendment he offered created a human touch to what we are doing in this House. The gentleman's amendment recognizes where someone gave up their life because of what had to be done in improving our whole system.

So I compliment him for that, and I thank the gentleman for his contribution.

Mr. MONTGOMERY. Mr. Chairman, I thank the gentleman from New Jersey.

AMENDMENTS OFFERED BY MR. ROE TO THE AMENDMENTS OFFERED BY MR. ROE

Mr. ROE. Mr. Chairman, I ask unanimous consent to offer five clarifying, technical amendments to the pending amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. ROE to the amendments offered by Mr. ROE:

In the matter proposed to be inserted on and after page 93, line 15 (relating to the Santa Ana River Mainstem project), insert at the end the following: "Construction of the Upper Santa Ana River Dam portion of the project shall proceed at the same time as construction of the upstream portions of the project in San Bernardino and Riverside Counties.".

In the matter proposed to be inserted on page 11, on and after line 9, relating to Kill Van Kull and Arthur Kill, New York and New Jersey—

(1) strike out "except that such project shall extend the Arthur Kill Channel at a depth of 40 feet to the Fresh Kills in Carteret, New Jersey, and such easing of bends as the Secretary determines are necessary to enhance navigation,";

(2) strike out "$85,000,000" and insert in lieu thereof "$59,000,000"; and

(3) strike out the last period and insert in lieu thereof the following: "and on satisfying the terms of section 103 shall be included in the project described in clause (1).".

In lieu of the matter proposed to be inserted on page 186, after line 24, insert the following:

(d) Notwithstanding any other provision of law (including the Water Supply Act of 1958), the Secretary—

(1) may not enter into any contract for the sale of storage to be reassigned to water supply in any water resource project under the jurisdiction of the United States that is not based on—

(A) repayment of the portion of the original construction cost of such project, including interest during construction that has been reallocated to water supply; and

(B) the interest accrued on the construction cost from the date of construction to the date of such reallocation; and

(2) may not implement any contract described in paragraph (1) which was entered into before the date of the enactment of this Act but for which no funds have been expended as of such date of enactment for water acquisition; until completion of the study under this section and enactment of a law after the date of enactment of this Act which authorizes the Secretary to enter into such a contract. The interest rate during construction and accrued construction cost interest shall be determined by the Secretary of the Treasury for the fiscal year in which construction of such project was initiated.

In the matter proposed to be inserted on line 25 of page 397, after "Canal Authority of such State" insert the following: "(except existing State roads, highways, and bridges and related rights-of-way, which may be transferred to a county or other local government)".

(1) In the matter proposed to be inserted as subsection (k) after line 3 on page 332, strike out "subsection" and insert in lieu thereof "section".

(2) In the amendment which proposes to add a new section 1199K at the end of title XI of the bill, relating to removal of certain vessels under the control of the United States, strike out "Seybold Channel" and insert in lieu thereof "Seybold Canal".

Mr. ROE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROE. Mr. Chairman, on these amendments, these are technical, conforming amendments where some errors had been made, and figures had to be recalculated; but I say to the House, these are technical amendments, and they offer no substantive change.

Mr. LEWIS of California. Will the gentleman yield?

Mr. ROE. I yield to the gentleman.

Mr. LEWIS of California. I appreciate my distinguished colleague yielding.

First, let me say the chairman has been most cooperative in our concerns relative to the Santa Ana River project, and the gentleman mentioned that specifically. Could he clarify for me what that technical amendment would do as it relates to that project?

□ 1110

Mr. ROE. On the Santa Ana project, may I at the outset say to the distinguished gentleman from California and his colleagues what an extraordinary job you all have done in putting together a frightfully, terribly complicated project. I know that the gentleman had been working in a bipartisan manner with all Members on both sides of the aisle to get this matter resolved. This technical amendment that we would be adding to the Santa Ana River project which would simply say, and let me read it to you:

The construction of the upper Santa Ana River Dam portion of the project shall proceed at the same time as the construction of the upstream portion of the project in the San Bernadino and Riverside Counties.

What we are doing here is simply two things. We have a communique from the corps that reaffirms that the integrity from the Prado Dam to the new revision of what was the Mentone Dam and the other counties' floodproofing program is all part and parcel of one particular program. We have authorized in this House, under our language, the entire project. I understand there is a question in the other body because they only authorized the lower reaches of that particular Santa Ana River flood protection program but only because they did not have the full report that was filed in September when they drafted their bill.

Therefore, what we are saying in further discussions with the corps that as they build the alternative to what was the Mentone Dam, part of the integrity of that construction is, there

are excavations involved which they want to be able to use some of that material to flood-proof and build dikes along different streams in San Bernadino and Riverside Counties. I believe that is the name that sticks in my mind.

This amendment comes back and says, it assures one thing, that when they are building the alternative to the Mentone Dam, the one that we are talking about in the September report, that the construction must proceed simultaneously with the upstream portions of the project in San Bernardino and Riverside Counties.

Mr. LEWIS of California. Will the gentleman yield further?

Mr. ROE. I yield to the gentleman from California.

Mr. LEWIS of California. I thank the gentleman for yielding.

Mr. Chairman, generally I agree with the thrust of that language, but would the gentleman help me with a technical question that could develop and perhaps be critical? It is my understanding that the Prado Dam is located within Riverside County, and this language then would address itself to the Prado Dam as well as to other construction elements.

Mr. ROE. Not to my understanding of it, not to my understanding. Let us have a colloquy on this.

What the gentleman is saying, what the gentleman's concern is, that he does not want to have part of the Riverside flood control program delayed because of the Mentone. That is not the intent of the amendment. The intent of this amendment is only to affect those areas that would be affected upstream when the alternate to the Mentone Dam is constructed.

Mr. LEWIS of California. The gentleman then responded to one-half of my concern. That is that the Prado Dam construction, further development would not be delayed, it is not the intent of this amendment to delay that. I appreciate that.

Mr. ROE. The gentleman is correct.

Mr. LEWIS of California. The other side of the question is, it is my understanding that it is just conceivable that we could have near the Prado Dam the finding of some endangered species, somewhere I have heard of those little problems developing.

Mr. ROE. Not in California.

Mr. LEWIS of California. Now, if such a thing should occur, that conceivably could impact the Prado Dam in a fashion that neither the gentleman nor myself would intend. But if that was the case, is it conceivable that that portion of the project might be delayed, and if that were the circumstance, would such a delay, in turn, delay construction that might in a reasonable way take place?

The CHAIRMAN pro tempore. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(By unanimous consent, Mr. ROE was allowed to proceed for 5 additional minutes.)

Mr. LEWIS of California. Mr. Chairman, will the gentleman continue to yield?

Mr. ROE. I yield to the gentleman further, of course.

Mr. LEWIS of California. I thank the gentleman for yielding.

Mr. Chairman, my concern is, if we found such a difficulty, the language of the amendment appears as though it might impact logical construction proceeding in the upper dam which is currently being considered as the logical alternative to the Mentone. Is that the intent of the gentleman? Would indeed this amendment do that?

Mr. ROE. No. I think what you are saying is, as we unfold the program and we go through the necessary environmental impact statement and other studies that are involved, if there comes about some, I am trying to think of the name, some snail darter that comes out of the woodwork——

Mr. LEWIS of California. The finch-toed lizard, perhaps?

Mr. ROE. What is that?

Mr. LEWIS of California. The finch-toed lizard.

Mr. ROE. Well, the lizard could, someone could come in and stop the project?

Mr. LEWIS of California. If they delayed Prado as a result of such a problem, would the language of this technical amendment, in turn, lead to an automatic delay of the construction of the proposed project upstream?

Mr. ROE. No.

Mr. LEWIS of California. If that indeed is the intent of the technical amendment.

Mr. ROE. That is right.

Mr. LEWIS of California. I agree with that. I have no problem with the technical amendment of the gentleman from New Jersey.

I thank my colleague.

Mr. McCANDLESS. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from California.

Mr. McCANDLESS. I thank the gentleman for yielding.

I am the other part of the puzzle, Mr. Chairman.

Mr. ROE. Yes.

Mr. McCANDLESS. Riverside County. I have a concern here, Mr. Chairman, about how the construction would proceed with respect to the traditional downstream-working-upstream concept that other projects have been constructed on. This technical amendment, does it deal with constructing all of the project at the same time the raising of the Prado Dam, at the same time that the construction of the Mentone alternative would take place?

Mr. ROE. It does at the same time that the Mentone alternative takes place, yes.

Mr. McCANDLESS. So if there were to be a cost-to-benefit ratio on the part of the Corps of Engineers, the cost-to-benefit ratio would address the entire project, not some portion that might be left over.

Mr. ROE. The gentleman is absolutely correct. The cost-to-benefit ratio would relate to the whole project.

Mr. McCANDLESS. I thank the chairman.

Mr. PACKARD. Mr. Chairman, will the gentleman yield?

Mr. ROE. Of course I yield to the distinguished gentleman from California [Mr. PACKARD] who has done yeoman's work on this program.

Mr. PACKARD. I sincerely appreciate the work of the chairman on this project which involves so many different parts of California, three counties in particular.

I appreciate the gentleman yielding.

I would like to inquire about the requirement in this technical amendment of having all parts of the upper portion of the project moving at the same time or simultaneously. Will this bring about a delay in any portion of the upper part of the project, and will those delays cause increased costs by virtue of the delay?

Mr. ROE. No; I do not see where that would happen, if I may respond to the distinguished gentleman from California, because this project, as the gentleman knows from his own work and efforts he put forth, is of such magnitude that it is impossible to build all at one time, to put out one contract. That is just not possible, there is land acquisition involved. So it would proceed segmentally.

So I see absolutely no problem that the gentleman is referring to here at all, from my point of view.

Mr. PACKARD. With that explanation, Mr. Chairman, I support the technical amendment.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to commend my colleagues from New Jersey, Mr. HOWARD, chairman of the Public Works Committee, and Mr. ROE, chairman of the Subcommittee on Water Resources, for their continuing support of beach restoration in Pinellas County, FL, which I represent.

I also want to thank the chairman for including in his amendment a recommendation by the Army Corps of Engineers to extend the Federal authorization for this project.

As you know, Hurricane Elena pounded Pinellas last September, leaving houses falling into the sea, damaging sea walls, and seriously eroding the beaches. The beaches, sea walls, and

property along the coast were left extremely susceptible to future storm damage. Last week that was in evidence as high tides and waves from Hurricane Juan again pounded the beaches, causing further erosion and weakening sea walls.

As a result of President Reagan's disaster declaration, the Corps of Engineers and the Federal Emergency Management Agency are completing plans to renourish and repair previously completed Federal beach restoration projects along Pinellas County's coast.

In other cases, immediate relief for beach renourishment is not available to those cities along the coast that chose in the past not to participate in the Federal Beach Renourishment Program.

If I might, Mr. Chairman, I would like to engage in a brief colloguy with my colleague from New Jersey, Mr. HOWARD, the chairman of the committee, to clarify his amendment, which includes an extension of the life of the Pinellas County beach renourishment project.

Mr. Chairman, as I stated earlier, a number of cities in Pinellas County had chosen not to participate in our ongoing beach renourishment project and, therefore, are not currently authorized to receive emergency beach restoration funds. It's important, however, that these communities be permitted to become a part of the Pinellas County project with as little delay as possible. I understand that your amendment, as it is written, would allow those cities desiring to become a part of this project to do so without the need for further Congressional authorization and appreciate that and inquire of the gentleman if my understanding is accurate?

Mr. STANGELAND. Mr. Chairman, if the gentleman will yield, I want to commend my colleague from Florida, Mr. YOUNG, for continuing to keep the committee aware of the serious situation that developed in Pinellas County as a result of Hurricanes Elena and Juan. Through his work with our committee, we have been able make provisions for the needs of the beautiful beaches of Pinellas County, and to do so without disruption.

My colleague from Florida is correct in saying that those communities in Pinellas County not currently participating in this project can do so without the need for further congressional authorization.

Mr. YOUNG. Mr. Chairman, I want to thank my colleague for his response and say that as a member of the Appropriations Committee, I will continue to do all I can to provide the necessary funding for those communities that decide to become a part of this authorized beach project.

Mr. Chairman, I appreciate the comments of my friend, the gentleman from Minnesota [Mr. STANGELAND].

Mr. ROE. Mr. Chairman, I ask for adoption of the five technical amendments.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from New Jersey [Mr. ROE] to the amendments offered by the gentleman from New Jersey [Mr. ROE].

The amendments to the amendments were agreed to.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from New Jersey [Mr. ROE], as amended, as modified.

The amendments, as amended, as modified, were agreed to.

Mr. BIAGGI. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the statement that I am making in connection with this bill is one that I would have made yesterday but for the elections in New York.

Mr. Chairman, I rise in strong support of the committee substitute amendment to H.R. 6, the Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985. As the principal author of title I of the legislation—the Port Development and Navigation Improvement Act of 1985, I am pleased to join with my friend and colleague, the gentleman from New Jersey [Mr. ROE], in bringing this legislation before the House for the third time.

At this time, I would also like to mention the excellent job done by one of my subcommittee counsels, Larry Mallon. He has worked long and hard on the port bill since its inception, and he deserves a great deal of credit for his extraordinary effort in the development of this legislation.

This is the third consecutive Congress that has considered comprehensive reform of the process of authorizing, financing, and constructing port navigation projects in the United States. Following 7 days of hearings in the field and here in Washington, and endless meetings as chairman of the Merchant Marine Subcommittee, I developed and introduced the grandfather of current port development legislation (H.R. 4627) in the 97th Congress—the only such measure reported to the House in that Congress. Title I of H.R. 6 incorporates most of the generic reforms formulated to expedite the port development process that have been embodied in every port bill introduced since then.

I reintroduced the bill (H.R. 1512) in the 98th Congress, and the Merchant Marine Committee reported it out again. At the request of Chairman ROE, I agreed to the incorporation of my bill into H.R. 3678—water resources authorization—in the 98th Congress, hoping for its expeditious passage. The House acted twice, but the bill languished in the other body.

I agreed to the inclusion of my port development bill in the water resources legislation last Congress and this one for one reason—I was assured it would be acted on quickly. It's no secret that the administration is squarely behind the port development bill, and its inclusion is critical to the passage of H.R. 6.

In all, the Merchant Marine Committee and the subcommittee have held 11 days of hearings on this legislation spanning the last three Congresses. I offer this chronology to underscore the genesis of the legislation and the commitment of the Merchant Marine Committee to the enactment of comprehensive port development legislation.

To those of us on the committee, title 1 represents the culmination of 5 years of sustained effort toward the enactment of meaningful procedural reform of the process of port development in the United States. These reforms affect the authorization, permitting, financing, and construction of port navigation projects in the national interest. The substitute amendment contains those procedural and substantive elements we deem critical to ensure the timely completion of necessary port projects in the future.

These include:

First, fast tracking. This is reflected in the adoption of a consolidated economic, engineering, and environmental decisionmaking process for port project review and approval involving all levels of government, the public, and affected interests.

These critically needed reforms will shorten the approval process for an individual port project from 22 years to 2½ years on the average. The fast-track process may be utilized by a local port—whether or not the non-Federal interest seeks later congressional authorization for reimbursement of the Federal share of the cost of project construction. Fast track is applicable to projects undertaken in whole or in part by a local port.

Second, project financing reforms. These are reflected foremost in the adoption of a graduated system of cost sharing between the Federal Government and non-Federal interests corresponding to project depth. This system is based upon the adoption of an international recognized threshold of 45 feet in depth as the line of demarcation between general cargo and deep-draft ports. This recommendation emanated from a survey of the national port policy practices of most developed countries conducted by the Merchant Marine Committee.

The adoption of a cost-sharing approach for the financing of new project construction incorporates the substitution of a market test, in lieu of

traditional cost-benefit analysis, in the determination of the economic viability of port projects. This should result in those projects having greater national and regional economic benefits proceeding to completion expeditiously.

Project financing reform, as advanced by the Merchant Marine Committee, also incorporates a Federal guarantee of the local share of the cost of new project construction as a substitute for direct Federal funding—at least until such time as a demonstrated market develops for locally issued channel dredging bonds.

These reforms institutionalize formerly ad hoc cost-sharing arrangements requiring inkind local contribution to project construction cost, such as dredged spoil disposal areas and reasonable environmental mitigation measures. These elements have frequently amounted to between 10 and 30 percent of total construction cost in the past.

Third, local user fee authority. This is implemented through the conferral of the consent of Congress upon non-Federal interests to levy local port or harbor dues. This is the traditional method for implementing a national policy requirement for cost sharing of navigation improvements adopted by other developed countries.

This authority may be exercised for the purpose of financing the local share of the cost of project construction, operation, and maintenance of a port navigation project constructed either by the Federal Government or by a local port.

I would like to raise at this point a concern of mine.

The Ways and Means Committee's version of H.R. 6 imposes a 0.04 percent ad valorem fee on cargo to recover a portion of the Federal operation and maintenance costs. I believe this fee whether called a fee or a tax raises questions of constitutionality, and I anticipate a challenge in court.

Combined, these reforms should go a long way toward improving the institutional process of port development in the United States by: Expediting the construction of long overdue and economically viable projects; reallocating national and local resources to higher priority projects; and affording, for the first time since the adoption of the Constitution, the opportunity for local ports to undertake the planning, financing, and construction of navigation projects under Federal approval and supervision.

In my judgment, the generic procedural reforms incorporated in title 1 of this legislation chart a new course in federalism and national port policy. They represent the first major restructuring of the original agreement between the newly established Federal Government and the States concerning port development—a compromise underlying the adoption of the constitution nearly 200 years ago.

It is very fulfilling to see an idea reach fruition. I am proud to have been the first sponsor of port development legislation. Although my original concept has been modified, the general thrust of that first bill remains intact. Passage of this bill will mean a new era in port development.

I strongly urge the support of this legislation, so long in the making, as we proceed to its consideration for the final time.

CONGRESSIONAL RESEARCH SERVICE,

From: Lenore Sek, Analyst in Transportation, Economics Division.

Subject: Revenues from an 0.04 Percent Ad Valorem Port User Fee, by Customs District.

The attached table show the value of total U.S. waterborne merchandise trade for 1984, and the revenue that would be received if an ad valorem fee of 0.04 percent were assessed on the merchandise at each of the Customs districts. The table shows that the districts in the North Atlantic area would account for 32 percent of the revenues that would be received, with the district of New York accounting for half of the revenues from the North Atlantic area. The Pacific area would account for 30 percent of revenues, with Los Angeles accounting for about half of the area's revenues. The Gulf area would account for 26 percent of revenues. The remaining areas would account for smaller portions: South Atlantic, 9 percent; Great Lakes, 2 percent; and other areas, 1 percent.

If you would like further information, please call me.

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, DC, September 11, 1985.

To: House Merchant Marine and Fisheries Committee.
(Attention: Larry Mallon).
From: Lenore Sek, Analyst in Transportation, Economics Division.
Subject: Calculation of a Port User Fee Based on Revenue Tons.

You requested that CRS calculate a port user fee based on revenue tons that would generate $140 million in revenues. A revenue ton is defined as a long ton when the freight charge is calculated on the basis of weight, as in the case of many bulk shipments, and it is defined as a measurement ton when the freight charge is calculated on the basis of volume, as in the case of many liner shipments. You requested that port fees be calculated for each of these two types of revenue ton.

The Maritime Administration (MarAd), Office of Port and Intermodal Development, provided the following 1980 data on U.S. waterborne commerce that probably was shipped by each of the two meanings of revenue ton.

Foreign trade (739 million long tons total):
weight: 665 million long tons.
measure: 168 million measurement tons (equivalent to 74 million long tons).

Domestic trade—coastal (294 million long tons total):
weight: 280 million long tons.
measure: 33 million measurement tons (equivalent to 14 million long tons).

Domestic trade—Great Lakes (103 million long tons total):
weight: 101 million long tons.
measure: 2 million measurement tons (equivalent to 2 million long tons).

Because 1980 measurement tonnage was one-fifth of the weight tonnage, you requested that the proportion of measurement fee to weight fee be 5:1 to balance receipts from these two sources. On the basis of a 5:1 ratio, the fees that would have to be charged are $.0679 per revenue ton (rounded to $.07 per revenue ton) for commodities shipped on the basis of weight (bulk shipments) and $.3396 per revenue ton (rounded to $.34 per revenue ton) for commodities shipped on the basis of measure (liner shipments).

In considering how the calculated port fee based on revenue tons would compare to the ad valorem fee of .04 percent that is currently proposed in some port development bills, you requested a comparison of the two types of fees (ad valorem and revenue ton) for selected commodity groups according to their value per ton. The table on the next page shows the results of such a comparison for 1980 foreign trade. The commodity groups, determined by MarAd, were separated into bulk or liner according to our conversation. The tonnage for liner commodities was converted into revenue tons using the foreign trade ratio on the preceding page. According to the table, bulk commodities with lower values per ton (up to $137 per ton in the table) pay less under an ad valorem fee than under the revenue ton fee. These groups were 30 percent of the total bulk tonnage in long tons. The remaining bulk commodities (values per ton of $175 and more) pay more under an ad valorem fee than under the revenue ton fee.

Of the 10 commodities categorized as liner (measurement ton basis), only the commodity with the lowest value per ton ($1430 in the table) would pay less under the ad valorem fee than revenue ton fee. The remaining nine commodities would pay less under the revenue ton fee.

It should be noted that receipts from an ad valorem fee for all foreign trade are seen to be about twice the receipts from the revenue ton fee.

If you would like further information, please call me.

COMPARISON OF RECEIPTS UNDER TWO PORT USER FEES: 1980 FOREIGN TRADE

Commodity group	Total long tons (thousands)	Value per ton	Ad valorem receipts	Revenue ton receipts (thousands)
Bulk				
Cement and limestone	10,995	$16.17	$71.12	$746.56
Iron ore and concentrates	25,258	32.29	326.18	1,715.02
Nonmetalic minerals	9,987	38.55	154.00	678.12

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MERCHANT MARINE AND FISHERIES,
Washington, DC, September 20, 1985.

Hon. WILLIAM GRAY,
Chairman, House Budget Committee, Washington DC.

DEAR BILL: As the Merchant Marines and Fisheries Committee considers the options available for meeting our reconciliation instructions, I would appreciate your review

of the enclosed proposals on port development fees.

The first would impose a fee based on the tonnage or volume of cargo, the second the value of the cargo. Discussions between our respective Committee staffs have indicated that the tonnage fee could be used to meet our reconcilation requirements, while the value fee could not.

I would appreciate your confirming this information and providing me with the rational for making the differentiation between the two approaches.

Because of the obvious time contraints we are both working under, a response at your earliest convenience will be most welcome.

Sincerely,

WALTER B. JONES,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE BUDGET,
Washington, DC, September 25, 1985.

Hon. WALTER B. JONES,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, DC.

DEAR WALTER: I write in response to your letter of September 20 concerning the Merchant Marine and Fisheries Committee's proposed legislation to comply with its reconciliation instructions. I am also advised that the staffs of our committees have met to discuss this and other related issues.

As you know, S. Con. Res. 32, The First Concurrent Resolution on the Budget for Fiscal Year 1986, contained reconciliation instructions to your committee to change laws within its jurisdiction sufficient to reduce budget authority and outlays for fiscal years 1986 through 1988. The conferees of the first budget resolution, in formulating your committee's instruction, assumed deficit reduction to be accomplished through either cuts in direct spending or increases in offsetting receipts, not through revenue increases.

As to your first proposal, after consulting with the House Parliamentarian, it is my opinion that there is sufficient precedent for your committee to exercise jurisdiction over tonnage fees on cargo to be used for purposes or projects within its jurisdiction.

The second proposal which provides for a fee to be imposed based upon the value of the cargo would not be a change in laws within the jurisdiction of the Merchant Marine and Fisheries Committee. This determination was reached in consultation with the House Parliamentarian who advised that your committee does not have jurisdiction over the imposition of an ad valorem fee or tax on cargo. Since there is no relationship between the fee or tax being imposed and the projects being financed by such collections, the proposal is more like a tax imposed by the United States pursuant to its revenue raising power.

The rationale used by the Budget Committee in advising committees whether a proposed fee is a proprietary receipt or user fee or whether it is a revenue is based upon the nature of the fee.

For example, in your two proposals the fees collected would be used "to reimburse the United States Government towards the cost of operation and maintenance of port navigation projects authorized under this Act or other Federal law." (Page 18 of Merchant Marine and Fisheries Committee draft.)

The tonnage fee on cargo bears some relationship to the purposes for which the fee is levied and will be used, in the sense that the heavier or more voluminous the cargo the more navigational, harbor, and port serivces may be required. Conversely, a tax or fee on the value of the cargo bears little relationship to the purposes for which the fee will be used. A very valuable cargo, diamonds for example, would be taxed at a higher rate than a less valuable cargo which might weigh substantially more. This would be the result even though the less valuable cargo may require larger port facilities, deeper harbors, etc.

As you see, there are general principles which are followed in determining the difference between a proprietary receipt or user fee and a revenue; however, it is difficult to enunciate a clear test that can uniformally be applied to all types of collections.

I would welcome the opportunity to meet with you should you have any further questions or if I might assist you in any way as you work to respond to the reconciliation instructions.

With best wishes,

Sincerely,

WILLIAM H. GRAY III,
Chairman.

DEPARTMENT OF THE TREASURY,
Washington, DC, July 10, 1985.

Hon. MARIO BIAGGI,
Chairman, Subcommittee on Merchant Marine, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: This is in further response to your May 16 letter to President Reagan regarding the impact of certain provisions of the Treasury Department's tax reform proposal on the maritime industry. I apologize for the delay in responding.

As you are aware, the President has reviewed those provisions of the Treasury Department's original recommendations to him and, after careful consideration, has outlined a program which he believes will promote the objectives of fairness, growth, and simplicity. We support the President's position and believe these proposals represent sound tax policy.

The proposed lengthening of depreciation rates for certain capital assets is substantially more generous than the Treasury Department's original recommendations to the President. As a result, these provisions should impact more favorably on the maritime industry than under the Treasury Department proposal.

Repeal of merchant marine capital construction funds (CCFs) is justified because the current rules for taxation of these funds are a gross departure from generally applicable principles of taxation. Earnings on deposits are generally exempt from tax in these funds and eligible taxpayers can expense capital investments made with fund withdrawals while claiming an investment tax credit on assets in which the basis is zero. Should a CCF subsidy be necessary, a direct spending or regulatory program would be a more proper vehicle to achieve the objects of a subsidy.

Repeal of the deduction for business expenses for travel onboard cruise ships is appropriate because such travel involves a high degree of personal consumption. Your suggestions that a potential source of taxable income may be found in the foreign cruise ship industry operated out of U.S. ports and that the Subpart F rules provide an advantage to U.S.-owned, foreign flag shipping is certainly of interest and will be taken under advisement.

Finally, the President's proposals would deny tax exemption to any obligation issued by a State or local government where more than one percent of the proceeds were used directly or indirectly by any person other than a governmental unit. In essence, this proposal would prevent the issuance of tax-exempt bonds to finance any facility other than facilities to be owned and operated by the State or local governmental unit. Thus, obligations could no longer be issued on a tax-exempt basis to finance facilities intended for private use, such as marine terminals that are sold or leased on a long-term basis to private businesses. Tax-exempt financing for channel dredging projects would probably not be affected unless some private company owned the channel or was granted special rights to use the channel different from that granted to the public at large.

Tax-exempt financing is an inefficient Federal subsidy where the Federal government foregoes $3 of tax revenues to provide a $2 interest cost savings to the party who uses the tax-exempt bond proceeds. This subsidy program also results in significant revenue losses for the Federal government equal to approximately $10 billion in this fiscal year for all nongovernmental bonds. This revenue loss must result in a larger deficit, higher marginal tax rates that would otherwise be necessary, or a decrease in other government spending. The elimination of all nongovernmental bonds, including those IDBs issued to finance port improvements, will, of course, force the beneficiaries of such programs to pay market rates on their borrowing. In return, however, the lower corporate and individual tax rates proposed will promote growth and fairness in the economy at large.

Sincerely,

J. ROGER MENTZ,
Acting Assistant Secretary, Tax Policy.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON MERCHANT MARINE AND FISHERIES,
Washington, DC, May 16, 1985.

Hon. RONALD W. REAGAN,
President, The White House, Washington, DC.

DEAR MR. PRESIDENT: I request your urgent reconsideration of a number of items contained in the draft Treasury tax reform proposal from the aspect of their likely adverse economic impact upon the potential for revitalization of the maritime industry in the United States.

In testimony before the House Ways and Means Committee on February 27, 1985, Treasury Secretary James A. Baker, III, said he would look carefully at the final Treasury proposal "to make sure we don't do something that affects capital formation, or that makes us even less competitive overseas. There is a need for balancing interests and equities". I concur completely with that statement and submit to you that these are the two most critical precepts with which to evaluate the equity and economic impact of various elements of the Treasury proposal.

Mr. President, I understand the current Treasury proposal includes several provisions that would impact the maritime industry inequitably and ill-advisedly to a disproportionate extent than other industries in the United States of equal or lesser importance to our international trade and national security. Were these elements of the proposal to be enacted into law, standing alone they would further damage the international competitiveness of the ocean shipping in-

dustry. That industry is already facing intensified Government-sponsored foreign competition concurrent with continuing withdrawal of traditional U.S. Government support. The proposal would remove any likelihood of economic revitalization and restoration of international competitiveness to the commercial shipbuilding industry in the United States. It would also critically threaten vital U.S. international trade and economic interests by jeopardizing the ability of U.S. ports to raise private capital to finance badly needed port improvements. At the very time your Administration is working closely with the Congress in seeking resolution of long overdue policy reforms to shift a major portion of the responsibility for financing port improvements from the Federal Government to the private sector these changes would be ill-advised. I cannot overstate the adverse impact of these proposed tax law changes upon a struggling industry, whose welfare we both value.

The specific provisions I refer to are the following:

First, the differentiation of the maritime industry for the most discriminatory tax treatment, which would affect private capital formation, of any segment of U.S. industry is potentially disastrous. This includes the proposed lengthening of the period of accelerated cost recovery from five to twenty-five years, representing the longest period of economic depreciation in U.S. tax history and of any industrialized country in the free world.

Second, the proposal includes the outright repeal of the Capital Construction Fund (CCF), tax deferral provisions contained not in the tax code but in the Merchant Marine Act, 1936. That provision was enacted originally in 1920 at the request of both the Departments of Commerce and Treasury to protect the Government's financial interest in subsidized vessels. This program has been evaluated repeatedly as the most cost-effective maritime promotion program in United States history. It encourages reinvestment in U.S.-flag shipping and accelerated replacement of technologically and economically obsolete tonnage in foreign trade.

Repeal of the CCF provision would effectively insure that no commercial vessel of any size would ever be constructed in a domestic shipyard in the United States for operation in foreign trade.

Third, the Treasury proposal calls for the repeal of a provision in current law that permits the deductibility of business expenses for travel onboard U.S.-flag cruise ships. Testimony before this Subcommittee has indicated significant potential for U.S.-flag vessel entry into this $5 billion cruise industry. The industry is comprised at the present time of 50 foreign-flag passenger ships effectively homeported in U.S. ports whose clientele are 90 percent U.S. citizen nationals. In contrast, there are only two U.S.-flag vessels currently operating in the trade.

Moreover, under current law this entire $5 billion industry is outside the incidence of U.S. tax laws. I respectfully submit that if the Treasury is aggressively searching for all available sources of potentially-taxable domestic and foreign source income, the cruise ship industry is a most likely candidate for taxation under the U.S. worldwide system of taxation encompassing the taxation of aliens doing business in the United States.

At the very least, the continued availability of the provision in current law permitting the deductibility of business expenses for travel on board U.S.-flag passenger vessels is a critical prerequisite to the investment planning of every U.S. entrepreneur seeking to enter this rapidly growing sector of the maritime industry.

Fourth, the Treasury proposal would reportedly incorporate without any independent analysis or justification, a one percent limitation on the potential beneficiaries of tax-exempt industrial revenue bonds issued by port authorities to finance marine terminal facilities. If port modernization legislation were to be finally enacted into law, the financing of channel dredging projects would be affected as well. This would effectively eliminate the principal tax-exempt institutions market for public port-initiated general obligation and revenue bond securities.

This very issue was debated at length prior to enactment of the Tax Reform Act of 1984, which encompassed other limitations on the use of tax-exempt bond financing by public entities, from which port authorities, in recognition of their critical importance to U.S. international trade, were expressly exempted. Annual customs receipts of $6 billion from a levy of duties at seaports represents one of the largest sources of Federal revenue at the present time outside of the Federal Income Tax. From that perspective, ports generate an approximately 25 to 1 return on investment in relation to current Federal expenditures for port maintenance by the Federal Government.

In addition to the inequity of these proposals in comparison to the tax treatment of other domestic industries and the tax policies of other nations, I must also point out the neutrality-violating or investment-distorting aspect of this proposal. For example, tax deferral of the reinvested earnings of U.S.-owned, foreign-flag shipping under Subpart F of the Internal Revenue Code is left undisturbed by the Treasury proposal. The discriminatory tax treatment of the maritime industry exists under present law also. You may not be aware that with respect to the investment tax credit recommended for repeal by the Treasury proposal, the maritime industry is the only industry in the United States subject to a 50 percent arbitrary ceiling in the amount of the eligible tax credit that may be claimed in conjunction with investment in capital equipment in the United States.

Mr. President, limitations of time and space preclude my going into further detail on the enormous economic impact on the maritime industry likely to result from enactment of these provisions contained in the current Treasury Tax Reform Proposal. I hope my urgent request will result in your serious reconsideration of these elements of the proposal prior to its formal transmittal to the Congress.

As the Congress proceeds toward the consideration of meaningful tax reform I look forward to working with you in the same spirit of cooperation that resulted in enactment of the landmark Shipping Act of 1984, and continues with concurrent Congressional consideration of comprehensive port development legislation, which I initiated four years ago. In order to facilitate comprehensive examination of the impact of the entire Treasury tax reform proposal upon the prospects for long-term economic revitalization of the maritime industry, I intend to introduce a complementary package of maritime tax reform initiatives substantially identical to that prepared by an Interagency Task Force Report of your Administration under the leadership of former Transportation Secretary Drew Lewis. I look forward to working with your Administration in seeking the inclusion of many of the concepts developed by your Interagency Task Force in the tax reform proposal eventually enacted by Congress.

Respectfully yours,

MARIO BIAGGI,
Chairman,
Subcommittee on Merchant Marine.

□ 1125

Mr. ROE. Mr. Chairman, H.R. 6, the Water Resources Conservation, Development and Infrastructure Act of 1985, contains water resources projects, modifications to authorized projects, and other provisions relating generally to the Water Resources Development Program of the Corps of Engineers. It also contains a program for assistance to communities for the construction, repair, and rehabilitation of water supply systems, the creation of a National Board on Water Resources Policy, and the deauthorization of a large number of older water resources development projects which have not been constructed. In addition, H.R. 6, as amended by the committee amendment in the nature of a substitute, contains revenue provisions imposing a 0.04-percent tax on the value of cargo.

With the exception of the revenue provisions—which fall within the jurisdiction of the Ways and Means Committee—the remaining portions of the bill—titles I through XIV—fall primarily within the jurisdiction of the Committee on Public Works and Transportation.

Under the House Rules and precedents, the Public Works Committee has jurisdiction over: Flood control and improvement of rivers and harbors; oil and other pollution of navigable waters; water power; and public works for the benefit of navigation, including bridges and dams.

This covers among other items the civil functions of the U.S. Corps of Engineers.

Thus, title I through XIV—which deal primarily with water resource development, flood control, projects for improvement of navigation, and port development—fall predominantly within the jurisdiction of the Public Works Committee.

This fact has been reflected in the referrals of H.R. 6. H.R. 6, as originally introduced, was referred exclusively to the Committee on Public Works and Transportation. It was not jointly referred to the Ways and Means Committee because the introduced version did not contain any revenue provisions. H.R. 3670, the text of which is the committee amendment in the nature of a substitute made in order by the rule, was jointly referred to the Public Works Committee and the Ways and Means Committee.

The Committee on Merchant Marine and Fisheries has some incidental jurisdiction relating to the matters covered principally in title I of H.R. 6. For this reason, H.R. 6 was sequentially referred to the Merchant Marine Committee for consideration of matters within its jurisdiction. It is also for this reason that we are prepared to yield

some of our general debate time to the Merchant Marine Committee.

However, the Merchant Marine Committee's argument that it has extensive jurisdiction over title I—port development—of the bill is specious.

The basic subject matter of that title—navigation projects to be carried out by the Corps of Engineers to develop the Nation's ports—falls squarely within the jurisdiction of the Public Works Committee. The Merchant Marine Committee does not have jurisdiction over corps projects.

Title I does, however, also contain a few provisions directly relating to the disposal of dredged materials under the Marine Protection, Research and Sanctuaries Act; environmental impact statements under the National Environmental Policy Act; and fish and wildlife mitigation matters.

These matters are clearly incidental to the primary subject matter of title I—port development. Thus, the Speaker's exclusive referral of title I of H.R. 6 and H.R. 3670 to the Public Works Committee is correct and belies any claim by the Merchant Marine Committee that its jurisdiction is any more than incidental.

Notwithstanding this situation, the Merchant Marine Committee argues that the joint referral of H.R. 45—(the Port Development and Navigation Act of 1985)—to the two committees somehow gives them joint jurisdication of H.R. 6. This is nonsense. H.R. 45 is significantly different than title I of H.R. 6, and contains a number of provisions which are not even included in H.R. 6. Moreover, title I of H.R. 6 is just a small part of a comprehensive water resources bill.

In conclusion, Mr. Chairman, the Speaker's decision to exclusively refer the nonrevenue portions of H.R. 6 and H.R. 3670 to the Public Works Committee was clearly correct.

Mr. FOGLIETTA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I join with the many supporters of this legislation, recognizing as they do, the need to go forward with many vital water resource projects.

I do, however, want to reiterate my reservation to the ad valorem fee this legislation will impose on all cargoes. I oppose this concept and I regret that we must break with the Nation's 200-year commitment to provide 100 percent of the operations and maintenance costs for our general cargo ports. There are many compelling reasons why we should not impose such a user fee; these range from the constitutionality of such a proposal to the potential for cargo diversion and possible foreign retaliation.

I appreciate the effort of those who agreed to the ad valorem fee in order to break the longstanding impasse on the omnibus water resources bill. It is my belief and fervent hope that the issue of a user's fee is now settled for the future, that there will be no attempt to change the level or the nature of this fee in the future. The ad valorem fee must not go higher than 0.04 percent of the commercial value of cargo and must remain uniform.

Mr. Chairman, at this point I want to commend the leadership of both parties of the Merchant Marine, Ways and Means, and Public Works and Transportation Committees for the effort that went into this important legislation.

In particular, however, I want to commend the distinguished chairman of the Merchant Marine Subcommittee, the gentleman from New York, who has put together so much of the substantive elements that are critical to the timely completion of projects necessary for the Nation's ports. These elements include the fast-tracking of the economic, environmental, and engineering decisionmaking process; project financing reforms; and local user fee authority. These latter two elements were recommended after the Merchant Marine Subcommittee undertook a survey of the national port policies of most developed nations. The gentleman from New York is to be congratulated for his fine effort.

I yield back the balance of my time.

The CHAIRMAN. The Chair recognizes the gentleman from South Dakota [Mr. DASCHLE].

Mr. DASCHLE. Mr. Chairman, I had hoped to be recognized earlier, but I rise to ask unanimous consent that the words "nonprofit entity" be added after the words "political subdivisions" to that section of the substitute numbered 17, and referring to page 399 of the substitute bill.

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

Mr. SNYDER. Mr. Chairman, reserving the right to object, we do not know what this is on this side.

Mr. DASCHLE. If the gentleman will yield, Mr. Chairman, we have cleared it with the ranking minority member.

Mr. SNYDER. I thought I was the ranking minority member.

Mr. DASCHLE. I am sorry. The gentleman from Minnesota [Mr. STANGELAND].

Mr. SNYDER. Mr. Chairman, I withdraw my reservation of objection.

Mr. DASCHLE. I thank the gentleman.

The CHAIRMAN. Will the gentleman from South Dakota [Mr. DASCHLE] please state his request, for the benefit of the Clerk, please?

Mr. DASCHLE. Mr. Chairman, I ask unanimous consent that the words "nonprofit entity" be added after the words "political subdivision" to that section of the substitute numbered 17 in dealing with and referring to page 399 in the substitute.

The CHAIRMAN. The gentleman will suspend for a moment while the Clerk seeks the appropriate position for the amendment.

Will the gentleman withhold his request until the issue of its proper positioning is clarified, and will the gentleman approach the podium for that purpose?

Mr. DASCHLE. I will, Mr. Chairman.

AMENDMENTS OFFERED BY MR. ROE

Mr. ROE. Mr. Chairman, I offer 14 committee amendments, and I ask unanimous consent that they be considered en bloc, notwithstanding the fact that some of the amendments refer to portions of the bill not yet designated.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. ROE: Page 8, line 20, strike out "$230,000,000" and insert in lieu thereof "$310,000,000.

Page 20, after line 9, insert the following new paragraph:

The Secretary shall also study, in consultation with appropriate Federal, State, and local agencies and taking into consideration existing plans, studies, and reports, whether it would be more cost-effective and environmentally sound to control future sedimentation than to conduct periodic maintenance dredging of such project. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for implementing measures to control sedimentation if such measures prove to be more cost-effective and environmentally sound.

Page 59, line 3, strike out the semicolon and insert in lieu thereof the following: "and includes any interstate agency and port authority established under a compact entered into between two or more States with the consent of Congress under the section 10 of Article I of the Constitution;".

Page 107, after line 24, insert the following new subsections:

(t) The Secretary is authorized and directed to undertake such structural and nonstructural measures as he deems feasible to prevent flood damage to those areas identified in the February 1984 draft environmental impact statement for the West Bank Hurricane Protection Levee, Jefferson Parish, Louisiana, at an estimated cost of $20,000,000. Funds provided by non-Federal interests for interim hurricane protection shall be considered beneficial expenditures and credited as part of the non-Federal contribution of the project.

(u) The Secretary is authorized to construct six additional floodgates at Bayou Rigolette, Louisiana, adjacent to the existing drainage structure, at an estimated cost of $6,900,000.

Page 108, line 1, strike out "(t)" and insert in lieu thereof "(v)".

Page 172, after line 12, insert the following:

SEC. 542. The Secretary is authorized to construct shoreline protection measures for the shoreline adjacent to the runway at the Sky Harbor Municipal Airport, Duluth,

Minnesota, including riprap shore protection, fueling area repairs and protection, and topsoil and turf establishment, at an estimated cost of $250,000.

Page 193, line 5, strike out "$36,000,000" and insert in lieu thereof "$3,600,000".

Page 212, line 14, after the period insert the following: "with respect to any water supply contract entered into by the Secretary under this section after June 1, 1985, the Secretary shall determine (1) the amount of hydropower lost, if any, as a result of the implementation of such contract, and (2) the replacement cost of the hydropower lost (where replacement cost is defined as the cost to purchase power from existing alternative sources). If hydropower is lost as a result of the implementation of such contract, the Secretary shall provide credits to the Southwest Power Administration of amounts equal to such replacement costs. Such credits shall be against sums required to be paid by the Southwest Power Administration for costs of the project allocated to hydropower. In each such case the Southwest Power Administration shall reimburse each preference customer for an amount equal to the customer's actual replacement cost for hydropower lost as a result of the implementation of such contract, less the cost such customer would have had to pay to the Southwest Power Administration for such hydropower. The Secretary may not increase payments of water users under a water supply contract under this section on account of the credits and reimbursement required to be provided under this section.".

Page 223, line 20, strike out "Beach" and insert in lieu thereof "Branch".

Page 226, after line 23, insert the following:

SEC. 782. The project for navigation, Savannah Harbor, Georgia, authorized by the River and Harbor Act of 1965, is modified to authorize the Secretary, as part of operation and maintenance, to remove drift and debris from the harbor.

Page 322 strike out line 4 and all that follows through line 20.

Redesignate succeeding sections accordingly.

Page 346, after line 14, insert the following:

(e) In any case in which a person holds a lease of property at Clarks Hill Reservoir, Georgia, which is terminated under this section on or after December 31, 1989, the Secretary shall offer for sale to such person real property at Clarks Hill Reservoir which is owned by the United States and is not needed for the project (if there is any such property). The property offered for sale shall be approximately equal in size to the property that was subject to such lease. The Secretary shall offer any such property for sale at the fair market value of the property, as determined by the Secretary. Each offer under this subsection shall be made on or before the date on which the lease is terminated and shall be open to such person for 18 months from the time the offer is made. As a condition to a sale under this subsection, the leaseholder shall restore the property subject to the terminated lease to a condition acceptable to the Secretary.

Page 382, strike out lines 17 through 20.

Redesignate the subsequent sections of title XI of the bill accordingly.

Page 384, strike out line 21 and all that follows through line 9 on page 387.

Redesignate succeeding sections accordingly.

Page 399, after line 5, insert the following new section:

SEC. 1199K. The Secretary shall allow a State or its political subdivisions to withdraw water on a monthly basis for municipal and industrial uses within the State from any Missouri River mainstem reservoir which is under the control of the Secretary and situated wholly or partially within such State but only to the extent that such withdrawals do not exceed the monthly average historical natural flows at the point of withdrawal as determined by the Secretary. Any such water withdrawal for municipal and industrial uses within the affected State shall not require any fee or payment to the Federal Government for waters or project storage or for any reason without the prior consent of Congress.

Mr. ROE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

Mr. DASCHLE. Mr. Chairman, reserving the right to object, I do so only because this is the appropriate section of amendments to which I have addressed my unanimous-consent request earlier. It is numbered 17 in this section. It is with that understanding that I find the amendment now to be appropriate where I would add "or nonprofit entity," as I suggested earlier.

The CHAIRMAN. The Chair would advise the gentleman from South Dakota, if he is asking the question, that consideration of the amendments en bloc of the gentleman from New Jersey [Mr. ROE] is being requested at this time, and that the unanimous-consent request of the gentleman from South Dakota [Mr. DASCHLE] would be in order during the debate on the amendments offered by the gentleman from New Jersey [Mr. ROE].

Mr. DASCHLE. I thank the Chair and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROE. I thank the Chairman for resolving that matter.

These 14 amendments are committee amendments. There are a number of projects in here, for example, the Mount St. Helens projects, which we had in the original legislation, which is still in this legislation, and has already been enacted into law in a supplemental appropriations bill.

One of these amendments would remove that provision.

There are figures and corrections, again, for one or two port projects.

Basically, these are technical amendments. For example, there was an error made in printing. It read $36 million, and for all of us who are budget savers, the figure should have read $3.6 million. So it is lesser than that in the printed bill.

There is a technical amendment that dealt with what the gentleman from New Jersey [Mr. HOWARD] mentioned, where the word was spelled as "beach" and it should have been "branch."

There is another amendment that speaks to continuing authorization for debris removal from the Savannah Harbor.

Mr. WYLIE had an amendment that struck this section relating to a park program, which has since been put into an appropriations bill.

Mr. BARNARD had an amendment which refers to exchange of properties for the Clarksville Reservoir, for people who are being moved off from their country cottages.

And Mr. QUILLEN had an amendment to remove a section, which is strictly housekeeping and was in the supplemental appropriations bill.

And Mr. HARKINS had an amendment that redesignated a section, so we could straighten out the housekeeping.

There are no questions on the amendments, Mr. Chairman.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Minnesota.

Mr. STANGELAND. Certainly we support the amendments en bloc on this side. We urge their passage.

Mr. LIVINGSTON. Mr. Chairman, this last week, Hurricane Juan brought a Halloween present to South Louisiana—which was far too much trick, and no treat at all. All in all, at least 10 parishes were damaged to the tune of over $1 million.

In Jefferson Parish alone, which is represented by both Representative BILLY TAUZIN and me, 10,000 people were left homeless—permanently or temporarily, 3,000 automobiles were extensively damaged, and losses were estimated at $50 million. Some of these damages were unavoidable. But others might have been avoided had we had adequate protection in place.

Mr. Chairman, the Jefferson westbank hurricane protection levee has been on the books since 1966. Everyone knew there might come a day when just the right hurricane might push the Gulf of Mexico northward—into the bayous and bays of the Louisiana marshland—and beyond.

The people of Jefferson Parish knew that if that happened, one of the vulnerable inhabited areas was the land mass west of New Orleans and the Mississippi River.

There were studies done which portrayed the potential damage, and everyone agreed that a good strong levee system was needed to protect residents from the danger of rapidly rising waters. Local, State, and Federal officials all agreed that the levee should be built, and, in fact, a temporary, make shift levee was built and maintained over the years.

But although considerable damage occurred as a result of Hurricanes Betsy in 1965 and Hilda in 1964, the matter was never really given top consideration by all of the interested parties at the same time.

And so it was that for financial, logistical, or environmental reasons, and others, the Government authorities, the landowners, the environmentalists and the local residents could never agree on exactly where the needed permanent levee was to go.

Well, Mr. Chairman, the time for discussion is over. Hurricane Juan won the argument. Juan decided that if the people couldn't agree on an adequate levee, he would show them what they were missing. And that's what he did.

Actually, he was a gentle soul. His winds were slight, so his damage—while extensive—was not nearly what it might have been had he been much stronger.

Nevertheless, he wiped out two entire subdivisions in Westbank Jefferson with his rising waters. He put 1,200 homes out of commission—along with approximately 1,500 automobiles. Carpets, furniture, appliances, bedding, walls and insulation, and clothing—all of this was ruined, leaving people dazed, bewildered and homeless.

Mr. Chairman, the damage did not have to happen to these people in Westbank Jefferson. If everyone could have agreed on a levee alignment years ago, a levee in this area would have been built—and Hurricane Juan would have been newsworthy, but not devastating for these particular people.

For these reasons, I'm asking that this amendment, offered by Chairman ROE at my request, be passed with H.R. 3670 to authorize whatever work may be necessary to build a permanent westbank hurricane protection levee.

The entire cost of the levee should not exceed $20 million, only a fraction of the damage suffered by my constituents this year, at the hands of that halloween prankster, Hurricane Juan.

I urge the adoption of this provision, and H.R. 3670.

The CHAIRMAN. The Chair recognizes the gentleman from South Dakota [Mr. DASCHLE] for his unanimous consent request.

Mr. DASCHLE. Mr. Chairman, I ask unanimous consent that at this point we include in that section of these amendments being offered en bloc the words "nonprofit entity."

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

The text of the amendment, as modified, is as follows:

Amendment offered by Mr. ROE, as modified: Page 399, after line 5, insert the following new section:

SEC. 1199K. The Secretary shall allow a State or its political subdivisions nonprofit entity to withdraw water on a monthly basis for municipal and industrial uses within the State from any Missouri River main stem reservoir which is under the control of the Secretary and situated wholly or partially within such State but only to the extent that such withdrawals do not exceed the monthly average historical natural flows at the point of withdrawal as determined by the Secretary. Any such water withdrawal for municipal and industrial uses within the affected State shall not require any fee or payment to the Federal Government for waters or project storage or for any reason without the prior consent of Congress.

Mr. DASCHLE. Mr. Chairman, I rise in support of the committee amendment which includes a provision offered by Mr. Dorgan and myself to forbid the Army Corps of Engineers from charging a storage fee for the use of a Federal reservoir, provided the withdrawals do not exceed natural flows of the river.

Earlier this year, former OMB Director, David Stockman, proposed a storage fee as a means of raising revenue from rural water users and the administration has singled out a few rural water systems in North and South Dakota to test the new taxing device. This spring the corps sent a storage fee contract to two rural water systems, the WEB rural water project in northeastern South Dakota and the Southwest rural water project in North Dakota.

The administration contends that those who benefit from the use of the Missouri River main stem dams should have to help pay for the benefits of the project. This rationale conveniently ignores the fact that the main stem dams also carry associated costs.

South Dakota has borne the lions share of that cost with the forfeiture of over 520,000 acres of rich farm bottomland. Moreover, my State was promised compensation in the way of the construction of irrigation projects for hundreds of thousands of acres of land, a promise that has never been kept.

Now the Corps of Engineers is proposing to force North and South Dakota, the two States which lost the most through the construction of the dams, to pay for the whole system through a storage fee. The inconsistency and inequity of this policy is striking. Downstream flood control, irrigation, and navigational interests are not similarly being asked to share the cost of the main stem system.

It is also important to point out that neither WEB nor the Southwest project is dependent, in whole or in part, on the existence of the main stem reservoirs. The amount of water that will be taken from the Missouri River for municipal and industrial use by WEB is about one-fifth of the total evaporation of the reservoir in a given year.

Mr. Chairman, the committee's language is very simple and fair. Any water supplier that withdraws, for municipal and industrial uses, an amount of water that does not exceed the natural flows of the river at the point of withdrawal cannot be charged any fee by the Federal Government for the use of that water. This clearly is the only reasonable way to deal with the problem.

WEB will draw a very small amount of water from the Missouri River and could easily be drawing the same amount from the natural riverbed if the Oahe reservoirs were not in existence. We consider use of the natural flows to be a birthright as citizens of the State. It is a great irony that South Dakota, which sacrificed over 520,000 acres of farmland with the construction of the main stem dams and reservoirs, is now being asked to pay for the privilege of drawing its small daily supply of drinking water while other downstream interests are getting a virtual free ride. The administration's storage fee proposal is inconsistent and very unfair to rural water users. I urge the adoption of this amendment to stop the corps plan now.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New Jersey [Mr. ROE], as modified.

The amendments, as modified, were agreed to.

The CHAIRMAN. Are there further amendments to title I?

AMENDMENT OFFERED BY MR. SHUMWAY

Mr. SHUMWAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SHUMWAY: Section 109(a)(1)(A)(ii) of H.R. 3670 is amended by striking the word "and" after the ";" and inserting in lieu thereof the word "or", and inserting a new subparagraph "(iii)" immediately thereafter reading as follows:

" '(iii) to recover the market value at the time of contribution for non-Federal contributions made in the form of lands, easements, rights-of-way, relocations, and dredge spoil disposal areas for port navigation projects constructed before enactment of this Act; and".

Mr. SHUMWAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. SHUMWAY. Mr. Chairman, this bill, as it is presently drafted, gives ports the authority to recover all non-Federal cost-sharing contributions through the assessment of fees and dues. I think this is a good and necessary authority because ports are highly competitive, and as such, I think need that discretionary free-market oriented kind of authorization.

But the bill does not give ports which have, in the past, undertaken port navigation projects the same kind of authority for recovery of non-Federal contributions. Although ports presently can, and sometimes do, legally charge fees to recover these costs, the lack of clear-cut legal authority has often tempted beneficiaries to raise legal challenges against such fees designed for recovery of these specific costs.

The costs of ports, in turn, of meeting these legal challenges; although their legal authority has been borne out in decisions of the courts and the Federal Maritime Commission, has proved to be a disincentive for ports to even exercise their authority. The result has tied the hands of many port directors in trying to remain competitive.

My amendment, therefore, Mr. Chairman, seeks to provide ports that particular authority. I think it should be noncontroversial because it does not spend a single Federal dollar. It simply clarifies the present legal authority for ports in assessing port fees and harbor dues, and I believe by reinforcing this existing authority and giving this flexibility to ports we will inject greater free-market conditions, which will help our ports, including the ones in this bill which are subject to the new cost-sharing requirements.

To the extent that ports have had to amortize these costs in the past, they have had to do so by offsetting these costs from general port fees. This often means, Mr. Chairman, that ports have had to either absorb these costs totally on their own, with a commensurate reduction in profit, or everyone who does business with the port, that is to say, not just the direct beneficiaries, but all of those, somehow have had to pay for these costs through general fees.

I think that is an inequitable situation, Mr. Chairman, and I think we should provide a clear provision in this law for ports to recoup those expenses which they have provided for Federal projects in the past to put them on an equal competitive basis with those who will receive projects through this bill and in the future.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. SHUMWAY. I yield to the gentleman from New York.

□ 1140

Mr. BIAGGI. I thank the gentleman.

Mr. Speaker, I would inquire of the gentleman, this is an amendment to title I? Is that correct?

Mr. SHUMWAY. It is; to title I.

Mr. BIAGGI. What effect does it have? The costs that are done retroactively, it would be the same process that we have been using prospectively.

Mr. SHUMWAY. The gentleman is correct.

Mr. BIAGGI. So that the user fees could be applied to the cost that the ports have already expended in their development. It would be the same thing we will be doing in the future?

Mr. SHUMWAY. That is exactly correct.

Mr. BIAGGI. I have no objection to it.

Mr. SHUMWAY. I appreciate the chairman's remarks. It simply gives those ports the discretion. It does not mandate upon them any requirement to go back and recoup those fees. But if they want to exercise that discretion, this amendment would open that door to them.

Mr. Chairman, I think that it is a fair amendment and one which will put all of the ports on an equal footing. It is an amendment which is supported by the American Association of Port Authorities. I think it is totally consistent with the provisions regarding future port projects which are already contained within this legislation. I, therefore, urge the adoption of the amendment.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield further?

Mr. SHUMWAY. I yield to the gentleman.

Mr. BIAGGI. I thank the gentleman.

I have no problem with the concept, but the question that comes up in my mind is when you say retroactive, how far back do you go? There is no date certain. Is there a date certain?

Mr. SHUMWAY. We wondered whether we should go back for a particular period of time and limit it in terms of its retroactivity, but what we found, I would say to the gentleman from New York, is that in antiquity, ports have already resolved these fees or else they did not advance them as part of Federal projects.

It seems to me that in its operative effect this amendment would only go back into the recent past. It would not go back into the ancient past. It just seemed inappropriate to draw a line as to where it might cut off or otherwise be affected.

Mr. BIAGGI. If the gentleman will continue to yield, I would say recent past, that still is not specific enough. That is my only concern. I am sure the chairman, Mr. ROE, has some additional comments in that regard.

Mr. SHUMWAY. I appreciate the gentleman's concern in that regard but I would just say in response that in practical effect, it will be the recent past without drawing a particular line as to what the timeperiod may be. That was a difficult decision to make, and I am sure the gentleman can appreciate that.

Mr. ROE. Mr. Chairman, I rise in opposition to the amendment.

I have the highest regard for the gentleman who has presented this proposed amendment, and I know of his extraordinary work in the House. His concern has been of great help to us in developing our port program.

I have to call out to the Members on this issue so they understand it. In view of the fact that this particular language does not give any dimentions. It says retroactivity ad infinitum. That means that anything, from my interpretation of the amendment and reviewing it, anything that has happened any time at any port during any work whatsoever, in lands, easements, right-of-ways, could be totally without dimensions in price, if you like, and that they would be considered a credit offset against what the new fee charges would be.

This could amount to billions of dollars. We have absolutely no idea how to interpret what the order of magnitude of that retroactivity would be. So I would suggest that the gentleman may wish to withdraw this amendment in view of that deficiency, and maybe offer a suggestion which our committee would accept that the corps would be directed to study the potential of this amendment and report back in a year. That, we would certainly be willing to accommodate the gentleman on. But if we were to accept this amendment, basically without a lot of additional information, we would be going back to the time when ports began. You could be talking about countless billions of dollars of credit offsets, and it would knock out the entire cost-sharing mechanism that has been devised from the port system.

Mr. SHUMWAY. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman.

Mr. SHUMWAY. I am not sure what the chairman means by credit offsets. What my amendment purports to do is simply give those ports that have expended moneys in the past in connection with a Federal project in their ports, to go back now and recover them.

Mr. ROE. Yes; I understand that.

Mr. SHUMWAY. Recover them from those who benefit from them. It would be the shippers, the other beneficiaries of any kind of port-deepening project.

If, in their discretion, they feel it would make them noncompetitive to go back and recover those costs, they certainly would not do so.

Mr. SNYDER. Mr. Chairman, will the gentleman, yield?

Mr. ROE. I yield to the gentleman from Kentucky.

Mr. SNYDER. I thank the gentleman for yielding.

Mr. Chairman, section 109 of the substitute grants congressional consent to non-Federal interests to levy port and harbor dues—including duties of tonnage—to recoup the additional non-Federal share of port dredging costs which would be required under section 105 of the bill. As contained in the substitute, section 109 represents the culmination of a great deal of thoughtful analysis and construction, primarily by the Committee on Merchant Marine and Fisheries, with the Public Works Committee playing a secondary role.

Clauses 2 and 3 of section 10 of article I of the U.S. Constitution expressly prohibit the levy of duties of tonnage except with the consent of Congress. Section 109 grants that consent in recognition that non-Federal interests, particularly ports, may require additional revenue-raising devices in order to recoup costs for port dredging which, until now, have been entirely a Federal responsibility. That is a monumental change in policy—one of sever-

al in this bill—which is why section 109 has been drafted as it has.

Mr. Chairman, I see no such extraordinary circumstance attaching to the amendment offered by the gentleman from California. Lands, easements, and rights-of-way have traditionally been a non-Federal responsibility in the construction of a variety of water-related projects, not just port dredging. As such, all ports that have had channel work completed under the traditional cost-sharing rules have done so with the full realization that they were expected to absorb those costs. I suspect, as I am certain many of you do, that in most cases the ports and other non-Federal interests have recovered most or all of those costs under the types of docking fees, terminal leases and other means which they have traditionally employed as revenue-raising devices. They don't need this amendment in order to continue to be able to do so.

The Members are being asked to legislate extraordinary measures to address simply ordinary revenue needs. I submit that such a sweeping policy change is not warranted or desirable. I see great potential for abuse as well Mr. Chairman, in that we may well be granting ports the means to raise revenues to recoup expenses which by now have been long amortized or retired. All this would be accomplished on the backs of vessel owners and operators who, everyone knows, aren't exactly in the economic shape to withstand additional costs of this nature or possible magnitude.

I urge a "no" vote on the gentleman's amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from California [Mr. SHUMWAY].

The amendment was rejected.

MODIFICATION OF AMENDMENT

Mr. GRAY of Illinois. Mr. Chairman, I ask unanimous consent that in the amendment which adds a new section at the end of title XI relating to Devil's Kitchen Lake project, that the word "surplus" be struck from such amendment.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. LOWRY of Washington. Mr. Chairman, I move to strike the last word.

Mr. Chairman, in the Merchant Marine Committee when we were working on this bill, the committee unanimously adopted an amendment called the antidiversion amendment.

For the purpose of making sure that American ports were not put at a competitive disadvantage because of the fee called for in this legislation; for cargo that would be ending up its last destination in Canada or in Mexico, or for cargo that would be starting in the United States and going out of a port in either of Canada or Mexico. The reason being that the American ports would be paying the fee and the Canadian and the Mexican ports would not be paying the fee.

So in that case, and in only that particular cargo, the amendment that I offered in the Merchant Marine Committee that was unanimously adopted, would exempt that cargo only from the fees so that our ports would not be put at a competitive disadvantage.

Because of the rules on the floor, that amendment is not in order at this time because it is a fee and that is a Ways and Means Committee jurisdiction, and that amendment is not in order. I am told that the other body will consider taking up that amendment, and I would like to enter into a colloquy with the distinguished chairman of the subcommittee, who I would like to compliment for this yeoman work, as well as the distinguished subcommittee ranking minority and full committee ranking minority member and the full committee chairman, who I really think have done a good job on this bill, but we have a serious problem.

So if I could engage for just about 2 minutes with the distinguished subcommittee chairman. The ports of Seattle and Tacoma and many other American ports would be placed at an artificial competitive disadvantage by the application of the national uniform user fee, or tax, in this legislation. These ports are in constant competition with neighboring foreign ports for American cargo and for Canadian and Mexican cargo. In the case of Seattle, 725,000 tons of cargo moved through the port that was either bound for or coming from Canada in trade with third countries. Application of the user fee, or tax, would add up to $55 per container in shipping costs to move a container through the port of Seattle. Port personnel indicate that shipping cost differentials of as little as $15 or $20 could make the difference between choosing Seattle over a Canadian port. In addition, Canadian ports are already diverting $7 billion of American cargo through their ports for delivery into the United States by truck or rail.

My amendment would have exempted from the fee, or tax, any cargo using American ports either for imports to or exports from Canada or Mexico in third country trade. In return, the fee, or tax, would be applied to all American cargo diverted through Canadian or Mexican ports.

Mr. Chairman, do you believe that this amendment is consistent with the overall concept of the national uniform user fee, or tax, as adopted in this bill?

□ 1150

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. LOWRY of Washington. I yield to the distinguished subcommittee chairman.

Mr. ROE. Mr. Chairman, I think the gentleman makes a very good point. The answer to the question is "Yes." We did not intend to put any American port at a competitive disadvantage through application of the fee.

Mr. LOWRY of Washington. I thank the subcommittee chairman. I understand that the other body may include provisions similar to the amendment I had in the Committee on Merchant Marine and Fisheries in their version of the water resources bill. Would the gentleman support inclusion of such provisions in the conference report?

Mr. ROE. Yes, I would, I say in response to the distinguished gentleman, because I think his cause is just and I think it is important to the competitive advantage of our own ports in the United States.

Mr. LOWRY of Washington. Mr. Chairman, I thank the subcommittee chairman very much, and again I compliment him and the other members of the committee for their work on this bill.

Mr. WYLIE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do this in order to explain, if I may, an amendment which was part of a package offered by the gentleman from New Jersey [Mr. ROE] a little while ago. The amendment which he offered on my behalf would strike language similar to language contained in the omnibus water resources bill which passed the House last year and did not pass the other body.

Meanwhile, under the Federal Property and Administrative Services Act, which provides for the sale of Government real surplus property, this land was sold to the Columbus Metropolitan Park District in December of last year, and the original cost plus some interest was recovered from the sale of the land.

I am pleased to report today, Mr. Chairman, that the Federal Government is happy, that the Metropolitan Park District is happy, and the citizens of central Ohio are pleased to have this beautiful recreational facility available as a wildlife refuge.

I could never say enough in the way of thanks to the gentleman from New Jersey [Mr. ROE] and his staff for the extraordinary assistance which he and they provided to make this wonderful result come about. I wanted to publicly say that here on the House floor, and also to express the appreciation I feel to the gentleman from New Jersey [Mr. HOWARD] and the gentleman from Kentucky [Mr. SNYDER] for their approval of this procedure. It was ap-

propriate to strike the language which was stricken from the bill, as it no longer applies, and I thank the gentleman for taking care of that.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, I would like to respond to the generosity of the gentleman's comments. I know as far as our committee is concerned that he has always been right there helping us all the time. We are pleased that it worked out. The gentleman has a formula, perhaps, that we have not understood yet. He gets things done. It takes us a little bit longer, and we compliment him for the job he has achieved.

Mr. WYLIE. It would not have happened without the help of the gentleman, and again I thank you very much. In this case a very wonderful, extraordinary result occurred, and everybody involved was pleased about the effect of it.

Mr. ROE. Mr. Chairman, I thank the distinguished gentleman.

Mr. MOORE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to enter into a colloquy with the chairman of the subcommittee, Mr. ROE, concerning the Mississippi River ship channel project which is in section 101 of H.R. 6.

Mr. ROE. If the gentleman will yield, I would be happy to engage in a colloquy with the gentleman from Louisiana.

Mr. MOORE. Mr. Chairman, as you know, the bill would provide authorization for six deep draft navigation projects, including the proposed deepening of the Mississippi River ship channel to a depth of 55 feet. It is my understanding that the Chief of Engineers has reported favorably on deepening the Mississippi River all the way to Baton Rouge based on his finding that, from a national perspective, the project would produce economic benefits which are over eight times the proposed cost of the project.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. MOORE. I yield to the subcommittee chairman.

Mr. ROE. The gentleman is correct. The plan recommended by the Army Corps of Engineers calls for deepening the channel from the mouth of the Mississippi to Baton Rouge as the preferred project alternative with a current benefit to cost ratio of 8.2 to 1.

Mr. MOORE. It is also my understanding that the committee conducted hearings on this issue and heard testimony from the corps, Members of Congress and other affected interest groups.

Mr. ROE. That is correct, the subcommittee heard extensive testimony on this project in the summer of 1982 and has continued to monitor this project since then.

Mr. MOORE. Based on that review of the project, I understand that the Subcommittee on Water Resources and the Committee on Public Works is recommending authorization of the project all the way to Baton Rouge at a depth of 55 feet and that the committee intends that the entire project should be built.

Mr. ROE. The gentleman from Louisiana is correct. Having reviewed this project in depth, it is the view of the committee that construction of the entire project to Baton Rouge is not only justified but that from a national perspective, it is the preferred approach.

Mr. MOORE. Mr. Chairman, I thank the subcommittee chairman for entering into this colloquy with me, and I thank him and the members of the subcommittee for their work on this important project.

TITLE II—INLAND WATERWAY TRANSPORTATION SYSTEM

SEC. 201. (a) The following works of improvement for the benefit of navigation are hereby authorized to be prosecuted by the Secretary substantially in accordance with the plans and subject to the conditions recommended in the respective reports hereinafter designated in this section, except as otherwise provided, or in accordance with such plans as the Secretary determines are advisable in any case in which there is no report designated. The Secretary shall complete each such work of improvement not later than seven years after the date on which funds are first appropriated for such project.

OLIVER LOCK AND DAM, BLACK WARRIOR–TOMBIGBEE RIVER, ALABAMA

Construction of a lock and dam to replace the William Bacon Oliver Lock and Dam, Black Warrior–Tombigbee River, Alabama: Report of the Chief of Engineers, dated September 26, 1984, at an estimated cost of $158,000,000.

GALLIPOLIS LOCKS AND DAM REPLACEMENT, OHIO RIVER, OHIO AND WEST VIRGINIA

The project for navigation, Gallipolis Locks and Dam Replacement, Ohio River, Ohio and West Virginia: Report of the Chief of Engineers, dated April 8, 1982, and Supplemental Report of the Chief of Engineers, dated August 13, 1983, at an estimated cost of $260,000,000.

WINFIELD LOCKS AND DAM, KANAWHA RIVER, WEST VIRGINIA

Construction of improvements to, and an additional lock in the vicinity of, the Winfield Locks and Dam, Kanawha River, West Virginia, and acquisition of lands for fish and wildlife mitigation in such vicinity, at an estimated cost of $134,000,000. The Secretary shall, not later than one year after the date of enactment of this Act, transmit a copy of any final environmental impact statement required by section 102(2)(C) of the National Environmental Policy Act of 1969, and any recommendations of the Secretary, with respect to such project to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee.

LOCK AND DAM 7 REPLACEMENT, MONONGAHELA RIVER, PENNSYLVANIA

The project for navigation, Lock and Dam 7 Replacement, Monongahela River, Pennsylvania: Report of the Chief of Engineers, dated September 24, 1984, with such modifications (including acquisition of lands for fish and wildlife mitigation) as the Secretary determines are advisable, at an estimated cost of $95,000,000.

LOCK AND DAM 8 REPLACEMENT, MONONGAHELA RIVER, PENNSYLVANIA

The project for navigation, Lock and Dam 8 Replacement, Monongahela River, Pennsylvania: Report of the Chief of Engineers, dated September 24, 1984, with such modifications (including acquisition of lands for fish and wildlife mitigation) as the Secretary determines are advisable, at an estimated cost of $68,000,000.

LOCK AND DAM 26, MISSISSIPPI RIVER, ALTON, ILLINOIS AND MISSOURI

Construction of a second lock having a length of 600 feet at lock and dam 26, Mississippi River, Alton, Illinois, and Missouri at an estimated cost of $245,000,000.

BONNEVILLE LOCK AND DAM, OREGON AND WASHINGTON—COLUMBIA RIVER AND TRIBUTARIES, WASHINGTON

The project for navigation, Bonneville Lock and Dam, Oregon and Washington—Columbia River and Tributaries, Interim Report: Report of the Chief of Engineers, dated March 14, 1980, and the Supplement thereto, dated February 10, 1981, at an estimated cost of $191,000,000. Dredged material from the project shall be disposed of at such sites considered by the Secretary to be appropriate to the extent necessary to prevent damage to the Blue Heron rookery on Pierce and Ives Islands. No construction shall take place on Pierce and Ives Islands during the heron nesting period. The Secretary shall establish a bioengineering committee to review plans for the project, recommend measures to minimize adverse affects of the project, and develop a mitigation plan for the project. Such committee shall include representatives of the Corps of Engineers, the contractor for construction of the project, and appropriate State and Federal agencies.

(b) If any provision in any report designated by subsection (a) recommends that a State contribute in cash 5 percent of the construction costs allocated to non-vendible project purposes and 10 percent of the construction costs allocated to vendible project purposes, such provision shall not apply to the project recommended in such report.

SEC. 202. (a) Two-thirds of the cost of construction of the general navigation features, including but not limited to, channels, locks, dams, and turning basins, of each project authorized by this title shall be paid only from amounts appropriated from the general fund of the Treasury. One-third of such cost shall be paid only from amounts appropriated from the Inland Waterways Trust Fund. For purposes of this subsection, the term "construction" shall include planning, designing, engineering, and surveying, the acquisition of all lands, easements, and rights-of-way necessary for the project, in-

cluding lands for disposal of dredged material, and relocations (other than relocations described in subsection (b)) necessary for the project.

(b) One-third of the cost of relocation of any oil, natural gas, or other pipeline, any electric transmission cable or line, any communications cable or line, and facilities related to such pipeline, cable, or line (1) the relocation of which is necessary for construction, operation, and maintenance of a project authorized by this title, and (2) which may only be built or commenced if authorized by the Secretary under section 10 of the Act of March 3, 1899 (30 Stat. 1151; 33 U.S.C. 403), shall be paid only from amounts appropriated from the general fund of the Treasury. One-sixth of such cost shall be paid only from the Inland Waterways Trust Fund. The remainder of such cost shall be paid by the owner of the facility being relocated.

(c) Any Federal responsibility with respect to a project authorized by this title which responsibility is not provided for in subsection (a) or (b) of this section shall be paid only from amounts appropriated from the general fund of the Treasury.

SEC. 203. There is authorized to be appropriated for fiscal years beginning after September 30, 1985, such sums as may be necessary from the general fund of the Treasury and from the Inland Waterways Trust Fund to pay the costs specified in section 202.

The CHAIRMAN. Are there amendments to title II of the bill?

If not, the Clerk will designate title III.

The text of title III is as follows:

TITLE III—FLOOD CONTROL

SEC. 301. (a) The following works of improvement for the control of destructive floodwaters are hereby adopted and authorized to be prosecuted by the Secretary substantially in accordance with the plans and subject to the conditions recommended in the respective reports hereinafter designated in this section, except as otherwise provided, or in accordance with such plans as the Secretary determines are advisable in any case in which there is no report designated.

QUINCY COASTAL STREAMS, MASSACHUSETTS

The project for flood control, Quincy Coastal Streams, Massachusetts (Town Brook Interim): Reports of the Chief of Engineers, dated December 14, 1981 and December 13, 1984, at an estimated cost of $20,630,000.

ROUGHANS POINT, MASSACHUSETTS

The project for flood control, Roughans Point, Revere, Massachusetts: Report of the Chief of Engineers, dated May 4, 1985, at an estimated cost of $6,990,000.

CAZENOVIA CREEK, NEW YORK

The project for flood control, Cazenovia Creek Watershed, New York: Report of the Chief of Engineers, dated September 8, 1977, House Document Numbered 96-126, at an estimated cost of $2,360,000. Such project shall include features necessary to enable the project to serve as a part of a streamside trail system if the Secretary determines such features are compatible with the project purposes.

MAMARONECK, SHELDRAKE, AND BYRAM RIVERS, NEW YORK AND CONNECTICUT

The project for flood control, Mamaroneck and Sheldrake River Basins, New York and Connecticut, and Byram River Basin, New York and Connecticut: Report of the Chief of Engineers, dated April 4, 1979, at an estimated cost of $52,400,000. Such project shall include flood protection for the town of Mamaroneck as recommended in the report of the Division Engineer, North Atlantic Division, dated March 28, 1978.

RAHWAY RIVER AND VAN WINKLES BROOK, NEW JERSEY

The project for flood control, Rahway River and Van Winkles Brook at Springfield, New Jersey: Report of the Chief of Engineers, dated October 24, 1975, House Document Numbered 96-20, at an estimated cost of $12,500,000.

ROBINSON'S BRANCH—RAHWAY RIVER, NEW JERSEY

The project for flood control, Robinson's Branch of the Rahway River at Clark, Scotch Plains, and Rahway, New Jersey: Report of the Chief of Engineers, dated October 10, 1975, House Document Numbered 96-21, at an estimated cost of $20,000,000.

GREEN BROOK SUB-BASIN, RARITAN RIVER BASIN, NEW JERSEY

The project for flood control, Green Brook Sub-basin, Raritan River Basin, New Jersey: Report of the Chief of Engineers, dated September 4, 1981, at an estimated cost of $137,000,000. Such project shall include flood protection for the upper Green Brook Sub-basin and the Stony Brook tributary, as described in plan A in the report of the District Engineer, New York District, dated August 1980.

JAMES RIVER BASIN, VIRGINIA

The project for flood control, James River Basin, Richmond, Virginia: Report of the Chief of Engineers, dated November 16, 1981, at an estimated cost of $93,300,000. Such project shall include flood protection for the Richmond municipal wastewater treatment facility, as recommended in the report of the District Engineer, Norfolk District, dated September 1980.

OATES CREEK, GEORGIA

The project for flood control, Oates Creek, Georgia: Report of the Chief of Engineers, dated December 23, 1981, at an estimated cost of $9,430,000. Such project shall include (1) measures determined by the Secretary to be necessary and appropriate to minimize pollution of shallow ground and surface waters which may result from construction of the project, and (2) planting of vegetation along the channel for purposes of enhancing wildlife habitat.

VILLAGE CREEK, ALABAMA

The project for flood control, Village Creek, Jefferson County, Alabama: Report of the Chief of Engineers, dated December 23, 1982, at an estimated cost of $21,000,000.

THREEMILE CREEK, ALABAMA

The project for flood control, Threemile Creek, Mobile, Alabama: Report of the Chief of Engineers, dated April 20, 1984, at an estimated cost of $13,300,000. The Secretary shall include as part of the non-Federal contribution of the project any local flood protection work carried out by non-Federal interests after January 1, 1982, and before the date of enactment of this Act which work the Secretary determines is reasonably compatible with the project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

BUSHLEY BAYOU, LOUISIANA

The project for flood control, Bushley Bayou, Louisiana: Reports of the Chief of Engineers, dated April 30, 1980, and August 12, 1982, at an estimated cost of $42,500,000.

LOUISIANA STATE PENITENTIARY LEVEE

The project for flood control, Louisiana State Penitentiary Levee, Mississippi River, Louisiana: Report of the Chief of Engineers, dated December 10, 1982, at an estimated cost of $20,400,000. No acquisition of land for or actual construction of the project may be commenced until appropriate non-Federal interests shall agree to undertake measures to minimize the loss of fish and wildlife habitat lands in the project area.

SOWASHEE CREEK, MERIDIAN, MISSISSIPPI

The project for flood control, Sowashee Creek, Meridian, Mississippi: Report of the Chief of Engineers, dated February 25, 1985, at an estimated cost of $12,300,000.

NONCONNAH CREEK AND ST. JOHNS CREEK, TENNESSEE AND MISSISSIPPI

The project for flood control, Nonconnah Creek, Tennessee and Mississippi: Report of the Chief of Engineers, dated December 23, 1982, at an estimated cost of $18,500,000. The improvements for St. Johns Creek and tributaries shall be included as a separate part of the project and shall be constructed by the United States Department of Agriculture Soil Conservation Service, at an estimated cost of $19,500,000, in accordance with the recommendations of the State Conservationist as contained in the report, Nonconnah Creek and Tributaries, Tennessee and Mississippi, dated September 1981. Subsection (f) of this section shall not apply to such improvements. The project shall include an evaluation of fish and wildlife losses which may result from construction of the project and such additional measures as the Secretary deems necessary and appropriate to mitigate such losses. The Secretary shall adopt and implement guidelines in connection with clearing and snagging as the Secretary determines necessary and appropriate to minimize adverse effects on fish and wildlife habitat.

HORN LAKE CREEK AND TRIBUTARIES, TENNESSEE AND MISSISSIPPI

The project for flood control, Horn Lake Creek and Tributaries, including Cow Pen Creek, Tennessee and Mississippi: Report of the Chief of Engineers, dated January 4, 1983, at an estimated cost of $2,400,000, including such additional measures as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary shall (1) reexamine the adequacy and feasibility of the recommended measures for fish and wildlife habitat, and (2) reexamine upland dredged disposal alternatives. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such reexamination, along with recommendations for additional measures which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of the project on fish and wildlife habitat. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution of the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment

and Public Works of the Senate. The Secretary shall also adopt and implement such guidelines in connection with channel clearing and drift removal for the project as the Secretary, in consultation with the Fish and Wildlife Service, determines are necessary and appropriate to minimize adverse effects on fish and wildlife habitat.

ISLAND CREEK BASIN, WEST VIRGINIA

The project for flood control, Island Creek Basin, in and around Logan, West Virginia: Report of the Division Engineer, dated April 3, 1985, at an estimated cost of $70,000,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (f) of this section.

MUSKINGUM RIVER, KILLBUCK, OHIO

The project for flood control, Muskingum River, Killbuck, Ohio: Report of the Chief of Engineers, dated February 3, 1978, House Document Numbered 96-117, at an estimated cost of $5,100,000.

MUSKINGUM RIVER, MANSFIELD, OHIO

The project for flood control, Muskingum River, Mansfield, Ohio: Report of the Chief of Engineers, dated February 3, 1978, House Document Numbered 96-117, at an estimated cost of $3,000,000.

HOCKING RIVER, LOGAN, OHIO

The project for flood control, Hocking River at Logan, Ohio: Report of the Chief of Engineers, dated June 23, 1978, at an estimated cost of $6,460,000. The Secretary shall review potential sites for disposal of dredged material from the project and shall select such sites as he determines necessary and appropriate with a view toward minimizing adverse effects on fish and wildlife habitat areas.

HOCKING RIVER, NELSONVILLE, OHIO

The project for flood control, Hocking River at Nelsonville, Ohio: Report of the Chief of Engineers, dated June 23, 1978, at an estimated cost of $7,040,000. The Secretary shall review potential sites for disposal of dredged material from the project and shall select such sites as he determines necessary and appropriate with a view toward minimizing adverse effects on fish and wildlife habitat areas.

SCIOTO RIVER, OHIO

The project for flood control, Scioto River at North Chillicothe, Ohio: Reports of the Chief of Engineers, dated September 4, 1981 and February 1, 1985, at an estimated cost of $8,990,000.

LITTLE MIAMI RIVER, OHIO

The project for flood control, Miami River, Little Miami River, Interim Report Number 2, West Carrollton-Holes Creek, Ohio: Report of the Chief of Engineers, dated December 23, 1981, at an estimated cost of $6,630,000.

MIAMI RIVER, FAIRFIELD, OHIO

The project for flood control, Miami River, Fairfield, Ohio: Report of the Chief of Engineers, dated June 22, 1983, at an estimated cost of $10,500,000. To the extent the Secretary, in consultation with appropriate Federal, State, and local agencies, determines necessary and appropriate, the project shall include additional measures for mitigation of losses of fish and wildlife habitat, including seeding and planting in disturbed areas, limiting removal of riparian vegetation to the minimum amount necessary for project objectives, performing work along the north streambank where construction is planned on only one side of the channel, limiting construction activities to the right streambank in the reach of Pleasant Run extending from mile 2.75 to mile 3.10, the use of gabions and riprap for bank protection in lieu of concrete, and the inclusion of pool-riffle complexes at bridges. The Secretary shall include as part of the non-Federal contribution of the project any local flood protection work carried out by non-Federal interests after July 1, 1979, and before the date of enactment of this Act which work the Secretary determines is reasonably compatible with the project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

HARRISBURG, PENNSYLVANIA

The project for flood control, Harrisburg, Pennsylvania: Report of the Chief of Engineers, dated May 16, 1979, at an estimated cost of $103,000,000, including such modifications and additional measures as may be recommended by the Secretary in the report transmitted under this paragraph. To the extent the Secretary, in consultation with appropriate Federal, State, and local agencies, determines necessary and appropriate, the project shall include (1) a low-flow channel or fishway in both the improved earth channel and the concrete channel portion of the project, (2) utilization of sloping side sections in the concrete channel, and (3) modifications to bridges crossing Paxton Creek to prevent damming of the creek. The project shall include the cost of any relocation required for geodetic control survey monuments. The Secretary shall study the feasibility of providing a floodway along Paxton Creek between Wildwood Lake and Maclay Street as an alternative to the recommended plan and shall reexamine fish and wildlife habitat mitigation measures recommended in the report of the Chief of Engineers. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such study and reexamination, along with recommendations for any modifications in the project which the Secretary determines to be feasible and appropriate to construct such floodway and for any additional measures which the Secretary determines to be necessary and appropriate to reduce fish and wildlife habitat losses in the project area. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution of the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

LOCK HAVEN, PENNSYLVANIA

The project for flood control, Lock Haven, Pennsylvania: Report of the Chief of Engineers, dated December 14, 1981, at an estimated cost of $66,700,000. The project shall be constructed to provide protection at least sufficient to prevent any future flood losses to the city of Lock Haven, Pennsylvania, from flooding equivalent to a level of flooding 50 percent greater than the level of flooding which occurred as a result of tropical storm Agnes in 1972. The Secretary shall include as part of the non-Federal contribution of the project any work carried out by non-Federal interests after January 1, 1973, which the Secretary determines is reasonably compatible with the project. Cost and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

SCHUYLKILL RIVER BASIN, POTTSTOWN, PENNSYLVANIA

The project for flood control and other purposes for Pottstown and vicinity, Schuylkill River Basin, Pennsylvania: Report of the Chief of Engineers, dated March 7, 1974, House Document Numbered 93-321, at an estimated cost of $4,590,000. The Congress hereby finds that the application of the provisions of section 209 of the Flood Control Act of 1970 result in the benefits from flood control measures authorized by this paragraph exceeding their economic costs.

SAW MILL RUN, PENNSYLVANIA

The project for flood control, Saw Mill Run, Pittsburgh, Pennsylvania: Report of the Chief of Engineers, dated January 30, 1978, House Document Numbered 96-25, at an estimated cost of $30,100,000, including construction of the portion of the Saw Mill Run relief sewer in the city of Pittsburgh, Pennsylvania, beginning at the northern boundary of Woodruff Street and ending at the point where Saw Mill Run Creek crosses the southern boundary of such city.

WYOMING VALLEY, PENNSYLVANIA

The project for flood control, Wyoming Valley, Pennsylvania: Report of the Chief of Engineers, dated October 19, 1983, at an estimated cost of $218,000,000.

EIGHT MILE CREEK, PARAGOULD, ARKANSAS

The project for flood control, Eight Mile Creek, Paragould, Arkansas: Report of the Chief of Engineers, dated August 10, 1979, including improvement of Fifteen Mile Bayou and tributaries as recommended by the District Engineer and the Mississippi River Commission in reports dated February 1978 and May 24, 1977, respectively, at an estimated cost of $14,200,000.

FOURCHE BAYOU BASIN, ARKANSAS

The project for flood control, Fourche Bayou Basin, Little Rock, Arkansas: Report of the Chief of Engineers, dated September 4, 1981, at an estimated cost of $22,800,000.

HELENA AND VICINITY, ARKANSAS

The project for flood control, Helena and Vicinity, Arkansas: Report of the Chief of Engineers, dated June 22, 1983, at an estimated cost of $11,200,000.

WEST MEMPHIS AND VICINITY, ARKANSAS

The project for flood control, West Memphis and Vicinity, Arkansas: Report of the Chief of Engineers, dated September 7, 1984, at an estimated cost of $19,900,000.

MINGO CREEK, OKLAHOMA

The project for flood control, Mingo Creek, Tulsa, Oklahoma: Report of the Chief of Engineers, dated November 16, 1981, at an estimated cost of $93,200,000. The project shall include measures determined appropriate by the Secretary, after consultation with the city of Tulsa, to minimize adverse effects associated with the use of flood water detention sites for the project.

FRY CREEKS, OKLAHOMA

The project for flood control, Fry Creeks, Oklahoma: Report of the Chief of Engineers, dated September 7, 1983, at an estimated cost of $9,100,000, except that the

Secretary shall acquire a total of 20 acres of land for mitigation of fish and wildlife losses and such lands, to the extent feasible, shall be contiguous and shall be in a corridor not less than 50 feet wide.

MALINE CREEK, MISSOURI

The project for flood control, Maline Creek, Missouri: Report of the Chief of Engineers, dated November 2, 1982, at an estimated cost of $44,800,000.

ST. JOHNS BAYOU AND NEW MADRID FLOODWAY, MISSOURI

The project for flood control, St. Johns Bayou and New Madrid Floodway, Missouri: Report of the Chief of Engineers, dated January 4, 1983, at an estimated cost of $76,200,000, except that the land for mitigation of damages to fish and wildlife shall be acquired as soon as possible from available funds, including the Environmental Protection and Mitigation Fund established by section 1104 of this Act and except that lands acquired by the State of Missouri after January 1, 1982, for mitigation of damage to fish and wildlife within the Ten Mile Pond mitigation area shall be counted as part of the total quantity of mitigation lands required for the project and shall be maintained by such State for such purpose.

STE. GENEVIEVE, MISSOURI

The project for flood control, Ste. Genevieve, Missouri: Report of the Board of Engineers for Rivers and Harbors, dated April 16, 1985, at an estimated cost of $29,400,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (f) of this section. Congress finds that, in view of the historic preservation benefits resulting from the project, the overall benefits of the project exceed the costs of the project.

BRUSH CREEK AND TRIBUTARIES, MISSOURI AND KANSAS

The project for flood control, Brush Creek and Tributaries, Missouri and Kansas: Report of the Chief of Engineers, dated January 3, 1983, at an estimated cost of $12,300,000. The project shall include, at an estimated additional cost of $700,000, replacement of the Kansas City Public Service Railway Bridge recommended for removal as part of the project if the Secretary determines, before the acquisition of any land for or the actual construction of the project, that appropriate non-Federal interests will use the bridge as part of a regional public transportation system in the ten-year period following initiation of the project.

CAPE GIRARDEAU, MISSOURI

The project for flood control, Cape Girardeau, Jackson Metropolitan Area, Missouri: Report of the Chief of Engineers, dated December 8, 1984, at an estimated cost of $18,700,000, except that the project shall include the nonstructural measures recommended in the Report of the Division Engineer, dated January 3, 1983.

HALSTEAD, KANSAS

The project for flood control, Halstead, Kansas: Report of the Chief of Engineers, dated May 8, 1979, at an estimated cost of $6,100,000, including the acquisition of such additional lands and access points as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study the need for additional lands for mitigation of fish and wildlife losses caused by the project and the need for additional access points to the Little Arkansas River. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such study, along with recommendations for additional measures which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of the project on fish and wildlife habitat. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution of the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

UPPER LITTLE ARKANSAS RIVER, KANSAS

The project for flood control, Upper Little Arkansas River Watershed, Kansas: Report of the Chief of Engineers, dated December 18, 1983, at an estimated cost of $9,590,000.

ROCK RIVER, ILLINOIS

The project for flood control, Rock River, Rockford and Vicinity, Illinois (Loves Park Interim): Report of the Chief of Engineers, dated September 15, 1980, at an estimated cost of $23,400,000. The project shall include flood protection measures along Small Unnamed Creek, as described in the Interim Report of the District Engineer, Rock Island, dated February 1979. Before the acquisition of land for or the actual construction of the project the Secretary shall study the probable affects of the project on existing recreational resources in the project area and, as part of the project, shall undertake such measures as he determines necessary and appropriate to mitigate any adverse effects on such recreation resources.

GREEN BAY LEVEE AND DRAINAGE DISTRICT NUMBER 2, IOWA

The project for flood control, Mississippi River, Coon Rapids Dam to Ohio River, Green Bay Levee and Drainage District Number 2, Iowa: Report of the Chief of Engineers, dated October 21, 1981, except that borrow material for the project shall be obtained from the island source as recommended by the District Engineer, Rock Island District, in his report dated November 1978, and revised November 1979, at an estimated cost of $5,550,000.

SOUTH QUINCY DRAINAGE AND LEVEE DISTRICT, ILLINOIS

The project for flood control, South Quincy Drainage and Levee District, Illinois: Report of the Chief of Engineers, dated January 24, 1984, at an estimated cost of $10,800,000. The Secretary shall, to the extent feasible, obtain borrow material from sites in the main channel of the Mississippi River and place fill material on the landward side of the existing levee in order to protect wildlife habitat.

NORTH BRANCH OF CHICAGO RIVER, ILLINOIS

The project for flood protection for the North Branch of the Chicago River, Illinois: Report of the Chief of Engineers, dated October 29, 1984, at an estimated cost of $16,700,000. In recognition of the flood damage prevention benefits provided in the North Branch of the Chicago River, Illinois Basin, by the Techny Reservoirs constructed by non-Federal interests on the West Fork of the North Branch of the Chicago River and by the Mid Fork Reservoir and the Mid Fork Pumping Station constructed by non-Federal interests on the Middle Fork of the North Branch of the Chicago River, the Secretary shall, subject to such amounts as are provided in appropriation Acts, reimburse non-Federal interests for an amount equal to 75 per centum of the costs of planning and construction of such reservoirs and pumping station.

LITTLE CALUMET RIVER, INDIANA

The project for flood control, Little Calumet River, Indiana: Report of the Chief of Engineers, dated July 2, 1984, except that such project shall be carried out substantially in accordance with the Report of the Division Engineer, dated October 12, 1982, at an estimated cost of $60,900,000.

LITTLE CALUMET RIVER BASIN (CADY MARSH DITCH), INDIANA

The project for flood control, Little Calumet River Basin (Cady Marsh Ditch), Indiana, designated as Plan D as described in the Final Feasibility Report of the District Engineer, dated April 1984, at an estimated cost of $4,530,000.

PERRY CREEK, IOWA

The project for flood control, Perry Creek, Iowa: Report of the Chief of Engineers, dated February 4, 1982, House Document Numbered 98-179, at an estimated cost of $31,000,000.

MUSCATINE ISLAND, IOWA

The project for flood control, Muscatine Island Levee District and Muscatine-Louisa County Drainage District No. 13, Iowa: Report of the Chief of Engineers, dated July 22, 1977, at an estimated cost of $12,700,000, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary shall reexamine the drainage system recommended in the report of the Chief of Engineers and the feasibility of obtaining material for the levee from upland rather than aquatic sources in order to minimize adverse effects on fish and wildlife habitat. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such reexamination, along with recommendations for modifications in the project which the Secretary determines to be necessary and appropriate to minimize adverse effects of the project on Spring Lake and on fish and wildlife habitat. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution of the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

DES MOINES RIVER BASIN, IOWA AND MINNESOTA

The project for flood control, Des Moines River Basin, Iowa and Minnesota: Report of the Chief of Engineers, dated July 22, 1977, at an estimated cost of $11,300,000. Before the acquisition of any interest in real property for or the actual construction of the project, the Secretary shall, in consultation with appropriate Federal, State, and local agencies, study the feasibility of minimizing

increased flood stages along Jordon Creek in the vicinity of the Chicago, Rock Island and Pacific Railroad Bridge and the implementation of nonstructural and structural flood plain management techniques along the reach of Walnut Creek, including the improvement of channel capacity in the vicinity of Grand Avenue. In addition, the Secretary shall, in consultation with appropriate Federal, State, and local agencies, review the location of river access points and boat ramps. The Secretary is authorized to undertake such additional measures as he determines necessary and appropriate to carry out the results of such study and review.

REDWOOD RIVER, MINNESOTA

The project for flood control, Redwood River at Marshall, Minnesota: Report of the Chief of Engineers, dated November 16, 1981, at an estimated cost of $3,650,000.

ROOT RIVER BASIN, MINNESOTA

The project for flood control, Root River Basin, Minnesota: Report of the Chief of Engineers, dated May 13, 1977, House Document Numbered 96-17, at an estimated cost of $7,680,000.

SOUTH FORK ZUMBRO RIVER, MINNESOTA

The project for flood control, South Fork Zumbro River Watershed at Rochester, Minnesota: Report of the Chief of Engineers, dated February 23, 1979, House Document Numbered 96-115, at an estimated cost of $55,000,000. Notwithstanding such report and any other provision of law (including section 302 of this title), the Federal share of the cost of the project shall be determined in accordance with such section, except that non-Federal interests shall not be required before and during construction of the project to provide lands, easements, and rights-of-way necessary for changes to highway bridges and foot bridges and approaches to such bridges, and to make relocations of utilities, structures, and other improvements necessary for such changes.

MISSISSIPPI RIVER AT ST. PAUL, MINNESOTA

The project for flood control, Mississippi River at St. Paul, Minnesota: Report of the Chief of Engineers, dated June 16, 1983, at an estimated cost of $7,350,000.

PORTAGE, WISCONSIN

The project for flood control, Wisconsin River at Portage, Wisconsin: Report of the Chief of Engineers, dated May 20, 1985, at an estimated cost of $5,150,000.

PARK RIVER, GRAFTON, NORTH DAKOTA

The project for flood control, Park River, Grafton, North Dakota: Report of the Chief of Engineers, dated April 17, 1984, at an estimated cost of $15,400,000.

FOUNTAIN CREEK, COLORADO

The project for flood control, Fountain Creek, Pueblo, Colorado: Report of the Chief of Engineers, dated December 23, 1981, at an estimated cost of $6,930,000.

METROPOLITAN DENVER, COLORADO

The project for flood control, Metropolitan Denver and South Platte River and Tributaries, Colorado, Wyoming, and Nebraska: Reports of the Chief of Engineers, dated December 23, 1981, and July 14, 1983, House Document Numbered 98-265, at an estimated cost of $10,000,000. The Secretary shall include as part of the non-Federal contribution of the project any work carried out by non-Federal interests after January 1, 1978, and before the date of enactment of this Act for upstream drainage improvements and downstream channelization which work the Secretary determines is reasonably compatible with the project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

BOGGY CREEK, TEXAS

The project for flood control, Boggy Creek, Austin, Texas: Report of the Chief of Engineers, dated January 19, 1981, at an estimated cost of $15,100,000. The Secretary shall include as part of the non-Federal contribution of the project any work carried out by non-Federal interests on the project (including any acquisition of lands required for the project) after September 30, 1979, and before the date of enactment of this Act which work the Secretary determines is reasonably compatible with the project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

BUFFALO BAYOU AND TRIBUTARIES, TEXAS

The project for flood control, Buffalo Bayou and Tributaries (Upper White Oak Bayou), Texas: Report of the Chief of Engineers, dated June 13, 1978, House Document Numbered 96-182, at an estimated cost of $76,000,000.

LAKE WICHITA, HOLLIDAY CREEK, TEXAS

The project for flood control, Lake Wichita, Holliday Creek, Texas: Report of the Chief of Engineers, dated July 9, 1979, at an estimated cost of $19,100,000. The Secretary shall include as part of the non-Federal contribution of the project any local flood protection work carried out by non-Federal interests after January 1, 1983, and before the date of enactment of this Act which work the Secretary determines is reasonably compatible with the project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

LOWER RIO GRANDE, TEXAS

The project for flood control, Lower Rio Grande Basin, Texas: Report of the Board of Engineers for Rivers and Harbors, dated April 29, 1983, at an estimated cost of $153,000,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (f) of this section. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study adverse effects of discharges of sediments and pollutants from the project on fish and wildlife. The Secretary is authorized to undertake such measures as he determines necessary and appropriate to minimize such adverse effects and to mitigate the adverse effects of the project on fish and wildlife habitat. Before the acquisition by the Secretary of any interest in real property for the project or the actual construction of the project, the Secretary, after consultation with the Secretary of Agriculture, shall determine that Phases II and III of the project (as set forth in such report) will be undertaken by the Secretary of Agriculture. The Secretary and the Secretary of Agriculture, in consultation with appropriate Federal, State, and local agencies, shall develop an overall mitigation plan for Phases I, II, and III of the project. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a copy of such plan, along with recommendations for additional measures which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of the project on fish and wildlife habitat. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution of the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SIMS BAYOU, TEXAS

The project for flood control, Sims Bayou, Texas: Report of the Chief of Engineers, dated April 17, 1984, at an estimated cost of $102,000,000, except that the level of protection provided shall be in accordance with the Report of the Division Engineer, dated March 18, 1983.

MIDDLE RIO GRANDE, NEW MEXICO

The project for flood control, Middle Rio Grande Flood Protection, Bernalillo to Belen, New Mexico: Report of the Chief of Engineers, dated June 23, 1981, at an estimated cost of $40,000,000. The project shall include the establishment of 75 acres of wetlands for fish and wildlife habitat and the acquisition of 200 acres of land for mitigation of fish and wildlife losses, as recommended by the District Engineer, Albuquerque, District, in his report dated June 13, 1979.

PUERCO RIVER AND TRIBUTARIES, NEW MEXICO

The project for flood control, Puerco River and Tributaries, Gallup, New Mexico: Report of the Chief of Engineers, dated September 4, 1981, at an estimated cost of $3,810,000.

LITTLE COLORADO RIVER, ARIZONA

The project for flood control, Little Colorado River at Holbrook, Arizona: Report of the Chief of Engineers, dated December 23, 1981, at an estimated cost of $9,520,000.

CACHE CREEK BASIN, CALIFORNIA

The project for flood control, Cache Creek Basin, California: Report of the Chief of Engineers, dated April 27, 1981, at an estimated cost of $25,300,000, except that, in lieu of constructing the recommended bypass channel, the Secretary shall accomplish the purposes of the project by removing the rock formation at the outlet channel and widening and deepening the channel in accordance with alternative 8 as described in the Feasibility Study of the District Engineer dated August 1979.

REDBANK AND FANCHER CREEKS, CALIFORNIA

The project for flood control, Redbank and Fancher Creeks, California: Report of the Chief of Engineers, dated May 7, 1981, at an estimated cost of $63,500,000. The project shall include measures determined appropriate by the Secretary to minimize adverse effects on groundwater and to maximize benefits to groundwater, including ground water recharge.

SANTA ANA RIVER MAINSTEM, CALIFORNIA

The project for flood control, Santa Ana River Mainstem, including Santiago Creek, California: Report of the Chief of Engineers, dated January 15, 1982, at an estimated cost of $1,213,000,000, including such measures as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary shall study (1) the feasibility and environmental impact

of including conservation storage at the end of the winter storm season at Prado Dam as a project purpose, (2) the effects of such storage on recreation and leasehold interests at Prado Reservoir and on riparian rights downstream of such dam, (3) any water supply benefits associated with such storage, and (4) upstream alternatives to construction of Mentone Dam in accordance with section 1304 of the Supplemental Appropriations Act, 1984. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for actual construction of the following elements of the project: improvements at Prado Dam which limit the reservoir taking line to no greater than elevation 566 feet, Santa Ana River channel improvements in Orange County, improvements along Santiago Creek, improvements of the Oak Street drain, improvement of the Mill Creek levees, features for mitigation of project effects on and preservation of endangered species, and recreation features as identified in the report of the Chief of Engineers for these project elements, and no appropriation shall be made for acquisition of any interest in real property for or the actual construction of other elements of the project, if such acquisition and actual construction have not been approved by resolution of the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. No acquisition of any interest in real property for or actual construction of other elements of the project shall be undertaken unless such acquisition and actual construction have been agreed to by resolutions of the non-Federal sponsoring agencies. Any relocation of the Talbert Valley Channel undertaken in connection with the project shall be constructed with a channel capacity sufficient to accommodate a 100-year flood.

ALENAIO STREAM, HAWAII

The project for flood control, Alenaio Stream, Hawaii: Report of the Chief of Engineers, dated August 15, 1983, at an estimated cost of $5,500,000, except that the level of protection provided shall be in accordance with the Report of the Board of Engineers for Rivers and Harbors, dated January 18, 1983.

AGANA RIVER, GUAM

The project for flood control, Agana River, Guam: Report of the Chief of Engineers, dated March 14, 1977, House Document Numbered 96-16, at an estimated cost of $6,670,000.

LITTLE WOOD RIVER, IDAHO

The project for flood control, Little Wood River, vicinity of Gooding and Shoshone, Idaho: Report of the Chief of Engineers, dated November 2, 1977, Senate Document Numbered 96-9, at an estimated cost of $3,800,000. After completion of the project, the Secretary shall evaluate and monitor the extent of any fish losses that are attributable to the project and undertake such additional mitigation measures as he determines appropriate.

YAKIMA-UNION GAP, WASHINGTON

The project for flood control, Yakima-Union Gap, Washington: Report of the Chief of Engineers, dated May 7, 1980, at an estimated cost of $8,160,000, including such additional measures as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall review the probable effects of the project on fish and wildlife resources and the feasibility of including recreation as a project purpose. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such review, along with recommendations for additional measures which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of the project on fish and wildlife habitat.

CHEHALIS RIVER, WASHINGTON

The project for flood control, Chehalis River at South Aberdeen and Cosmopolis, Washington: Report of the Chief of Engineers, dated February 8, 1977, House Document Numbered 96-27, at an estimated cost of $19,700,000. Before beginning the actual construction of the project, the Secretary shall perform additional studies relating to foundation materials in the project area and with regard to dredged spoil disposal sites and make such modifications as he determines appropriate.

CENTRALIA, WASHINGTON

The project for flood control, Centralia-Chehalis Flood Damage Reduction Study, Chehalis River and Tributaries, Washington: Report of the Chief of Engineers, dated June 20, 1984, at an estimated cost of $18,500,000.

(b) The Secretary is authorized and directed to design and construct, at full Federal expense, such flood control measures at or in the vicinity of Salyersville, Kentucky, on Licking River as the Secretary determines necessary and appropriate to afford the city of Salyersville, Kentucky, and its immediate environs a level of protection against flooding at least sufficient to prevent any future losses to such city from the likelihood of flooding such as occurred in December 1978, at an estimated cost of $7,000,000. With respect to such project, Congress finds that the benefits determined in accordance with section 209 of the Flood Control Act of 1970 and attributable to the flood measures authorized for such project exceed the cost of such measures.

(c) The Secretary is authorized to construct a project for flood damage prevention in the community of Gold Gulch, near Felton, Santa Cruz County, California, at an estimated cost of $6,000,000. The provisions of section 302 of this title shall apply to such project.

(d)(1)(A) The Secretary is authorized and directed to undertake such structural and nonstructural measures as he deems feasible to prevent flood damage to communities in the Pearl River Basin, St. Tammany Parish, Louisiana, at an estimated cost of $25,000,000.

(B) For purposes of analyzing the costs and benefits of any project recommended by the Secretary as a result of the study entitled Pearl River Basin, Mississippi and Louisiana, the Secretary shall take into account the costs and benefits of measures undertaken pursuant to this paragraph.

(2) The Secretary is authorized and directed to design, construct, and undertake such measures as the Secretary determines are necessary to provide a level of protection sufficient to prevent recurring flood damages along the following rivers:

(A) Amite River, Louisiana;

(B) Comite River, Louisiana;

(C) Tangipahoa River, Louisiana;

(D) Tchefuncte River, Louisiana;

(E) Tickfaw River, Louisiana;

(F) Bogue Chitto River, Louisiana; and

(G) Natalbany River, Louisiana;

at an estimated cost of $25,000,000.

(e) The Secretary is authorized and directed to purchase such land along Highway 75 in Minnesota as may be required for the construction of the International Levee segment of the Emerson, Manitoba, flood control project and to upgrade existing flood control levees in the vicinity of Noyes, Minnesota, at an estimated cost of $200,000.

(f) In the case of any project authorized by subsection (a) of this section for which a final report of the Chief of Engineers has not been completed before the date of enactment of this Act, the Secretary shall, as soon as possible after the date of enactment of this Act, transmit a copy of any final environmental impact statement required by section 102(2)(C) of the National Environmental Policy Act of 1969, and any recommendations of the Secretary, with respect to such project to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such Committee.

(g) The Secretary is authorized to undertake flood control works along the lower portion of Calleguas Creek, Conejo Creek to the Pacific Ocean, California, at an estimated cost of $40,000,000. The provisions of section 302 of this title shall apply to such project.

(h) The Secretary is authorized to undertake appropriate local flood control protection measures along the lower portions of Coyote Creek adjacent to and in the vicinity of Alviso, California, and along the Guadalupe River in the vicinity of San Jose, California. The Secretary shall include as part of the non-Federal contribution of the project any local flood protection work carried out by non-Federal interests after January 1, 1983, and before the date of enactment of this Act which work the Secretary determines is reasonably compatible with such measures. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of such measures. The provisions of section 302 of this title shall apply to such project.

(i)(1) The Secretary is authorized and directed to undertake such structural and nonstructural measures as he deems feasible to prevent flood damage to the cities of Monroe and West Monroe, Louisiana, and Ouachita Parish, Louisiana, at an estimated cost of $40,000,000.

(2) For purposes of analyzing the costs and benefits of any project recommended by the Secretary as a result of the study entitled Monroe-West Monroe Interim Study of the Ouachita Basin Study, Ouachita River Basin, Arkansas and Louisiana, the Secretary shall take into account the costs and

benefits of measures undertaken pursuant to this subsection.

(j) The Secretary is authorized to undertake the following elements of the overall project for flood damage protection and allied purposes in the Passaic River Basin, New Jersey and New York, as described in the report of the Chief of Engineers, dated February 18, 1976, and in accordance with the reports hereinafter designated or, in any case in which a report is not designated, with such modifications as the Chief of Engineers deems advisable, which modifications shall include, but are not limited to, plans being developed by the District Engineer:

(1) Molly Ann's Brook Subbasin, New Jersey: Report of the Board of Engineers for Rivers and Harbors, dated April 16, 1985, at an estimated cost of $7,470,000;

(2) Lower Saddle River Basin, New Jersey: Report of the Board of Engineers for Rivers and Harbors, dated April 16, 1985, at an estimated cost of $25,200,000;

(3) Ramapo River at Oakland, Pompton Lakes and Wayne, New Jersey: Report of the Board of Engineers for Rivers and Harbors, dated April 16, 1985, at a cost of $4,520,000;

(4) Upper Rockaway River Basin, New Jersey, at an estimated cost of $25,000,000;

(5) Nakoma Brook Sloatsburg, New York, at an estimated cost of $4,500,000;

(6) Ramapo and Mahwah Rivers at Mahwah, New Jersey: Report of the Chief of Engineers, dated November 27, 1984, at an estimated cost of $4,340,000; and

(7) the project for flood protection in the Third River, Passaic Basin, New Jersey, at an estimated cost of $12,000,000.

Such modifications shall also include, with respect to the project for the Lower Saddle River Basin, New Jersey, measures to improve aquatic habitat, consisting of the following instream habitat structures (among others): pool-riffle areas, submerged scour holes, wing dam deflectors, and low-flow pilot channels. The instream habitat structures shall be carried out on the Saddle River beginning at Grove Street in Ridgewood, New Jersey, and continuing downstream to the Passaic River, on Sprout Brook from the Garden State Parkway to the Saddle River, and on Hohokus Brook from Grove Street downstream to the Saddle River. The provisions of section 302 of this title shall apply to such projects.

(k)(1) The Secretary is authorized to design and construct flood control works for the protection of Meredosia, Illinois, at an estimated cost of $80,000. Such project shall include, but not be limited to, a levee which is approximately one-fifth of a mile long. The provisions of section 302 of this title shall apply to such project.

(2) For purposes of analyzing the costs and benefits of any project recommended by the Secretary as a result of any study on the Illinois River, authorized by resolution of the Committee on Environment and Public Works of the Senate or the Committee on Public Works and Transportation of the House of Representatives, the Secretary shall take into account the costs and benefits of any measures undertaken by the Secretary pursuant to paragraph (1) in the interest of preventing flood damages along the Illinois River in the vicinity of Meredosia, Illinois.

(l) The Secretary is authorized to undertake a project for flood control works along Mission Zanja Creek within the city of Redlands, California, in accordance with the plan developed by the District Engineer based on studies pursuant to section 205 of the Flood Control Act of 1948, at an estimated cost of $13,209,000. The provisions of section 302 of this title shall apply to such project.

(m)(1) The Secretary is authorized and directed to study the nature and scope of flood problems resulting from Rio Puerto Nuevo, Puerto Rico. Such study shall take into account the objectives described in section 1101 of this Act and the benefits and costs attributable to any project considered to minimize such flood problems. Not later than 18 months after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the results of such study including recommendations on measures necessary to minimize such flood problems.

(2) The Secretary is authorized and directed to undertake, on an emergency basis, such structural and nonstructural measures as the Secretary deems necessary to prevent flood damage in the city of San Juan, Puerto Rico, from Rio Puerto Nuevo, Puerto Rico, at an estimated cost of $25,000,000.

(n) The Secretary is authorized to undertake such measures, including silt removal and channel modification, in the vicinity of the confluence of the Salt and Eel Rivers, California, as the Secretary determines necessary to prevent recurring floods along the Eel River and its tributaries, at an estimated cost of $800,000. The provisions of section 302 of this title shall apply to such project.

(o) The Secretary is authorized and directed to undertake such structural and nonstructural measures as the Secretary determines necessary to prevent flood damage resulting from rising lake levels at Malhauer and Harney Lakes, Oregon, at an estimated cost of $15,000,000. The provisions of section 302 of this title shall apply to such project.

(p) The Secretary is authorized to construct the project for flood control, O'Hare System of the Chicagoland Underflow Plan, Illinois, substantially in accordance with the Report of the Chief of Engineers, dated June 3, 1985, at an estimated cost of $18,100,000, except that the capacity of the flood control reservoir shall be at least 1,050 acre-feet in order to provide optimum storage capacity for flood control purposes. The provisions of section 302 of this title shall apply to such project.

(q)(1) The Secretary shall undertake such measures as he deems necessary to correct flooding problems in the south end of Louisville, Kentucky, within an area bounded by New Cut Road west to the city limits and Palatka Road south to the city limits at an estimated cost of $1,200,000. The provisions of section 302 of this title shall apply to such project.

(2) The Secretary is authorized to provide technical assistance to the city of Louisville, Kentucky, to assist such city in the correction of flooding caused by drainage problems in such city.

(r) The Secretary is authorized to construct a project for flood control for Poplar Brook, New Jersey, including reconstruction of the brook through the Borough of Deal, New Jersey, to accommodate the runoff from a storm having an average frequency of occurrence of once every 15 years, replacement of the culvert through the Conrail railroad embankment with a new culvert designed to pass a maximum flow equivalent to the peak flow from a storm having an average frequency of occurrence of once every 15 years, use of the area upstream of the embankment as an on-stream detention basin, and gabion or other lining as determined appropriate by the Secretary, at an estimated cost of $2,300,000. The provisions of section 302 of this title shall apply to such project.

(s)(1) The Secretary is authorized and directed, at an estimated cost of $81,225,000, to design and construct for the purpose of providing flood control for the Pearl River Basin in Mississippi, including, but not limited to, Carthage, Jackson, Monticello, and Columbia, Mississippi—

(A) a flood retarding dam on the Pearl River, upstream of the Ross Barnett Dam, in the vicinity of Shoccoe, Mississippi;

(B) a combination roadway crossing of the Pearl River and floodwater detention and storage facility in east central Leake County, Mississippi;

(C) a levee system in the south part of Carthage, Mississippi, which will upgrade, extend, and improve the protective levee system on the south side of Highway 16 in Leake County and the city of Carthage;

(D) appropriate drainage structure and bridge modifications to expand and improve the stormwater conduits under Mississippi Highway 35, south of Carthage, Mississippi, for the purposes of reducing backwater influence for areas upstream of such highway;

(E) upstream reservoirs on the Pearl River;

(F) such other structures as may be necessary to alleviate unforeseen flooding in the Leake County area as a result of the construction of the Shoccoe Dry Dam; and

(G) channel improvements on the upstream Pearl River.

(2) Prior to initiation of construction of the projects authorized by paragraph (1), non-Federal interests shall agree (A) to hold and save the United States free from damages due to the construction and operation of such projects, and (B) to operate and maintain such projects in accordance with regulations prescribed by the Secretary. The provisions of section 302 of this title shall apply to such projects.

(t) If any provision in any report designated by subsection (a) of this section recommends that a State contribute in cash 5 percent of the construction costs allocated to nonvendible project purposes and 10 percent of the construction costs allocated to vendible project purposes, such provision shall not apply to the project recommended in such report.

SEC. 302. (a)(1) Except as provided in paragraph (2) of this subsection, the non-Federal share of the cost of any project for flood control (A) which is authorized by section 301(a) of this title, or (B) which is authorized by any other law enacted before the date of enactment of this Act and for which a contract for construction has not been entered into before such date of enactment, shall be 25 percent.

(2) If, for a project for flood control to which paragraph (1) applies (other than a nonstructural project), the sum (as determined by the Secretary upon completion of the project) of—

(A) the cash required to be paid under subsection (b)(1) for such project, plus

(B) the value of all lands, easements, and rights-of-way required for such project, plus

(C) the cost of all necessary relocations of utilities, structures, and other improvements for such project,

is a percentage of the cost of such project which is greater than 25 percent, the non-Federal share of the cost of such project shall be such percentage, except that in no event shall the non-Federal share deter-

mined under this paragraph exceed 30 percent of the cost of the project.

(b)(1) The non-Federal interests shall pay, during the period of construction of any project for flood control to which subsection (a) applies, 5 percent of the cost of such project. An amount equal to amounts paid with respect to a project under this paragraph is authorized to be appropriated to the Secretary to carry out such project. Amounts appropriated pursuant to the preceding sentence are in addition to, and not in lieu of, amounts authorized by any other provision of this Act for construction of a project to which this section applies.

(2) If the Secretary estimates before the beginning of construction of any project for flood control to which subsection (a) applies that the sum of (A) the value of all lands, easements, and rights-of-way required for such project, plus (B) the cost of all necessary relocations of utilities, structures, and other improvements for such project will be a percentage of the cost of such project which is greater than 25 percent (or which is greater than 20 percent in the case of a nonstructural project), the Secretary shall, upon request by the non-Federal interests, acquire such lands, easements, and rights-of-way and make such relocations, except that the aggregate amount of the value of lands, easements, and rights-of-way acquired by the Secretary and the cost of necessary relocations made by the Secretary shall be limited to the amount by which such estimated sum exceeds an amount equal to 25 percent of the estimated cost of the project (or an amount equal to 20 percent of the estimated cost of a nonstructural project).

(c) If the Secretary determines after completion of a project for flood control to which subsection (a) applies that the sum of—

(1) the cash paid under subsection (b)(1), plus

(2) the value of lands, easements, and rights-of-way provided by the non-Federal interests, plus

(3) the cost of relocations of utilities, structures, and other improvements made by non-Federal interests,

is less than the non-Federal share of the cost of the project, the non-Federal interests shall pay to the Secretary the amount necessary to meet the non-Federal share, plus interest from the date of such determination (as computed under subsection (e)), over a period of fifteen years from the date of such determination or such shorter period as the non-Federal interests may request. If such sum exceeds the non-Federal share of the cost of the project (as so determined), the Secretary shall pay to the non-Federal interests an amount equal to such excess, plus interest from the date of such determination, subject to the general availability of appropriations for that purpose. Payments under the preceding sentence shall not be subject to the limitation contained in the last sentence of section 215(a) of the Flood Control Act of 1968.

(d) After completion of any project to which subsection (a) applies, the Secretary shall transfer, without consideration, to the non-Federal interests any lands, easements, and rights-of-way acquired by the Secretary under subsection (b).

(e) The interest rate used for purposes of computing interest under subsection (c) shall be determined by the Secretary of the Treasury as of the date on which the project is substantially completed and provides the flood protection benefits for which such project is designed, as determined by the Secretary. Such interest rate shall be determined on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations, which are neither due nor callable for redemption for fifteen years from the date of issue.

(f)(1) For purposes of this section, the cost of a project includes, but is not limited to, the value of lands, easements, and rights-of-way, and the cost of relocations of utilities, structures, and other improvements, necessary to carry out the project.

(2) For purposes of this section, the value of lands, easements, and rights-of-way (other than lands, easements, and rights-of-way acquired by purchase for the project by the Secretary for any non-Federal interest) shall be determined by the Secretary as of the date on which actual construction of such project is begun.

(g)(1) For purposes of analyzing the costs and benefits of a proposed project for flood control in any study of such project, the Secretary shall take into account the costs incurred in and the benefits produced by any local flood protection work carried out by non-Federal interests after the later of (A) the first day of the five-year period ending on the date of enactment of this Act, or (B) the first day of the five-year period ending on the date on which funds are first obligated for such study, if the Secretary determines that such work can reasonably be expected to be compatible with the project being considered by the Secretary. This paragraph shall not apply to any study for a project which project is authorized by this Act or any Act enacted before the date of enactment of this Act.

(2) The Secretary shall include as part of the non-Federal contribution of any authorized project for flood control the cost of any local flood protection work which is part of such project and which is carried out by the non-Federal interests after the date of such authorization or after the date of enactment of this Act, whichever is later. With respect to any local flood protection work carried out by non-Federal interests after the first obligation of funds for a study of a project for flood control (but not before the first day of the five-year period ending on the date of enactment of this Act), the Secretary shall recommend in any report submitted to Congress relating to such project that the cost of such work be included as part of the non-Federal contribution of such project if the Secretary determines that such work is reasonably compatible with the proposed project. Any local flood protection work included as part of the non-Federal contribution of a project for flood control under this paragraph shall not be subject to the limitation contained in the last sentence of section 215(a) of the Flood Control Act of 1968.

SEC. 303. Before construction of any project for local flood protection, the non-Federal interests shall agree to participate in and comply with applicable Federal flood plain management and flood insurance programs.

SEC. 304. Section 2 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved December 22, 1944 (58 Stat. 889; 33 U.S.C. 701a-1), is amended by inserting after "drainage improvements" the following: "and flood prevention improvements for protection from groundwater-induced damages".

SEC. 305. The Secretary is authorized and directed to undertake local flood protection measures, including such channel widening and deepening and environmental measures as the Secretary and the Governor of the State of New Jersey may agree, to prevent flood damage to the residents of the Pine Brook section of Manalapan Township, New Jersey, substantially in accordance with the report of the Division Engineer, North Atlantic Division, entitled "Expanded Reconnaissance Report for Flood Control on Pine Brook, New Jersey, Manalapan, New Jersey", dated September 8, 1977, at an estimated cost of $1,400,000.

SEC. 306. The Secretary is hereby authorized to construct a comprehensive project for flood control in the Las Vegas Valley and tributaries area, Nevada, at an estimated cost of $80,000,000.

SEC. 307. The Secretary is authorized to design and construct flood control works for the protection of Brockton, Massachusetts, at an estimated cost of $12,500,000. Such project shall include, but not be limited to, improvements to ponds in the D. W. Field Park area and the existing Brockton-Avon Reservoir to provide additional storage, improvements to the drainage system under E. B. Keith Field, new culverts, improvements to miscellaneous bridges and utilities, and such other downstream improvements as the Secretary deems necessary. The provision of section 302 of this title shall apply to such project.

AMENDMENT OFFERED BY MR. EDGAR

Mr. EDGAR. Mr. Chairman, I offer an amendment to title III.

The Clerk read as follows:

Amendment offered by Mr. EDGAR: Page 108, line 13, after the period add the following sentence:

For purposes of this section each element of the project for flood control Mississippi River and tributaries, shall be considered as a separate project, except those elements which consist of channel and levee construction work and acquisition of related lands, easements and rights of way on the main stem of the Mississippi and Atchafalaya Rivers.

The CHAIRMAN. The gentleman from Pennsylvania [Mr. EDGAR] is recognized for 5 minutes in support of his amendment.

(By unanimous consent, Mr. EDGAR was allowed to proceed for an additional 10 minutes.)

The CHAIRMAN. The gentleman from Pennsylvania [Mr. EDGAR] is recognized for 15 minutes.

Mr. EDGAR. Mr. Chairman, before I begin the explanation of my single amendment to this landmark omnibus water resources bill, I would like to spend just a couple of minutes talking about its merits and then clarify why I stand in the well in strong support of the bill but also in strong support of an amendment which would help to provide some more equity within this legislation.

As my colleagues know, over the last 11 years I have been one of the leading opponents of passing an inequitable omnibus water bill that was based on simply devising a shopping list of projects and bringing those to the House floor for agreement. What I

have tried to do over the last 11 years is to develop a merit selection process so that with our limited Federal dollars—and as many Members know from the budget debates and the reconciliation debates, we have far less dollars to spend—with those limited dollars we may target them to the most needy of the flood control projects, the dam projects, the river projects, and the deepwater and shallow ports projects, and that we spend those dollars targeted on the most meritorious projects whether they are in Mississippi, or Alabama, or whether they are in Pennsylvania, or New York.

As we studied over many years the expenditure of dollars, we discovered some interesting things; 82 cents out of every dollar we spent was spent in the South and West building new projects, many of them very necessary projects, but less than 18 cents out of every dollar expended from 1955 to 1980 was spent on the older industrial areas of the Northeast and Midwest region rehabilitating and reconstructing the existing dams and water supply projects in those areas. We discovered that often the cost-benefit ratios were not sufficient to justify the new construction projects, and we found in some instances that we were building holding ponds for catfish farmers and marinas that were in fact not in the best interest of the Nation.

Over the course of the last 11 years we worked hard with the Appropriations Committee and with the authorization committee on a bill that includes many policy initiatives that we believe are part of the reform of the whole water process. I, as one Member of Congress, have been talking throughout the Nation about the fact that if energy was our problem of the seventies, water, its quality, and its quantity is really the problem of the late 1980's and 1990's, and it is appropriate for us in the Clean Water Act, the omnibus water bill, the Superfund legislation, and the Safe Drinking Water Act, to bring Federal policy into compliance with the concerns of quality and quantity.

□ 1200

Now this bill that is before us, H.R. 6, has many worthy provisions. Let me just take a moment to talk about four of those provisions which I think my colleagues ought to focus in on.

The first and most important is that this bill for the first time has a consistent statement of cost sharing.

Why is that important? It is difficult with the national geography to develop a merit selection process that is fair and equitable across the country. The needs of California, and Texas, and Mississippi are different than the needs of Illinois, and Indiana, and Pennsylvania.

Therefore, we devised a system where if the local communities and the State government would share in a small percentage of cost, they would begin to make some choices as to what in fact is of value and a merit to the project.

So, in fact, in the case of this bill, we have a minimum cost-sharing requirement on all new projects, whether they are dams, whether they are flood control, and it brings within this legislation for the first time a merit-selection system based on the ability of communities and States to come up with some local investment tied with their ability to provide local easements and rights-of-way.

So the first major reform of this bill is the issue of cost sharing.

Second, this bill shifts significantly the dollars expended on new starts and rehabilitation. In the past we spent very little rehabilitating locks and dams, rehabilitating existing water systems, choosing, instead, to build new projects while the old, existing projects decay. But in this bill we take care of lock and dam 7 and 8 on the Monongahela and Allegheny River system. We begin to address the modernization needs of the Ohio River lock at Gallipolis. By spending more on rehabilitation and reconstruction and less on new construction, we also improve the share of the Federal water dollar received by the Northeast and Midwest from about 18 cents on every dollar to 38 cents on every dollar.

We as politicians often do not like to invest the time or the money on cutting ribbons on old projects; we like new projects. This bill includes a major reemphasis or retargeting of the dollars to restoring existing projects.

At the same time it includes sufficient funds for new projects for new development. The older areas of the country, the areas that put their water systems in place over the last 75 years are aided significantly by this bill.

So in the area of cost sharing and in the area of rehabilitation, this bill makes a major step forward in water policy.

The third thing that this bill does, this bill provides for investments in environmental mitigation up front. No longer will we simply come in and do a project and worry about the environmental damage later. We will now come in and make sure that the environment is cared for in the total cost of that project. That is a significant contribution.

Finally, the bill provides a major new section to help replace aging water supply systems. If we look at the quality of our water in our older cities and communities over the last 10 years, it is decreasing, not increasing in quality. Our main water supply tunnels are leaking tremendous amounts.

This bill provides for a reasonable revolving loan fund to replace aging water supply systems and provides for a new mechanism where in fact those dollars are repaid to the Federal Government. Specifically, title VIII of H.R. 6 includes a provision I authored to provide $800 million for water supply rehabilitation loans.

So we have cost sharing, we have a focus on rehabilitation; we have a commitment to environmental mitigation; we deauthorize some projects that are not going to be built.

Finally, we have provided a very necessary ingredient, that of water supply.

I am also pleased that the bill includes a number of meritorious projects which are desperately needed in my home State of Pennsylvania. In particular, I note that the bill funds the replacement of the aging lock and dam 7 and 8 on the Monongahela River. Flood control projects for Harrisburg, Lock Haven, Pottstown, the Wyoming Valley, and Saw Mill Run in Pittsburgh are also authorized. Section 1120 allows the continued functioning of the navigation channel in the Delaware River up to Philadelphia, and section 401 funds the breakwaters we need at Presque Isle near Erie. These projects are vital to the economic health of the Commonwealth of Pennsylvania.

This bill with its policy changes has drawn the attention of the environmental community and of the communities across the Nation that have opposed water policy over many years. As one of the leaders in trying to cut the past practices of water policy, I can stand in the well as an enthusiastic supporter of this bill and I hope my colleagues, Democrats and Republicans, Conservatives and Liberals, will support this legislation.

Now, my amendment which I am offering at this time provides another sense of fairness. What my amendment does is simply bring a whole network of waterways and tributaries that are exempted from the cost-sharing provisions of this bill and requires cost sharing. These are the Mississippi River tributaries that have been excluded from any cost-sharing provisions in H.R. 6.

Now, why is that important? It is important because if a flood occurs in your district and you want Federal aid for floodwalls or levees that will alleviate that flood damage in your district, under the reasonable, simple, and minor cost-sharing provisions of this bill, you have to provide between 25 and 30 percent local or State investment; but if you happen to represent a district that is in the seven States in the Mississippi River and tributaries program, you are exempted and 100 percent of the dollars cost of the project will be borne by the Federal

Government and the Federal taxpayer.

My amendment would simply mean that all the projects on those tributaries that are new projects would have to comply with the same cost sharing that is in our bill that every other project in the bill must meet.

My amendment does exempt—and I think this has to be underscored—we exempt the main stem of the Mississippi. We exempt the Atchafalaya River, but we do not exempt the tributaries that flow into the Mississippi or into the Atchafalaya River system.

Now, all old projects, and this Mississippi project has been with us since the late twenties, all of the projects that presently are under construction still will get 100-percent Federal funding. All this does is focus in on the new projects that have not moved to construction at this point in time.

I would urge my colleagues to look carefully at this legislation. We are going to hear in a few minutes from people who support the exemption, saying that all of the waters from Pennsylvania and other States flow down the Mississippi River and that causes all the floods in the lower tributaries and therefore it should be a national priority to spend 100 percent of our dollars cleaning up that problem. That is only partially true. That is the reason my amendment exempts the main stem of these river systems from compliance to the cost sharing.

The only thing that we include are the tributaries. It cannot be said that all the water from Pennsylvania is filling the tributaries to the Mississippi River.

I would urge my colleagues to look carefully at this amendment. This massive MR&T undertaking was originally authorized in 1928 and has been repeatedly enlarged over the years with the addition of scores of major and minor projects. Many of these remain to be built and are quite separable from the essential flood control levees and navigation improvements on the main stem of the lower Mississippi River. The remaining cost to complete the MR&T project, as outlined in the fiscal year 1984 budget appendix, is $5.8 billion. This year the Army Corps of Engineers expenditures on the MR&T project will be about $269 million, about one-quarter of the entire Army Corps of Engineers budget is expended on this project.

Because this large agglomeration of MR&T work has technically been authorized as one big project, no cost sharing would be required under the current language of section 302(a)(1) of this bill, which applies only to projects which are not yet under construction. If considered as one large project, MR&T has been under construction for over 50 years.

My amendment would simply state that for purposes of the flood control cost-sharing requirements in section 302, each separable element of the MR&T project will be considered as a separate project. Thus, cost sharing would be required for those unbuilt components authorized as part of MR&T, just as they would for flood control projects everywhere else in the Nation.

Most of these separable elements are drainage projects, including extensive stream channelization, on tributaries to the Mississippi River in the lower Mississippi River Valley States of Arkansas, Kentucky, Louisiana, Tennessee, Mississippi, and Missouri. They are not part of the main stem work in the Mississippi River itself, which has been largely completed.

In fact, my amendment would not—and I repeat, my amendment would not—be applied to the main stem work on the Mississippi or the Atchafalaya Rivers. I agree with Chairman ROE, Chairman HOWARD, and the distinguished gentleman from Mississippi [Mr. WHITTEN], who have pointed out many times that these "main stem" parts of the MR&T work are truly a national responsibility on a national river system.

However, it would be unfair to allow the rest of the $5 billion MR&T project to be excluded from the cost sharing that will be applied to every other flood control project in every other Member's district in the Nation. We should not take the unfair and inequitable step of excluding billions of dollars in flood control projects from the scope of the bill's cost-sharing reform merely because we want to have it as one technical large project.

I urge you to join me in making new MR&T flood control work subject to the cost-sharing provisions of H.R. 6.

Mr. WHITTEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, first, I wish to congratulate the chairman of the full committee, Mr. HOWARD, and the chairman of the subcommittee Mr. ROE, as well as the ranking Republican, Mr. SNYDER, and other members of the committee.

I have pointed out for some years, I believe it was first during the term of President Johnson, that hopefully when we slow down the growth of military expenditures, we can divert our energy, and attention to worth while, valuable, and essential public works. We must keep the wheels turning for you cannot pay a cheap dollar borrowed with a hard-to-get dollar thus we must have a vital economy.

We have tried through the years to get an authorization for the backlog of worthwhile projects, so we could begin to spend money wisely and now the time has come so that we can do it. I think our committee, and all our colleagues, have done a great job in providing these authorization so that we will have some place to focus our resources when the time comes.

In the years that I have been here I have presided over the Subcommittee on Public Works of Appropriations, and I am a member of the subcommittee now. Our subcommittee has held hearings in the State of Pennsylvania to deal with floods in that area and other affected areas because their water flows down the Mississippi to New Orleans.

I remember when the Mount St. Helens volcano eruption occurred, we brought out a supplemental bill and called the committee back together so our House colleagues could get on with the task of taking care of that area which suffered from the volcano, Mount St. Helens.

Whether it is in California, Maine, New York, or wherever it may be, this committee has looked without partisanship to taking care of flood control in all our country.

Now, it is hard for me to understand my friend, the gentleman from Pennsylvania. I do not know what the gentleman is opposed to through the years, but it is just unreasonable to say that any section of the country can handle water from 41 percent of the United States by itself. From some parts of Canada and New York State, the water goes down the Mississippi to New Orleans.

Let me tell you that in 1928 in the lower Mississippi we had one of the most disastrous floods in the history of the United States. Following that, the Congress had the Corps of Engineers draw up a plan to try to handle the flooding along the Mississippi River because at that time and since you could not control the volume of water draining 41 percent of the country. You have to work with it.

I want you to know that from 1928 until now we have completed 86.6 percent of the overall projects, and all we do here is let the corps finish that huge project without putting it under a new requirement which would require years to accomplish.

What is involved here is the completion of a plan to handle the next flood.

We have already invested $3.7 billion and the overall project is 86.6 percent complete.

Now we have gotten control of the main stem to a great degree, but when the main stem drains all the water from 41 percent of this country into our area, then the tributaries have to go into a flooded river which means widespread flooding over several States.

Should you on the remaining part of the 1928 plan, 13.4 percent, you would put a stop to further efforts to control the Mississippi River, which drains 41 percent your country.

Do you realize that to bring the remaining work under your provision, you would have to get the State legislatures to act, you would have to see whether the bonded indebtedness necessary would hit the ceiling. You would have to slow down and let various land areas form a taxing unit to issue bonds.

I say to you, when we are here today trying to do these great things for the future of this country, let us not go backwards and stop that which we are already doing and which nears completion.

I want to tell you, the damages we have in my area which is in the tributary area, we had three 100-year floods in 10 years. Millions of acres were flooded. We must complete the 1928 plan one way or the other.

□ 1215

So I say while we are starting out on new things, do not stop that which is 86⁹⁄₁₀ percent completed, and where we, through geography and through such as this bill, have to live with all the water from 41 percent of the country, for it goes down into this funnel that hits New Orleans. I do not believe you would do that.

Let me digress a little bit here, and I think it is worthwhile to say it. Some years ago I was walking over from the other body where we had been in a conference, and the late Secretary of the Treasury, Joe Fowler, who was Chairman of the Commission which was to buildup a sufficient productive capacity for us to compete with Russia, said, "Jamie, you know, if I was in charge of Russia, I would declare 5 years of peace."

Just think, he said "It would bring disaster to our economy." Just think if all the boys were to come home from the service, if all the contracts with the Federal Government for military equipment were cancelled, what would happen here. Our economy would break down. At that time we had more cars than we could park, more clothes than we could wear, and the finest time in the history of this country. But I decided that it simply should not take a war or preparation for war in order to have prosperity. We could have prosperity if we would use the same energy in protecting and developing our country, and would end up with a richer country.

I want to congratulate my colleagues in charge of this bill. They have provided something for us to turn to so we may improve our country, and if we will just do that we can do wonders. Once again, let us not try to stop that which is nearly complete in the interest of trying to improve the country, as this bill otherwise would do.

Mr. BEDELL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I think the House needs to know what it is voting for, and certainly I am interested in knowing what I am voting for. I would feel it proper to ask some questions.

I would ask the gentleman from Pennsylvania: Does the gentleman's amendment in any way decrease the efforts to control the flooding on the main stem of the Mississippi itself, or the work that needs to be done in that regard?

Mr. EDGAR. If the gentleman will yield, the answer is, my amendment does not touch the main stem of the Mississippi River or the Atchafalaya River. That's where upstream water from our States goes. Our States are not flooding your tributaries, and that's where we want you to have to pay the same cost sharing we have to pay.

Mr. BEDELL. So that if the gentleman's amendment is adopted, it would mean that my people, who have flood control projects on rivers that eventually flow into the Mississippi, would be treated the same as people in the States we have mentioned who have flood control projects that flow into the Mississippi. Is that correct?

Mr. EDGAR. That is correct. In fact, at the table there is a map that I am sure some of the opponents of the amendment are going to offer which shows the large basin that drains down into the Mississippi. It is only those projects in the narrow tributaries at the southern end of that which get 100 percent funding under the bill. Under my amendment, they would be brought into equity with projects in the gentleman's State which have to come up with 25 or 30 percent cost sharing and are part of that same system.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. BEDELL. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Chairman, I do not think this statement is entirely correct because if this amendment were passed, we are going to require local governments, levee boards, county governments, to come up with funds for their cost-share of desperately needed new authorized projects; whereas, many of these today do not even have the funds that they need that they have to come up with to acquire rights-of-way on the main stem of the Mississippi River.

The main-stem levees are under grade today in several States of this Nation because of the fact that the local government bodies do not have the money today to acquire the rights-of-way, which they must do, and then the Federal Government funds the entire project. It is going to compound the problem.

Mr. BEDELL. Of course, any water we pour into the Mississippi compounds the problem. I think there is no argument about that. But the fact is that I have water that flows into the Mississippi as well, and I guess the question I do not understand is why we should treat somebody from Illinois or Ohio or Iowa or some other place differently from the way we would treat those communities that are in the States that have been mentioned. If I understand the amendment correctly, it would say that if you happen to live in Louisiana then you do not have to come up with any cost sharing, but if you happen to live in Illinois or Ohio or Iowa or any of those States, then you do have to come up with cost sharing.

We do not have a heck of a lot of extra money. I hope everybody understands that. If we pass Gramm-Rudman, that is certainly going to be the case. If it makes sense, which I think it does, to say that people have to come up with part of the cost, then I do not understand what the argument can possibly be that would say if you happen to live in some States it does not apply, but if you live in other States it does apply, as long as we are providing the funds to take care of the main stem of the river.

Is there something the gentleman does not understand?

Mr. EDGAR. If the gentleman will yield, in further explanation of the gentleman's question, the gentleman from Iowa is precisely right. We have farmers who are going under, we have poor communities, we have banks and savings and loans that barely can make it, and we have a high level of stress in many of those communities.

If we have an area of flood control as a new project in this bill, your communities, as poor as they are, have to come up with 25 to 30 percent cost-sharing. That is a fact of life under the legislation that is before us, and it is something that has to be addressed by local and State governments. It is the same as in your communities. When your people are inundated with floods in those tributaries, they have to come up with a project, but under the provisions of this bill, your poor people are exempt from any cost sharing and Mr. BEDELL's poor people are not.

All we are suggesting is that the main stem of the Mississippi is national property and we are not including that. The main stem of the Atchafalaya River system is not included. The only thing that is included is those projects which feed into the Mississippi that are called tributaries, and they are no different than the tributaries in Mr. BEDELL's district or in my district or in someone else's district that flow into that large water system.

Mr. HUCKABY. If the gentleman will yield further, would the gentleman not agree that the farther downstream one goes, the greater the volume and the quantity of water as such, especially at flood time, compounds the magnitude of the problem?

The CHAIRMAN. The time of the gentleman from Iowa [Mr. BEDELL] has expired.

(By unanimous consent, Mr. BEDELL was allowed to proceed for 3 additional minutes.)

Mr. HUCKABY. Mr. Chairman, will the gentleman yield further?

Mr. BEDELL. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

For instance, Mr. Chairman, I have one project in this bill. This is my ninth year in Congress, and in 3 of the 9 years they have had 100-year floods in this agricultural district, as such. Certainly these people have all the problems that the rest of agriculture does, but in addition to that, in the other tributaries there is water coming from Arkansas, probably from Iowa, water coming from Pennsylvania, et cetera, that compounds this problem because the water cannot get into the Mississippi River when the Mississippi River is high.

Mr. BEDELL. If I might, I do see the problem, and I think it is a problem, but I think we have that same problem all across the country in other areas. It seems to me water is water, whether it comes from Iowa or whether it comes from Louisiana. Water is water, and it causes similar problems.

I guess if it is right for Iowa, it seems to me it should be right for Louisiana as well. I do not see why we should discriminate and say that if you happen to live in some other area than those States, then you have to get 25 percent cost sharing from the local area, but if you live those States you do not have to.

Mr. EDGAR. If the gentleman will yield further, today, right at this moment, lock and dam 7 and 8 on the Monongahela River are under about 8 feet of water. Right there in Pennsylvania today there are families being displaced in southwestern Pennsylvania because of large, enormous floods. Those floodwaters are heading down the main stem of the Mississippi because that is part of the flow of the water.

The point that is being made, to address the flood problems in the southwestern corner of Pennsylvania, those people, devastated, loss of homes, loss of property, loss of agricltural ingredients, are no better off than people in your area in Louisiana. Loss of heavy steel and industry is there, in western Pennsylvania too.

What we are suggesting is that in equity and fairness, not to the extent that the administration wanted—the administration wanted 100 percent cost recovery; we do not think that is equitable—but we do think that it is very difficult to see poor and impoverished communities inundated with floods in one section having to come up with cost sharing, and poor and inundated areas in another section not having to have equal time or equal money.

□ 1225

Mrs. BOGGS. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I think we should get something straight here. This is what we are talking about; the Mississippi River and its tributaries are neither isolated streams nor local waterways. As you have heard from the gentleman from Mississippi, together they comprise a drainage system for the watershed of 41 percent of this country, the third largest watershed in the world.

You have also heard from the gentleman from Mississippi that recognizing the needs of the people to control flooding, yet understanding the inability of localities to fund such a vast national flood control program, Congress authorized the project in 1928. That is the project we are talking about in this bill, Mr. Chairman.

In that act, Congress specifically recognized the gigantic scale of this project involving flood waters of a volume, and flowing from a drainage area largely outside of the States most affected. Therefore, no local contribution was required.

Well, through the years, Mr. Chairman, that has changed. Of course, some $3.7 billion in Federal funds have been spent on the project since 1928, but the State and local governments have expended over $922 million for the costs of lands, easements, rights-of-way and maintenance. Continuously, we have fulfilled our legally established cost-sharing obligations.

In the 1983 and 1984 floods alone, the project prevented an estimated $31 billion in damages, over nine times the U.S. investment in the last 60 years, and over its lifetime, the project is estimated to have prevented some $100 billion in damages.

We sympathize and we empathize with the poor people in Pennsylvania, with the poor people in Virginia, with the poor people in West Virginia who are experiencing terrible floods, and we are happy that they have had them only once or twice in the last 10 years. We have had them continuously in the lower Mississippi Valley over those past 10 years.

The project that was authorized in 1928 is now 76 percent complete. The mainstem levee system is only 71 percent complete to approved grade and section. Much remains to be done in the tributary rivers.

In Louisiana alone, some 500 miles of approximately 800 miles of levees are incomplete. We have built the funnel, Mr. Chairman, but the drain is not complete.

A flood control system is built from the top down, not the bottom up. And while much of the mainstem features are substantially complete in the upper reaches of the project, in Louisiana this system is only 65 percent complete. So it is unfair to require more individual project costs from Louisiana now that the project upstream is effectively able to pass the flood down to us.

We in Louisiana have always paid our fair share, and in practically all, if not all instances, we have paid more than any other State for flood control, navigation and water resources projects. We do not believe it is equitable for the Federal Government to retreat from its commitment of 57 years to the people of the Mississippi Valley. A change in cost-sharing to us would be disastrous.

The localities bordering on the Mississippi River and tributaries are no more beneficiaries of this project than the States to the north, east, and west who have sent the waters which must be controlled. The Mississippi River and tributaries flood control program cannot be dissected and considered as a series of local problems to be addressed by each individual area. It is a single, national program addressing a single, potentially disastrous problem for the benefit of a vast area of the country.

I urge my colleagues to vote no on the Edgar amendment.

Mr. LIVINGSTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Edgar amendment. I think it is absolutely incredible that the gentleman from Pennsylvania would have initially sought to put the burden of all of the costs of maintenance of the Mississippi River on the backs of the States through which it flows. Now he has amended his amendment, but I still think that his suggestion is likewise ridiculous, and I would simply call the attention of the House to this map which sits by my left and point out that what he is talking about is the largest drainage system in the world.

The water which flows through the Mississippi River, particularly through Louisiana, comes from virtually one-half of the rest of the United States. This greater Mississippi River tributary system provides the life stream for America's domestic and foreign commerce. Forty-three percent of all of the grain exported by U.S. farmers is shipped through the lower Mississippi River channel.

The Mississippi and her tributaries provide power through hydroelectric dams. Hundreds of thousands of jobs, and billions of dollars in economic benefits flow to the Nation because of this great old river and her tributaries.

The river provides drinking water for America's thirsty. It provides the core and the balance for America's ecosystems and environment.

But, of course, the gentleman from Pennsylvania would say, well, we appreciate all of the benefits that accrue from the river system; we will enjoy its bounty; but only those States through which it flows should pay the cost for its upkeep.

Mr. Chairman, that is not fair. Fully two-thirds of the United States' water flows through the Mississippi River system and the whole Nation benefits from its smooth and efficient performance. So it is hardly fair to say that just a few States must bear the cost, and cost there is for the maintenance of this system.

If left to its own devices, fully one-third of the Nation would be subject to annual floods as the system overruns its banks. Actually that may be closer to 50 percent. So to control that flow, we need reservoirs on the tributary streams, we need floodways to receive the excess flow. And to protect and continue the river commerce, we need channel improvements like revetments, and dikes, and dredging to increase the channel capacity. We need control structures and cutoffs and pumping plants and floodwalls and floodgates to make the whole system work efficiently.

To maintain the 10,000 miles of natural and manmade waterways with a navigable depth of 6 feet or more, it costs $100 million a year in maintenance costs alone. When you consider the new construction that is needed to constantly improve the system, those costs increase by another $245 million a year.

And even if we approve the planned 1986 improvements, we would still have 400 miles of levies below flood safety standards.

Louisiana alone has 2,200 miles of levies along the Mississippi River. She has another 1,600 miles of levy floodwall in addition to those on the main stem, and of that amount, we have a constant need for improvements and upgrade. Had we not had the current system, millions upon millions of people would have been devastated beyond belief, and beyond the damage that actually did occur in the floods of 1983, 1979, 1975, 1973, and going all the way back to 1929 when the system began.

In 1983 alone, had we not had the Mississippi River and tributary project in place, 6.1 million acres would have been flooded and $17 billion in damages would have been sustained by the American people.

Mr. Chairman, the Edgar amendment presents false economy. This project has paid for itself many times over. America has received well over $100 billion in direct benefits since the project's inception, and it has saved many times that in terms of losses that Americans might have sustained had the system not been adopted.

Let us not turn our backs on a real success story. I would urge my colleagues to defeat the Edgar amendment.

The CHAIRMAN. The time of the gentleman from Louisiana [Mr. LIVINGSTON] has expired.

(On request of Mr. EDGAR and by unanimous consent, Mr. LIVINGSTON was allowed to proceed for 2 additional minutes.)

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. LIVINGSTON. I will be happy to yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I thank the gentleman for yielding.

I would first like to ask the gentleman a question. Was the gentleman suggesting in his comments that somehow in the Edgar amendment that we were changing national policy as it relates to maintenance of flood control projects.

Mr. LIVINGSTON. Well, the gentleman is the author of the amendment, and he certainly knows what in the world this amendment does better than I. I am not going to attempt to explain his amendment for him.

In further answer to the gentleman's point, I would simply say that this map illustrates quite well that millions of gallons and tons of water are flowing through this system which is of great benefit to the Nation at large. There is absolutely no reason to put upon the focal point of that system the burden of maintaining its tributaries and the costs of their upgrading and improvement.

Mr. EDGAR. If the gentleman will yield further, I appreciate the gentleman suggesting that the author of the amendment knows what the amendment does. The amendment does not touch any of the maintenance practices that are presently in place, the maintenance of the flood projects, the levies, they are not affected by the Edgar amendment.

Mr. LIVINGSTON. If I might reclaim my time, he would then put that $250 million worth of much needed new construction on the backs of those States that can least afford them. They are the recipients of all of the water that flows from the north through the southern regions of the United States. The gentleman would impose the costs of such devices as control structures, cutoffs, pumping plants, floodwalls and floodgates on those States, and I think that that is not at all a fair proposition.

Mr. EDGAR. If the gentleman will yield further, the gentleman's numbers should be reduced by two-thirds because the gentleman from Pennsylvania's amendment only provides that 25 percent of that cost not be borne only by the local communities, but by the State and local communities, just as the States and localities that are north of the gentleman's district have to bear 25 to 30 percent of the costs. The majority of project costs—70 to 75 percent—will continue to be paid by the Federal Government. I think that's a fair balance.

The CHAIRMAN. The time of the gentleman from Louisiana [Mr. LIVINGSTON] has again expired.

(On request of Mr. BEDELL and by unanimous consent, Mr. LIVINGSTON was allowed to proceed for 1 additional minute.)

Mr. LIVINGSTON. I will be happy to yield in a minute, but I simply would like to respond to the gentleman that, in fact, what the gentleman is doing with his amendment is overturning a system which has worked successfully to provide power, to provide commerce, to provide benefits of untold millions of dollars to the United States, which system has been in place since 1929, yet which he would eliminate.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. LIVINGSTON. I will be happy to yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, I appreciate the gentleman's statement. The gentleman points out quite clearly that two-thirds of the United States furnishes water to this area. Those of us who do not happen to be in the States that are exempted would point out, as the gentleman has, that two-thirds of the water comes from these other States, and we are going to say to those States that are exempted we are going to treat you differently than we do all of the other States that are in that area where they have flooding. Many of us have real trouble in the time that we have and with the shortage of funds that we have to say to that we are going to give this extra money to those States, but you are going to treat all of the rest of the States completely differently.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. BREAUX. Mr. Chairman, I have always been struck by the novelty of the argument that somehow a few States are benefiting from the project that others are not getting the same benefits from. Nothing could be further from the truth.

We are talking about a project that does not affect just the States at the bottom of the funnel, but all of the States, over 31 States and two Canadi-

an Provinces who happen to dump water down the funnel, which just happens to come through the bottom of the Mississippi River Valley tributary system.

I want my colleagues to know that what is done in Louisiana for flood protection certainly benefits all of the States in the system.

□ 1240

If the water is not available to be drained outside of the Mississippi River, the Mississippi River is going to start flowing backward, and we are going to have water going north instead of south, flooding the States of the system.

So what we are talking about is a project that is 76 percent complete, a project that was authorized in 1928; a project that benefits all of the States on the entire system.

I am also amazed at the argument that somehow, people are trying to create the impression that the States at the bottom of the system are not contributing their share. Nothing could be further from the truth.

We are paying for the land to construct the levees and to construct the projects. We are paying for the easements and the rights-of-way that are necessary and have to be purchased in order to create the project and make it work successfully. We are doing the maintenance on the project to ensure that the levees do not break, and that the system works in order that all of the States in the system, 31, 2 Canadian Provinces, benefit from the system.

This affects agriculture in all of the States along the system, and I think it makes a great deal of sense to keep the project going as it is and to not let it be disrupted by the mischievous amendment offered by the gentleman from Pennsylvania [Mr. EDGAR].

I dare say that I think the people of the northern part of the project would not be offering amendments if they were being inundated by all of the water coming from the Gulf of Mexico going north, other than what we are having to face with the water coming from 31 States.

Mr. HUCKABY. Will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Chairman, I would like to take this time to commend my good friend and colleague, the chairman of the subcommittee, the gentleman from New Jersey [Mr. ROE] as well as the gentleman from Minnesota [Mr. STANGELAND] for the outstanding job that they have done in bringing this well-balanced bill to the floor, that I am optimistic that we can finally get passed through both bodies as well as signed into law.

I would like to thank the gentleman from New Jersey [Mr. ROE] also for accepting an amendment of mine; one at the last moment regarding the Laourea Gully project in Louisiana, which the gentleman is also concerned with. We have been operating for years, really, under the impression that this project was authorized; and the corps has now made the decision that was not authorized, and I thank the gentleman for accepting that amendment.

I also would like to echo the gentleman's comments regarding the amendment before the House of Representatives. Much has been done in Louisiana, in other Southern States that are tributaries of the Mississippi; but so much more remains to be done.

This section of our Nation floods far more, with greater frequency, duration of floods than any other section of the Nation. These States, to be honest with you, cannot afford by themselves the amount of funds that are still needed for the flood protection.

As has been pointed out, this river basin is the greatest river basin drainagewise in the entire world. So I would urge my colleagues to reject the amendment.

Mr. BREAUX. Reclaiming my time, I thank the gentleman from Louisiana [Mr. HUCKABY] for his comments. What we are talking about, ladies and gentlemen, is a national problem. It has to be viewed as a national problem.

What happens in Louisiana is going to affect all of the 31 additional States, and it is a national problem and should be viewed in a national perspective. The tributaries cannot be separated away from the main stem of the Mississippi. To say that "Well, we are going to take care of the Mississippi but folks, you are going to have to take care of the local tributaries" is trying to separate a project that cannot simply be separated at all.

It has to be looked at as a national project as it has been looked at since 1928.

Mr. BEDELL. Will the gentleman yield?

Mr. BREAUX. I yield to the gentleman.

Mr. BEDELL. The gentleman, if I understood him, made the point that if there was a flood on the tributaries, the river would back up and flood areas such as my area of Iowa.

Mr. BREAUX. I was suggesting that.

Mr. BEDELL. I think the gentleman understands that my area of Iowa is over 1,000 feet above sea level, which would mean that we would have to have more than 1,000 feet of water all across the rest of the country in order to do so.

However, if we do have a flood——

Mr. BREAUX. I would say to the gentleman we are almost there now in Louisiana.

Mr. BEDELL. However, if we do have a flood in Iowa, then certainly that water is going to flow down the river and cause trouble downstream as well.

So that for the gentleman to say that it is more important in the national interest to take care of the tributaries downstream than upstream seems to me to be a pretty ridiculous argument, unless the gentleman thinks we are going to get 1,000 feet of water over the whole country.

Mr. BREAUX. Reclaiming my time, if you do not do anything with the tributaries——

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. EDGAR and by unanimous consent, Mr. BREAUX was allowed to proceed for 2 additional minutes.)

Mr. BREAUX. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding. The gentleman mentioned my name, and characterized this as a mischievous amendment.

I just draw to the gentleman's attention, and one of the reasons I am standing on the Republican side is that I have in my hand this statement of administration policy dated October 23, 1985, from the White House, which states its position on this particular bill.

Now, the gentleman from Louisiana knows that I frequently disagree with this administration. But sometimes they're right. This time they are. In their letter, on the second page, it says:

> The bill also fails to treat all regions of the nation equitably, by not extending the compromise cost-sharing agreement to as-yet unstarted, multi-million dollar features of the Mississippi River and Tributaries comprehensive flood control project.

It goes on to say, simply, that:

> The Administration urges the Congress to eliminate or modify objectionable provisions or omissions in H.R. 6 during floor or conference action. If H.R. 6 is enacted in its present form, the President's advisors would recommend that the bill be disapproved.

So I do not think the gentleman's characterization of it as being a mischievous amendment is true. The gentleman from Pennsylvania has excluded Mississippi and Atchafalaya River systems from the amendment in order to address the concerns you've raised.

Mr. BREAUX. Let me take back the time the gentleman gave me to respond. I think this is yet another good example of the administration being clearly dead wrong on a position of national importance, when they are trying to single out the project and divide it up.

Is this another example of them being wrong? I take no consolation in the fact that it is opposed by the administration; they are not correct on the issue.

Mr. HUCKABY. Will the gentleman yield?

Mr. BREAUX. I yield to the gentleman.

Mr. HUCKABY. I thank the gentleman for yielding.

I would like to point out to the gentleman from Iowa [Mr. BEDELL] that when you have a flood in Louisiana, in Iowa you are going to have a flood downstream. When you have a flood over in Pennsylvania, you probably are not having one in Iowa. You are still going to have a flood downstream. When you have heavy snows in Iowa in the wintertime, they melt; usually not causing damage in that section of the country.

Mr. BREAUX. Reclaiming my time, the gentleman is making a good point.

If the tributaries and the main stem of the river do not work, you are going to have flooding in Iowa and in Pennsylvania and everywhere up the stream. What is done in Louisiana at the bottom of the funnel also affects everything that happens upstream, all the way to Iowa and all the way to Canada.

Mr. HUCKABY. I thank the gentleman.

Mr. BEVILL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Edgar amendment. This area of the country has a unique problem. This is exactly why the Congress of this United States, in 1928, passed legislation to help this area of the country that has 41 percent of the water pouring into it, down the Mississippi River with all its tributaries.

So there are unique problems; this is the same old amendment; it has just been watered down a little to try to get us to pass it.

The Appropriations Subcommittee that I chair listens to the testimony of the Corps of the Engineers, we hear the testimony of the officials from the States, the public witnesses, we know the massive problems. I hope nobody is getting hoodwinked by this amendment, because it is a bad amendment that would create chaos in this part of the country if it were to go into effect, and I hope it is voted down.

Mr. Chairman, the Mississippi River has the third largest drainage basin in the world, draining 41 percent of the continental United States, exclusive of Alaska. The basin covers more than 1,245,000 square miles. Its waters come from 31 States, and were it not for the levees, it would flood over 30,000 square miles, a territory greater than many of our States.

The river combines size with usefulness and is one of the most valuable assets of the United States. Through its aid to drainage, navigation, water supply, power, manufacturing, agriculture, and other incidental uses, it renders vital service to over 40 percent of that area of the country. At the same time, the river poses a significant and continuing flood threat to the inhabitants of the lower Mississippi Valley.

The Flood Control Act of 1928 authorized the necessary work to correct the disastrous flood problems created by the record flood of 1927, affecting seven States—Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee.

Congress took this action because 41 percent of the continental United States, exclusive of Alaska, sends its water down the Mississippi River. In recognition that local interests had spent $292 million in an effort to protect themselves from the floods of the river which are of immense volume and which flow from a drainage area largely outside of the States most affected and which exceed those of any other river in the United States, the 1928 act requires no local contribution.

The Mississippi River and tributaries project is one project addressing the flood problems of the seven States—failure to complete this project as a complete unit will totally cripple the project.

As chairman of the Subcommittee on Energy and Water Development of your Appropriations Committee, I have heard the testimony of Members of Congress, local interests, and representatives of the Corps of Engineers year after year outlining the critical need for this project.

Although only partially complete, the project, through its flood control benefits, has more than returned to the Nation the accumulated construction investment of approximately $3.7 billion from May 1928 to September 1984. For example, in the 1983 and 1984 floods alone, the project prevented an estimated $31 billion in damages. Hence, in two seasons, the benefits were nearly 9 times the investment in the project over the last half century. Add that to the previous tally, and it means the MR&T project has saved some $100 billion since its inception; all in all, a pretty good benefit-to-cost ratio.

In closing, let me reiterate my opposition to this amendment which if passed would create a tremendous financial burden on the people adversely affected by the flood waters of 31 States.

Mr. STANGELAND. Will the gentleman yield?

Mr. BEVILL. I yield to the gentleman.

Mr. STANGELAND. I thank the gentleman for yielding and I just would like to associate myself with his remarks, commend him for his observations, and commend the other speakers on this issue.

Mr. Chairman, I rise in opposition to the amendment of the gentleman from Pennsylvania.

I understand the gentleman's concern that cost-sharing provisions in this legislation be applied fairly and equitably, and I certainly share those concerns.

However, given the history and unique nature of the Mississippi River and tributaries project, to treat each element as a separate project would, in my judgment, be most unfair to the MR&T project—and I am sure that is not what the gentleman desires.

These are, in fact, not new projects; they are elements and features of a single comprehensive overall project. These works were authorized in 1929 as a flood control project, and that project is not completed. What remains is not new but represents additional steps toward completing an existing project. Each element is an integral and interdependent part of the overall project.

At the outset, it is important that the MR&T be viewed as a national project, rather than a regional one. The Mississippi basin drains 41 percent of the continental United States. It is, in fact, the fourth largest drainage basin in the world—and that has enormous implications for the lower Mississippi Valley.

The people in that region constantly endure the ravages of floods coming down upon them from over 40 percent of the land area of the United States. The situation is aggravated by the increased urbanization of our Nation, which has produced higher runoff rates and volumes and lower ground water tables. These developments have only increased the threat of flooding to the lower Mississippi Valley.

Studies by the Corps of Engineers show that within the lower Mississippi Valley alone, about 6 million acres of farmland were flooded in fiscal year 1984. Therefore, the need for the MR&T project is without question.

Frankly, it is unrealistic to expect citizens in those States in the lower Mississippi Valley to pay new or additional costs to protect themselves from devastating floods from outside their boundaries. In more ways than one, they have already paid enough.

I urge defeat of the amendment.

Mr. BEVILL. Mr. Chairman, I yield to the distinguished ranking minority member of our House Committee on Public Works and Transportation, the gentleman from Kentucky [Mr. SNYDER], and I would like to commend him, and Chairman HOWARD and Chairman ROE, the subcommittee chairman, and the subcommittee ranking minority member, Congressman STANGELAND for this fine bill here. I

commend you all for this fine bill you have brought to the floor.

This bill has been passed twice by the House and there is no reason to waste a lot of time on amendments like this. We ought to just vote them down and move on.

I yield to the gentleman.

Mr. SNYDER. I thank the gentleman for his commendation, but I certainly want to commend the gentleman for his statement and the others who have opposed this for giving good, articulate reasons as to why it should be defeated; it is mischievous, even though the proponent does not want to admit that that is the title for it, but I think it ought to be dismissed for being just that.

Mr. Chairman, I rise in opposition to the amendment.

The cost-sharing provisions of section 302 should not apply to the Mississippi River and tributaries project. In the last 56 years, the $3.5 billion spent by the Federal Government on this project has, according to estimates, saved $100 billion in the protection of property and lives.

The mighty Mississippi has been the benefactor of great economic wealth, and it has also brought pain, suffering, and devastation when its floodwaters have taken their toll. That is why the flood control part of this project was authorized in 1928; and it would never have succeeded as it has if it had been broken up into hundreds of individual projects as though they were totally unrelated.

This is a single project, albeit a large one, with many parts, and to apply a new cost-sharing formula to these parts by considering each as a separate project is unrealistic, unfeasible and unfair.

The people in the lower Mississippi River Valley have been fighting the floodwaters of that great river and its tributaries for years, and they have contributed substantially to flood control efforts. It is not their water which floods their land and their homes. It is water brought down to them from the upper reaches of the Mississippi.

The cost of the protection from rainfall from over 40 percent of the land area of the United States is beyond the ability of the citizens in the lower Mississippi Valley to pay, and it is totally unrealistic to expect them to do so.

I urge defeat of the amendment.

Mrs. LONG. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to the Edgar amendment.

Mr. Chairman, the amendment would require affected States and local governments in the lower Mississippi Valley, including my own State of Louisiana, to share the cost of previously authorized but not yet constructed flood control projects in the region. Requiring cost sharing by these units of government represent a serious policy mistake and I urge my colleagues to reject the amendment for several reasons.

First, the Mississippi River and its tributaries is the third largest drainage basin in the world. The river system drains over 41 percent of the continental United States and parts of Canada. The Mississippi River represents a national asset, not a local one. Billions of dollars of interstate and international commerce depend on the river system for water, for power, recreation, and the transportation of food, fuel, and manufactured goods. Millions of Americans, in every State of the Union, directly or indirectly and whether they realize it or not, benefit from the river and its tributaries, and from the billions of dollars invested in it over time. Just as the benefits of the Mississippi River belong to all Americans, so do its problems. The costs of maintaining the river as a viable instrumentality of interstate commerce inescapably fall hardest on those who live near it, therefore, adoption of the amendment will simply make matters worse for all.

The Federal Government has been sharing the cost of flood control in the lower Mississippi Valley since the creation of the Mississippi River Commission in 1879. Congress recognized its larger Federal responsibility for flood protection in the lower Mississippi Valley in 1928. Congress noted that governments and residents of the region had already spent some $300 million for flood control prior to 1926, and that the valley had always borne the direct costs of flooding in loss of property and life. The Flood Control Act of 1928 authorized the Mississippi River and tributaries project to mitigate damages from future floods. The project included substantial local contribution of funds, rights-of-way and easements, and construction on the the Mississippi River and tributaries project is now more than three-quarters complete under the original authorization, as amended.

Mr. Chairman, Congress must not change the ground rules and suddenly subject the remainder of this massive project to the new cost-sharing formula contained in H.R. 3670. Flood control in the lower Mississippi Valley is a national problem because of the national importance of the Mississippi River. Congress recognized that fact in 1928, and nothing has changed since then.

Flooding in the lower Mississippi Valley does not restrict its impact to residents of the valley. Flood waters destroy all types of property—agricultural, commercial, residential, public and private indiscriminately. Floods on the Mississippi River interrupt traffic on national highways, waterways, and air routes with equal vigor. Anyone who believes flood control on the Mississippi River is a problem local to areas adjacent to it simply cannot see the big picture.

Second, Mr. Chairman, the ultimate effect of the Edgar amendment will be to end construction of necessary flood control projects in the valley. Louisiana tragically has the second highest unemployment rate in the Nation. This has caused substantial reduction in State and local revenues. State and local governments simply will not be able to raise their share of the cost at a time of reduced Federal aid and revenue. Future levee construction will be abandoned, and future floods will result in ever greater loss of life, property, and commerce. America as a whole will suffer and the flood damage and loss of life will cost the economy much more with just one massive flood than this amendment hopes to save. Federal emergency disaster assistance, lost property, revenue man-hours spent on cleaning up, and so forth, cost the economy hundreds of millions. And, because of the lack of effective flood control, the scenario would be repeated, time and time again, flood after flood.

Third, the imposition of cost-sharing on government in the region is unjust because the residents of the area already pay a disproportionate cost of flood control because of their proximity to the river. The Mississippi River and Tributaries project will not and cannot prevent floods; nature is by far the stronger actor. The floods which will continue to come and which will affect all Americans because the use of the Mississippi River system will always cost valley residents more. To require them to pay an increased share of the burden of protecting the interests of all Americans is unsound and unfair public policy.

Mr. Chairman, I again urge my colleagues to reject this amendment which jeopardizes the Mississippi River and Tributaries project. There is more at stake here than cost-sharing for Federal water projects. Flood control in the lower Mississippi Valley is a national problem with national implications. Residents of the region must not be asked to contribute more than their fair share of the cost of the flood protection which benefits all America. The Mississippi River and Tributaries project is more than three-quarters complete. Congress must not change the rules at this late stage of the game.

□ 1250

Mr. EMERSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Edgar amendment.

Mr. Chairman, I regret to see this debate develop in such a way that it appears to be Louisiana against the

rest of the world. As the representative of southeast Missouri, I want to assure my colleagues that there is indeed a lot more to this problem than just Louisiana.

The Mississippi is truly a national resource, but it is also a national problem. As such, I believe that my colleagues should come to understand the fact that the Nation should participate in the solution.

The Mississippi, if I may quote here, and I am going to refer to my source a little bit later, but I do want to quote now:

> The Mississippi is well worth reading about. It is not a commonplace river, but on the contrary is in all ways remarkable. Considering the Missouri its main branch, it is the longest river in the world—four thousand three hundred miles. It seems safe to say that it is also the crookedest river in the world, since in one part of its journey it uses up one thousand three hundred miles to cover the same ground that the crow would fly over in six hundred and seventy-five. It discharges three times as much water as the St. Lawrence, twenty-five times as much as the Rhine, and three hundred and thirty-eight times as much as the Thames. No other river has so vast a drainage basin: it draws its water supply from twenty-eight States and Territories; from Delaware, on the Atlantic seaboard, and from all the country between that and Idaho on the Pacific slope—a spread of forty-five degrees of longitude. The Mississippi receives and carries to the Gulf water from fifty-four subordinate rivers that are navigable by steamboats, and from some hundreds that are navigable by flats and keels. The area of its drainage basin is as great as the combined areas of England, Wales, Scotland, Ireland, France, Spain, Portugal, Germany, Austria, Italy, and Turkey; and almost all this wide region is fertile; the Mississippi valley, proper, is exceptionally so.

My source on this is none less than Mark Twain. He stated the magnitude and realization of the scope of the subject back in the 1880's when he wrote that wonderful volume entitled "Life on the Mississippi."

This truly is a national problem, and it ought to be treated as such as we arrive at our solution.

The gentleman from Pennsylvania [Mr. EDGAR] has crossed the aisle here and identified himself with the Republicans to say that the White House is in support of his position.

Let me say to my Republican colleagues and to my colleagues in the House at large, as a Republican, that I think the White House is wrong on this subject.

Mr. Chairman, I oppose the Edgar amendment, and I urge my colleagues to do likewise.

Mr. ROE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the amendment on the floor and join, if I may, with the statement of my colleagues from Louisiana.

Looking at the map, you can see the reason for our opposition. All the water in an area larger than most nations on Earth flows through our town. And to have us pay the full 30 percent cost of flood control protection in that case is not in the Nation's interest nor our own.

I thank the chairman.

Mr. ROE. I thank the gentleman.

You know, I have been laboring in the vineyards with most everyone in this House, and it has nothing to do with partisanship. If the gentleman from Pennsylvania would listen, there is a series, I understand, which I read about, on the television now. It is colorful and talks about the heritage of our country. I believe the name of it is "The North and South." We have been doing budgets and all that sort of thing around here in the last couple or 3 weeks, and I have not had a chance yet to see any of the episodes. It talks about a Confederate and a Yankee. It has a person from the Confederacy, a young fellow, and a young fellow from the North.

As I understand it, they get together, and they become dear personal friends, and they go on to West Point, and they go in the service of their country. The division between the areas then arose, between the North and the South.

I think that the North and South battle is over. What happens in Louisiana or Mississippi or any other place down South has a material bearing on what happens in New Jersey as it does to what happens in the Midwest and the Far West.

I know I have spoken on this issue, and I have been concerned with this issue, myself, and I am sure people could come back to me and say, "Bob, you are chameleon, you are jumping from one side to the other." Well, I never was on one side or the other. The battle was fairness and equity. I wonder what we say when we come to a law that was passed in 1928 when the Congress decided this issue. I just think it is wrong, without public hearings and getting into the ramifications; what does it mean to just come up and put an amendment on the floor and say that, "From 1928 until now all bets are off because I don't believe it should be helpful in the Mississippi area, what we ought to do is cut that all off by one single debate."

So from my point of view, I reappraised my opinion because I, along with ARLAN STANGELAND, "JIMMY" HOWARD, the chairman of our committee, and the ranking minority member, Mr. SNYDER, we have talked about these different issues in equity and fairness. We came up with the point that we have been considering; in the bill we have a concern that has arisen in five of the States on the upper Mississippi, and in that particular concern we are developing the relationship of the economics involved, the dynamics of the natural areas, and what happens in those upper waters that affect the Mississippi. Five States are involved.

We are establishing a special commission. And the commission is going to be allocated, at least under the authorization, I believe, it was approximately $150 million.

We are going to spend $150 million to look at what happens up there. Strangely, though, strangely, in that authorization, there is not any cost sharing involved. There is not any cost sharing involved; and the reason for this is because it affects the entire dynamics of the beginning of the Mississippi River and its tributaries.

Rife throughout this bill is fair play, and I helped to write most of it, and I can tell you this, Member after Member in every State, and no State is sovereign on this comment I choose to make, in every single State Members have legitimately come to the committee and they have said, "We need an adjustment here, we need some help there, we can't afford to carry that there. Can the committee consider this?"

I would suggest to you that if you were to look at the bill in depth and you were to pick out point by point, we have been generous, because the generosity was needed to be able to get the job done in the national interest.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(On request of Mr. EDGAR and by unanimous consent, Mr. ROE was allowed to proceed for 2 additional minutes.)

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I thank the gentleman for yielding.

Mr. Chairman, I understand the gentleman's comments. I just want to point out to the gentleman that in the bill that the gentleman brought to the House floor 1 year ago in the last Congress, we had in fact included language like my amendment today, to treat the tributaries to the Mississippi like all other tributaries to all other river systems. The flood control cost sharing in our bill as we brought it to the House floor last year included the language that I am now asking to include here.

I would just urge the gentleman to accept it now like he did in 1984.

Mr. ROE. If I may recapture my time from the distinguished gentle-

man, the gentleman is speaking to this issue, as he well knows and as I know, being dear personal friends, as to what my feelings are, but I have to respond in this way: In the great sovereign State of Pennsylvania, when you had the Johnstown Flood and half of the area was going into other States, the same Congress of the United States voted to help the great sovereign State, the Commonwealth I believe it is, of Pennsylvania because the people needed the help.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. ROE. No, I have only got a few seconds. I will get another 5 minutes. I do not want to spend all day arguing with you on this.

We have been on this issue for the last 3 years.

□ 1305

The point in question is that we all helped each other all throughout this country. I remarked to myself last night, I thought to myself, "Isn't it ironic that we should be bringing a water resources bill up, at all times, now?" Half of Louisiana is under water, we have had the Gloria storm, we have got toxic wastes running down the Susquehanna, part of my State is under water, we have a situation in West Virginia where I understand the dam broke, half of West Virginia is under water, and we get into talking about nit-picking, "We will do a little here and we will do a little there," and I am so tired—if I can say this, and if you will indulge me, being very tired myself today, when we have worked on this bill, and each one of you, almost, individually, as we worked on the bill, everybody comes——

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(By unanimous consent, Mr. ROE was allowed to proceed for 3 additional minutes.)

Mr. ROE. Everybody comes up and they tinker, "We will move this language over here, and maybe what we will achieve * * *." Do you know what that tinkering does? It does somebody else in. It is not fair. It is not equitable. It is all well to go and try to grab something out of the pot, but it is fundamentally wrong if we deny somebody else, and that is the one code that this committee has worked on, that is the one code this committee has taken. We have taken the point of view that we have got to be fair.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. ROE. One more time, yes.

Mr. EDGAR. I just want to remind everybody that I support the bill. The gentleman from Pennsylvania assisted the gentleman from New Jersey in writing the bill. The bill is a good one, it is pulling together.

Mr. ROE. Then let us vote.

Mr. EDGAR. The gentleman from Pennsylvania is not offering an amendment that is tinkering. It is at the fundamental heart of the question of fairness, equity and cost sharing. And it will save millions of dollars.

I thank the gentleman for yielding.

Mr. ROE. I thank the gentleman one more time for his great contribution and also, seriously, for his help on the bill. The gentleman has been marvelous on that, and I want to thank him very much for his help.

It is reasonable that brothers can disagree once in a while, and this is a point I disagree on.

I would urge the Members to join together and let us end this debate on this issue once and for all and vote down the Edgar amendment.

Mr. TAUZIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me thank the gentleman from New Jersey for all his splendid help on this bill, and particularly his defense of the structure of the bill that does protect those of us who accept so much water into our State in Louisiana.

Water is a blessing. Those of us who are of the Christian faith use water in our baptismal ceremonies. Most religions refer to water as a source of life. We in Louisiana certainly know what a blessing it is. We call ourselves the Bayou State. We have got more water I think than most people could ever realize. We have waters and streams and rivers and coulees and bayous and canals, and you name it, we have it.

We also know that water can be a curse and a great burden. I recently came back from my district, where about 40,000 homes were recently under floodwaters. And to call that water a blessing is certainly wrong. It was a curse. It was a killer. It destroyed lives and destroyed families and homes. We have seen what floodwaters did in the Shenandoah Valley in the last couple of days.

Water to Louisiana is both a blessing and a curse. We are particularly dangerously situated when it comes to water. We are backed up, on one end, by the Gulf of Mexico, which can get awfully mean and awfully treacherous, as we have seen as Hurricane Juan made its way into the coastal areas of Louisiana and continually dumped coastal water upon us. Some communities in Louisiana received as much as 25 inches of rain water in 1 month, 7 times more than some of the Western States get in a year. In 1 month, 25 inchs of water.

And it is no coincidence when the great Mississippi River system is cresting, and one crest after another comes down to Louisiana from 31 States, that the backwaters of Louisiana begin to flood, and the backwater areas, the bayou country, becomes deeply inundated with water, and more and more lives and property become threatened by this curse and this burden.

Now, to say to a State and to its people that you must accept this high water that is a curse and a burden, outside of its blessing; that you must accept it as part of this national flood control system for this great river basin; you must accept it on behalf of those other citizens of our Nation who want to get rid of it because it is a curse to them; to say that when you accept it, you have to pay some additional burden in dollars, that in addition to lost lives and damages to families and property, you also have to put up some money, to accept the curse and burden of more water upon your people, is a little strong.

I do not think the gentleman from Pennsylvania means to say that, but that is what the amendment does. It tells the folks at the end of the great Mississippi funnel, when you accept all that additional burden of drainage, you also have to pay to take it. That is like telling people in Louisiana that "We are going to send you our hazardous waste, and we also want to make you pay to take it." There is something wrong with that kind of logic. The logic that makes sense is that if our State is going to be at the bottom of the funnel, threatened to the south by the waters of the gulf, if we are going to accept the additional burden and responsibility of all the additional water coming to us from 41 percent of the land mass of our Nation, that we ought not be required to pay to take it. To the contrary, ought to be given some help in dealing with it, to prevent the kind of loss and destruction that I have recently witnessed in my State.

Mr. Chairman, I urge the defeat of the pending amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. EDGAR].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. EDGAR. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 124, noes 296, not voting 14, as follows:

[Roll No. 394]

□ 1330

Mrs. ROUKEMA and Messrs. COBLE, CHAPMAN, ROWLAND of Connecticut, and WEAVER changed their votes from "aye" to "no."

Messrs. YATES, ECKERT of New York, and NIELSON of Utah changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. WEISS. Mr. Speaker, I unavoidably and inadvertently missed the vote on the Edgar amendment to H.R. 6, Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985. I was within 1 minute of the vote, but I did not get here on time. Had I been present, I would have voted "aye."

AMENDMENT OFFERED BY MR. BROWN OF CALIFORNIA

Mr. BROWN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of California: Page 93, strike out line 14 and all that follows through line 8 on page 95.

The CHAIRMAN. The gentleman from California [Mr. BROWN] is recognized for 5 minutes in support of his amendment.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I am happy to yield to the distinguished chairman of the subcommittee.

Mr. ROE. Mr. Chairman, I thank the gentleman from California for yielding.

For the benefit of the Members, I understand that there are a number of Members who are on conference committees or in committee sessions who would like to have an opportunity for the gentleman from California to yield to them.

Therefore, Mr. Chairman, I ask unanimous consent that the gentleman from California [Mr. BROWN] be given an additional 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The CHAIRMAN. The gentleman from California [Mr. BROWN] is recognized for 10 minutes.

Mr. PICKLE. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from Texas.

Mr. PICKLE. Mr. Chairman, I thank the gentleman for yielding, and I rise in support of this measure and commend the committee for its action.

Mr. Chairman, I support this measure offered by the members of the Public Works and Transportation Committee. I commend Chairman HOWARD and Chairman ROE and the members of the committee for bringing to the floor of the House a fair piece of legislation dealing with an important function of the Federal Government. I especially want to commend Chairman ROE and the Subcommittee on Water Resources for crafting a bill that addresses very effectively an area of vital national importance.

In my opinion, this measure takes balanced and equitable approach to the improvement of our national infrastructure, the conservation of our water resources and development of a water plan for the Nation. In addition, this measure establishes a plan for dealing with the problems of flooding in communities across the United States. I am especially pleased that a project of major importance to the people of my district is included in the bill, with language that establishes a fair approach for the city of Austin and the Federal Government to work together in protecting the homes and businesses of the people of East Austin. The project I speak of is the Boggy Creek flood control project.

Boggy Creek is a tributary of the Colorado River. The Colorado, in the course of its route to the Gulf of Mexico, runs through my congressional district and through the city of Austin.

Normally a thing of beauty, the Colorado River can, on occasion, become a dangerous torrent of flood waters. When a central Texas thunderstorm descends on the Austin area and lingers for a long enough amount of time, the Colorado will swell and back into its tributaries. Boggy Creek has been described by the flood control experts at the U.S. Army Corps of Engineers as a large, natural fishbowl waiting to be filled with water. When that happens, the more than 2,000 businesses and homes surrounding Boggy become part of the creek and are flooded, causing tremendous damage to

residences and businesses along its banks. This results in great financial cost to the owners and the possibility of physical harm to those people caught in the flood.

For many years, I have worked with the U.S. Army Corps of Engineers, the city of Austin, and my colleagues on the Public Works and Transportation Committee to secure Federal involvement in a flood control project on Boggy Creek. The measure before us today contains the result of that work.

H.R. 6 goes much further than assisting the people of one Texas city. It establishes projects across the country, where people need some assistance and expertise in establishing flood control projects, port development, inland waterway projects, shoreline protection, and water resources policy development.

This is a much needed measure and I urge the Members of Congress in both the House and Senate to expedite its passage.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to my friend, the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Chairman, the water resource authorization bill before us today is extremely important to my State of Oklahoma. I rise in support of it and commend the committee.

Mr. Chairman, the water resources authorizing legislation before us today is of the highest importance to the State of Oklahoma. Years of delay on authorizing these critical flood control and water quality projects have stymied development, restricted water use, and cost lives and millions of dollars of damage in flooding.

Last year this body passed legislation similar to H.R. 6. Unfortunately, the Reagan administration refused to accept the cost-sharing provisions, and Oklahoma and other States with pressing projects were left to wait at least another year.

We can wait no longer. In my home city of Tulsa, a flood control system for Mingo Creek has been on the drawing board for years. Last Memorial Day, after heavy rains, the creek overflowed its banks and unleashed a flood which took many lives and cost close to $200 million in damage. That is more than twice the Federal cost of the flood control system.

South of Mingo Creek, in southeast Tulsa and Bixby, OK, Fry Creeks are in desperate need of improved channelization. This bill provides the necessary funding for that project, alleviating the flooding which hits on an annual basis with the spring rains.

H.R. 6 also provides badly needed funding for other projects throughout the State of Oklahoma.

While Sardis Lake is now complete, poor access has limited its appeal as a recreation area. This bill allows for the upgrading of the existing access road, and also provides a small sum for recreation facilities.

The Parker Lake project, just east of Ada, OK, when complete will provide a stable supply of water for many cities in the Oklahoma City area. The recent rapid growth in that area has put pressure on existing water sources. Parker Lake will go a long way toward easing that pressure.

Fort Gibson Lake, a critical source of power for the region, has ample capacity for more power generation. H.R. 6 will allow the addition of two more hydropower units.

Finally, Mr. Chairman, the bill authorizes construction of the treatment and conveyance system of water from Lake Arcadia to Edmond, OK. This project, which will be paid for over the long term by non-Federal interests, provides badly needed water for the growing Edmond area.

Mr. Chairman, these projects are extremely important to the health and growth of the State of Oklahoma. They are all clearly in the national interest, and I am pleased that they have been placed in this legislation.

I urge my colleagues to join me in supporting H.R. 6, and I hope that the other body will act quickly to approve it as well. We have waited long enough.

Mr. LEHMAN of California. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I am happy to yield to my friend, the gentleman from California.

Mr. LEHMAN of California. Mr. Chairman, I rise in support of the legislation.

Mr. Chairman, I would like to commend the chairman and members of the Public Works Committee for their efforts in drafting H.R. 3670/H.R. 6, the Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985. This bill addresses a number of important issues, including flood control, water conservation, and basic infrastructure projects vital to the Nation, and I am pleased to lend my support to the legislation.

I would, however, like to take this opportunity to express my concerns regarding the Redbank-Fancher Creeks flood control project located in Fresno County, CA. The project, as proposed by the corps and local sponsors and as described by the "Report of the Chief of Engineers, dated May 7, 1981," addresses a very serious flood control problem which annually threatens the Fresno-Clovis Metropolitan area, provides for additional water storage to relieve a serious ground water overdraft problem, and allows for recreation and habitat development. These are all important components of the project and have long had the support of the affected local communities.

My specific concern relates to the inclusion of the recreation component. The May 7, 1981, corps report cited by the legislation and the accompanying House report—Report 99-251—describe the components of the project and specifically cite recreation as an integral part of the project. According to the House report, "Recreational facilities at Big Dry Creek Reservoir will provide for boating, fishing, and picnicking, and 70 acres of riparian species will be planted around the reservoir." However, in its letter of transmittal dated November 17, 1983, the corps, citing administration policy, unilaterally removed this component from the project.

While I have been assured by the chairman of the Public Works Subcommittee on Water Resources that it is the intent of the legislation that the recreation component be included as part of the project pursuant to "Report of the Chief of Engineers, dated May 7, 1981," as cited by the bill, I would like to reiterate my concern that the intent of the legislation be met. As clearly indicated in the corps report, recreation and the riparian habitat development are vital elements of this project and are obligations which should be fulfilled by the corps. The decision by the corps to remove this component from the project in its letter of transmittal was an administrative decision done without the advice from local sponsors and inconsistent with the intent of the legislation.

As the corps report indicates, the recreation and riparian habitat needs of the area will be well served by the inclusion of this component and are certainly justified under the responsibilities of the corps in this regard, and I urge the corps to meet the intent of the H.R. 3670/H.R. 6 as it relates to the Redbank-Fancher Creeks project.

Mr. STOKES. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from Ohio.

Mr. STOKES. Mr. Chairman, I rise in support of the legislation. I commend the subcommittee chairman and the committee for this excellent bill.

I would like to express my appreciation to Congressman BOB ROE for his diligent efforts on H.R. 6, the Water Resources Conservation, Development, and Infrastructure, Improvement and Rehabilitation Act. I especially appreciate the attention which the chairman has given to the inclusion of the Cleveland Harbor improvement project in the bill. The activity surrounding the development of the Cleveland Harbor and lakefront is an integral part of the continuing revitalization of the economy of Metropolitan Cleveland. Ohio and Cleveland public officials, the private sector and the Army Corps of Engineers have worked closely together and are in agreement that the work on the Cleveland Harbor needs to be undertaken. This work will create important jobs for Clevelanders.

H.R. 6 authorizes $36 million for the deepening and widening of the east harbor entrance, bulkheading and other necessary repairs for Pier 34 and approach channels and necessary protective structures for mooring basins for transient vessels, as well as other work to be recommended by the Army Corps of Engineers. The approval

of this bill moves us one giant step forward in a Federal, State, and private cooperative effort to bring the Cleveland Harbor improvement project to fruition.

I especially appreciate the colloquy between Congressman ROE and Congresswoman MARY ROSE OAKAR to clarify the intent of Congress with regard to the development of this project. I would like to reiterate my understanding that H.R. 6 provides to the Army Corps of Engineers the necessary authorization for the sheeting, bulkheading, and related improvements to Dock 24, Dock 32 and Dock 36, as well as the removal of navigational impediments at specific bridges, the correction of "bow thruster" problem areas and other infrastructure problems at the Cleveland Harbor. As I understand it, it is the committee's intention that these activities be undertaken by the Army Corps of Engineers and, further, that the Corps of Engineers work with Ohio and local officials in permitting local funds spent on the basin south of Pier 34 to be part of the local match required for all of the project components comprising the Cleveland Harbor improvement project.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. Mr. Chairman, let me point out that I am yielding to all these Members on the assumption that they are supporting my amendment, and, of course, I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I have been with the committee so far.

Mr. Chairman, if the gentleman will yield, I would like to engage in a very brief colloquy that we have been waiting to have for some time with the distinguished chairman, and I rise in support of the bill as well.

I thank the gentleman for yielding to me for a colloquy, and I would ask that he yield to the distinguished chairman also.

Mr. BROWN of California. I certainly yield to the gentleman from New Jersey.

Ms. OAKAR. I would first like to commend the chairman of the Water Resources Subcommittee and the members of the Public Works Committee for their outstanding work on this vital legislation. I am grateful for the committee's attention to the navigation and infrastructure needs of Cleveland's Harbor, for which $36 million is authorized in H.R. 6.

Mr. Chairman, I would like to clarify the committee's intent with respect to the project. Is the committee's intent to provide for the deepening and widening of the east entrance to the Cleveland Harbor?

Mr. ROE. That is the intent.

Ms. OAKAR. Is it also the committee's intention that bulkheading and other repairs to pier 34 be performed to remove potential navigation hazards, and that cost sharing be consistent with provisions relating to navigation?

Mr. ROE. The gentlewoman is correct.

Ms. OAKAR. Is the committee's intent to direct the Corps of Engineers to work in conjuction with the State of Ohio and local authorities in the construction of the basin south of pier 34, particularly in allowing local funds spent on the basin to be part of the local share of funding for all work elements in the authorization?

Mr. ROE. The gentlewoman is correct.

Ms. OAKAR. Does the committee recognize the purpose of this basin for mooring smaller vessels that seek safe harbor in the event of dangerous weather that can occur suddenly in Lake Erie, and is the local non-Federal cost to be consistent with the formula established for shallow ports, those between 14 and 20 feet deep?

Mr. ROE. That is the intent of the committee.

Ms. OAKAR. Finally, Mr. Chairman, does the authorization also permit sheeting, bulkheading, and related improvements to Dock 20, Dock 24, Dock 32 and Dock 36, and along the navigational channel of the Cuyahoga River, as well as the removal of navigational hazards at specific bridges, the correction of "bow thruster" problems, repair and building of breakwalls, and other related navigational and infrastructure problems at the Cleveland Harbor area as will be identified by local authorities working in cooperation with the Corps of Engineers and this committee, subject to the provisions of section 103?

Mr. ROE. The gentlewoman from Ohio is again correct.

Ms. OAKAR. I thank the gentleman for yielding. I thank him for his courtesy and leadership. I thank the gentleman from California very much as well.

Mr. BROWN of California. Mr. Chairman, if there are no other Members who wish to have me yield in order to endorse my amendment, I will proceed.

Mr. Chairman, I also ask unanimous consent that in the event that my amendment is not properly designated because I have not followed all of the changes that have already been made this morning, that it be properly referenced to the Santa Ana River mainstem project in California which it intends to knock out of the bill.

Mr. CHAIRMAN. The Chair is aware that the amendment is properly drafted.

Mr. BROWN of California. If the amendment is properly drafted, Mr. Chairman, then I have no request.

Mr. CHAIRMAN. The Chair recognizes the gentleman from California [Mr. BROWN].

Mr. BROWN of California. Mr. Chairman, I support this bill, and I intend to vote for it. I also support the Santa Ana River project, and if I knew what it was, I would vote for that. Unfortunately, this bill purports to authorize a project which has not yet been approved.

We were further ahead in the design and approval of this project 3 years ago than we are today, and I would like to indicate on this chart what the situation is. We have a very significant flood control problem in California on the Santa Ana River. The river originates in the mountains, flows through my district, which is indicated in green here, flows on down across the boundary into Orange County, and goes on out to the ocean.

Now, 3 years ago the Corps of Engineers had approved the all-river plan which included the Mentone Dam, located at this point. I supported that. I still support it. All of the public agencies support it. What happened is that after the project went to the next level in the Department of the Army, it was vetoed by then Assistant Secretary Gianelli.

□ 1340

Mr. Gianelli's reasons were that there were some objections locally for environmental reasons and that it costs too much.

This is the single most costly element of this project. It is approximately a half a billion dollars. We are not talking about chicken feed here; we are talking about a half a billion dollars.

Unfortunately, the committee bill that we have before us, as originally before us, and the committee report still refers to the Mentone Dam as being authorized. It is not authorized. It has already been vetoed.

The Corps of Engineers has initiated a new study for an alternative. That study has been completed, and they have recommended a smaller dam higher up in the mountains.

That is satisfactory to me. I have no problems with it. It only provides about 80 percent of the flood control that the Mentone Dam would, and it has about 80 percent of the cost, but it is satisfactory.

Now, where do we stand on the alternative?

Well, the district Corps of Engineers recommended that plan about 2 months ago. The local agencies have supported it.

You have received a "Dear Colleague" letter from some of my friends in Orange County indicating that all the local people agree on it. I agree on it. That is not the issue.

I would settle for that plan, but here is the problem. Everyone also agrees that this project must be completed as a whole, that it cannot proceed with the parts which protect Orange County from flood and leave the only part of the project which protects San Bernardino County and Riverside

County from flood in limbo, and that is the situation we are in today.

We are in limbo because there is no approved plan.

Now, I am not trying to be obstructionist about this matter. I told my good friend, the gentleman from California [Mr. PACKWOOD], and I have told the chairman of the full committee and the chairman of the subcommittee that if we could get assurances that this project would be approved by the administration, I would not offer an amendment, and I mean that sincerely, because I support the currently recommended project.

So what has happened? The chairman fought diligently yesterday to get a letter from the Corps of Engineers or from the Department of the Army endorsing the current plan as recommended by the corps and what he got was a letter saying that "in September the L.A. District Engineer completed his draft report on possible alternatives to Mentone. The report is still under review by the Corps of Engineers, so its findings, conclusions and recommendations, are subject to revision."

Well, we were further along than that 3 years ago when they knocked out Mentone. That is not exactly the sort of assurance that I am looking for, assurance that my district, my two counties are going to be protected. I want to see what those revisions are. Does it include minor changes in the design of the dam or does it include knocking it out, as happened 3 years ago? I think we are entitled to an answer.

Now, the committee in its wisdom and with the strong initiative of Congressman PACKARD who is on the committee, has sought in every way they could to reassure me that the upper part of this project would go ahead.

The CHAIRMAN. The time of the gentleman from California [Mr. BROWN] has expired.

(By unanimous consent, Mr. BROWN of California was allowed to proceed for 5 additional minutes.)

Mr. BROWN of California. At one point in the bill, at the initiative of the gentleman from California [Mr. PACKARD], there was language that the project could not proceed unless the final approved design of this alternate dam had been brought back and approved by the Public Works Committee in the House and a similar committee in the other body.

Now, does that give me the assurance that I seek? I will tell you in all honesty that it does not. And why does it not?

I have here a quotation, a letter from the U.S. Department of Justice, Office of Legislative and Governmental Affairs, sent to the chairman of the Senate committee just a few months ago. This letter says, among other things, the language that no appropriation shall be made without the approval of the House and Senate committees, would be without any legal significance.

In other words, it is a nullity.

Now, I appreciate the good faith of the committee members who have sought to reassure me that they would protect the interests of my constituents. I think they did so in full good faith. I know they did so in good faith, but they are under some misapprehension.

In a "Dear Colleague" letter which several of my colleagues in Orange County sent out, they stated, for example, that the Senate has maintained the integrity of the project by authorizing the entire project. That is not true.

The Senate has specifically said the upper Santa Ana Dam is not authorized and will not be authorized until it has been approved by the administration. The chairman of the subcommittee knows that.

Unfortunately, even in the report of the Public Works Committee the language is still there referring to Mentone, although recognizing that there needs to be an alternative.

Unfortunately, I hesitate to say this, and I will quote from the committee report:

> The committee notes the particular concerns with regard to the Mentone Dam. Accordingly, although the total plan is authorized—

This is in the report—

> The Corps is directed to acquire land for and construct only the following elements—

And it lists everything else except the dam that is of concern to me.

Now, what is the effect of this? My friends in Orange County point to the billions of dollars of assets in their county that are in danger. Those assets are currently protected by a dam right here in Riverside County. They say that we have got to move quickly to raise this dam and give further protection to Orange County.

We had a major flood in California in 1969, just 16 years ago. That flood did close to 100 million dollars' worth of damage. That would be a quarter of a billion dollars today.

Where did that damage take place? Not a dollar of it was in Orange County. It was all in my district.

So we have a bill now which provides adequate protection for Orange County, but leaves the two counties of San Bernardino and Riverside in limbo as to whether there is any protection whatsoever for them.

Now, I hesitate to make one final point, but I will. There have been some rumors to the effect that I might be trying to be an obstructionist to this bill because I was peeved at some of my dear colleagues in Orange County because they made such an assiduous effort to defeat me in last year's election. I resent that kind of remark because it belittles the importance of the points I have just been making. The interests of my constituents are all that concern me and I think that I am entitled to demand assurances that we are not going to suffer half a billion dollars damage in the next big storm, while Orange County suffers no damage, because we have no approved project on the upper part of the Santa Ana River which will give us any protection in the area I have outlined in green, which just happens to be my district.

Now, I have not made a big effort to conduct a campaign on this. I have expressed my concerns to the committee members. I want to fully explain it to the House. I think my position is reasonable. I would like very much to have the support of the House in taking this project out, not permanently, but just until the design is completed.

The Senate will not consider approving a plan until it has gone through the full approval process in the administration. But in their anxiety to do something to take home to their constituents, certain of my colleagues from Orange County want to rush this project along.

I know they did this in good faith and I am not questioning it. I know they want to protect me and I appreciate that. But as I have explained, I still do not feel protected. I ask your consideration and support for this amendment.

Mr. PACKARD. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we have struggled with this project for the last 3 years as we have been drafting H.R. 6. We have spent an inordinate amount of time trying to address the concerns of all agencies involved.

This project covers at least three counties in the State of California. It is no small process to address the concerns of each county and particularly each Member that has some interest in this project.

We have consistently tried to put in the language of the bill, wording that would resolve the concerns of the gentleman from California who has just addressed us.

There is no project in the country that has been deemed to be a more important flood control project than this one. It has more potential for danger and for damage in terms of dollar amounts than any project in the country.

Certainly this project cannot and ought not be eliminated, as the gentleman's amendment would do. To eliminate this project from the bill would doom it to failure. It would not be reintroduced. It would not be reconsidered by the committee in the near future. It would be impossible for us.

This is the first water bill of any consequence that has come before this body for the last 8 years. To expect this committee to take this project as a freestanding bill next year or the following year, after the final reports have been submitted, is totally inconceivable. It will not happen.

Therefore, this project would be delayed for what I believe would be at least a decade before it could be brought before this body again.

Second, the corps has completed its studies and has submitted its preliminary reports. We simply are waiting now for their final report which they have said would be before us in 1 month. Then the rest of the approval process would simply be pro forma, would not be altered. Because of the timing it would be impossible and irresponsible, in my judgment, for us to delay this project or to eliminate it from H.R. 6, as the gentleman's amendment would do.

Third, the other body, according to the gentleman's own statements, has eliminated the upper portion of this project from their bill. If that is the case, and I am not certain that it is because they have included the entire amount of money required for the full project, their intention is to approve the entire project, recognizing that there is yet some unfinished study work and report work to be done. They have made it very clear, however, in their report language that they intend to include this as part of the project and it will be done at the appropriate time. They would not have included 100 percent of the funding for the entire project otherwise.

If the gentleman is correct in stating that they have not included this upper portion of the project in their bill and then he seeks to eliminate this project from our House bill, I do not understand how he then feels that we could include this in conference committee action that would allow the whole project to survive. It would eliminate the upper portion of the project from conference and would destine this entire project to failure, in my judgment.

I think it would be imprudent, and unwise, and certainly shortsighted for us not to include this project, along with the multitude of other water projects across this country, in H.R. 6.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. PACKARD. I am happy to yield to the gentleman.

Mr. BROWN of California. Mr. Chairman, as I said before, my distinguished colleague from Orange County has really gone out of his way to seek to accommodate the interests of my constituents and I have expressed my appreciation to him.

I think the gentleman is aware of the difficulties in providing absolute assurances. Even if the Chief of the Corps of Engineers approves this project, he cannot guarantee me, and the letter we just received today from the Department of the Army makes that clear, that the upstream dam would be approved at the level of the Corps of Engineers, at the level of the Army.

Now, what I would like to have from the gentleman and the reason that I have suggested that we knock out the whole project—let me back up just a moment.

The Senate bill provides authorization to proceed with construction on the lower two-thirds. The House bill in the report language does the same thing.

I would like the gentleman's assurance that, first of all, he will seek to change the House report language; second, he will not accept a bill in conference that does not allow the whole project to proceed together.

Can the gentleman give me that kind of assurance?

Mr. PACKARD. I can certainly give the gentleman assurance that I will work to that end, but I cannot make assurances for the Department of Defense. I cannot make assurances for what will definitely be included in the House report.

The CHAIRMAN. The time of the gentleman from California [Mr. PACKARD] has expired.

(At the request of Mr. BROWN of California, and by unanimous consent, Mr. PACKARD was allowed to proceed for an additional 6 minutes.)

□ 1355

Mr. PACKARD. But certainly I can make assurances to the gentleman from California that I will work to that end, becuase I do not think we are at variance on that point.

Mr. BROWN of California. If the gentleman will yield further, I want to be even more precise.

Would the gentleman assure me that he would not support a bill which allowed the construction of the part of that project which benefits his district unless the part that benefits my district can be included; that he would not vote for such a bill?

Mr. PACKARD. Mr. Chairman, if I may reclaim my time, I can tell the gentleman that I have worked hard to put that kind of language in the bill, and I think that there is basically language now in the bill that addresses this project to that effect. It will protect the upper portion of the project so that it can move forward simultaneously with the rest of the project. Again, I will work to that end.

Mr. LEWIS of California. Mr. Chairman, will the gentleman yield?

Mr. PACKARD. I would be happy to yield to my friend, the gentleman from California.

Mr. LEWIS of California. I appreciate my colleague yielding.

Mr. Chairman, I do understand the concerns being expressed by my colleague, the gentleman from California [Mr. BROWN], but it is my understand that those sections of the bill as printed which referred to all sorts of portions of the project that might be constructed, and did not refer to the northern portion, have been struck from the bill, and that the Howard amendment takes directly into consideration the concerns the gentleman is expressing. It not only talks about the total dollar amount; it also talks about the report that is in transition.

That, which the gentleman is expressing, concern about in terms of a lack of recognition of the upper portions of this project have been taken care of by the committee.

Mr. BROWN of California. If the gentleman will yield further to me on that point, I will read the language in the bill, just to make sure there is no misunderstanding.

Actual, physical construction of the project may commence upon adoption of a resolution of agreement for said construction by the non-Federal sponsoring agencies.

That language, according to the best legal opinion I have, is null and void, just like the previous language about approval by the two committees.

Not only that, it does not even specify whether it requires unanimous consent, which would protect San Bernardino. It could be done by a majority vote of all the boards of supervisors, which might very well approve a project that did not include that specific upper river dam or included some less satisfactory provision.

Mr. PACKARD. Mr. Chairman, let me reclaim my time and simply assure the gentleman that our intentions and the intentions of the committee are to address the concerns that the gentleman has expressed. As far as commitments are concerned, as far as the legality of the language, I think it is as legal as any other language in our bill, but nevertheless, I think the gentleman understands our intent. But to make assurances on hypothetical circumstances that we cannot foresee, I am not sure that we could make those kinds of assurances under any circumstances.

The gentleman has my word that we will work toward the concerns. We have in the past. We will continue to do so in the future in conference and in other areas where the bill will have to move. I think that is all we can offer to the gentleman from California. I hope that will be satisfactory and that he would not see fit to introduce an amendment to strike the entire project, which I think would be particularly counterproductive for his own constituents and certainly for a project that is in the best interest of

California and the many people that we represent.

Mr. BROWN of California. If the gentleman will yield further, I would say that I am equally as sincere as the gentleman in wanting this project with the upstream dam. It so happens that without the upstream dam, my constituents, the constituents of Mr. LEWIS, the constituents of Mr. MCCANDLESS, have no protection. We are the ones who suffered the $100 million damage in the last storm, not Orange County.

Mr. PACKARD. Mr. Chairman, if I may reclaim my time, I think the gentleman is aware, though, that we have included the upstream dam as the alternative now in the House version. That upstream dam is not in the Senate version and for that reason it is essential that we leave it in the House version so that it might become a conferenceable item. We have the assurance that the Senate is willing to accept that alternative, but it has to be conferenceable. If you remove it from the entire project, we have no conferenceable project for the gentleman's district.

Mr. BROWN of California. If the gentleman will yield further, as long as we are conducting a dialog here, I appreciate the point the gentleman makes. The Senate position, of course, is that they will not have anything in their authorization that has not been approved by the Corps of Engineers and by the Department of the Army, which means that they might not be willing to conference it. If that is the situation, and the House yield to the Senate, then you have authorization for the lower two-thirds.

Mr. PACKARD. Mr. Chairman, in response to that, I think that the intent of the Corps of Engineers is to have the study completed before conference, and the Senate will be able to move with an approved project. Therefore, it will be addressed in the conference, in my judgment.

Mr. ROE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, again, this is a matter among brothers, and unfortunately, there are all brothers and no sisters on this delegation, but let me point something out.

I think what the gentleman from California has raised with his chart has merit. We looked at this and studied it in depth, as Mr. PACKARD knows, who worked so diligently on the committee on this issue, and I deliberately got in touch with the Corps of Engineers and met with them, along with members of our committee, and the gentleman from Minnesota, ARLAN STANGELAND.

We said, "We want to review this because we are concerned about the issues that Mr. BROWN of California has raised, and the concerns raised by the gentleman from California, Mr. PACKARD, and we wanted to be sure of certain basic, factual items. The factual items were: Is there such a thing as a Santa Ana water resource flood control program? Is that what you are talking about, the river? Bring us some charts and maps and let us study this, being technically trained myself, so we can take a look at this."

Then I said to them, "I would like to have a communique, which I will include in the RECORD, from the Department of the Army.

The letter follows:

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, DC.

Hon. ROBERT A. ROE,
Chairman, Subcommittee on Water Resources, House of Representatives, Washington, DC.

DEAR CHAIRMAN ROE: This is in response to your recent request for information regarding the Corps of Engineers investigations of flood control alternatives along the Santa Ana River main stem in southern California.

As you know, the fiscal year 1984 Supplemental Appropriations Act directed the Corps to study alternatives to Mentone Dam, a previously proposed upstream storage element of the overall plan for flood control on the Santa Ana River main stem in Orange, Riverside and San Bernardino Counties, California. In September of this year, the Los Angeles District Engineer completed his draft report on possible alternatives to Mentone. This report is still under review by the Corps of Engineers, so its findings, conclusions, and recommendations are subject to revision. However, the Corps' preliminary findings are that there is a viable alternative to Mentone Dam, the Upper Santa Ana River Dam, and that this alternative, in conjunction with other elements of the overall plan, would be economically justified, environmentally acceptable, technically sound, and acceptable to affected local interests.

An upstream flood storage feature, whether it be Mentone Dam, Upper Santa Ana River Dam, or some other comparable structure or structures, is the optimal approach that will permit the plan recommended by the Chief of Engineers to function as intended. The ability to control significant flood flows in the Upper Santa Ana River basin will permit the elements of the plan that are further downstream to function as designed and will allow detailed design and construction to proceed as an integrated system, providing benefits to Orange, Riverside, and San Bernardino Counties.

Even though I must reiterate that the upstream alternatives to Mentone are still being analyzed, I am confident that the best solution will involve an integrated system of improvements, to include features in the upper basin as well as the lower basin.

I trust this information is responsive to your inquiry. If you need further assistance in this matter, please call on me.

Sincerely,

H.J. HATCH,
Major General, U.S. Army,
Director of Civil Works.

In that letter, particularly we wanted the corps to reiterate that the Santa Ana River project was a single project and its integrity, its ability to control the flooding, had to be handled as a total project. I gave a copy of the letter to the gentleman from California [Mr. BROWN]. The last paragraph reads as follows:

The ability to control significant flood flows in the upper Santa Ana River basin will permit the elements of the plan that are further downstream to function as designed and will allow detailed design and construction to proceed as an integrated system providing benefits to Orange, Riverside and San Bernardino Counties.

What that says, in fact, is that the integrity of the engineering to achieve the goals of the program, depends upon doing the whole thing. I think the corps has reconfirmed that.

Again, the question asked by the distinguished gentleman from California [Mr. BROWN], can we assure that this body or the Senate will go ahead and agree to constructing the entire project, in view of what the Senate has done, or whether or not the President will even sign this bill. I have heard people get up here today and say the whole bill is going to be vetoed by the President, which of course is his prerogative.

In order to be further helpful, in thinking this situation out and checking out the engineering, it was reported to me that during the course of engineering to build the alternative dam to Mentone they have to do a certain quantitative excavation and the integrity of the building of the alternate Mentone Dam to the flood protection areas in San Bernardino and Riverside Counties relate to that part of the construction program. As they remove that material, in building that dam, they will also be flood proofing San Bernardino County and Riverside County. This is a fact.

In the amendment to the amendment offered by the gentleman from New Jersey [Mr. HOWARD], we came back and put language in deliberately and we said that the construction of the upper Santa Ana River Dam, and did not speak to Metone, which is the alternate project, shall proceed at the same time as construction of the upstream portions of the project in San Bernardino and Riverside Counties.

We locked those two things together because they are an integral part of the program and the whole program cannot achieve its efficiency unless they are both built at the same time.

Let me just make one more point, and forgive me if I am too loquacious. I did not mean to be. I am trying to be helpful here.

I am the chairman of the subcommittee. We have our dear, distinguished chairman of our full committee here, the gentleman from New Jersey [Mr. HOWARD], who certainly will speak for himself, but as a conferee, I am sure, I will sustain the point of view of both or all gentlemen from California that this project is consid-

ered to be in its entirety a single project.

□ 1405

Now beyond that point, if we can convince the conferees on the other side of the aisle and the chairmen of the committees in the other body, we will fight for that.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(By unanimous consent, Mr. ROE was allowed to proceed for 5 additional minutes.

Mr. ROE. Let me close on this point: Mention was made that the other body has a rule that if there is not a report from the corps filed at a certain time that they will not consider the project.

May I respectfully suggest to all of us in this House today that there are a host of projects that do not have final reports that are in this bill, and that is also true of the bill in the other body unequivocably. So I suggest if we could impose upon the distinguished gentleman from California to have confidence, and faith, and trust, that we believe in what he is trying to do, have extended enormous energy to be of help, withdraw this amendment and not stop the project, and let us work together to achieve it.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from New Jersey.

Mr. HOWARD. Mr. Chairman, I thank the gentleman for yielding and would like to associate myself with the remarks that have been made here this afternoon. We will be completing this legislation and going into conference with the other body, and we have said, those of us who will be the conferees, that this will be a top-priority item in the conference.

It has been said that perhaps the other body will not accept any projects unless they are agreed to by the Corps of Engineers, or OMB, or the White House. As the gentleman is well aware, as far as this committee has been concerned, it is not downtown that makes policy in this country, it is the Congress of the United States, the House of Representatives and the Senate. I think the gentleman knows of the record of this committee in going to conference with the other body, that we have been strong, and we have been very successful. We intend that in this bill, and we intend that on this one project.

So we are going every step that we can, except saying that we would in some way dump the whole bill if this is not complete. We just cannot quite say that but I certainly feel in my heart that when we come back with the conference report the gentleman will be well satisfied with what we do.

Mr. PACKARD. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from California.

Mr. PACKARD. I certainly agree with the subcommittee chairman as to what our intent and our approach ought to be. I think the worst thing that we could do would be to strike this project from this bill. I think we need to sit down and determine how we can best work with the other body and the conference committee to accomplish our common objectives.

I do not think we are that far apart on our objectives. The problem is simply how to devise the language. In our efforts to get that done, I certainly concur with the chairman.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield to me?

Mr. ROE. Of course, I yield to the gentleman from California.

Mr. BROWN of California. Again, let me reiterate that I understand and appreciate the efforts that have been made by all, by the chairman of the subcommittee, the chairman of the full committee, the ranking minority member to protect the integrity of the whole project here.

In their anxiety to reassure me, they have made a number of changes in the bill. Unfortunately, we all understand the fragility of legislative language, and if the chairman will permit me to reference his last amendment, which he mentioned, and I quote the language "construction of the upper Santa Ana River Dam portion of the project shall proceed at the same time as construction of upstream portions of the project in San Bernadino and Riverside County," there is no other upstream portion but this dam.

What I want to see in that bill is language that says that construction of the upstream dam shall proceed at the same time as the downstream portions of the project in Orange County. Then I would be protected, if we can depend upon any legislative language to protect us. And I would urge that the next time the staff drafts an amendment that they look at it a little more closely in order to achieve the purpose that they are really seeking here.

Mr. ROE. If I may reclaim my time, sir, I would respectfully suggest to the distinguished gentleman from California that at midnight last night, we were attempting, with a battery of engineers from the Corps of Engineers and billwriters, to help the gentleman, because we believe in what he is trying to achieve.

Now if in some way this committee erred in its language, then I humbly apologize publicly on the floor to the gentleman. I think what is fair play is fair play. We have given you all of the credibility of this committee to fight for what we believe is right, and for what you are trying to achieve. There is no further assurances we can give you other than our word, and on that basis I yield back the balance of my time.

Mr. LEWIS of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield to me briefly?

Mr. LEWIS of California. I will be happy to yield to my colleague from California.

Mr. BROWN of California. Mr. Chairman, I have a feeling that I have offended the distinguished chairman of the subcommittee, and that was the last thing I intended to do.

What I intended to say to the gentleman, and I hope he will appreciate it, is that I think his word is far more important in this situation than any of the language in this bill. And it is his word that I rely upon, and it is his word that might lead me to withdraw this amendment.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of California. I will be happy to yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, I cannot afford the luxury, I found out in my public career, to get angry. Life is too short for that.

I think what we achieve together in life is trying to get something done and that is what is important. I am very honored for what—yes, I will say that I am very honored for what the gentleman said. I would on the basis of what he just said give him that assurance, and would humbly request that he withdraw his amendment, and give us a chance to work this out.

Mr. BROWN of California. Mr. Chairman, will the gentleman yield further?

Mr. STANGELAND. Mr. Chairman, will the gentleman yield to me?

Mr. LEWIS of California. I will be happy to yield to the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding and would be happy to join my chairman in giving the gentleman from California [Mr. BROWN] the same kind of assurances on my part that the gentleman from New Jersey has just given.

Mr. LEWIS of California. Mr. Chairman, if I could take just a moment, I would like to speak to the point that the chairman, and the gentleman from New Jersey [Mr. ROE] and my ranking member have just made. We have had a long history of working on this project, and especially with this committee, and with the gentleman from New Jersey. I cannot recall a circumstance in my own public experience where I have seen more bipartisan cooperation to accomplish this project. Indeed, from the day I came to the

House and had the honor and privilege of serving on the Committee on Public Works and Transportation, the Santa Ana River project was before us, and the chairman of the committee, the ranking members involved on both sides of the aisle recognized the critical circumstances that we face in southern California and wanted to cooperate fully with us in moving toward a reasonable solution to that difficulty.

In the initial stages of my own involvement there was general agreement that the all-river plan, including the Mentone Dam, should be a part of the project. At that point in time, the committee was taking us at our word and expressed a willingness to go along with that huge project.

It was only after local leaders in the San Bernadino and Riverside County wanted to look again that the committee responded once again by expressing their will to support an appropriation in 1983 that directed the Corps of Engineers to look for possible alternatives, to the controversial Mentone Dam.

The corps, responding to our direction, did so, and that led to the alternative proposal that is really before us today. This comprehensive solution addresses the downstream problems as well as the upstream element in the Santa Ana canyon. This alternative caused us to spend $2 million in 1983 and 1984, but will save us $228 million.

I think it is critical to realize that my colleague from San Diego, the gentleman from California [Mr. PACKARD], is exactly correct when he pointed out that we are in a very delicate situation at this moment. Presently the Senate water resources bill does only authorize the downstream projects or a portion of the projects. Indeed, if we should strike the Santa Ana from this bill, as is suggested originally by this amendment, we would find ourselves in a circumstance where when we went to conference with the other body, we would have an item to negotiate.

It is critically important that we keep this project in our bill so that at least we can undo the language from the other body.

I must say that the other body has been more than responsive as well. While they have indicated that they do have a rule which does not finally authorize projects, at least in terms of committee action, until a final report has been signed by the Corps of Engineers, they have indicated very clearly that if an amendment should be presented on the floor by the Senators from California that would amend their language to include the upper reaches authorization, that they would tend to look positively upon that amendment.

Nevertheless, if we do not delete the Santa Ana now at least we will have a foundation for discussion in the conference committee.

Mr. Chairman, it is very important for us to realize that dealing with the corps in the first place is at best difficult. Their process is an extended one. It takes a number of years.

The CHAIRMAN. The time of the gentleman from California [Mr. LEWIS] has expired.

(By unanimous consent, Mr. LEWIS of California was allowed to proceed for 2 additional minutes.)

Mr. LEWIS of California. Mr. Chairman, we have been involved in attempting to come to a legislative solution of the Santa Ana difficulty for all of the time that I have been in the Congress and longer. Indeed, I do not have a crystal ball, but it is very clear that at some time in the future, we are going to have that 150- or that 200-year flood.

We are talking about a floodplain in which there are thousands of lives potentially at risk, maybe as much as $18 billion of property. My crystal ball does not tell me whether we will have the 200-year flood next year or 5 years from now, but not to go forward, to even consider risking the deauthorization to me would only open the possibility of indeed standing in the way of that flood as it rushed to Orange County. I do not think my colleague from California [Mr. BROWN] wishes to do that.

It is very apparent that the committee is being more than cooperative at this moment, as they have been in the past. I really rise today to express my grave concern about the gentleman's proposed amendment which would strike this project, and I urge my colleague to withdraw his amendment.

The CHAIRMAN. The time of the gentleman from California [Mr. LEWIS] has again expired.

(On request of Mr. BROWN of California, and by unanimous consent, Mr. LEWIS of California was allowed to proceed for 1 additional minute.)

Mr. BROWN of California. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of California. I will be happy to yield to the gentleman.

Mr. BROWN of California. I appreciate the gentleman's fine statement. I think we are reaching a common understanding of the situation here.

The gentleman knows that if that 200-year flood comes, it is his district that is going to get washed out first. Would the gentleman confirm that?

Mr. LEWIS of California. I beg your pardon?

Mr. BROWN of California. I say that if that 200-year flood comes, it is your district that is going to be washed out first because you are right at the foot of the mountain.

Mr. LEWIS of California. Frankly, my crystal ball is not even that clear. But I do know that if we do have the 200-year flood, we all have a case for somebody who has a higher authority than you or I.

Mr. BROWN of California. May I ask the gentleman one more question?

Mr. LEWIS of California. Surely.

Mr. BROWN of California. If I should withdraw my amendment and the bill passes, and is signed into law and if it authorizes only a portion of the project, omitting the upper Santa Ana River Dam, that still does not guarantee that the project will be built unless the Appropriations Committee appropriates the money for it.

Would the gentleman indicate his attitude to me about appropriating money for a project that did not include any flood control protection for his district?

Mr. LEWIS of California. I will be happy to try to respond to the gentleman.

In the appropriations bill that involved the energy conference report from last year, with the cooperation of the chairman of the subcommittee, the authorizing committee as well as the cooperation of the gentleman from California [Mr. FAZIO] and the others, there was language inserted that specifically attempted to go as far as one could conceivably go to assure the kind of development of this project that would see that all parts of it went forward together. That is my view and attitude. It is the view expressed by the Appropriations Committee and, indeed, I believe it is the view of the committee. That will continue to be my position on this issue.

Mr. BROWN of California. I appreciate the gentleman's comment.

Mr. McCANDLESS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have listened to the the dialog of my colleagues from California, those who assist me in representing that regional area, a critical area as far as flood control is concerned. At this time, I draw on some 12 years of knowledge in another body serving as the flood control management for the area, and the length of time that it has taken us to get to this point, a point where we have an agreement of three counties on one subject, which in itself is a small miracle, but within those counties, we not only have incorporated cities that finally have agreed, which is a large miracle, but we have all of the various areas, regional and otherwise, communities that are not necessarily a part agreeing after we have provided the alternate to the Mentone Dam.

□ 1420

Thirty days have transpired in the answers session of the system; 15 more are required. It is my understanding that the preliminary report will be approved sometime in December, around the 15th; possibly earlier if we make

that take place, and that is something that people have been working for something like 50 years off and on, but in reality the last 12 years will have come to a culmination.

I would ask my colleague from California [Mr. BROWN] to assist me in representing these areas of critical importance. To take a second look at this with the idea in mind that the blocks are finally in place to complete the project in its entirety: The communities, the jurisdictions, the Corps of Engineers and the expressed favoritism by those two Members of the other body who represent the area as well as the mechanics of the conference committee that we can move forward on this project and provide the much-needed help and essential emergency value that this flood control system provides.

I ask my colleague to certainly reconsider, if he would, his amendment for the purposes that I have referred to.

Mr. BADHAM. Will the gentleman yield?

Mr. McCANDLESS. I yield to the gentleman.

Mr. BADHAM. I thank the gentleman for yielding.

Mr. Chairman, from time to time as one of the concerned Members of this body on this subject of the Santa Ana River Basin, there were times when I felt constrained to oppose this project because of its huge magnitude, and I will have to say that as the project went on, and I, working with others got the project to a more manageable and realistic point, that at that time I became in support of the project, which was scaled down in cost and would do practically all the needed things to be done to solve the flood control problems in that area.

I remain now in support of that project, and I thank the committee for getting it this far. So I, too, would join my distinguished colleague and good friends from California, in that area of southern California, in asking the gentleman who has offered this amendment to very seriously consider not going ahead with that amendment, because it would put the project back to zero, and I think the time is now to go ahead.

Mr. McCANDLESS. I would conclude, Mr. Chairman, simply by saying that there are tributary projects that are a part of this master project that play a very important part in the drainage of the area in question.

Without the master plan, or the backbone system, the other tributaries are put on the back burner, on an indefinite basis, and contrary to some language that we saw here earlier in this body, those tributaries and those projects are being shared by a number of jurisdictions as far as the financial responsibility is concerned, and only waiting for the approval of the master plan of the Santa Ana River project.

So this is a double digit type of situation, where one level is waiting on the other level to contribute to the overall protection of the people in the area.

Mr. FAZIO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will be very brief. I simply would like to say that I think the gentleman from Riverside County, Mr. BROWN, deserves a great deal of credit for the role that he has played on behalf of the upstream constituencies of this project. There is no question that the work that he did with the cooperation of Mr. McCANDLESS and Mr. LEWIS was instrumental in sensitizing the Appropriations Committee, as it funded the remaining elements of the study, which will lead eventually to the administration's support for a modified Santa Ana River project authorization.

The role he played was crucial, and I think today in bringing this very contentious issue to the attention of his colleagues here on the floor, and certainly in gaining the kind of concessions that I believe he has legitimately derived from the gentlemen from New Jersey [Mr. HOWARD and Mr. ROE], he continues to serve his constituency to the utmost.

This is a very expensive project: $1.2 billion in fact. It is a very important one at the same time. A standard flood in Orange County, in the downstream area, could very easily destroy $11 billion worth of property. I think it is very clear that the cost/benefit ratio argues for the construction of this project.

Mr. Chairman, I think the players have all had their say. I think it is important, however, to note that there is a statewide and perhaps even national interest in this. It is clear that every drop of water that we can conserve in southern California means less that we have to import from northern California or somewhere else in the Colorado River Basin, and I think it is particularly important that the issue of water conservation was addressed in the appropriations language this year, funding the study, and it will I am sure be included in the authorization when it is finally worked out.

So I would like to conclude by saying that I concur with the general consensus that is emerging that we have to go forward, but with more sensitivity for the protection of the upstream watershed and the need to conserve our scarce water resources.

At this point, I yield to my friend from California, Mr. BROWN.

Mr. BROWN of California. I thank my friend for yielding. I am grateful for his kind words.

I am somewhat apologetic at taking the time of the House to go into this project in such detail, but as the gentleman in the well has said, this is the largest single project in the bill; it is $1.2 billion. That one little dam in that one little circle up there on the map is a half a billion dollars. It is not chicken feed we are talking about.

The implications in terms of policy are very widespread. So I think that the time has been well spent, in getting a better understanding of the project, and from my standpoint, getting a feeling that the key people on the Committee on Public Works are committed to this project as a whole; not to some bifurcated project.

I am also somewhat reassured to know of the support that this position has in the Committee on Appropriations, where the gentleman in the well serves, and where my good friend from San Bernardino County also serves. I think if anything should go wrong and we are unable to resist the blandishments of the other body in conference, we might still have a secondary line of defense in the appropriations committee.

So with these understandings, Mr. Chairman, I ask unanimous consent to withdraw my amendment at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. PACKARD. Mr. Chairman, reserving the right to object, I simply want to take a moment to thank the gentleman from California [Mr. BROWN] for withdrawing the amendment and again commit myself to work with him in trying to accomplish the objectives that we have talked about.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The amendment is withdrawn.

Are there further amendments to title III of the bill?

If not, the clerk will designate title VI.

The text of title IV is as follows:

TITLE IV—SHORELINE PROTECTION

SEC. 401. (a) The following works of improvement for the benefit of shoreline protection are hereby adopted and authorized to be prosecuted by the Secretary substantially in accordance with the plans and subject to the conditions recommended in the respective reports hereinafter designated in this section, except as otherwise provided, or in accordance with such plans as the Secretary determines are advisable in any case in which there is no report designated.

ROCKAWAY INLET TO NORTON POINT, NEW YORK

The project for shoreline protection, Atlantic Coast of New York City from Rockaway Inlet to Norton Point: Report of the Chief of Engineers, dated August 18, 1976, House Document Numbered 96-23, includ-

ing beach fill up to 250 feet beyond the historical shoreline as described in the report of the District Engineer, New York District, dated August 1973, at an estimated cost of $9,400,000. The non-Federal share of the cost of construction and nourishment of the additional beach fill shall be 50 per centum.

CAPE MAY INLET TO LOWER TOWNSHIP, NEW JERSEY

The project for shoreline protection, Cape May Inlet to Lower Township, New Jersey: Report of the Chief of Engineers, dated December 23, 1981, including construction of beach erosion mitigation measures from Cape May Inlet to Lehigh Avenue in Cape May Point Borough substantially in accordance with Plan A of the Phase I General Design Memorandum, titled "Cape May Inlet to Lower Township, New Jersey", dated August 1980, at an estimated cost of $40,000,000.

ATLANTIC COAST OF MARYLAND (OCEAN CITY)

The project for shoreline protection, Atlantic Coast of Maryland (Ocean City) and Assateague Island, Virginia: Report of the Chief of Engineers, dated September 29, 1981, at an estimated cost of $22,718,000.

WILLOUGHBY SPIT, VIRGINIA

The project for shoreline protection, Willoughby Spit and Vicinity, Norfolk, Virginia: Report of the Chief of Engineers, dated April 17, 1984, at an estimated cost of $2,583,000.

VIRGINIA BEACH, VIRGINIA

The project for beach erosion control and hurricane protection, Virginia Beach, Virginia: Report of the Chief of Engineers, dated May 22, 1985, at an estimated cost of $27,344,000.

WRIGHTSVILLE BEACH, NORTH CAROLINA

The project for shore and hurricane wave protection, Wrightsville Beach, North Carolina: Report of the Chief of Engineers, dated December 19, 1983, at an estimated annual cost of $260,000.

FOLLY BEACH, SOUTH CAROLINA

The project for shoreline protection, Folly Beach, South Carolina: Report of the Chief of Engineers, dated March 17, 1981, at an estimated cost of $1,174,000.

PANAMA CITY BEACHES, FLORIDA

The project for shoreline protection, Panama City Beaches, Florida: Report of the Chief of Engineers, dated July 8, 1977, House Document Numbered 96-65, at an estimated cost of $28,100,000.

ST. JOHNS COUNTY, FLORIDA

The project for shoreline protection, St. Johns County, Florida: Report of the Chief of Engineers, dated February 26, 1980, at an estimated cost of $8,140,000. To the maximum extent feasible, the Secretary shall construct such project so as to avoid adverse effects on sea turtle nesting.

CHARLOTTE COUNTY, FLORIDA

The project for shoreline protection, Charlotte County, Florida: Report of the Chief of Engineers, dated April 2, 1982, at an estimated cost of $1,470,000. To the maximum extent feasible, the Secretary shall construct such project so as to minimize the harm to marine borrow areas and reefs.

INDIAN RIVER COUNTY, FLORIDA

The project for shoreline protection, Indian River County, Florida: Report of the Chief of Engineers, dated December 21, 1981, House Document Numbered 98-154, at an estimated cost of $2,550,000, except that the non-Federal share of the cost of the Sebastian Inlet State Park segment shall be 30 percent. To the maximum extent feasible, the Secretary shall construct such project so as to avoid adverse effects on sea turtle nesting.

DADE COUNTY, FLORIDA

The project for shoreline protection, Dade County, north of Haulover Beach Park, Florida: Report of the Chief of Engineers, dated December 27, 1983, at an estimated cost of $7,490,000. To the maximum extent feasible, the Secretary shall construct the project so as to minimize adverse effects on coral reefs.

MONROE COUNTY, FLORIDA

The project for shoreline protection, Monroe County, Florida: Report of the Chief of Engineers, dated April 22, 1984, at an estimated cost of $1,561,000, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall study the effects that construction, operation, and maintenance of the proposed project (other than the portion of the project consisting of Smathers Beach) may have on the seagrass community in the project area. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for modifications in the project which the Secretary determines to be necessary and appropriate to minimize the adverse effects of such construction, operation, and maintenance on such seagrass community. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project (other than the portion of the project consisting of Smathers Beach) unless such acquisition and actual construction have been approved by resolution adopted by each such committee. The portion of the project consisting of Smathers Beach shall include any measures which the Secretary determines, in consultation with the United States Fish and Wildlife Service, the Environmental Protection Agency, and the National Marine Fisheries Service, are appropriate to minimize adverse effects from carrying out such portion on the seagrass community.

PRESQUE ISLE PENINSULA, ERIE, PENNSYLVANIA

The project for shoreline protection, Presque Isle Peninsula, Erie, Pennsylvania: Report of the Chief of Engineers, dated October 2, 1981, at an estimated cost of $18,200,000.

CASINO BEACH, CHICAGO, ILLINOIS

The project for shoreline protection, Interim II, Casino Beach, Chicago, Illinois: Report of the Chief of Engineers, dated September 26, 1984, at an estimated cost of $3,320,000.

ILLINOIS BEACH STATE PARK, ILLINOIS

The project for shoreline protection, Illinois Beach State Park, Illinois described as alternative 3A in Interim Report 1, Illinois-Wisconsin Stateline to Waukegan of the District Engineer, Chicago District, dated June 1982, at an estimated cost of $11,900,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (b) of this section.

INDIANA SHORELINE, INDIANA

The project for shoreline protection, Indiana Shoreline Erosion, Indiana: Report of the Chief of Engineers, dated November 18, 1983, at an estimated cost of $7,920,000.

MAUMEE BAY, LAKE ERIE, OHIO

The project for shoreline protection for the southeast shore of Maumee Bay State Park, Ohio: Report of the Chief of Engineers, dated July 9, 1984, at an estimated cost of $8,485,000. The requirements of section 221 of the Flood Control Act of 1970 (Public Law 91-611) shall not apply to any agreements between the Federal Government and the State of Ohio for local cooperation as a condition for the construction of such project. The Secretary is authorized to contract with the State of Ohio on the items of local cooperation for such project, which are to be assumed by the State, notwithstanding that the State may elect to make its performance of any obligation contingent upon the State legislature making the necessary appropriations and funds being allocated for the same or subject to the availability of funds on the part of the State.

(b) In the case of any project authorized by subsection (a) of this section for which a final report of the Chief of Engineers has not been completed before the date of enactment of this Act, the Secretary shall, as soon as possible after the date of enactment of this Act, transmit a copy of any final environmental impact statement required by section 102(2)(C) of the National Environmental Policy Act of 1969, and any recommendations of the Secretary, with respect to such project to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such Committee.

(c) The Secretary is authorized and directed to design and construct an erosion control structure approximately 8,200 feet in length on the western shore of Tangier Island, Virginia, adequate to protect such island from further erosion, at an estimated cost of $3,500,000. Such project shall be carried out on an emergency basis, in view of the national, historic, and cultural value of the island and in order to protect the Federal investment in public facilities.

(d) The Secretary is authorized to carry out the project for shore protection at Coconut Point, Tutuila Island, American Samoa, including a 3,600-foot long rock revetment to protect communal lands and public facilities, at an estimated cost of $1,500,000.

(e) If any provision in any report designated by subsection (a) recommends that a State contribute in cash 5 percent of the construction costs allocated to non-vendible project purposes and 10 percent of the construction costs allocated to vendible project purposes, such provision shall not apply to the project recommended in such report.

SEC. 402. (a) The Secretary shall undertake demonstration projects for shoreline erosion control at the following communities in New Jersey: Fort Elsinboro, Sea

Breeze, Gandys Beach, Reeds Beach, Pierces Point, and Fortescue.

(b) Such demonstration projects shall be carried out in cooperation with Federal, State, and local agencies, and private organizations.

(c) Such demonstration projects may be carried out on private or public lands except that privately owned lands shall not be acquired under authority of this section. In the case of sites located on private or non-Federal public lands, the demonstration projects shall be undertaken in cooperation with non-Federal interests who shall pay 25 percent of construction costs at each site and assume operation and maintenance costs upon completion of the project.

(d) The Secretary shall prepare and submit to Congress a report on each site during the fiscal year following completion of construction at that site. Such report shall include an analysis of the technique or techniques used and an evaluation of their functioning to that point.

(e) There is authorized to be appropriated not to exceed $12,500,000 to carry out this section for fiscal years beginning after September 30, 1985.

The CHAIRMAN. Are there amendments to title IV of the bill?

If not, the Clerk will designate title V.

The text of title V is as follows:

TITLE V—WATER RESOURCES CONSERVATION AND DEVELOPMENT

SEC. 501. (a) The following works of improvement for water resources development and conservation and for other purposes are hereby adopted and authorized to be prosecuted by the Secretary substantially in accordance with the plans and subject to the conditions recommended in the respective reports hereinafter designated in this section, except as otherwise provided, or in accordance with such plans as the Secretary determines advisable in any case in which there is no report designated.

NEPONSET RIVER, MILTON TOWN LANDING TO PORT NORFOLK, MASSACHUSETTS

The project for dredging, Neponset River, Milton Town Landing to Port Norfolk, Massachusetts, including the disposal of the dredged material at sea, at an estimated cost of $1,500,000.

MERRIMACK RIVER, MASSACHUSETTS

The project for navigation, Merrimack River, Massachusetts, consisting of (1) improvements along the Merrimack River from Lowell, Massachusetts, to Lawrence, Massachusetts (including a concrete weir running eastward from the confluence of the Concord River and the Merrimack River parallel to the southern bank of the Merrimack River), (2) a lock at the end of the channel created by the weir, and (3) such other measures as the Secretary deems necessary in the interest of navigation, at an estimated cost of $8,000,000, including any modifications that may be recommended by the Secretary with respect to such project under subsection (b) of this section.

BIG RIVER RESERVOIR, RHODE ISLAND

The project for flood control, Big River Reservoir, Rhode Island: Report of the Chief of Engineers, dated March 9, 1983, at an estimated cost of $39,900,000, including the acquisition of such additional lands as the Secretary recommends in the report transmitted under this paragraph. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall reevaluate the acquisition of mitigation lands recommended in the report of the Chief of Engineers for purposes of determining the need for additional lands for mitigation of fish and wildlife losses. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such reevaluation, including a description of any additional lands determined by the Secretary to be necessary and appropriate for mitigation of fish and wildlife losses. No appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee.

OLCOTT HARBOR, NEW YORK

The project for navigation, Olcott Harbor, New York: Report of the Chief of Engineers, dated June 11, 1980, at an estimated cost of $6,230,000. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall conduct additional studies of the effects of the project on fish and wildlife resources. Such studies shall include the development and testing of a physical model of the proposed plan. The Secretary is authorized to undertake any additional measures which he determines necessary and appropriate to minimize any adverse effects of the project on fish and wildlife production and habitat.

HAMPTON ROADS DEBRIS REMOVAL, VIRGINIA

The project for the removal of debris from Hampton Roads and Vicinity, Virginia: Report of the Chief of Engineers, dated October 19, 1983, at an estimated cost of $2,280,000.

RUDEE INLET, VIRGINIA

The project for navigation and shoreline protection, Rudee Inlet, Virginia Beach, Virginia: Report of the Division Engineer, dated February 4, 1983, at an estimated cost of $1,040,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (b) of this section.

ATLANTIC INTRACOASTAL WATERWAY BRIDGES, NORTH CAROLINA

The project for replacement of Atlantic Intracoastal Waterway Bridges, North Carolina: Report of the Chief of Engineers, dated October 1, 1975, House Document Numbered 94-597, at an estimated cost of $8,800,000, which shall be in addition to, and not in lieu of, any amounts authorized to be appropriated for such project under section 101 of the River and Harbor Act of 1970.

RICHARD B. RUSSELL DAM AND LAKE, GEORGIA AND SOUTH CAROLINA

The project for mitigation of fish and wildlife losses at Richard B. Russell Dam and Lake Project, Savannah River, Georgia and South Carolina: Report of the Chief of Engineers, dated May 11, 1982, House Document Numbered 97-244, at an estimated cost of $20,200,000, including utilization for purposes of fish and wildlife habitat mitigation of such Federal lands as may be described by the Secretary in the report transmitted under this paragraph. The Secretary and the State of South Carolina, in consultation with the United States Fish and Wildlife Service, shall identify those Federal lands at Clarks Hill Lake to be utilized for purposes of fish and wildlife habitat mitigation. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report describing the lands so identified. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee.

METROPOLITAN ATLANTA AREA, GEORGIA

The project for water supply, Metropolitan Atlanta Area, Georgia: Reports of the Chief of Engineers, dated June 1, 1982, and September 7, 1983, at an estimated cost of $26,400,000, including such additional measures as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall further evaluate the possible effects of the proposed project on fish and wildlife habitat and related resources. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such evaluation, along with recommendations for additional measures which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of the project on fish and wildlife habitat and related resources. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution of the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

JACKSONVILLE HARBOR (MILL COVE), FLORIDA

The project for navigation, Jacksonville Harbor (Mill Cove), Florida: Report of the Chief of Engineers, dated February 12, 1982, House Document Numbered 98-233, at an estimated cost of $6,600,000, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph. The Secretary, in consultation with the State of Florida, shall study the adequacy of available dredged material disposal areas for construction, operation, and maintenance of the project and the potential of such disposal areas for recreational development. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for modifications in the project which the Secretary determines to be necessary and appropriate to assure that adequate dredged material disposal areas are available for construction, operation, and maintenance of the project and recommendations for a recreational master plan. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be

made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee. After completion of the project, the Secretary shall monitor and evaluate the effectiveness of the project in reducing shoaling.

PORT CANAVERAL HARBOR, FLORIDA

The project for mitigation of fish and wildlife losses at the Port Canaveral West Turning Basin Project, Florida, in accordance with a plan transmitted under this paragraph. The Secretary, the United States Fish and Wildlife Service, the National Marine Fisheries Service, the Administrator of the Environmental Protection Agency, and appropriate agencies of the State of Florida and political subdivisions thereof shall develop, and transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate, a plan for mitigation of fish and wildlife losses resulting from the Port Canaveral West Turning Basin Project. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project unless such plans have been approved by resolution adopted by each such committee.

YAZOO BACKWATER AREA, MISSISSIPPI

The project for mitigation of fish and wildlife losses at the Yazoo Backwater Project, Mississippi: Report of the Chief of Engineers, dated July 12, 1984, at an estimated cost of $17,700,000. The project shall include acquisition of 40,000 acres for mitigation of project-induced fish and wildlife losses as recommended in the report of the District Engineer, Vicksburg District, dated July 1982. A portion of such 40,000 acres which the Secretary, in consultation with the United States Fish and Wildlife Service and the Governors of the States of Mississippi and Arkansas, may determine may be acquired from willing sellers in the State of Arkansas.

GREENVILLE HARBOR, MISSISSIPPI

The project for navigation, Greenville Harbor, Mississippi: Report of the Chief of Engineers, dated November 15, 1977, as amended by the supplemental report of the Chief of Engineers dated February 22, 1982, at an estimated cost of $30,300,000, except that initial construction of the project shall be to the full project dimensions, including a channel width of 500 feet and a depth of 12 feet.

VICKSBURG HARBOR, MISSISSIPPI

The project for navigation, Vicksburg Harbor, Mississippi: Report of the Chief of Engineers, dated August 13, 1979, at an estimated cost of $60,700,000, except that initial construction of the project shall be to the full project dimensions.

MEMPHIS HARBOR, MEMPHIS, TENNESSEE

The project for navigation, Memphis Harbor, Memphis, Tennessee: Report of the Chief of Engineers, dated February 25, 1981, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph, at an estimated cost of $40,500,000, except that initial construction of the project shall be to the full project dimensions and the project shall include acquisition of such additional lands, but not to exceed 500 acres, for mitigation of losses of bottomland hardwood habitat as may be recommended by the Secretary in such report. The Secretary shall reevaluate, in consultation with the Fish and Wildlife Service, the need for mitigation of project-induced losses of bottomland hardwood habitat. The Secretary, in consultation with the Environmental Protection Agency, shall conduct further studies of the quality of the water in the project area and the need for measures to prevent adverse effects on the quality of the water. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such reevaluation and study, along with recommendations for additional lands which the Secretary determines to be necessary and appropriate to mitigate project-induced losses of bottomland hardwood habitat and for additional measures which the Secretary determines necessary and appropriate to prevent adverse effects on water quality. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such Committee.

LAKE PONTCHARTRAIN NORTH SHORE, LOUISIANA

The project for navigation, Lake Pontchartrain North Shore, Louisiana: Report of the Chief of Engineers, dated February 14, 1979, at an estimated cost of $1,260,000.

ATCHAFALAYA BASIN, LOUISIANA

The project for flood control, Atchafalaya Basin Floodway System, Louisiana: Report of the Chief of Engineers, dated February 28, 1983, at an estimated cost of $200,000,000.

RED RIVER WATERWAY, LOUISIANA

The project for mitigation of fish and wildlife losses, Red River Waterway, Louisiana: Report of the Chief of Engineers, dated December 28, 1984, at an estimated cost of $10,500,000.

CABIN CREEK, WEST VIRGINIA

The project for flood damage prevention features, Cabin Creek, West Virginia: Report of the Chief of Engineers, dated March 1, 1979, at an estimated cost of $5,100,000, including channel improvement for 10.5 miles on Cabin Creek, establishment of flood plain management guidelines, and supplemental flood proofing. The construction of such features shall be coordinated with any construction by other Federal agencies of other features described in such report under applicable Federal laws.

OBION CREEK, KENTUCKY

The project for mitigation of fish and wildlife losses, West Kentucky Tributaries Project, Obion Creek, Kentucky: Report of the Chief of Engineers, dated September 16, 1980, at an estimated cost of $4,000,000, except that (1) the Secretary, in consultation with the United States Fish and Wildlife Service, shall acquire and preserve not less than 6,000 nor more than 9,000 acres of woodland for mitigation of project-induced woodland and wetland habitat losses, and (2) the land for mitigation of damages to fish and wildlife shall be acquired as soon as possible from available funds, including the Environmental Protection and Mitigation Fund established by section 1104 of this Act.

MUDDY BOGGY CREEK, PARKER LAKE, OKLAHOMA

The project for flood control and water supply, Parker Lake, Muddy Boggy Creek, Oklahoma: Report of the Chief of Engineers, dated May 30, 1980, at an estimated cost of $43,000,000.

FORT GIBSON LAKE, OKLAHOMA

The project for Fort Gibson Lake, Oklahoma: Report of the Chief of Engineers, dated August 16, 1984, at an estimated cost of $24,100,000.

HARRY S TRUMAN DAM AND RESERVOIR, MISSOURI

The project for modification of the Harry S Truman Dam and Reservoir Project, Missouri: Report of the Chief of Engineers, dated December 21, 1981, at an estimated cost of $2,100,000. The Secretary, in consultation with the State of Missouri and the United States Fish and Wildlife Service, shall acquire lands, or designate project joint-use lands, for mitigation of fish and wildlife losses in addition to those lands recommended for such purposes by such report; except that the total acreage of all mitigation lands shall not exceed 1,000 acres.

TRIMBLE WILDLIFE AREA, SMITHVILLE LAKE, LITTLE PLATTE RIVER, MISSOURI

The project for replacement of the Trimble Wildlife Area, Smithville Lake, Little Platte River, Missouri: Report of the Chief of Engineers, dated September 22, 1977, House Document Numbered 95-389, at an estimated cost of $7,870,000.

ST. LOUIS HARBOR, MISSOURI AND ILLINOIS

The project for navigation, St. Louis Harbor, Missouri and Illinois: Report of the Chief of Engineers, dated April 30, 1984, at an estimated cost of $11,300,000, except that initial construction of the project shall be to the full project dimensions.

MISSOURI RIVER MITIGATION, MISSOURI, KANSAS, IOWA, AND NEBRASKA

The project for mitigation of fish and wildlife losses, Missouri River Bank Stabilization and Navigation Project, Missouri, Kansas, Iowa, and Nebraska: Report of the Chief of Engineers, dated April 24, 1984, at an estimated cost of $50,500,000. The Secretary shall study the need for additional measures for mitigation of losses of aquatic and terrestrial habitat caused by such project and shall report to Congress, within three years after the date of enactment of this Act, on the results of such study and any recommendations for additional measures needed for mitigation of such losses.

DAVENPORT, IOWA (NAHANT MARSH)

The Davenport, Iowa Local Protection Project—Fish and Wildlife Mitigation Plan: Report of the Chief of Engineers, dated July 9, 1979, House Document Numbered 97-218, at an estimated cost of $414,000.

HELENA HARBOR, PHILLIPS COUNTY, ARKANSAS

The project for navigation, Helena Harbor, Phillips County, Arkansas: Report of the Chief of Engineers, dated October 17, 1980, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph, at an estimated cost of $37,800,000, except that initial construction of the project shall be to the full project dimensions and the project shall include acquisition of such additional lands as may be recommended by the Secretary in such report. The Secretary, in consultation with the Fish and Wildlife Service,

shall evaluate the adequacy of the recommended measures for mitigation of losses of wildlife habitat. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such evaluation, along with recommendations for additional lands which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of the project on fish and wildlife habitat. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such committee.

WHITE RIVER NAVIGATION TO BATESVILLE, ARKANSAS

The project for navigation, White River Navigation to Batesville, Arkansas: Report of the Chief of Engineers, dated December 23, 1981, including such modifications as may be recommended by the Secretary in the report transmitted under this paragraph, at an estimated cost of $23,400,000, except that the project shall include 1,865 acres of habitat mitigation lands. The Federal share of the cost of relocation of any oil, natural gas, or other pipeline, any electric transmission cable or line, any communications cable or line, and facilities related to such pipeline, cable, or line (1) the relocation of which is necessary for construction, operation, and maintenance of the project, and (2) which may only be built or commenced if authorized by the Secretary under section 10 of the Act of March 3, 1899 (30 Stat. 1151; 33 U.S.C. 403), shall be 50 percent. The non-Federal share of such cost shall be paid by the owner of the facility being relocated. The acquisition of all lands, easements, and rights-of-way necessary for the project, including lands for disposal of dredged material, shall be at full Federal expense. The Secretary, in consultation with the Fish and Wildlife Service, shall evaluate the effect of the project on the Fat Pocketbook Pearly Mussel. The Secretary shall also evaluate, in consultation with the Fish and Wildlife Service, the feasibility of including weirs in tributary areas to benefit aquatic habitat and is authorized to include them as he determines appropriate. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such evaluations, along with recommendations (A) for additional measures which the Secretary determines to be necessary and appropriate to mitigate the adverse effects of the project on the Fat Pocketbook Pearly Mussel, and (B) for weirs in tributary areas which the Secretary determines to be necessary and appropriate to benefit aquatic habitat. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such Committee. Nothing in this paragraph shall be construed to effect the requirements of Public Law 89-669, as amended.

TRINITY RIVER, TEXAS

The project for the mitigation of fish and wildlife losses, Trinity River, Texas: Report of the Board of Engineers for Rivers and Harbors, dated October 4, 1982, at an estimated cost of $9,460,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (b) of this section for additional mitigation measures.

COOPER LAKE AND CHANNELS, TEXAS

The project for the mitigation of fish and wildlife resource losses, Cooper Lake and Channels, Texas: Report of the Chief of Engineers, dated May 21, 1982, at an estimated cost of $14,700,000, except that the non-Federal share of any portion of the costs of mitigation of fish and wildlife losses attributable to water supply features of the project shall be repaid in accordance with the Water Supply Act of 1958 and the non-Federal share of any portion of the costs of mitigation of fish and wildlife losses attributable to recreation features of the project shall be repaid in accordance with the Federal Water Project Recreation Act.

SACRAMENTO RIVER BANK PROTECTION, CALIFORNIA

The project for mitigation of fish and wildlife losses, Sacramento River Bank Protection Project, California: Reports of the Chief of Engineers, dated September 1, 1981, at an estimated cost of $1,700,000.

SWEETWATER RIVER, CALIFORNIA

The project for mitigation of fish and wildlife losses, Sweetwater River channel improvement project, California: Report of the Division Engineer, dated July 15, 1982, at an estimated cost of $3,477,000, including such modifications as may be recommended by the Secretary with respect to such project under subsection (b) of this section for additional mitigation measures.

LAVA FLOW CONTROL, HAWAII

The project for lava flow control, Island of Hawaii: Report of the Chief of Engineers, dated July 21, 1981, at an estimated cost of $5,030,000.

WAILUA FALLS, WAILUA RIVER, KAUAI, HAWAII

The project for hydroelectric power generation at Wailua Falls, Wailua River, Kauai, Hawaii: Report of the Board of Engineers for Rivers and Harbors, dated July 18, 1983, at an estimated cost of $13,400,000.

CITY WATERWAY, TACOMA, WASHINGTON

The project for the relocation of the boundaries of the City Waterway, Tacoma Harbor, Washington: Report of the Chief of Engineers, dated May 5, 1983, House Document Numbered 98-244, at an estimated cost of $5,000.

MCNARY LOCK AND DAM, WASHINGTON AND OREGON

The project for McNary Lock and Dam, Second Powerhouse, Columbia River, Washington and Oregon, Phase I, General Design Memorandum: Report of the Chief of Engineers, dated June 24, 1981, at an estimated cost of $649,000,000.

BETHEL BANK STABILIZATION, ALASKA

The project for bank stabilization, Bethel, Alaska: Report of the Chief of the Engineers, dated July 30, 1983, at an estimated cost of $15,100,000, including such modifications as may be necessary to accommodate related work undertaken and carried out by non-Federal interests.

KODIAK HARBOR, ALASKA

The project for navigation, Kodiak Harbor, Alaska: Report of the Chief of Engineers, dated September 7, 1976, Senate Document Numbered 96-6, at an estimated cost of $14,500,000.

ST. PAUL ISLAND, ALASKA

The project for navigation, St. Paul Island Harbor, Alaska: Report of the Chief of Engineers, dated August 9, 1983, at an estimated cost of $11,800,000. The cost sharing for the project shall be determined in accordance with section 105 of this Act.

(b) In the case of any project authorized by this section for which a final report of the Chief of Engineers has not been completed before the date of enactment of this Act, the Secretary shall, as soon as possible after the date of enactment of this Act, transmit a copy of any final environmental impact statement required by section 102(2)(C) of the National Environmental Policy Act of 1969, and any recommendations of the Secretary, with respect to such project to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. Except for funds appropriated to the Environmental Protection and Mitigation Fund pursuant to section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by each such Committee.

(c) If any provision in any report designated by this title recommends that a State contribute in cash 5 percent of the construction costs allocated to non-vendible project purposes and 10 percent of the construction costs allocated to vendible project purposes, such provision shall not apply to the project recommended in such report.

SEC. 502. The Secretary is authorized and directed to undertake a demonstration project for the removal of silt and aquatic growth from Albert Lea Lake, Freeborn County, Minnesota, at full Federal expense and at an estimated cost of $4,270,000. The Secretary shall report to the Administrator of the Environmental Protection Agency the plans for and results of such project together with such recommendations as the Secretary determines necessary to carry out the program for freshwater lakes under section 314 of the Federal Water Pollution Control Act.

SEC. 503. (a) The Secretary shall, after consultation with the advisory committee established under subsection (b), carry out a demonstration project for the development, operation, and maintenance of a recreation and greenbelt area on, and along the Des Moines River, Iowa, between the point at which the Des Moines River is intersected by United States Highway 20 to the point downstream at which relocated United States Highway 92 intersects the Des Moines River. Subject to subsections (b) and (c) of this section, such project shall include, but not be limited to—

(1) the construction, operation, and maintenance of recreational facilities and streambank stabilization structures;

(2) the operation and maintenance of all structures constructed before the date of enactment of this Act (other than any such structure operated and maintained by any person under a permit or agreement with the Secretary) within the area described in the Des Moines Recreational River and

Greenbelt Map and on file with the Committee on Public Works and Transportation of the House of Representatives;

(3) such tree plantings, trails, vegetation, and wildlife protection and development and other activities as will enhance the natural environment for recreational purposes; and

(4) the prohibition or limitation by the Secretary of the killing, wounding, or capturing at any time of any wild bird or animal in such areas as may be designated by the Secretary.

(b)(1) The advisory committee referred to in subsection (a) shall be constituted as follows:

(A) five persons shall be appointed by the Governor of Iowa;

(B) two persons shall be appointed by their respective board of supervisors to represent each of Mahaska, Marion, Warren, Jasper, Polk, Dallas, Boone, and Webster Counties;

(C) one person shall be appointed by the mayor of the city of Des Moines and one additional person shall be appointed by the mayor of each other incorporated municipality within whose boundaries a portion of such recreation area lies; and

(D) three employees or officials of the Corps of Engineers shall be appointed by the Secretary.

(2) Each member of the advisory committee shall serve at the pleasures of the authority which appointed such member.

(3) No member of the advisory committee who is not an officer or employee of the United States shall receive compensation on account of his service on the committee or travel expenses or per diem in lieu of subsistence with respect to the performance of services for the committee. Members of such advisory committee who are officers or employees of the United States shall not receive additional compensation on account of their service on the committee.

(4) The advisory committee may elect such officers and spokesmen as it deems appropriate and may appoint such ad hoc committees of interested citizens as it deems appropriate to assist the committee in advising the Secretary.

(c) The construction and maintenance of structures and plant and husbandry activities referred to in subsection (a) of this section shall be conditioned upon the ownership by the United States of the land or interests therein necessary for such purposes.

(d) In carrying out the project described in subsection (a) of this section, the Secretary may acquire by purchase, donation, exchange, or otherwise land and interests therein, as the Secretary determines are necessary to carry out such project. If the Secretary purchases any land or interest therein from any State or local agency, he shall not pay more than the original cost paid by such State or local agency for such land or interest therein. No land or interest therein may be acquired by the United States to carry out such project without the consent of the owner, and nothing herein shall constitute an additional restriction on the use of any land or any interest therein which is not owned by the United States.

(e) Notwithstanding any other provision of law, the Federal share of the project to be carried out pursuant to this section shall be 100 percent of the cost of the project.

(f) The Secretary may enforce paragraph (4) of subsection (a) and such regulations as the Secretary may issue to carry out such paragraph. The Secretary may delegate such enforcement authority to such Federal, State, and local agencies as the Secretary deems appropriate to accomplish the purposes of this section.

(g) There is authorized to be appropriated to carry out this section $8,000,000, for fiscal years beginning after September 30, 1985.

SEC. 504. The Secretary is authorized to carry out the project for beach erosion control, navigation, and storm protection from Hereford Inlet to the Delaware Bay entrance to the Cape May Canal, New Jersey, substantially in accordance with the report of the Chief of Engineers, dated September 30, 1975, at an estimated cost of $40,000,000. The Secretary may construct the beach erosion control, navigation, or storm protection features of the project separately or in combination with the other such features. The non-Federal share for any such feature which is separately constructed shall be the appropriate non-Federal share for that feature.

SEC. 505. The Secretary is authorized to carry out the project for beach erosion control, navigation, and storm protection from Barnegat Inlet to Longport, New Jersey, substantially in accordance with the report of the Chief of Engineers dated October 24, 1975, except that such project shall also include construction of a fisherman walkway on top of a jetty as described in the report of the Chief of Engineers dated January 20, 1983, at an estimated total cost of $61,300,000. The Secretary may construct the beach erosion control, navigation, or storm protection feature of the project separately or in combination with the other such features. The non-Federal share for any such feature which is separately constructed shall be the appropriate non-Federal share for that feature.

SEC. 506. The Secretary shall carry out a demonstration project for the removal of silt, aquatic growth, and other material in Lake George, Hobart, Indiana, and in that part of Deep River upstream of such lake through Lake Station, Indiana, and to construct silt traps or other devices to prevent and abate the deposit of sediment in Lake George and such part of Deep River, at full Federal expense and at an estimated cost of $5,200,000.

SEC. 507. (a) The Secretary is authorized and directed to establish and conduct for a period of five years at multiple sites on the Ohio River and its tributaries a streambank erosion prevention and control demonstration program. The program shall—

(1) identify streambank erosion measures likely to provide the highest degree of protection technically and economically feasible for both high and low flow conditions;

(2) conduct necessary research on the interaction of erodible boundaries with flowing water in order to more accurately predict the behavior and optimum design of protective works;

(3) define and test optimum designs of bed slopes and grade control structures for a wide range of soil and flow conditions;

(4) develop, field test, and evaluate new erosion protection products or methods, including but not limited to earth or rock-filled grids, reinforced earth bulkheads, stabilized mattings for vegetation seeding, and patterned schemes using manufactured blocks in loose, matted, or interconnected configurations;

(5) develop and evaluate engineering techniques to control overbank drainage;

(6) identify and quantify economic losses occurring along the Ohio River and its tributaries due to streambank erosion; and

(7) construct demonstration projects, including bank protection works.

(b) For each demonstration project and streambank measure undertaken under subsection (a) of this section, the Secretary shall evaluate the environmental impacts of such project or measure with respect to both riverine and adjacent land-use values, with the view of minimizing environmental losses.

(c) Demonstration projects authorized by this section shall be undertaken to reflect a variety of geographical and environmental conditions, including naturally occurring erosion problems and erosion caused or incurred by man-made structures or activities. At a minimum, demonstration projects shall be conducted at sites on—

(1) that reach of the Ohio River between the Captain Anthony Meldahl Locks and Dam and the McAlpine Locks and Dam;

(2) the Licking River; and

(3) the Kanawha River in the vicinity of St. Albans, West Virginia.

(d) There is authorized to be appropriated not to exceed $25,000,000 to carry out this section.

(e) The Secretary shall report to Congress each year on work undertaken pursuant to this section.

SEC. 508. (a) The Secretary is authorized to construct demonstration projects for low-cost projects along the shore of the Chesapeake Bay and its tributaries for the control of streambank and shoreline erosion. The Secretary shall select an equal number of projects under this section in each of the States of Maryland, Pennsylvania, and Virginia. In selecting projects in Virginia under this section, the Secretary shall give priority consideration to the shoal at the mouth of the Coan River.

(b) The Federal share of the cost of the demonstration projects under this section shall be 50 percent.

(c) Information gathered in the study conducted under section 54 of the Water Resources Development Act of 1976 shall be used to the extent possible in selecting appropriate projects.

(d) There is authorized to be appropriated for fiscal years beginning after September 30, 1985, $5,000,000 to carry out this section.

SEC. 509. The Secretary is authorized and directed to implement at full Federal cost snagging and clearing and channel rectification measures along the Passaic, Pompton, Pequannock, and Ramapo Rivers, New Jersey, from Beatties Dam in Little Falls on the Passaic River upstream to the confluence of the Pompton River at Two Bridges, upstream along the Pompton River to and including the Pompton Feeder on the Pequannock and Ramapo Rivers, and upstream along the Ramapo River to the Pompton Lakes Dam, and along tributaries of such rivers (including Singac Brook and Weasel Brook), including the modification of such structures, flood proofing, and flood warning measures as determined necessary by the Chief of Engineers, at an estimated cost of $25,000,000. None of the work authorized by this section shall affect the analysis of costs and benefits for projects presently being studied by the Secretary.

SEC. 510. The Secretary is authorized to replace the dike at the Small Boat Harbor, Buffalo Harbor, New York, at an estimated cost of $9,000,000.

SEC. 511. The Secretary is authorized and directed to take such measures as may be necessary to correct erosion problems along the banks of the Red Lake River, Minnesota, approximately one and one-half miles

west of Gentilly, Minnesota, adequate to protect the nearby highway and bridge, at an estimated cost $300,000.

SEC. 512. The Secretary is authorized to perform intermittent dredging and such other work as may be required on the Yazoo River in Mississippi, from Greenwood south, to remove natural shoals as they occur, at an annual average cost of $200,000, so as to allow commerce to continue. Responsible local interests shall agree to (1) provide without cost to the United States all lands, easements, and rights-of-way required for dredging and disposal of dredged materials; (2) accomplish without cost to the United States such alterations, relocations, and rearrangement of facilities as required for dredging and disposal of dredged materials; and (3) hold and save the United States free from damages due to the dredging and disposal of dredged materials.

SEC. 513. The Secretary is authorized and directed to undertake a demonstration project for the removal of silt and stumps from Greenwood Lake and Belcher Creek, New Jersey, at full Federal expense and at an estimated cost of $10,000,000. The Secretary shall report to the Administrator of the Environmental Protection Agency the plans for and results of such project together with such recommendations as the Secretary determines necessary to carry out the program for freshwater lakes under section 314 of the Federal Water Pollution Control Act.

SEC. 514. (a) The Secretary shall take such action as may be necessary to remedy slope failures and erosion problems (1) along the banks of the Coosa River, Alabama, in order to protect the Fort Toulouse National Historic Landmark and Taskigi Indian Mound in Elmore County, Alabama, at an estimated cost of $29,000,000, and (2) along the banks of the Black Warrior River, Alabama, in order to protect the Mound State Monument National Historic Landmark near Moundville, Alabama, substantially in accordance with the study conducted by the District Engineer dated July 20, 1981, at an estimated cost of $4,118,000. Such actions shall be coordinated with the Secretary of the Interior and the State of Alabama.

(b) Prior to initiation of construction of the project authorized by subsection (a), appropriate non-Federal interests shall agree—

(1) to provide without cost to the United States all lands, easements, and rights-of-way necessary for construction and operation of the project;

(2) to hold and save the United States free from damage due to construction, operation, and maintenance of the project, not including damages due to the fault or negligence of the United States or its contractors;

(3) to accomplish without cost to the United States all modifications or relocations of existing sewerage and drainage facilities, buildings, utilities, and highways made necessary by construction of the project; and

(4) to maintain and operate all features of the project after completion, in accordance with regulations prescribed by the Secretary.

SEC. 515. The Secretary is authorized to undertake such measures as may be necessary to maintain the Larkspur Ferry Channel, Larkspur, California, at a depth sufficient for ferry boat service between Marin County and San Francisco, California, at an estimated cost of $500,000.

SEC. 516. The Secretary is authorized to perform dredging in Weeks Bay, Vermilion Bay, and Southwest Pass, Louisiana, to a depth of 13 feet, as necessary to provide a water access route to the Gulf of Mexico from the Port of Iberia Commercial Canal through Weeks Bay, Vermilion Bay, and Southwest Pass, at an estimated cost of $3,000,000.

SEC. 517. The Secretary is authorized to undertake in La Conner, Washington, such bank erosion control measures along the Swinomish Channel as the Secretary determines necessary to prevent damage to structures in the La Conner Historical District, at an estimated cost of $1,177,000.

SEC. 518. The Secretary is authorized to acquire from willing sellers in a timely manner at fair market value 67,000 acres of land for mitigation of wildlife losses resulting from construction and operation of the project for the Tennessee-Tombigbee Waterway, Alabama and Mississippi. Such lands shall be in addition to, and not in lieu of, lands currently owned by the United States in the project area which are designated as wildlife mitigation lands for such project. Of the lands acquired under this section, not less than 20,000 acres shall be acquired in the area of the Mobile-Tensaw River delta, Alabama, and not less than 25,000 acres shall be acquired in the areas of the Pascagoula River, the Pearl River, and the Mississippi River delta, Mississippi. Other lands acquired under this section may be acquired anywhere in the States of Alabama and Mississippi. The Secretary shall select lands to be acquired under this section in consultation with appropriate State and Federal officials. Emphasis shall be placed on acquisition of lands which are predominantly flood plain forest. The States of Alabama and Mississippi shall provide for the management for wildlife purposes of lands acquired under this section and lands currently owned by the United States in the project area which are designated as wildlife mitigation lands for such project. Subject to such amounts as are provided in appropriation Acts, the Secretary shall reimburse such States for such management and initial development costs as specified in a plan for management of mitigation lands to be developed by the Secretary, the United States Fish and Wildlife Service, and the States of Alabama and Mississippi.

SEC. 519. The Secretary is authorized and directed to undertake a demonstration project for the removal of silt and aquatic growth from Sauk Lake and its tributary streams in the vicinity of Sauk Centre, Stearns County, Minnesota, at full Federal expense and at an estimated cost of $2,000,000. The Secretary shall report to the Administrator of the Environmental Protection Agency the plans for and results of such project together with such recommendations as the Secretary determines necessary to carry out the program for freshwater lakes under section 314 of the Federal Water Pollution Control Act.

SEC. 520. The Secretary shall repair and rehabilitate the Muck Levee, Salt Creek, Logan County, Illinois, at an estimated cost of $12,000.

SEC. 521. (a) The Secretary shall, after consultation with the Passiac River Restoration Steering Committee, carry out a demonstration project for bank stabilization and development, operation, and maintenance of a recreation and greenbelt area on public properties on, and along the east bank of the Passaic River, New Jersey, from Dundee Dam to Kearney Point. Such project shall include, but not be limited to—

(1) the construction, operation, and maintenance of recreational facilities (including, but not limited to, a multipurpose pathway described in the Passaic River Restoration Master Plan) and streambank stabilization structures;

(2) terraforming; and

(3) such tree plantings, vegetation and wildlife protection and development, and other activities as will enhance the natural environment for recreational purposes.

(b) The construction and maintenance of structures and plant and husbandry activities referred to in subsection (a) of this section shall be conditioned upon the ownership by the public of the land or interest therein necessary for such purposes. The operation and maintenance of such structures and activities shall be undertaken by the counties or cities owning the lands on which such structures are to be located or on which such activities are to be carried out.

(c) In carrying out the project described in subsection (a) of this section, the Secretary may acquire by purchase, donation, exchange, or otherwise, lands and interests therein as the Secretary and the Passaic River Restoration Steering Committee determine are necessary to carry out such project. No lands or interests therein may be acquired by the United States or any State or local government to carry out such project without the consent of the owner, and nothing herein shall constitute an additional restriction on the use of any lands or interests therein which is not owned by the United States or a State or local government.

(d) Notwithstanding any other provision of law, the Federal share of the project to be carried out pursuant to this section shall be 100 percent of the cost of the project. There is authorized to be appropriated to carry out this section $10,000,000 for fiscal years beginning after September 30, 1985.

SEC. 522. The Secretary is authorized and directed to undertake a project for bank erosion control on the Rillito River in the vicinity to Tucson, Arizona, for the purpose of providing protection against the level of flooding that occurred in October 1983, at an estimated cost of $30,000,000. The Secretary shall include as part of the non-Federal contribution of the project any bank erosion control work on the Rillito River carried out by non-Federal interests after January 1, 1985, which the Secretary determines is reasonably compatible with such project. Costs and benefits resulting from such work shall continue to be included for purposes of determining the economic feasibility of the project.

SEC. 523. The Secretary shall construct the Agat small boat harbor in Guam in accordance with the provisions of section 107 of the River and Harbor Act of 1960. Such project shall be carried out with any available funds.

SEC. 524. The Secretary is authorized and directed to provide protection against stream bank erosion on the Little River in the vicinity of the Highway 41 bridge, Horatio, Arkansas, at an estimated cost of $500,000.

SEC. 525. The Secretary is authorized to take such measures as may be necessary to maintain a harbor of refuge in Swan Creek, Newport, Michigan. Non-Federal interests shall provide a public wharf and such other facilities as may be necessary for a harbor of refuge which shall be open to all on equal terms and such other requirements as the Secretary deems necessary.

SEC. 526. (a) The Secretary is authorized to construct such bank stabilization meas-

ures as the Secretary determines necessary for flood damage prevention and erosion control along approximately 3,000 feet of Caney Creek in the vicinity of Jackson, Mississippi, between McDowell Road and Raymond Road, at an estimated cost of $1,250,000.

(b) The Secretary shall complete his study of flood and soil erosion problems along Caney Creek and its tributaries in the vicinity of Jackson, Mississippi. For purposes of analyzing cost and benefits of any project recommended by the Secretary as a result of such study, the Secretary shall take into account the cost and benefits of measures undertaken pursuant to subsection (a).

SEC. 527. The Secretary shall undertake a demonstration project for the removal of silt and stumps from, and the control of pollution from nonpoint sources in, Deal Lake, Monmouth County, New Jersey, at an estimated cost of $8,000,000. Upon completion of the demonstration project, the Secretary shall submit a report of such project, along with recommendations for further measures to improve the water quality of Deal Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 528. Notwithstanding any other provision of law, the Secretary shall transfer to New Hanover County, North Carolina, its successors or assigns, without consideration, all right, title, and interest of the United States to a surplus dredging vessel (known as the "Hyde hopper dredge") in Wilmington, North Carolina, if such county agrees in writing to utilize such vessel only for the purpose of establishing an artificial fish habitat at no cost to the United States.

SEC. 529. The Secretary is directed to construct a low-level weir across the cutoff channel of the Wabash River at Grayville, Illinois to restore the river flow to its original channel and prevent streambank erosion and damage to public and private facilities, at an estimated Federal cost of $2,200,000.

SEC. 530. (a) The Secretary is authorized and directed to establish and conduct for a period of five years at multiple sites on the Platte River and its tributaries in Nebraska a demonstration program consisting of projects for flood control and streambank erosion prevention. The program shall have as its objectives the protection of property, environmental enhancement, and social well-being.

(b) Flood control projects carried out under this section shall include projects for the construction, operation, and maintenance of flood damage reduction measures, including but not limited to bank protection and stabilization works, embankments, clearing, snagging, dredging, and all other appropriate flood control measures, and shall also include recreational facilities deemed appropriate by the Secretary. Such projects shall be carried out substantially in accordance with the plan of action of the Chief of Engineers dated February 6, 1984, and with the Platte River and Tributaries, Nebraska, study of 1978 and the Platte River Basin, Nebraska, Level B Study of 1976.

(c) In carrying out any streambank erosion prevention project under this section, the Secretary shall—

(1) identify streambank erosion measures likely to provide the highest degree of protection technically and economically feasible for both high and low flow conditions;

(2) conduct necessary research on the interaction of erodible boundaries with flowing water in order to more accurately predict the behavior and optimum design of protective works;

(3) define and test optimum designs of bed slope and grade control structures for a wide range of soil and flow conditions;

(4) develop, field test, and evaluate new erosion protection products or methods, including but not limited to earth or rock-filled grids, reinforced earth bulkheads, stabilized mattings for vegetation seeding, patterned schemes using manufactured blocks in loose, matted, or interconnected configurations, and any other appropriate techniques recommended under section 32 of the Water Resources Development Act of 1974;

(5) develop and evaluate engineering techniques to control overbank drainage; and

(6) identify and quantify economic losses occurring along the Platte River and its tributaries due to streambank erosion.

(d) For each demonstration project under this section, the Secretary shall evaluate the environmental impacts of such project with respect to both riverine and adjacent land-use values, with the view of enhancing wildlife and wildlife habitat as a major purpose coequal with all other purposes and objectives, and with the view of minimizing environmental losses.

(e) Demonstration projects authorized by this section shall be undertaken to reflect a variety of geographical and environmental conditions, including naturally occurring erosion problems and erosion caused or incurred by man-made structures or activities. At a minimum, demonstration projects shall be conducted at sites on—

(1) that reach of the Platte River between Hershey, Nebraska, and the boundary between Lincoln and Dawson Counties, Nebraska; and

(2) that reach of the Platte River from the boundary between Colfax and Dodge Counties, Nebraska, to its confluence with the Missouri River and that portion of the Elkhorn River from the boundary between Antelope and Madison Counties, Nebraska, to its confluence with the Platte River.

(f) The Secretary shall condition the construction, operation, and maintenance of any project under this section upon the availability to the United States of such land and interests in land as he deems necessary to carry out such project and to protect and enhance the river in accordance with the purposes of this section. Lands and interests in land for any project under this section shall not be acquired without the consent of the owner, except that not to exceed five percent of the lands acquired for such a project may be acquired in less than fee title without the consent of the owner if determined necessary by the Secretary because of flooding or streambank erosion problems causing or threatening to cause serious damage in the Platte River Basin.

(g) The Secretary shall establish a Platte River Advisory Group consisting of representatives of the State of Nebraska and political subdivisions thereof, affected Federal agencies, and such private organizations as the Secretary deems desirable. Projects under this section shall be carried out in coordination and consultation with such Advisory Group.

(h)(1) Except as provided in paragraph (2), projects carried out under this section shall be at full Federal expense.

(2) Prior to construction of any project under this section, non-Federal interests shall agree that they will provide without cost to the United States lands, easements, and rights-of-way necessary for construction, operation, and maintenance of such project; hold and save the United States free from damages due to construction, operation, and maintenance of such project; and share equally in the costs required to operate and maintain such project.

(i) There is authorized to be appropriated for fiscal years beginning after September 30, 1985, not to exceed $25,000,000 to carry out this section.

(j) The Secretary shall report to Congress each year of the demonstration program under this section on work undertaken pursuant to such program.

(k) The Congress finds that the benefits for national economic development, regional development, social well-being, and environmental quality exceed the costs of the projects authorized by this section.

SEC. 531. (a) The Secretary, in consultation with the Soil Conservation Service of the Department of Agriculture, the United States Geological Survey and the Office of Surface Mining of the Department of the Interior, the State of Ohio, and other appropriate Federal and non-Federal agencies, shall study the flooding problems in the Wheeling Creek Watershed, Ohio, and measures to prevent or reduce such flooding, including control of erosion of coal mine areas to reduce deposition of sediments in Wheeling Creek, removal of sediment deposits in Wheeling Creek, and other measures deemed appropriate by the Secretary. Not later than two years after the date of enactment of this Act, the Secretary shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study together with recommendations taking into consideration the objectives set forth in section 1101 of this Act.

(b) The Secretary is authorized to undertake interim emergency flood control measures, including the removal of sediment deposits from Wheeling Creek and other measures deemed appropriate by the Secretary, to reduce flood damage in the vicinity of Goosetown, Wolfhurst, Barton, Crescent, Maynard, Blainsville, Fairpointe, Crabapple, and Lafferty, Ohio. For purposes of analyzing the costs and benefits of any project recommended by the Secretary as a result of the study authorized by subsection (a) of this section, the Secretary shall take into account the costs and benefits of measures undertaken pursuant to this subsection.

(c) There is authorized to be appropriated to carry out the provisions of subsection (b) of this section not to exceed $7,000,000.

SEC. 532. The Secretary shall maintain the navigation project for Wilson Harbor, Wilson, New York, to its authorized dimensions.

SEC. 533. The Secretary shall maintain the navigation project for Oak Orchard Harbor, Carlton, New York, to its authorized dimensions.

SEC. 534. The Secretary is authorized to construct a project for flood protection along Five Mile Creek, Dallas, Texas, including dredging of a channel at the lower end of such creek and developing a retention structure at the upper end of such creek, at an estimated cost of $7,100,000.

SEC. 535. (a) The Secretary shall construct a bridge (including approaches thereto) across the Ohio River between Newport, Kentucky, and Cincinnati, Ohio, to replace a bridge on United States Route 27, at an estimated cost of $30,000,000.

(b) The Secretary shall construct a bridge (including approaches thereto) across the Ohio River between Covington, Kentucky, and Cincinnati, Ohio, to replace a bridge on Kentucky State Route 17, at an estimated cost of $31,000,000.

(c) Subject to subsection (d) of this section, the Secretary shall construct, in whole or in part, a bridge (including approaches thereto) across the Ohio River between Maysville, Kentucky, and Aberdeen, Ohio, to replace a bridge on United States Route 68.

(d) In allocating funds made available to carry out this section, the Secretary shall assure that sufficient funds are allocated to the projects authorized by subsections (a) and (b) of this section to complete such projects. Any remaining funds shall be used to carry out subsection (c) of this section.

(e) The Secretary may enter into agreements with the highway departments of the States of Kentucky and Ohio to carry out subsections (a), (b), and (c) of this section.

(f) The Secretary of Transportation shall transfer any amounts set aside under section 147 of the Federal-Aid Highway Act of 1978 which were in excess of amounts needed to complete projects authorized by such section to the Secretary for the purpose of carrying out this section. Such funds shall be available to the Secretary for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that such funds shall remain available until expended.

SEC. 536. The Secretary shall construct in the vicinity of the former site of Tolay Lake in Sonoma County, California, a water resources development project consisting of a storage reservoir, a dam and three wing dams, and such discharge, transmission, distribution, and other related facilities as the Secretary considers appropriate, at an estimated cost of $150,000,000.

SEC. 537. The Secretary is authorized and directed to undertake a demonstration project to remove silt and aquatic growth from Lake Worth, Tarrant County, Texas, including constructing silt traps and providing other devices or equipment to prevent and abate the further deposit of sediment in Lake Worth. Such project shall also provide for the use of dredged material from Lake Worth for the reclamation of despoiled land. The Secretary may take such other actions as may be necessary to carry out such project. Upon completion of the demonstration project the Secretary shall submit a report of such project, along with recommendations of further measures to improve the water quality of Lake Worth, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. There is authorized to be appropriated $1,750,000 to carry out this section.

SEC. 538. The Secretary is authorized and directed to construct such streambank protection works as the Secretary deems necessary to prevent further bank failure and erosion of a 1,200-foot reach of the left descending bank of the Kanawha River from approximately 55th Street to a point approximately 100 feet upstream of 57th Street in Charleston, West Virginia, at an estimated Federal cost of $440,000. Such works are authorized on the condition that local interests furnish all lands, easements, rights-of-way, access routes and relocations necessary for project construction. Local interests shall also hold and save the United States free from damages, and maintain and operate the works after completion. Funds to carry out the provisions of this section will be allocated from available Construction General funds of the Treasury, and shall remain available for purposes of this section until completion of such works.

SEC. 539. The Secretary is authorized and directed to deepen the Fox River Channel, Green Bay, Wisconsin, to a depth of twenty-seven feet in accordance with such plans as the Chief of Engineers determines are advisable. There is authorized to be appropriated for fiscal years beginning after September 30, 1985, such sums as may be necessary to carry out this section.

SEC. 540. (a) The Secretary of Agriculture, acting through the Administrator of the Soil Conservation Service, is authorized to complete construction of the following projects for run-off and waterflow retardation and soil erosion prevention:

(1) Bush River Watershed, Virginia;

(2) Great Creek Watershed, Virginia; and

(3) Cottonwood-Walnut Creek Watershed, New Mexico.

(b) Construction of such projects shall be completed in accordance with the resolutions adopted by the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives which authorized such construction; except that—

(1) construction of the project for Cottonwood-Walnut Creek Watershed, New Mexico, shall be completed in accordance with such resolutions as modified by Committee Print 99-11 of the Committee on Public Works and Transportation of the House of Representatives; and

(2) the amount authorized to be appropriated for construction of such projects shall be as follows:

(A) for Bush River Watershed, Virginia, $6,490,000;

(B) for Great Creek Watershed, Virginia, $2,900,000; and

(C) for Cottonwood-Walnut Creek Watershed, New Mexico, $24,630,000.

SEC. 541. (a) The Secretary is authorized and directed to undertake a demonstration project to remove accumulated silt and debris from Hamlet City Lake, Hamlet, North Carolina, including constructing silt traps and providing other devices or equipment to prevent and abate the further deposit of sediment in Hamlet City Lake.

(b) Upon completion of the demonstration project, the Secretary shall submit a report of such project, along with recommendations of further measures to improve the water quality of Hamlet City Lake, to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives.

(c) There is authorized to be appropriated $300,000 to carry out this section.

The CHAIRMAN. Are there amendments to title V?

If not, the Clerk will designate title VI.

The text of title VI is as follows:

TITLE VI—WATER RESOURCES STUDIES

SEC. 601. The Secretary is authorized and directed to prepare and submit to Congress feasibility reports on the following water resources projects at the following locations:

Illinois River in the vicinity of Hardin, Illinois, to recommend remedial measures for bank stabilization.

Kinnickinnic River, Milwaukee County, Wisconsin, for flood control and allied purposes.

SEC. 602. The Secretary is authorized and directed to undertake the detailed engineering and design for a flood control project at Milton, Pennsylvania, including, but not limited to, final construction plans at a cost not to exceed $2,500,000.

SEC. 603. The Secretary is hereby authorized and directed to make studies in cooperation with the Secretary of the Interior and the governments of Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands for the purposes of providing plans for the development, utilization, and conservation of water and related land resources of such jurisdiction, at an estimated cost of $2,000,000 for each of the four studies. Such studies shall include appropriate consideration of the needs for flood protection, wise use of flood plain lands, navigation facilities, hydroelectric power generation, regional water supply and waste water management facilities systems, general recreation facilities, enhancement and control of water quality, enhancement and conservation of fish and wildlife, and other measures for environmental enhancement, economic and human resources development. Such studies shall be compatible with comprehensive development plans formulated by local planning agencies and other interested Federal agencies.

SEC. 604. (a) The Secretary shall make a study of the possibility of rehabilitating the hydroelectric potential at former industrial sites, millraces, and similar types of facilities already constructed and of the possibility of converting such sites for use as new, small hydroelectric projects. The Secretary shall also provide technical assistance to local public agencies and cooperatives in any such rehabilitation at sites studied or qualified for study under this section.

(b) There is authorized to be appropriated to carry out this section, $5,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988.

SEC. 605. (a) The Secretary shall investigate and study the feasibility of utilizing the capabilities of the United States Army Corps of Engineers to conserve fish and wildlife (including their habitats) where such fish and wildlife are indigenous to the United States, its possessions, or its territories. The scope of such study shall include the use of engineering or construction capabilities to create alternative habitats, or to improve, enlarge, develop, or otherwise beneficially modify existing habitats of such fish and wildlife. The study shall be conducted in consultation with the Director of the Fish and Wildlife Service of the Department of the Interior, the Assistant Administrator for Fisheries of the National Oceanic and Atmospheric Administration, and the Administrator of the Environmental Protection Agency, and shall be transmitted, within the 30-month period beginning on the date of enactment of this Act, by the Secretary to Congress, together with the findings, conclusions, and recommendations of the Chief of Engineers. The Secretary, in consultation with the Federal officers referred to in the preceding sentence, shall undertake a continuing review of the matters covered in the study and shall transmit to Congress, on a biennial basis, any revisions to the study that may be required as a result of the review, together with the find-

ings, conclusions, and recommendations of the Chief of Engineers.

(b) The Secretary is further authorized to conduct demonstration projects of alternative or beneficially modified habitats for fish and wildlife, including but not limited to man-made reefs for fish. There is authorized to be appropriated not to exceed $10,000,000 to carry out such demonstration projects. Such projects shall be developed, and their effectiveness evaluated, in consultation with the Director of the Fish and Wildlife Service and the Assistant Administrator for Fisheries of the National Oceanic and Atmospheric Administration. One of such demonstration projects shall be the construction of a reef for fish habitat in Lake Erie in the vicinity of Buffalo, New York, one of such projects shall be the construction of a reef for fish habitat in the Atlantic Ocean in the vicinity of Fort Lauderdale, Florida, and one of such projects shall be the construction of a reef for fish habitat in Lake Ontario in the vicinity of the town of Newfane, New York.

SEC. 606. The Secretary, in consultation with appropriate Federal, State, and local agencies, is authorized to make a nationwide study and appraisal of the nature and scope of the Nation's flood problems and the effectiveness of existing programs, both structural and nonstructural, in reducing losses from floods, at an estimated cost of $5,000,000, and to report thereon to Congress within three years with recommendations on proposed modifications to existing laws and policies to improve the overall effectiveness of the nationwide efforts to reduce such losses. In the conduct of this study particular attention should be given to flood problems existing in highly developed urban watersheds and their relationships to local storm drainage and pollution control measures.

SEC. 607. Section 142 of the Water Resources Development Act of 1976 (Public Law 94-587) is amended by inserting immediately after "Napa," the following: "San Francisco, Marin,".

SEC. 608. The Secretary, in consultation with appropriate Federal, State, and local agencies, shall determine the extent of shoreline erosion damage in the United States causally related to the regulation of the waters of Lake Superior by the International Joint Commission—United States and Canada, in response to an emergency application by the United States made on January 26, 1973. The Secretary shall report to Congress, not later than the end of the fiscal year following the fiscal year for which the initial appropriation is made to carry out this section, the results of such survey, together with recommendations of a methodology for, and a determination of, the costs of indemnifying individual shoreline property owners, and a recommended schedule for such indemnification. There is authorized to be appropriated to carry out this section not to exceed $2,130,000.

SEC. 609. The Secretary shall study the feasibility of requiring, in the interest of safety, each boat loading facility which is or has been built only after authorization by the Secretary under section 10 of the Act of March 3, 1899 (30 Stat. 1151; 33 U.S.C. 403), to display sufficient lighting from sunset to sunrise to make such facility's presence known within a reasonable distance. The Secretary shall transmit a report of such study, including recommendations to the Congress not later than September 30, 1986.

SEC. 610. (a) Not later than two years after the date of enactment of this Act, the Secretary shall prepare and submit to Congress an estimate of the long-range capital investment needs for water resources programs under the jurisdiction of the Secretary, including, but not limited to, deep-draft ports, inland waterway transportation, flood control, municipal and industrial water supply, and hydroelectric power and recreation and fish and wildlife conservation and enhancement associated with such programs.

(b) The estimate prepared under this section shall include, but not be limited to—

(1) an estimate of the current service levels of public capital investments and alternative high and low levels of such investments over a period of ten years in current dollars and over a period of five years in constant dollars;

(2) capital investment needs in each major program area over a period of ten years;

(3) an identification and analysis of the principal policy issues that affect estimated capital investment needs;

(4) an identification and analysis of factors that affect estimated capital investment needs including but not limited to the following factors:

(A) economic assumptions;

(B) engineering standards;

(C) estimates of spending for operation and maintenance;

(D) estimates of expenditures for similar investments by State and local governments;

(E) estimates of demand and need for public services derived from such capital investments and estimates of the service capacity of such investments; and

(F) the effects of delays in planning and implementation of water resources projects on the capital investment costs of water resources programs, including increased costs associated with interest rates and inflation; and

(5) a description of the economic, social, and environmental benefits realized from past investments and expected to be realized from future investments, including the protection of life and property.

SEC. 611. The Secretary is directed to expedite completion of the study of New York Harbor and Adjacent Channels, New York and New Jersey, authorized by a resolution of the Committee on Environment and Public Works of the Senate, dated December 15, 1980, and to submit a report to Congress on the results of such study not later than October 1, 1986.

SEC. 612. The Secretary is authorized to study the feasibility of identifying the amounts, types, and locations of flood control benefits produced by reservoir projects and of requiring non-Federal participation in such projects in proportion to the benefits received from such projects. The Secretary shall transmit a report on the results of such study together with recommendations to Congress not later than two years after the date of enactment of this Act.

SEC. 613. (a) The Secretary shall study and monitor the extent and adverse environmental effects of dioxin contamination in the Passaic River-Newark Bay navigation system.

(b) Not later than one year after the date of enactment of this Act, the Secretary shall transmit a report on the results of such study and monitoring along with any recommendations of the Secretary concerning methods of reducing the effects of such contamination to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives.

SEC. 614. Not later than one year after the date of enactment of this Act, the Secretary shall submit to Congress a list of water resources studies which have been authorized before the date of enactment of this Act and for which no report has been transmitted to the Congress. For each such study the Secretary shall include the following information:

(1) the date of authorization and the manner in which the study was authorized;

(2) a description of the purposes of the study;

(3) a description of funding that has been made available for the study;

(4) a description of any work that has been performed in carrying out the study; and

(5) a description of any work that remains to be done in carrying out the study and the time necessary for and estimated cost of completing such work.

For each such study the Secretary shall make a recommendation as to whether the study should continue to be authorized.

SEC. 615. (a) The Secretary shall prepare and submit the annual report required by section 8 of the Act of August 11, 1888, in two volumes. Volume I shall consist of a summary and highlights of Corps of Engineers' activities, authorities and accomplishments. Volume II shall consist of detailed information and field reports on Corps of Engineers' activities.

(b) The Secretary shall prepare biennially for public information a report for each State containing a description of each water resources project under the jurisdiction of the Secretary in such State and the status of each such project. The report for each State shall be prepared in a separate volume.

SEC. 616. The Secretary is authorized and directed to undertake a study of the feasibility of navigation improvements at Saginaw Bay and Saginaw River, Michigan, including channel widening and deepening. The Secretary shall submit the feasibility report on such study to the Congress not later than September 30, 1986.

SEC. 617. The Secretary is authorized to study the feasibility of constructing shoreline erosion mitigation measures along the Rancho Palos Verdes coastline, California, for the purpose of providing additional stabilization for the Portuguese Bend landslide area. The Secretary shall submit the feasibility report on such study to the Congress not later than two years after the date of enactment of this Act.

SEC. 618. The Secretary is directed to expedite completion of the study of the navigation project for Sunset Harbor, California, at an estimated cost of $820,000, and to submit a report to the Congress on the results of such study not later than October 1, 1986. The study shall include a determination of the feasibility of recovery of Federal project costs through Federal participation in the local economic benefits created by the construction and operation of the project.

SEC. 619. In order to determine the advisability of specific measures to diminish shoreline erosion, marsh deterioration, salt water intrusion, hurricane vulnerability, and barrier island destruction and to carry out reasonable planning efforts that require suitable sediment for nourishment, the Secretary is authorized to conduct a nearshore sediment inventory to determine availability of suitable sediment in the offshore waters of Louisiana between Southwest Pass and

Sabine Pass and in Lake Pontchartrain and in Lake Borgne, at a cost not to exceed $2,000,000.

SEC. 620. The Secretary is authorized to undertake a study of the feasibility of opening a channel between Jamaica Bay and Reynolds Channel, Long Island, New York, for the purpose of water quality improvement. The Secretary shall report the results of such study to Congress not later than one year after the date of enactment of this Act.

SEC. 621. The Secretary shall study land acquisition policies applicable to water resources projects carried out by the Secretary, including, among other things, an analysis of the acquisition policies of mineral rights in connection with such projects. Such study shall also include a complete detailed report on (1) the acquisition policies and procedures utilized by the Secretary in the acquisition of mineral rights at the water resources project for Lake Sommerville, Texas, authorized by the Flood Control Act of June 28, 1938, and (2) the acquisition policies and procedures followed in permitting reservoir lands to be used for mineral exploration and development subsequent to construction of such project. Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study along with such recommendations as the Secretary may have for modifications of such land acquisition policies.

SEC. 622. No Federal agency shall study or participate in the study of any regional or river basin plan or any plan for any Federal water and related land resource project which has as its objective the transfer of water from the Columbia River Basin, or the Arkansas River Basin, to any other region or any other major river basin of the United States, unless such study is approved by the Governors of all affected States.

SEC. 623. The Secretary shall immediately investigate erosion problems on the southern bank of the Black Warrior-Tombigbee River from river mile 253 to river mile 255. Not later than six months after the date of enactment of this Act, the Secretary shall report to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate on the results of such investigation along with recommendations for measures to alleviate such erosion problems.

SEC. 624. The Secretary is authorized to conduct a study of the feasibility of developing measures to control storm water runoff on a watershed basis. Such study shall include, among other things, a review of existing drainage codes, State statutes, and Federal programs relating to prevention of drainage soil erosion and flooding. Not later than two years after the date of enactment of this Act, the Secretary shall submit a report to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate on the results of such investigation along with recommendations concerning development of such measures.

SEC. 625. The Secretary is authorized and directed to conduct a study (1) to analyze the differences among Corps districts and Corps divisions regarding boundary delineation and fencing practices, (2) to analyze the cost of fencing activities and the relationship of such cost to the benefits derived from such activities, and (3) to analyze the need for providing, to the greatest extent practicable and consistent with authorized project purposes, access of the project area to the general public for recreational purposes. The Secretary shall submit a report on the results of such study to Congress not later than one year after the date of the enactment of this Act.

SEC. 626. The Secretary is authorized and directed to complete a study of the Army Corps of Engineers project evaluation and selection criteria identifying all factors which create a disproportionate burden adverse to the selection of flood control or other projects under the Secretary's authority in rural areas and in areas with greater percentages of low-income individuals. Within one year of the date of the enactment of this Act the Secretary shall transmit a report to Congress on the results of such study together with specific recommendations for changes in the selection criteria that would effectively eliminate any bias against projects in such areas.

SEC. 627. The Secretary is authorized and directed to study the eradication and control of hydrilla in the Potomac River and to develop an effective plan of action for such eradication and control. Not later than September 30, 1986, the Secretary shall submit to Congress a report on the results of such study together with the plan of action which the Secretary recommends and an estimate of the cost of implementing such plan.

SEC. 628. (a) The Secretary shall study the requirements relating to inclusion of storage for present and future water supply in water resources projects constructed by the Secretary, including establishment of costs for and repayment schedules for principle and interest for such water supply features.

(b) Such study shall determine whether such requirements ensure development of adequate supplies of water for municipal and industrial use and availability of such supplies at equitable price levels.

(c) The Secretary shall submit a report on the results of the study required by this section, together with recommendations, to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives within one year after the date of the enactment of this Act.

SEC. 629. (a) The Secretary shall study and develop a plan for drought management and low fresh-water inflow maintenance on the major tributaries entering the Chesapeake Bay, including, but not limited to, water conservation, water storage, emergency restrictions, and ground water recharge.

(b) Not later than two years after the date of the enactment of this Act, the Secretary shall submit a report of the study required by this section, together with recommendations, to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House.

SEC. 630. (a) The Secretary shall conduct a feasibility study on providing flood protection in the Guayanilla River Basin, Puerto Rico.

(b) Not later than two years after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the results of such study together with such recommendations as the Secretary determines to be appropriate.

AMENDMENT OFFERED BY MR. DYSON

Mr. DYSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DYSON: Page 175, line 19, strike out "and".

Page 175, line 21, strike out the period and insert in lieu thereof the following: "and one of such projects shall be the construction of a reef for fish habitat in the Chesapeake Bay in Maryland.".

Mr. DYSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. DYSON. Mr. Chairman, I applaud the committee for the fine work it has done on H.R. 6. This is a good bill which meets the pressing needs of today and fulfills the obligations we have to future generations.

In title VI of this bill, the Secretary is authorized to construct demonstration projects for fish habitats in various regions of the country. My amendment seeks to add the Chesapeake Bay to this list.

Mr. Chairman, as one of the world's largest ecosystems, the Chesapeake provides spawning and nursery sites for several rare and endangered species of fish. Hundreds of thousands of migratory birds and waterfowl find food and shelter in the bay and the bay is also a nesting area for the endangered bald eagle and osprey.

From the rich waters of the bay we have harvested more crabs than any other body of water in the world. Not only my colleagues, but the entire Atlantic seaboard has feasted on the abundant supply of crabs, oysters, clams, and other seafood which have been fished from the bay.

Mr. Chairman, as I am sure you know, we are surrounded by almost 4,000 miles of shoreline. Our beautiful bay has fallen on hard times. Many years of unchecked pollution and general neglect has depleted the bay of some of its bounty, most notably, the striped bass or rockfish. Despite a moratorium on rockfish in Maryland and severe restrictions in Pennsylvania and Virginia, the most recent survey has indicated that the number of striped bass spawned in the upper bay—which historically accounts for over one-fourth of all striped bass—is at its lowest level in three decades.

Our Government recognized the important role the bay has in our economy, our diet, and as a natural resource enjoyed by millions of Americans. Therefore, it is of extreme importance that we include the bay in this project for it is through efforts such as this planned habitat demonstration project that we will replenish, and save, our bay.

I yield to the chairman of the subcommittee.

Mr. ROE. I want to compliment the gentleman from Maryland [Mr. DYSON] for a splendid approach, and I know the great work that he has been doing in the Chesapeake Bay Program over these years, and has been a real leader in that field, and for this modification that he is looking for for increasing reef fish habitat, which is a general advanced environmental view.

I think it is an excellent amendment, and we have no problems on our side of the aisle.

Mr. STANGELAND. Will the gentleman yield?

Mr. DYSON. I yield to the gentleman.

Mr. STANGELAND. I, too, want to commend the gentleman and say we have looked at the amendment on this side of the aisle; we think it is an improvement on this section, and we certainly accept it.

Mr. DYSON. I thank both gentlemen.

Mr. Chairman, I would like to say for the benefit of the House that I think we would not have made the great strides that we have made in the Chesapeake Bay if it wasn't for the gentleman from New Jersey and the gentleman from Minnesota.

They have been tremendous helps in that regard, especially in their role on the Water Resources Subcommittee.

I yield to the gentlewoman from Maryland [Mrs. BENTLEY].

□ 1430

Mrs. BENTLEY. Mr. Chairman, I would like to join in support of this amendment by my colleague from Maryland. Chesapeake Bay, of course, is the most important asset of the State of Maryland and, we think, one of the most important in the United States.

Mr. Chairman, I commend the gentleman for his amendment.

Mr. DYSON. Mr. Chairman, I thank all those Members for their fine remarks.

Mr. Chairman, I urge adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland [Mr. DYSON].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title VI of the bill?

Mr. ROEMER. Mr. Chairman, I have an amendment at the desk, and unfortunately it is to title V. I was so fascinated by the last debate, I let it go by.

Mr. Chairman, I ask unanimous consent that my amendment be considered at this time.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

AMENDMENT OFFERED BY MR. ROEMER

The Clerk read as follows:

Amendment offered by Mr. ROEMER: Page 134, line 5, strike out the period and insert in lieu thereof the following: ", except that the land the Secretary may purchase for such project may include all or such portion of any land referred to in the report or all or such portion of any land adjacent to the Loggy Bayou Wildlife Management Area in Bossier Parish, Louisiana, which the Secretary determines is appropriate.".

Mr. ROEMER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. ROEMER. Mr. Chairman, I have discussed my amendment with the chairman of the subcommittee, Mr. ROE.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman from New Jersey.

Mr. ROE. I thank the gentleman for yielding.

Mr. Chairman, I want to compliment the gentleman from Louisiana.

Mr. Chairman, I compliment the gentleman on this added dimension of the wildlife program in Loggy Bayou.

I think it is a great addition to the bill.

Mr. Chairman, we have no objection to the amendment.

Mr. ROEMER. I thank the gentleman for his comments.

Mr. Chairman, I also talked to my colleagues on the Republican side of the aisle.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman fom Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding.

Mr. Chairman, we, too, have looked at the amendment and think it serves a good purpose in the bill.

Mr. ROEMER. I thank the gentleman for his comments.

The amendment, simply put, allows Red River Waterway mitigation the potential purchase of property around Loggy Bayou for the purpose of wildlife preserve. It does not add any cost to the bill. It just gives the Corps of Engineers another option.

I appreciate the time and ask for passage by the House.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana [Mr. ROEMER].

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to title VI?

Mrs. BENTLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of H.R. 3670.

Mr. Chairman, shortly before this Congress recessed for the congressional August recess, the House and Senate agreed to and passed the supplemental appropriations bill for fiscal year 1985. Included in the bill was appropriations for water construction projects.

President Reagan signed the supplemental appropriations bill into law in August of this year, thereby, giving his approval for water construction development that is funded through Federal, State, and local cost sharing measures.

Under the Supplemental Appropriations Act of 1985 funds will be released for the construction of water projects long overdue. It has been over a decade since a bill has been enacted that provides for port and inland waterways development.

Today, Mr. Chairman, we have before us H.R. 3670, the Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985. As a member of both the Committee on Public Works and Transportation and the Merchant Marine and Fisheries, I have participated in the markup of H.R. 3670. I wish to commend the leadership and members of all the committees responsible for getting H.R. 3670 to the floor for House action.

It is imperative for this Congress to act and pass H.R. 3670, the omnibus water bill, in a timely fashion. As soon as H.R. 3670 becomes law, cost sharing measures will be established and funds appropriated in the Supplemental Appropriations Act of 1985 will be released to begin long overdue port development and water resources construction.

On Sunday of this week, some 600 of my constituents of the Second Congressional District of Maryland, joined me in celebrating the deepening of the main ship channel leading into the Port of Baltimore. Those who joined me in celebrating the dredging of the harbor shared the vision that with the use of water construction funds greater economic growth will result.

After the dredging, larger ships will be free to enter the Baltimore Port. Greater means for trade will create more jobs and a stronger economy with the importation and exportation of goods.

Port development of the Baltimore Port is just one example of the many ways our Nation's water infrastructure will benefit from investing in construction of our water resources. I strongly urge my colleagues to join me in supporting H.R. 3670, the Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985.

Enactment of H.R. 3670 will provide cost-sharing measures for the initi-

ation of water construction projects. Port development, inland waterways, flood control projects, beach erosion, municipal water supply systems, and other water resources projects will receive necessary funding to maintain and develop this Nation's water infrastructure. A vote for H.R. 3670 will be a vote for investment in America's means to foster economic growth.

The CHAIRMAN. Are there further amendments to title VI of the bill?

AMENDMENT OFFERED BY MR. TRAFICANT

Mr. TRAFICANT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TRAFICANT: Page 187, after line 19, insert the following:

SEC. 631. The Secretary shall prepare and submit to Congress not later than October 1, 1986, a report on the status of feasibility and reconaissance studies (including studies completed and studies currently being conducted) relating to the hydroelectric power potential at existing Corps of Engineers projects in the States of Illinois, Indiana, Michigan, Ohio, Wisconsin, Iowa, Minnesota, Pennsylvania, and West Virginia.

Mr. TRAFICANT (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Mr. CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. ROBINSON. Mr. Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to the gentleman from Arkansas.

Mr. ROBINSON. Mr. Chairman, I rise in support of the bill, H.R. 3670, the Omnibus Water Resources Authorization. Contained within the bill is money for a vitally necessary and long standing flood control project—the improvement of the Fourche Creek and its tributaries. The Federal share authorized is $22.8 million.

The principal water problem in southwest Little Rock is urban flooding caused by inadequate channel capacities of Fourche Creek and its tributaries, particularly Coleman, Grassy Flat and Rock creeks. A major flood, in September 1978, caused over $17 million in damages in 1978 dollars. More recent storms have routinely resulted in extensive local flooding.

The recommended plan of improvement consists of channel clearing, channel improvement, flood plain management measures to restrict future development in the 100-year flood plain, and acquisition of 1,750 acres of bottomland for environmental preservation. The project is designed to prevent approximately 95 percent of the average annual damages of overbank flooding.

The final Environmental Impact Statement was filed with the Environmental Protection Agency on March 20, 1981. The presentation of the bottomland acreage will provide unique opportunities for the public enjoyment of nature in an urban setting.

The passage of the bill has been long delayed due to controversy surrounding the local funding and funding ratios for various projects contained in the bill. The local share for this project has been available for some time—demonstrating the urgent need and local support for the Fourche project. Once approved by the Senate and signed by the President, an appropriation bill will be required. I will seek to have funds included for the Fourche Creek in a supplemental appropriation bill.

Mr. TRAFICANT. Mr. Chairman, today I am offering an amendment that directs the Army Corps of Engineers to prepare and submit to Congress a report on the status of feasibility and reconnaissance studies relating to the hydroelectric power potential at existing corps projects in the Great Lakes region; namely, Illinois, Indiana, Michigan, Ohio, Wisconsin, Iowa, Minnesota, Pennsylvania, and West Virginia.

We have a great opportunity before us. The opportunity to tap an underutilized source of energy: hydropower. Its clean, environmentally safe and renewable. Converting the falling water that is now wasted at existing corps projects into useable energy opens up new possibilities for becoming less dependent on foreign sources of oil.

Two points I want to stress are:

First, this amendment will allow for a status of these corps studies, those completed and underway, and the cost-benefit of engaging them to produce hydroelectric power—not studying the construction of new projects.

Second, other regions throughout the country have been successful in receiving hydroelectric development. It is now time for the Northeast-Midwest to share in reliable, nonpolluting power sources. I urge my colleagues to approve this amendment.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. TRAFICANT. I yield to the chairman of the subcommittee.

Mr. ROE. I thank the gentleman for yielding.

Mr. Chairman, again, I want to compliment the gentleman from Ohio for his extensive contribution to our efforts in Public Works and this overall legislation.

Mr. Chairman, I think that the amendment that the gentleman has presented is very workable, and it is a good idea, and we should be doing it.

Mr. Chairman, we have no objection to the amendment of the gentleman from Ohio.

Mr. TRAFICANT. Unless there is opposition, Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio [Mr. TRAFICANT].

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to title VI?

If not, the Clerk will designate title VII.

The text of title VII is as follows:

TITLE VII—PROJECT MODIFICATIONS

SEC. 701. The navigation project for Lynnhaven Inlet, Bay, and connecting waters, Virginia, authorized by section 101 of the River and Harbor Act of 1962 (76 Stat. 1173, 1174) is hereby modified to provide that the United States shall pay for the remedial work to Long Creek Canal which the city of Virginia Beach, Virginia, was required to carry out as a result of such navigation project, at a cost not to exceed $1,660,000.

SEC. 702. The project for navigation on the Southern Branch of Elizabeth River, Virginia, authorized by resolutions of the Senate and House Public Works Committees, dated October 1, 1976, and September 23, 1976, respectively, under the provisions of section 201 of Public Law 89-298, is hereby modified to delete the requirement that local interests contribute in cash for land enhancement benefits 2.4 per centum of the construction cost, including engineering and design and supervision and administration thereof, of all work to be provided by the Corps of Engineers.

SEC. 703. The general comprehensive plan for flood control and other purposes in the Ohio River Basin authorized by the Flood Control Act approved June 28, 1938, is hereby modified to authorize the Secretary to reconstruct and repair the Cherry Street bridge and the Walnut Street bridge, Massillon, Ohio, at an estimated cost of $2,100,000. Non-Federal interests shall own, operate, and, upon completion of the work authorized by this section, maintain such bridges in accordance with the requirements of the Flood Control Act approved June 28, 1938.

SEC. 704. The navigation project at Mamaroneck Harbor, New York, authorized by the first section of the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved September 22, 1922 (42 Stat. 1038), the first section of the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved August 30, 1935 (49 Stat. 1029), and section 101 of the Rivers and Harbors Act of 1960 (74 Stat. 480) is hereby modified to provide that the Federal share of the additional cost of disposing in ocean waters dredged material resulting from dredging necessary to maintain the project, above the cost of disposing of such dredged material on land, shall be 80 per centum.

SEC. 705. The hurricane-flood protection project for Lake Pontchartrain, Louisiana, authorized by section 204 of the Flood Control Act of 1965 (Public Law 89-298) is hereby modified to provide that the Secretary is authorized to construct features, such as a flood wall with sluice gates or other means, at an estimated cost of $3,500,000, to insure that, by the most economical means, the level of protection within Jefferson Parish provided by the hurricane-flood protection project will be unimpaired as the result of any pumping station constructed by local interests. Requirements for non-Federal cooperation for the additional work authorized by this section shall be on the same basis as levee improvements for hurricane-flood protection on this project.

SEC. 706. The project for Reelfoot Lake, Lake numbered 9, Kentucky, authorized by resolution of the Committee on Public Works of the Senate adopted December 17, 1970, and resolution of the Committee on

Public Works of the House of Representatives adopted December 15, 1970, under section 201 of the Flood Control Act of 1965 (Public Law 89-298), is hereby modified to provide that operation of the pumping plant feature of such project shall be the responsibility of the United States.

SEC. 707. The Yaquina Bay and Harbor project, Oregon, authorized by the River and Harbor Act approved March 2, 1919, is modified to authorize the Secretary to raise the south jetty to protect vehicular access which was provided at non-Federal cost and to protect public use areas on accreted land adjacent to the south jetty, from damaging effects of overtopping of the jetty, on condition that local interests provide the necessary lands, easements, and rights-of-way for such modification. The estimated Federal construction cost of this modification is $2,200,000.

SEC. 708. The project for flood control and other purposes on the South Platte River Basin in Colorado, authorized by the Flood Control Act of 1950 (64 Stat. 175) is hereby modified to authorize the Secretary, upon request of and in coordination with the Colorado Department of Natural Resources and upon the Chief of Engineers' finding of feasibility and economic justification, to reassign a portion of the storage space in the Chatfield Lake project to joint flood control-conservation purposes, including storage for municipal and industrial water supply, agriculture, and recreation and fishery habitat protection and enhancement. Appropriate non-Federal interests shall agree to repay the cost allocated to such storage in accordance with the provisions of the Water Supply Act of 1958, the Federal Water Project Recreation Act, and such other Federal laws as the Chief of Engineers determines appropriate.

SEC. 709. The project for flood protection on the Sacramento River, California, authorized by the Flood Control Act approved March 1, 1917, as amended, is hereby further modified to authorize the Secretary to construct bank protection works along the reach of the Sacramento River and its tributaries from Red Bluff to Shasta Dam, and from Chico Landing downstream along each bank to the head of the Sacramento River flood control project levees, subject to the same requirements of non-Federal cooperation applicable to other similar elements of the project, and to include mitigation of fish and wildlife losses induced by the project. The evaluation and justification of the project shall be based on the overall benefits and costs of all project elements. In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $25,000,000 to carry out the purposes of this section.

SEC. 710. The project for King Harbor, Redondo Beach, California, authorized in the River and Harbor Act of 1950, is hereby modified to provide that all costs of the dredging and maintenance of such project shall be borne by the United States and that the Secretary shall restore the breakwaters to a height of 22 feet and maintain the breakwaters at such height. The Secretary is authorized to study the need for and feasibility of raising the breakwater to a height greater than 22 feet. Not later than two years after the date of enactment of this Act, the Secretary shall make a report of such study with recommendations to the Congress.

SEC. 711. The plan for the harbor improvement at Honolulu Harbor, Oahu, Hawaii, authorized by section 301 of the River and Harbor Act of 1965 (79 Stat. 1092) is hereby modified to delete the requirement that local interests contribute in cash, prior to initiation of construction, a lump sum amounting to 2.6 per centum of the estimated first cost of the general navigation facilities for the project, ascribed to land enhancement through disposition of dredged material.

SEC. 712. (a) The navigation project for Santa Cruz Harbor, Santa Cruz, California, authorized in section 101 of the River and Harbor Act of 1958 (Public Law 85-500) is hereby modified to provide that the United States shall reimburse the non-Federal interests for 80 per centum of the cost of acquiring and installing the sand bypassing facility authorized as part of such project, at an estimated cost of $36,000,000, and that none of the costs of operating and maintaining such facility or of any maintenance dredging in such harbor shall be paid by the United States. Such project is also modified to authorize the Secretary to seal the east jetty of such harbor to prevent sand from passing through.

(b) The Secretary shall study the long-term solutions to the shoaling problems in Santa Cruz Harbor and shall report the results of such study, along with recommendations, to the Congress upon completion of such study. There is authorized to be appropriated $600,000 for fiscal years beginning after September 30, 1985, to carry out this subsection.

SEC. 713. The project for the mouth of the Colorado River, Texas, authorized by the River and Harbor Act of 1968, is hereby modified to provide that the diversion channel authorized as a part of such project to divert Colorado River flows into Matagorda Bay shall be constructed and maintained entirely at Federal expense and for the purpose of fish and wildlife enhancement, at an estimated additional construction cost of $425,000. The benefits attributable to the diversion channel shall be deemed to at least equal its costs.

SEC. 714. The project for the town of Niobrara, Nebraska, authorized by section 213 of the Flood Control Act of 1970 (84 Stat. 1824, 1829) is hereby modified to authorize and direct the Secretary to relocate existing Nebraska Highway Numbered 12 through the relocated town of Niobrara, Nebraska, with necessary connections to Nebraska Highway Numbered 14, at an estimated cost of $1,600,000.

SEC. 715. The comprehensive plan for the development of the water resources of the Alabama-Coosa River and tributaries, authorized by section 2 of the River and Harbor Act approved March 2, 1945 (59 Stat. 10), as modified by Public Law 83-436, approved June 29, 1954 (68 Stat. 302), is further modified as follows: the plan for the Coosa River segment of the waterway between Montgomery and Gadsden, Alabama, is hereby modified generally in accordance with the plans contained in the report of the District Engineer, Mobile District, entitled "Montgomery to Gadsden, Coosa River Channel, Alabama, Design Memorandum No. 1, General Design", dated May 1982, subject to such modification thereof from time to time as the Secretary may deem advisable. The interest rate to be used in determining benefits and costs of the modified project shall continue to be that rate which is applicable to the project as originally authorized.

SEC. 716. (a) The LaFarge Dam project for flood control and allied purposes for the Kickapoo River, Wisconsin, authorized by the Flood Control Act of 1962, is hereby modified to authorize and direct the Secretary to construct as soon as possible and with available funds, the flood control levee, channel improvement, and interior drainage facilities for Gays Mills, Wisconsin, substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 450, Eighty-seventh Congress, at an estimated cost of $4,000,000. The project features authorized by this section may be funded under section 205 of the Flood Control Act of 1948, as amended. Benefits and costs resulting from construction of such project features shall continue to be included for purposes of determining the economic feasibility of completing the partially constructed LaFarge Dam.

(b) The Secretary is authorized and directed to complete as soon as possible a reconnaissance study under section 205 of the Flood Control Act of 1948 with respect to such structural and nonstructural measures as the Secretary determines are necessary and appropriate to prevent flood damage in the vicinity of Viola, Wisconsin.

SEC. 717. The project for flood control in East Saint Louis and vicinity, Illinois, authorized by section 204 of the Flood Control Act of 1965, is hereby modified to authorize the Secretary to provide drainage channels in conjunction with the pumping plant to improve project effectiveness and the local environment, substantially in accordance with the report of the District Engineer, Saint Louis district, entitled "Reevaluation Report, Bluewaters Ditch area", dated September 1976, at an estimated additional cost of $1,130,000.

SEC. 718. The project for flood protection at Winona, Minnesota, authorized under the provisions of section 201 of the Flood Control Act of 1965, is hereby modified to provide that changes to two bridges within the limits of the city of Winona, Minnesota, made necessary by the project and its present plan of protection, shall be accomplished entirely at Federal expense, at an estimated cost of $630,000.

SEC. 719. The project for flood control, Wenatchee, Washington, Canyons 1 and 2, authorized by resolution of the Committees on Public Works of the House of Representatives and Senate on December 15 and 17, 1970, respectively, is hereby modified, notwithstanding any other provision of law (including section 302 of this Act), to authorize the Secretary to acquire lands, easements, and rights-of-way and to make relocations for such project on condition that local interests enter into a legally binding agreement before construction to reimburse the United States for the non-Federal share of the cost of such project, including interest on the unpaid balance, in not more than fifty equal annual installments. The non-Federal share of the cost of such project shall be determined under such section 302. The rate of interest on the unpaid balance shall be that specified in section 301(b) of the Water Supply Act of 1958 (Public Law 85-500).

SEC. 720. The project for replacement of locks and dam 26, Mississippi River, Alton, Illinois and Missouri, authorized by section 102 of the Act of October 21, 1978 (Public Law 95-502), is modified to provide for the repair of the Red School House County Road, St. Charles County, Missouri, to such standard as the Secretary determines reasonable, but in no event to a standard less than the minimum standard required by such county.

SEC. 721. (a) Subsection (a) of section 66 of the Water Resources Development Act of 1974 (Public Law 93-251) is amended by striking out the period at the end thereof and inserting in lieu thereof a comma and the following: "and thereafter to maintain such channel free of such trees, roots, silt, debris, and objects.".

(b) Subsection (b) of section 66 of the Water Resources Development Act of 1974 (Public Law 93-251) is amended by adding at end thereof the following new sentence: "Non-Federal interests shall pay 25 per centum of the cost of maintaining the channel free of such trees, roots, silt, debris, and objects.".

SEC. 722. Subsection (a) of section 92 of the Water Resources Development Act of 1974 (Public Law 93-251) is amended—

(1) by inserting "(1)" immediately after "(a)";

(2) in the third sentence thereof, by striking out "Each installment" and inserting in lieu thereof "Except as provided in paragraph (2) of this subsection, each installment"; and

(3) by adding at the end thereof the following new paragraph:

"(2) The Secretary of the Army, acting through the Chief of Engineers, shall, upon the request of Saint Bernard Parish, Louisiana, modify the agreement entered into between the Secretary and Saint Bernard Parish pursuant to this section so that each installment to be paid by Saint Bernard Parish as its part of the non-Federal share of the cost of the hurricane-flood protection project on Lake Pontchartrain, Louisiana, shall be one-fiftieth of the remaining unpaid balance as set forth in such agreement plus interest on such balance, and the total of such installments shall be sufficient to achieve full payment of such balance, plus interest, within fifty years of the initiation of project construction.".

SEC. 723. The second sentence of subsection (b) of section 116 of the River and Harbor Act of 1970 (84 Stat. 1822) is amended to read as follows: "The Secretary of the Army, acting through the Chief of Engineers, shall, before beginning any operation to maintain the channel authorized by this section, enter into a separate agreement with the appropriate non-Federal interests which is applicable only to that operation and which requires such non-Federal interests to pay 25 per centum of the cost of such maintenance operation.".

SEC. 724. The second paragraph under the center heading "BRAZOS RIVER BASIN" in section 10 of the Flood Control Act of 1946 (60 Stat. 649), is amended by inserting "or water supply" after "irrigation".

SEC. 725. The project for navigation at Houston Ship Channel (Greens Bayou), Texas, authorized under section 301 of the River and Harbor Act of 1965 (79 Stat. 1091) is hereby modified to authorize and direct the Secretary to perform such dredging operations as are necessary to maintain a forty-foot project depth in that section of Greens Bayou from mile 0 to mile 0.34 as described in House Document Numbered 257, Eighty-ninth Congress.

SEC. 726. The Secretary is authorized to modify any water resources development project for mitigation of damages to fish and wildlife if the estimated cost of such modification does not exceed 10 per centum of the estimated total cost of such project or $7,500,000, whichever is the lesser. No appropriation shall be made for any such modification of a project if such modification has not been approved by resolutions adopted by the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives. For the purpose of securing consideration of such approval, the Secretary shall transmit to Congress a report of such modification, including all relevant data and all costs.

SEC. 727. (a) Bank protection activities conducted under the Rio Grande bank protection project pursuant to the First Deficiency Appropriation Act, 1945, approved April 25, 1945 (59 Stat. 89), may be undertaken in Starr County, Texas, notwithstanding any provision of such Act establishing the counties in which such bank protection activities may be undertaken, at an estimated cost of $700,000.

(b) Any bank protection activity undertaken in Starr County, Texas, pursuant to subsection (a) of this section shall be—

(1) in accordance with such specifications as may be prepared for such purpose by the International Boundary and Water Commission, United States and Mexico; and

(2) except as provided in subsection (a), subject to the terms and conditions generally applicable to activities conducted under the Rio Grande bank protection project.

SEC. 728. The project for the Anacostia River and tributaries, District of Columbia and Maryland, approved under authority of section 205 of the Flood Control Act of 1948, is hereby modified to authorize the Secretary to prevent damage to the project caused by the one hundred-year flood, including, but not limited to, replacing riprap, removing sediment deposits, shaping and sodding slopes, and seeding, at an estimated cost of $4,400,000.

SEC. 729. The navigation project for Yazoo River, Mississippi, authorized by the River and Harbor Act of 1968, is hereby modified to provide that the cost of the alteration of the Shepardstown Bridge (mile 147.8) shall be entirely borne by the United States, at an estimated cost of $3,600,000.

SEC. 730. The project for flood control on Corte Madera Creek, Marin County, California, authorized by section 201 of the Flood Control Act of 1962 is hereby modified to authorize and direct the Secretary to construct the project for unit 4, from the vicinity of Lagunitas Road Bridge to Sir Francis Drake Boulevard, substantially in accordance with the plan, dated February 1977, on file in the office of the San Francisco district engineer. The plan is hereby further modified to authorize and direct the Secretary to construct such flood proofing measures as may be necessary to individual properties and other necessary structural measures in the vicinity of Lagunitas Road Bridge to insure the proper functioning of the completed portions of the authorized project. The non-Federal share of the costs of such measures shall be in accordance with the cost-sharing provisions contained in section 73(b) of the Water Resources Development Act of 1974. The project is hereby further modified to eliminate any channel modifications upstream of Sir Francis Drake Boulevard.

SEC. 731. The project for improvement of the Mississippi River below Cape Girardeau with respect to the Teche-Vermilion Basins, Louisiana, authorized in the Flood Control Act of 1966, is hereby modified to require the Secretary to relocate at Federal expense the Highway 71 bridge required to be relocated by this project or, at his discretion, to reimburse local interests for such relocation carried out by them at an estimated cost of $1,200,000.

SEC. 732. The Granger Dam project, San Gabriel River, Texas, is modified to require the Secretary to elevate, relocate, or make such other changes as may be necessary to insure that county roads numbered 361 and 428, including bridges, Williamson County, Texas, be upgraded to conform to the same standards as relocated FM Road numbered 971 at a cost not to exceed $3,800,000. The work authorized by this section shall not be commenced until appropriate non-Federal interests agree to furnish without cost to the United States lands, easements, and rights-of-way necessary for the work, to hold and save the United States free from damages due to the work, and to accept all such work thereafter for operation and maintenance.

SEC. 733. The project for Lewisville Lake, Texas, authorized by the River and Harbor Act approved March 2, 1945, is hereby modified to authorize and direct the Secretary to take such actions as may be necessary to insure that approximately four thousand feet, including bridges and approaches, of the road crossing Cottonwood Branch of Lewisville Lake, Texas, formerly designated State Highway 24T, will be above elevation five hundred and thirty-two feet above mean sea level, at an estimated cost of $3,200,000. Prior to the undertaking of the work authorized by this section, appropriate non-Federal interests shall agree to furnish without cost to the United States lands, easements, and rights-of-way necessary for the work, to hold and save the United States free from damages due to the work and to accept all such work thereafter for operation and maintenance.

SEC. 734. The project for Dardanelle lock and dam, Arkansas, authorized by the River and Harbor Act approved July 24, 1946, is hereby modified to authorize and direct the Secretary to take such action as may be necessary to replace the existing bridge across Cane Creek, Logan County, Arkansas, with a new bridge at an estimated cost of $1,800,000. Prior to the undertaking of the work authorized by this section, appropriate non-Federal interests shall agree to furnish without cost to the United States lands, easements, and rights-of-way necessary for the work, to hold and save the United States free from damages due to the work, and to accept all such work thereafter for operation and maintenance and no other requirements shall be imposed on non-Federal interests in connection with this work.

SEC. 735. The project for flood protection on the Susquehanna River at Sunbury, Pennsylvania, authorized by the Flood Control Act of 1936, as modified by the Flood Control Act of 1941, is hereby modified to authorize and direct the Secretary to permanently seal the closure structure at the abandoned Reading Railroad site, at an estimated cost of $75,000.

SEC. 736. The project for the Hudson River, New York; New York City to Waterford authorized by the Act of June 25, 1910 (Public Law 318, Sixty-first Congress), as amended, is modified to authorize the Secretary to remove shoals between the mouth of Roeliff Jansen Kill, Columbia County, New York, and the present navigation channel and to place such removed material at an appropriate site designated by the State of New York, at an estimated cost of $150,000.

SEC. 737. The flood control project for the San Lorenzo River, Santa Cruz County, California, authorized by the Flood Control Act of 1954, is hereby modified to authorize and direct the Secretary to dredge the San Lorenzo River to provide flood protection to

Santa Cruz, California, and surrounding areas, entirely at Federal expense, at an estimated cost of $3,500,000. No dredging of such river (other than that authorized by the preceding sentence) shall be accomplished by the Secretary, except as provided in a law enacted after the date of enactment of this Act.

SEC. 738. The project for flood protection along the Sacramento River and its tributaries, California, authorized by the Flood Control Act of 1917, as amended, is hereby modified to authorize and direct the Secretary to accomplish remedial construction necessary to restore the project flood control levees along the Colusa Trough Drainage Canal and the Knights Landing Ridge Cut, at an estimated cost of $10,400,000.

SEC. 739. The project for New Melones Dam and Reservoir, California, authorized by the Flood Control Act of 1962 is hereby modified to authorize the following roads to be upgraded to Federal-aid secondary system standards: (1) 5.1 miles of the Parrotts Ferry Road, from north of the Parrotts Ferry Bridge to State Route 4 at Vallecito, Calaveras County, California, and (2) 5.4 miles of Parrotts Ferry Road from south of the Parrotts Ferry Bridge to State Route 49 near Sonora, Tuolumne County, California, at an estimated Federal cost of $15,000,000. The cost of the work authorized by this section shall be paid entirely by the United States.

SEC. 740. After the date of the enactment of this section, the Secretary of the Army shall have all of the authority which the Secretary of the Air Force has immediately prior to such date over the Trilby Wash Detention Basin (McMicken Dam) and Outlet Channel, Maricopa County, Gila River Basin, Arizona. The Secretary is authorized to take necessary remedial measures to assure structural integrity and flood control capacity of the Trilby Wash Detention Basin (McMicken Dam) and Outlet Channel, Maricopa County, Gila River Basin, Arizona, constructed under authority of section 304 of Public Law 209 of the Eighty-third Congress, at an estimated cost of $7,500,000. The Secretary is authorized to reimburse any non-Federal interest for any remedial measure (1) carried out by such interest, after January 1, 1983, and before the date of enactment of this Act, to assure structural integrity and flood control capacity of the Trilby Wash Detention Basin (McMicken Dam) at a level of flood protection equal to the level of flood protection provided by such dam before January 1, 1977, and (2) approved by the dam safety agency of the State of Arizona.

SEC. 741. The Secretary is authorized to acquire real property by condemnation, purchase, donation, exchange, or otherwise, as a part of any water resources development project for use for public park and recreation purposes, including but not limited to, real property not contiguous to the principal part of the project.

SEC. 742. The following water resources development projects are modified to authorize the Secretary to construct the beach erosion control, storm protection, or navigation feature of the project separately or in combination with the other such features:

(1) Great Egg Harbor Inlet and Peck Beach, New Jersey, authorized in accordance with section 201 of the Flood Control Act of 1965 (79 Stat. 1073, 1074).

(2) Corson Inlet and Ludlam Beach, New Jersey, authorized in accordance with section 201 of the Flood Control Act of 1965.

(3) Townsend Inlet and Seven Mile Beach, New Jersey, authorized in accordance with section 201 of the Flood Control Act of 1965.

The non-Federal share for any such feature which is separately constructed shall be the appropriate non-Federal share for that feature.

SEC. 743. The project for the Apalachicola-Chattahoochee-Flint Rivers, Georgia and Florida, authorized in section 2 of the River and Harbor Act of 1945 (Public Law 79-14; 59 Stat. 10) is hereby modified to authorize the Secretary—

(1) in the course of routine maintenance dredging, to restore and maintain access (in the interest of navigation and ecological restoration) to bendways and interconnecting waterways, including the upper and lower inlets to Poloway cutoff, isolated during construction and maintenance activities by the Federal Government; and

(2) to acquire lands for and to construct, operate, and maintain water-related public use and access facilities along and adjacent to the Apalachicola River downstream of Jim Woodruff lock and dam to Apalachicola, Florida, except that the Secretary shall proceed with the acquisition of lands for the construction of water-related public use and access facilities and the operation and maintenance of such facilities at not more than one area within each county bordering the Apalachicola River.

The Federal and non-Federal share of activities authorized by paragraph (2) of this subsection shall be determined in accordance with the provisions of the Federal Water Project Recreation Act of 1965 (Public Law 89-72; 79 Stat. 213).

SEC. 744. The project for Racine Harbor, Wisconsin, authorized by the River and Harbor Act of March 2, 1945, is hereby modified as described in Racine County Federal permit application number 85-196-02. The Secretary is authorized to construct and maintain the modified harbor area, including initial dredging of such harbor area and entrance channel and construction of a dredged-spoil containment facility, at an estimated cost of $3,000,000.

Sec. 745. The project on Milk River for local flood protection at Havre, Montana, authorized by section 10 of the Flood Control Act approved December 22, 1944 (58 Stat. 897), is hereby modified to authorize the Secretary to reconstruct or replace, whichever the Chief of Engineers determines necessary and appropriate, the water supply intake weir of the city of Havre, Montana, at an estimated cost of $1,400,000.

SEC. 746. The Lower Granite lock and dam feature of the project for navigation, Snake River, Oregon, Washington, and Idaho, authorized by the first section of the River and Harbor Act approved March 2, 1945 (59 Stat. 21), is hereby modified to authorize the Secretary to construct an all-weather surface road in Whitman County, Washington, from Whitman County Road 9000 in Wawawai Canyon to Lower Granite Dam and the Port of Almota, at an estimated cost of $7,870,000.

SEC. 747. The project for Curwensville Lake, Pennsylvania, authorized by the Flood Control Act of 1954 is hereby modified to authorize the Secretary to construct, at full Federal expense, a water line with pumps from the Pike Township Water Authority to the Bloomington holding tank in order to provide water for municipal use to the town of Bloomington, Pennsylvania, at an estimated cost of $300,000.

SEC. 748. The project for flood protection, Waterloo, Iowa, authorized by section 204 of the Flood Control Act of 1965 is hereby modified to provide that the reconstruction of the bridge on United States Highway 20 and the Lafayette Street bridge which are required as a result of the Blowers Creek phase of the project shall be carried out at full Federal expense, at an estimated cost of $1,700,000.

SEC. 749. The Mud Lake feature of the project for the western Tennessee tributaries, Tennessee and Kentucky, authorized by resolution of the Committee on Public Works of the Senate adopted December 17, 1970, and resolution of the Committee on Public Works of the House of Representatives adopted December 15, 1970, under section 201 of the Flood Control Act of 1965 (Public Law 89-298), is hereby modified to provide that the requirements of local cooperation shall be (1) to hold and save the United States free from damages due to the construction works, and (2) to maintain and operate all the works after completion in accordance with regulations prescribed by the Secretary.

SEC. 750. The project for flood control on the Kawkawlin River, Michigan, authorized under the authority of section 205 of the Flood Control Act of 1948, as amended, is hereby modified to provide that the operation and maintenance of the project shall be the responsibility of the Secretary, at an estimated annual cost of $70,000.

SEC. 751. The project for Denison Dam (Lake Texoma), Red River, Texas and Oklahoma, authorized by the Flood Control Act approved June 28, 1938 (52 Stat. 1219), as amended, is hereby modified to provide that the Secretary is authorized to reallocate from hydropower storage to water supply storage, in increments as needed, up to an additional 150,000 acre-feet for municipal, industrial, and agricultural water users in the State of Texas and up to 150,000 acre-feet for municipal, industrial, and agricultural water users in the State of Oklahoma. For that portion of the water storage reserved for users in the State of Oklahoma, the Secretary may contract, in increments as needed, with qualified individuals, entities, or water utility systems for use within the Red River Basin; except that for any portion of that water to be utilized outside the Red River Basin, the Secretary shall contract with the RedArk Development Authority. For the portion of the water storage reserved for users in the State of Texas, the Secretary shall contract, in increments as needed, for 50,000 acre-feet with the Greater Texoma Utility Authority and 100,000 acre-feet with the North Texas Municipal Water District. All contracts entered into by the Secretary under this section shall be under terms in accordance with section 301(b) of the Water Supply Act of 1958 (Public Law 85-500). No payment shall be required from and no interest shall be charged to users in the States of Oklahoma or Texas for the reallocation authorized by this section until such time as the water supply storage reserved under such reallocation is actually first used. Any contract entered into for the use of the water received under this section shall require the contracting entity to begin principal and interest payments on that portion of the water allocated under the contract at the time the entity begins the use of such water. Until such time, storage for which reallocation is authorized in this section may be used for hydropower production. Nothing in this section shall be construed as amending or altering in any way the Red River Compact. In consideration of benefits in connection

with such reallocation and usage of municipal, industrial, and agricultural water, all benefits that can be assigned to the Red River chloride control project, Texas and Oklahoma, or the Red River and tributaries multipurpose study, Oklahoma, Texas, Arkansas, and Louisiana, and any individual projects arising from such study, shall be reserved for such projects. Nothing in this section shall affect water rights under the laws of the States of Texas and Oklahoma.

SEC. 752. The navigation project for Buffalo Ship Canal, Buffalo, New York, authorized by the River and Harbor Act of March 2, 1945, is hereby modified to authorize and direct the Secretary to take such actions as may be necessary to construct a high-lift span bridge in the vicinity of the Coast Guard station, approximately 3,600 feet north of South Michigan Avenue, over the ship channel, at full Federal expense, at an estimated cost of $18,000,000.

SEC. 753. The project for Jackson Hole, Snake River, local protection and levee, Wyoming, authorized by the River and Harbor Act of 1950, is hereby modified to provide that the operation and maintenance of the project and additions and modifications thereto constructed by non-Federal interests shall be the responsibility of the Secretary, except that the non-Federal interests shall pay the first $35,000, in cash or materials, of the cost of any such operation and maintenance in any one year.

SEC. 754. The project for navigation for Newport Bay Harbor, Orange County, California, authorized by the River and Harbor Act approved August 26, 1937 (50 Stat. 849), and section 2 of the River and Harbor Act approved March 2, 1945 (59 Stat. 21), is modified to authorize the Secretary to dredge and maintain the upper Newport Bay to the boundary of the Upper Newport Bay State Ecological Preserve to a depth consistent with the depth in the existing project for lower Newport Bay, at an estimated cost of $2,500,000.

SEC. 755. The project for flood control and other purposes in the South Platte River Basin in Colorado, authorized by the Flood Control Act of 1950 (64 Stat. 175), is modified to provide that the Chatfield Dam and any other authorized Federal improvements in the South Platte River Basin shall be operated in a manner that achieves the authorized level of flood protection, as determined by the Secretary, for the area beginning at the Chatfield Dam and ending at a point 82 miles downstream.

SEC. 756. The multipurpose project at Beaver Lake, Arkansas, authorized by the Flood Control Act of 1954, is hereby modified to authorize and direct the Secretary, in cooperation with the Administrator of the Environmental Protection Agency and in consultation with appropriate State and local agencies, to conduct a one-year comprehensive study of the Beaver Lake reservoir to identify measures which will optimize achievement of the project's purposes while preserving and enhancing the quality of the reservoir's water. Upon completion of the study the Secretary shall undertake a demonstration project at Beaver Lake to determine the effectiveness of measures identified in such study for preserving and enhancing the quality of the reservoir's water for current and future users, at full Federal expense and at an estimated cost of $5,000,000.

SEC. 757. (a) The Mississippi River-Gulf outlet feature of the project for Mississippi River, Baton Rouge to Gulf of Mexico, authorized by the Act of March 29, 1956 (Public Law 455 of the Eighty-fourth Congress, 70 Stat. 65), is modified to provide that the replacement and expansion of the existing industrial canal lock and connecting channels or the construction of an additional lock and connecting channels shall be in the area of the existing lock. The Federal share of the cost of such modification shall be paid from the Port Infrastructure Development and Improvement Trust Fund. The conditions of local cooperation specified in House Document Numbered 245, Eighty-second Congress, shall apply to the construction of the replacement or additional lock and connecting channels, except that the additional costs, as determined by the Chief of Engineers, of lands, easements, and rights-of-way acquisition and relocations of residences, industries, and utilities beyond those costs at the Meraux site (Violet), including such costs attributable to the relocation, replacement, modification, or construction of bridges, shall be borne by the United States. All other costs of relocation, replacement, modification, or construction of bridges (at a cost not to exceed $94,500,000), required as a result of the construction of the replacement or additional lock and connecting channels shall be borne by the United States; and before construction of bridges may be initiated the non-Federal public bodies involved shall agree (1) to hold and save the United States free from damages resulting from construction of the bridges and their approaches, (2) upon completion of construction, to accept title to such bridges and approaches and thereafter to operate and maintain the bridges and their approaches as free facilities.

(b) The Secretary is directed to make a maximum effort to assure the full participation of members of minority groups, living in the affected areas, in the construction of the replacement or additional lock and connecting channels authorized by subsection (a) of this section, including actions to encourage the use, wherever possible, of minority-owned firms. The Chief of Engineers is directed to report on July 1 of each year to the Congress on the implementation of this section, together with recommendations for any legislation that may be needed to assure the fuller and more equitable participation of members of minority groups in this project or others under the direction of the Secretary.

SEC. 758. The project for flood protection on the Saginaw River, Michigan, authorized by the Flood Control Act of 1958 (Public Law 85-500), is modified (1) to provide that the Secretary shall first construct the Flint and Shiawassee Rivers portion of the Shiawassee Flats unit of such project and that such construction shall begin, with available funds, during fiscal year 1986, and (2) to authorize the Secretary to reconstruct or relocate, whichever the Secretary determines is necessary, the Curtis Road Bridge, at full Federal expense and at an estimated cost of $350,000. Such project is also modified to include necessary measures to alleviate project-induced flood damages to areas outside the project area and to include such channelization measures in the Shiawassee Flats unit as the Secretary determines necessary for flood control purposes. For the purpose of determining the non-Federal share of the cost of the project, as modified, the cost of reconstruction or relocation of the Curtis Road Bridge, as the case may be, shall not be included in the cost of the project.

SEC. 759. The navigation project for Brunswick Harbor, Georgia, authorized by the River and Harbor Act of 1950, is hereby modified to incorporate the Georgia Ports Authority's 30-foot-deep by 300-foot-wide by 8,000-foot-long channel in the South Brunswick River serving Colonel's Island terminal facilities.

SEC. 760. The project for navigation at Houston Ship Channel (Barbour Terminal Channel), Texas, authorized by section 107 of the River and Harbor Act of 1960 (74 Stat. 486), is modified to authorize and direct the Secretary to perform such dredging operations as are necessary to maintain a 40-foot project depth in the Barbour Terminal Channel.

SEC. 761. (a) The Hansen Dam project authorized as part of the flood control project for the Los Angeles and San Gabriel Rivers, California, by section 5 of the Flood Control Act approved June 22, 1936 (49 Stat. 1589), is hereby modified to authorize the Secretary to contract for the removal and sale of dredged material from the flood control basin for Hansen Dam, Los Angeles County, California, for the purposes of facilitating flood control, recreation, and water conservation. All funds received by the Secretary from the removal and sale of such dredged material shall be deposited in the general fund of the Treasury.

(b) There is authorized to be appropriated for fiscal years beginning after September 30, 1985, an amount not to exceed the amount of funds received by the Secretary from the removal and sale of dredged material under subsection (a). Amounts appropriated under this subsection shall be available to the Secretary—

(1) to construct, operate, and maintain recreational facilities at the Hansen Dam project; and

(2) to the extent consistent with other authorized project purposes, to facilitate water conservation and ground water recharge measures at the Hansen Dam project in coordination with the city of Los Angeles, California, and the Los Angeles County Flood Control District;

at full Federal expense.

SEC. 762. The project for navigation, Newport News Creek, Virginia, authorized by the River and Harbor Act of 1946, is hereby modified to authorize the relocation and reconstruction by the State of Virginia of the project upon approval of plans for such relocation and reconstruction by the Secretary.

SEC. 763. The project for flood protection, Turtle Creek, Pennsylvania, authorized by the Flood Control Act of 1958, is hereby modified to authorize and direct the Secretary to repair and restore such project so that such project serves its project purposes. Such repairs and restoration shall not be commenced until each non-Federal interest has entered into a written agreement with the Secretary to furnish its required cooperation for such repairs and restoration in accordance with the project agreement and to comply with section 221 of the Flood Control Act of 1970 and the non-Federal share requirements of section 302 of this Act.

SEC. 764. The project for navigation, Dunkirk Harbor, New York, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works of the House of Representatives, dated December 15, 1970, and resolution of the Committee on Public Works of the Senate, dated June 22, 1971, is modified to authorize the Secretary to include dredging and maintenance of the east-

ern inner harbor of such project in accordance with such plans as the Secretary, in consultation with appropriate non-Federal interests, may develop, at an estimated cost of $2,300,000.

SEC. 765. The project for navigation at Houston Ship Channel (Bayport Ship Channel), Texas, authorized by section 101 of the River and Harbor Act of 1958 (72 Stat. 298), is modified to authorize and direct the Secretary to perform such dredging operations as are necessary to maintain a 40-foot project depth in the Bayport Ship Channel.

SEC. 766. (a) The project for navigation for Honolulu Harbor, Hawaii, authorized by section 101 of the River and Harbor Act of 1954, is modified to authorize and direct the Secretary to maintain a 23-foot project depth in the Kalihi Channel portion of such project.

(b) The consent of Congress is hereby given to the State of Hawaii to construct, operate, and maintain a fixed-span bridge in and over the water of the Kalihi Channel, Honolulu Harbor, Hawaii.

SEC. 767. The project for navigation, Bayou Lafourche and Lafourche-Jump Waterway, Louisiana, authorized by the River and Harbor Act of August 30, 1935, is hereby modified to provide for the maintenance by the Secretary of a channel 30 feet deep from mile minus 2 to mile 0 in Belle Pass and of a channel 24 feet deep from mile 0 to mile 4 in Bayou Lafourche. The Secretary is authorized and directed to study the feasibility of deepening the channel from mile 0 to mile 4 in Bayou Lafourche to 30 feet. The Secretary shall report the results of such study with recommendations to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 768. (a) The project for harbor improvement at Noyo, Mendocino County, California, authorized by the River and Harbor Act of 1962 (76 Stat. 1173), is hereby modified to provide that the non-Federal interests shall contribute 25 per centum of the cost of areas required for initial and subsequent disposal of dredged material, and of necessary retaining dikes, bulkheads, embankments, and movement of materials therefor.

(b) The requirements for appropriate non-Federal interests to contribute 25 per centum of the construction costs as set forth in subsection (a) shall be waived by the Secretary upon a finding by the Administrator of the Environmental Protection Agency (1) that for the area to which such construction applies, the State of California, municipalities, and other appropriate political subdivisions of the State and industrial concerns are participating in, and in compliance with, an approved plan for the general geographical area of the dredging activity for construction, modification, expansion, or rehabilitation of waste treatment facilities, and (2) that applicable water quality standards are not being violated.

(c) If, in lieu of diked disposal, the Secretary determines ocean disposal is necessary to carry out the project, the Federal share of the cost of such ocean disposal shall be 100 per centum.

SEC. 769. The project for flood control, Endicott, Johnson City, and Vestal, New York, authorized by the Flood Control Act of 1954, is hereby modified to authorize the Secretary to undertake such measures as may be necessary to correct erosion problems affecting the levee at Vestal, New York, and to perform necessary work to protect the levee and restore it to its design condition, at an estimated cost of $700,000. The non-Federal share of the cost of such measures and work shall be determined under section 302 of this Act.

SEC. 770. The flood control project for Sardis Lake, authorized by section 203 of the Flood Control Act of 1962, as modified by section 108 of the Energy and Water Development Appropriation Act of 1982, is modified to authorize and direct the Secretary to plan, design, and construct access road improvements to the existing road from the west end of Sardis Lake to Daisy, Oklahoma, at full Federal expense and at an estimated cost of $10,000,000. Non-Federal interests shall operate and maintain facilities at their own expense.

SEC. 771. The project for navigation, Cambridge Creek, Maryland, is modified to authorize and direct the Secretary to narrow the channel in the existing project, as determined necessary by the Secretary for the purpose of enhancing economic development in the area of such creek. No appropriation shall be made for carrying out such modification, if such modification has not been approved by resolution adopted by the Committee on Public Works and Transportation of the Houses of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 772. (a) The project for beach erosion control, Sandy Hook to Barnegat Inlet, New Jersey, authorized by the River and Harbor Act of 1958, is modified to provide that the first Federal construction increment of the Ocean Township to Sandy Hook reach of such project shall consist of a berm of approximately 50 feet at Sea Bright and Monmouth Beach extending to and including a feeder beach in the vicinity of Long Beach, at an estimated cost of $40,000,000.

(b) The non-Federal share of the cost of construction and maintenance of the Ocean Township to Sandy Hook reach of the project for beach erosion control, Sandy Hook to Barnegat Inlet, New Jersey, shall consist of amounts expended by non-Federal interests for reconstruction of the seawall at Sea Bright and Monmouth Beach, New Jersey.

(c) Before initiation of construction of any increment of the project for beach erosion control, Sandy Hook to Barnegat Inlet, New Jersey, non-Federal interests shall agree to provide public access to the beach for which such increment of the project is authorized in accordance with all requirements of State law and regulations.

SEC. 773. The project for flood control, Taylorsville Lake, Kentucky, authorized by the Flood Control Act of 1956, is modified to authorize and direct the Secretary to replace the Floyd's Fork Bridge on Routt Road, Jefferson County, Kentucky, in order to provide improved access to the project, at an estimated cost of $650,000.

SEC. 774. The project for the Lower Snake River Fish and Wildlife Compensation Plan, authorized by the Water Resources Development Act of 1976, is modified in accordance with the recommendations contained in the report of the Chief of Engineers, dated March 6, 1985.

SEC. 775. The project for navigation, Illinois River at Peoria, Illinois, authorized by the River and Harbor Act of 1946, is modified to provide for the inclusion within the project an adjacent downstream water area of approximately 400 feet long by 200 feet wide developed by local interests for an enlarged small boat harbor, including Federal construction and maintenance of such area and an access channel to a depth of 7 feet, at an estimated cost of $50,000. The project features authorized by this section may be funded under section 107 of the River and Harbor Act of 1960.

SEC. 776. The project for navigation for Tampa Harbor, Florida, authorized by the River and Harbor Act of 1970 is modified to provide for the widening of the authorized Port Sutton Turning Basin an additional 105 feet to the fender line along Pendola Point, at an estimated cost of $850,000.

SEC. 777. The project for Coralville Reservoir on Iowa River, Iowa, authorized by the Flood Control Act approved June 28, 1938, is modified to provide that the Secretary shall take such measures as are necessary to improve the Johnson County, Iowa, Road F-28 between Interstate route I-380 and Front Street in North Liberty, Iowa, at an estimated cost of $1,400,000.

SEC. 778. The project for flood protection on the Chariton River, Iowa and Missouri, authorized by section 203 of the Flood Control Act of 1954 (68 Stat. 1262), is modified to authorize and direct the Secretary to sell to the Rathbun Regional Water Association, Incorporated, a sufficient number of acre-feet of storage space from Rathbun Lake, Iowa, to yield to such association one billion five hundred million gallons of water annually based on a 90-percent chance of sufficient water being available from such lake. Such sale of storage space shall be subject to such terms and conditions as the Secretary and association may agree to under existing law, except that the construction costs of such project allocated to water supply required to be repaid under section 301(b) of the Water Supply Act of 1958 and the interest and amortization rate used to calculate the annual financial cost shall be the same as those used in contract number DACW41-76-C-0031 entered into by the United States and such association and approved by the Assistant Secretary of the Army for Civil Works on October 10, 1975.

SEC. 779. The project for navigation, Salem River, New Jersey, is hereby modified to provide that the depth of such project shall be 20 feet.

SEC. 780. The navigation project, Cold Spring Inlet, New Jersey, is hereby modified to provide that the depth of the 2,000 foot reach of the New Jersey Intracoastal Waterway in Cape May County shall be 15 feet.

SEC. 781. The project for navigation and power generation, Fort Peck, Montana, authorized by the Act entitled "An Act to authorize the completion, maintenance, and operation of the Fort Peck project for navigation, and for other purposes", approved May 18, 1938 (16 U.S.C. 833), shall include recreation as a purpose of such project.

AMENDMENTS OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer three amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. CONTE:

On page 312, line 9 strike "protection and";

On page 312, lines 10 and 11 strike ", mitigation of project—caused fish and wildlife losses (including habitat),"; and

On page 312, line 12, insert a comma before "shall".

On page 199, line 19 insert a period after "wildlife" and delete all thereafter through "lesser." on line 21, and

On page 200, line 4 insert the following after the period: "The Secretary shall, under the terms of this section, obligate not more than $30,000,000 in any fiscal year.".

On page 341, line 1, strike "involves" and insert in lieu thereof "necessitates the mitigation of fish and wildlife losses, including";

On page 341, line 4, after "such" insert "mitigation or enhancement, including acquisition of the";

On page 341, line 4, after "shall be" insert "undertaken or"; and

On page 341, line 6, after "shall be" insert "undertaken or".

Mr. CONTE (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. CONTE. Mr. Chairman, I have three amendments at the desk, one in title VII and two in title XI. Since they deal with the same subject matter, I ask unanimous consent that they be considered en bloc.

Mr. Chairman, let me begin by commending the gentleman from New Jersey [Mr. ROE] and the gentleman from Minnesota [Mr. STANGELAND], as well as other members of the subcommittee and full committee, for their work on this bill. This bill represents the best efforts of four committees to respond to our Nation's critical water resource needs, while being mindful of our continuing budgetary problems. The bill provides for increased cost sharing on various water projects, and, I am pleased to note, also provides for the implementation of a program of water supply construction loans and grants. This program, contained in title VIII, is one on which I have worked closely with the chairman and other members of the committee, particularly the gentleman from Pennsylvania [Mr. EDGAR] and I applaud the committee's inclusion of that program in this bill.

The bill also contains important environmental safeguards to be pursued in the construction of water projects. Federal projects that dam, drain, and divert the waters and wetlands of the United States almost invariably affect the value of fish and wildlife habitat in the project area. Over the years, significant improvements have been made by the Corps of Engineers in the consideration of fish and wildlife impacts, and this bill will continue those improvements. But the legacy of major wildlife losses from projects built in years past, as well as overwhelming size of the construction program contemplated by this bill, lead me to propose several amendments to strengthen and clarify the treatment of important fish and wildlife habitat at corps projects.

With the populations of numerous species of migratory waterfowl reaching record lows on our major flyways this year, it is time to redouble our efforts to preserve the habitat upon which the very survival of these species depends.

Mr. Chairman, my first amendment deals with the provision in title VII of the bill clarifying the Corps of Engineers' authority to retrofit existing projects with fish and wildlife mitigation features. My amendment would strike the $7.5 million ceiling for individual project modifications, and substitute a $30 million annual aggregate ceiling for such work. This will provide greater flexibility to the corps to meet real mitigation needs on a project by project basis, while also maintaining budgetary discipline with a reasonable, and by all estimates adequate, ceiling on expenditures.

My second amendment would clarify a provision in title XI regarding the evaluation of fish and wildlife measures included in Corps of Engineers projects. I am concerned that the language currently in the bill might have the effect of clouding the distinction between fish and wildlife mitigation and fish and wildlife enhancement, for purposes of project benefit-cost analysis. My understanding is that mitigation is currently, and appropriately, treated as a project cost and allocated among other project purposes such as hydropower or water supply.

My amendment would strike the reference to mitigation in this section, to avoid any inference that fish and wildlife mitigation should be subject to separate benefit/cost analysis.

My third amendment, also to title XI, would clarify an important new provision of the bill requiring the implementation of fish and wildlife mitigation concurrently with the implementation of other project features, My amendment would make clear that all activities constituting a mitigation plan—and not merely the acquisition of mitigation lands—are to be implemented concurrently with project construction. Such other features might include fish ladders, greentree reservoirs, or other facilities necessary to effectively manage fish and wildlife resources for mitigation purposes.

I want to commend the members of the committee for their sensitivity to these issues, and urge the adoption of my amendments.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I am glad to yield to my good friend from New Jersey, the chairman of the subcommittee, Mr. ROE.

Mr. ROE. I thank the gentleman for yielding.

Mr. Chairman, at the outset I would like to thank the gentleman for his enormous contribution that he has made over the years to our public works efforts, particularly in the areas of wildlife and mitigation, and the work he has done throughout the country, and all the legislation that he has handled.

Mr. Chairman, I think the career of the gentleman speaks well to protecting the environment and the quality of life here in America.

So that is one reason, above and beyond everything else, that I think, as a member of this committee, I would certainly accept your amendment, as being of extraordinary increased value to our legislation.

But there is a second reason I would recommend to our committee that they would accept your outstanding amendment, and that is because I understand it is your birthday today.

Mr. Chairman, on this side of the aisle we have no objection whatever to the amendments of the gentleman from Massachusetts.

Mr. CONTE. I want to thank the gentleman from New Jersey for his gracious remarks.

I would like to make one correction: My birthday is actually on Saturday. We are celebrating it tonight because the House is in session, and I hope that the gentleman from New Jersey and my other colleagues will be able to attend.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I would be glad to yield to the gentleman from Minnesota, the ranking minority member on the subcommittee.

Mr. STANGELAND. Happy birthday. As a birthday present, I will say that we will accept your amendments on this side of the aisle as well.

Mr. CONTE. I thank the gentleman very much. You are very kind.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Massachusetts [Mr. CONTE].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. RALPH M. HALL

Mr. RALPH M. HALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered By Mr. Ralph M. Hall: Page 211, line 5, insert "(a)" after "751.".

Page 211, line 21, strike out "For" and all that follows through the period on line 21 and insert in lieu thereof the following: "For that portion of the water storage reserved for users in the State of Texas, the Secretary shall contract, in increments as needed, for 50,000 acre-feet with the Greater Texoma Utility Authority and 100,000 acre-feet with other qualified individuals, entities, or water utility systems. Nothing in the preceding sentence shall supersede any requirement of State law with respect to the use of any water".

Mr. RALPH M. HALL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be

considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. RALPH M. HALL. I thank the Chairman.

Mr. Chairman, under section 751, the Dennison Dam, better known as Lake Texoma, has an allocation. The State of Oklahoma and the State of Texas got together and received 300,000 acre feet allocation divided evenly, pursuant to an agreement.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. RALPH M. HALL. I yield to the gentleman from New Jersey.

Mr. ROE. I thank the gentleman for yielding.

Mr. Chairman, again we have reviewed this amendment. I know that our colleague, Mr. WATKINS, is also interested in this amendment. We have reviewed it for sufficiency and what it achieves. We have no objection to the amendment of the gentleman; it makes a contribution to and improves our bill.

Mr. RALPH M. HALL. I thank the Chairman, and I thank the gentleman for his work on this bill.

Mr. Chairman, I yield back the balance of my time.

□ 1445

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. RALPH M. HALL).

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to title VII of the bill?

If not, the clerk will designate title VIII.

The text of title VIII is as follows:

TITLE VIII—WATER SUPPLY

SUBTITLE A—LOAN PROGRAM

SEC. 801. This subtitle may be cited as the "Water Supply Rehabilitation and Conservation Act of 1985".

SEC. 802. The Congress hereby finds that—

(1) many water supply systems are in deterioration and that authority has not been granted to any Federal water development agency to assist many existing municipal and industrial water supply systems;

(2) certain regions of the Nation are facing serious water supply problems and large quantities of water are being wasted as a result of aging and deteriorating water supply and distribution facilities;

(3) modernizing existing water supply systems is an important part of any effort to rejuvenate the Nation's older cities and remove impediments to economic growth;

(4) many water supply systems have experienced difficulty in obtaining capital necessary to accomplish repairs, rehabilitations, expansions, and improvements required for efficient and reliable operation;

(5) in light of historic and continuing Federal involvement in meeting many other water supply needs, there is a national need to rehabilitate and upgrade existing water supply systems;

(6) in all regions of the country and in all circumstances in which the Federal Government is involved in providing water supply, it is essential to promote water conservation; and

(7) encouraging the use of low-flow devices in new construction, improving metering and rate schedules and leak detection programs, and adopting other water conservation methods saves water and energy.

SEC. 803. For purposes of this subtitle—

(1) The term "expansion", as used with respect to a water supply system, means the installation of water supply facilities necessary to increase the service capability or efficiency of the water supply system.

(2) The term "improvement", as used with respect to a water supply system, means any activity other than rehabilitation designed to improve service reliability or efficiency of the water supply system.

(3) The term "rehabilitation", as used with respect to a water supply system, means the repair or replacement of components or facilities required to restore service reliability or efficiency of the water supply system.

(4) The term "State" means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

(5) The term "water supply system" means the facilities used in the production and pumping of water for consumption (including, but not limited to, water storage, desalination, and other collection and purification techniques), water treatment facilities (other than sewage treatment facilities), and the water distribution and conveyance facilities used to provide water for municipal and industrial purposes.

SEC. 804. (a) Subject to the provisions of this subtitle, the Secretary may make loans to—

(1) any department, agency, or instrumentality of one or more State or local governments which operates a water supply system, and

(2) any person who operates a water supply system the rates and services of which are subject to regulation by a department, agency, or instrumentality of a State government,

for the purpose of repair, rehabilitation, expansion, or improvement of such system.

(b)(1) Subject to the provisions of section 810, the amount of any loan under this subtitle shall not exceed 80 per centum of the cost of the project for which the loan is made. Such costs shall include, but not be limited to, the costs of (A) engineering, (B) design, and (C) acquisition of water rights, lands, easements, and rights-of-way, necessary to carry out the project.

(2) The Secretary may not lend under this subtitle in any fiscal year (A) more than $40,000,000 to any operator of a water supply system, and (B) more than $80,000,000 for water supply projects in any State.

(c) No loan may be made under this subtitle for any purpose not related to water supply or water conservation.

(d) No loan may be made under this subtitle for the purpose of acquisition by a supplier of water of any other supplier of water serving a population of more than 1,000 persons.

(e) No loan may be made under this subtitle for any project which is intended solely to increase the number of persons served by a water supply system.

(f)(1) For the purpose of securing consideration and approval of loans under this subtitle, not later than 180 days after the date of enactment of this Act, and not later than January 15 of each year thereafter, the Secretary shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate (hereinafter in this subsection referred to as "the committees") a list of any applications for loans fulfilling all requirements for loans under this subtitle, a detailed summary of all such applications, and a recommendation of approval or disapproval for a loan for each such application. Not later than 270 days after the date of enactment of this Act, and not later than May 15 of each year thereafter, the committees shall adopt a resolution listing those loans, if any, approved under this subtitle. Except for loans authorized by section 813 of this Act, no appropriation shall be made for any loan under this subtitle if the application for such loan has not been approved by such resolution adopted by the committees.

(2) Any loan approved and authorized for appropriations pursuant to the provisions of paragraph (1) of this subsection shall not be authorized after the 5-year period beginning on the date of approval of such loan by the committees unless during such period funds have been obligated for such loan under this subtitle.

SEC. 805. (a) Any operator of a water supply system seeking a loan under this subtitle shall submit an application to the Secretary for such loan in such form and manner as the Secretary may require by regulation. Each such application shall be accompanied by a payment of one percent of the amount of the loan requested in such application (but in no event more than $10,000).

(b) Any application for a loan under this subtitle shall include, among other things (1) a detailed plan and estimated cost of the project for which the loan is applied, (2) a showing (A) that the applicant holds or can acquire all lands and interests in land (except public and other lands and interests in land owned by the United States which are within the administrative jurisdiction of the Secretary and subject to disposition by the Secretary) and rights to the use of water pursuant to applicable State law necessary for the successful completion, operation, and maintenance of the project, and (B) that the applicant is ready, willing, and able to finance the portion of the cost of the project which will not be covered by the loan, and (3) a showing of the improvements the proposed project will make in supplying water for domestic, commercial, and industrial purposes, as well as public purposes including fire protection and recreation.

(c) The Secretary may only make loans under this subtitle with respect to projects which the Secretary determines are technologically feasible and which constitute a reasonable financial risk.

(d) In making loans under this subtitle, the Secretary shall give priority to those water supply systems which are polluted, contaminated, or threatened with pollution or contamination, to such an extent that they present a potential danger to human health.

SEC. 806. Upon approval or disapproval of a loan application under this subtitle by the Secretary, the Secretary shall pay the applicant the amount by which the payment made by such applicant under section 805(a) with respect to such application exceeds the

cost incurred by the Secretary in processing such application.

SEC. 807. (a) The Secretary may only make loans under this subtitle to an operator of a water supply system if the Secretary determines that, before completion of the proposed project, the operator will, to the best of the operator's ability, implement a model water conservation program or a water conservation program, suitable to local conditions, which is equivalent to a model water conservation program.

(b) For purposes of this section, the term "model water conservation program" includes the following:

(1) Encouraging each community served by the water supply system to establish plumbing codes which promote water conservation in new construction.

(2) To the extent feasible and appropriate, utilizing water meters which promote water conservation.

(3) Establishing water rate schedules which encourage water conservation.

(4) Providing a comprehensive leak detection and repair program for water supply systems.

(5) Making public information available on home and business water conservation techniques and benefits.

(6) Developing a drought contingency plan.

SEC. 808. The Secretary shall enter into an agreement with each person to whom a loan is to be made under this subtitle. Subject to the provisions of section 810, such agreement shall include the following terms, among others:

(1) The maximum amount of the loan to be made and the time and method of making funds available under the loan.

(2) An interest rate for the loan determined in accordance with section 301(b) of the Water Supply Act of 1958 (72 Stat. 319; Public Law 85-500).

(3) Computation of interest in accordance with such section 301(b).

(4) A repayment period and a plan of repayment of the sums lent and interest determined in accordance with such section 301(b).

(5) Such provisions as the Secretary shall deem necessary or proper to provide assurance of and security for prompt repayment of the loan and interest, including a provision that the operator of the water supply system shall maintain adequate rates in order to be reasonably expected to meet its obligations under the agreement and to maintain, repair, and rehabilitate the project for which the loan is made.

SEC. 809. Amounts paid with submission of loan applications under section 805(a) and amounts of loans (including interest accruing on such loans) repaid under this subtitle shall be deposited in the general fund of the Treasury.

SEC. 810. The Secretary may increase the maximum percentage of the cost of a project for which a loan may be made under this subtitle if the project for which the loan is made will serve a remote rural area or if the Secretary determines that such increase is appropriate for economic reasons.

SEC. 811. The Secretary shall issue such regulations and carry out such actions as may be necessary to carry out the objectives of this subtitle, except that the Secretary may not provide planning, design, or construction-related services to applicants for loans under this subtitle.

SEC. 812. There is authorized to be appropriated to carry out this subtitle $800,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989, and such sums as may be necessary for each fiscal year thereafter.

SEC. 813. The following water supply projects are authorized to receive loans under this subtitle:

(1) Treatment, conveyance, distribution, and pumping facilities for Buffalo, New York, at an estimated cost of $20,000,000.

(2) Treatment, conveyance, distribution, and pumping facilities for Berlin, New Hampshire, at an estimated cost of $10,000,000.

(3) Treatment, conveyance, distribution, and pumping facilities for Rochester, New Hampshire, at an estimated cost of $10,000,000.

(4) Treatment, conveyance, distribution, pumping, and storage facilities for the Islands of Saint Thomas, Saint Croix, and Saint John, Virgin Islands, at an estimated cost of $35,000,000.

(5) Conveyance, distribution, pumping, and storage facilities for Dupage County, Illinois (Dupage County Commission), at an estimated cost of $280,000,000.

(6) Conveyance facilities (Third Water Tunnel, First Stage) for New York City, at an estimated cost of $220,000,000.

(7) Treatment, conveyance, distribution, pumping, and storage facilities for Fort Smith and Van Buren, Arkansas, at an estimated cost of $25,000,000.

(8) Treatment, conveyance, distribution, production, pumping, and storage facilities for American Samoa, at an estimated cost of $20,000,000.

(9) Treatment, pumping, and conveyance facilities for William H. Harsha Lake, Ohio River Basin, Ohio, at an estimated cost of $18,400,000.

(10) Treatment, conveyance, distribution, and pumping facilities for Totowa, New Jersey (Passaic Valley Water Commission), at an estimated cost of $25,000,000.

(11) Conveyance, pumping, and distribution facilities for Jersey City, New Jersey, at an estimated cost of $15,000,000.

(12) Treatment, conveyance, pumping, distribution, production, and storage facilities for Rockaway Township, New Jersey, at an estimated cost of $10,000,000.

(13) Treatment, conveyance, pumping, distribution, production, and storage facilities for Falmouth, Kentucky, at an estimated cost of $2,500,000.

(14) Treatment, distribution, pumping, and storage facilities for the Borough of Ford City, Pennsylvania, at an estimated cost of $1,600,000.

(15) Treatment, conveyance, distribution, pumping, and storage facilities for Tucson, Arizona, at an estimated cost of $50,000,000.

(16) Conveyance, pumping, and distribution facilities for Boston, Massachusetts, at an estimated cost of $86,000,000.

(17) Conveyance, pumping, distribution, and storage facilities for Cook County, Illinois (Northwest Suburban Municipal Joint Action Water Agency), at an estimated cost of $124,400,000.

(18) Treatment, conveyance, pumping, distribution, production, and storage facilities for Brockton, Massachusetts, at an estimated cost of $9,500,000.

(19) Treatment, conveyance, pumping, distribution, production, and storage facilities for Hesperia, California, at an estimated cost of $32,000,000.

(20) Treatment, conveyance, distribution, and pumping facilities for Philadelphia, Pennsylvania, at an estimated cost of $66,000,000.

(21) Intake, pumping, and distribution facilities for Huntington, West Virginia, at an estimated cost of $2,400,000.

(22) Treatment, conveyance, distribution, and pumping facilities for Grand Haven, Michigan, at an estimated cost of $6,900,000.

(23) Treatment, conveyance, pumping, distribution, production, and storage facilities for Battle Creek, Michigan, including identification and development of alternative sources of water and necessary relocation of wells, at an estimated cost of $3,000,000.

(24) Storage facilities consisting of a water tank in Tafuna, Tualauta County, Western Tutuila Island, American Samoa, at an estimated cost of $450,000.

(25) Storage facilities consisting of a water tank in the Village of Leona, Lealataua County, Western Tutuila Island, American Samoa, at an estimated cost of $425,000.

(26) Treatment, conveyance, pumping, distribution, and storage facilities for the Beccaria-Houtzdale area, Pennsylvania, at an estimated cost of $2,000,000.

(27) Conveyance, pumping, distribution, and storage facilities for the community of Blue Creek, Ohio (Northwest Water System, Inc.), at an estimated cost of $2,200,000.

(28) Treatment, conveyance, pumping, distribution, production, and storage facilities for Morris County, New Jersey (Morris County Municipal Utilities Authority), at an estimated cost of $26,300,000.

(29) Treatment, conveyance, pumping, distribution, and production facilities for Johnstown, Pennsylvania, at an estimated cost of $5,500,000.

(30) Treatment, conveyance, distribution, and pumping facilities for East Hazelcrest, Illinois, at an estimated cost of $350,000.

SEC. 814. Section 401(d) of the Act entitled "An Act to enhance the economic development of Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and for other purposes" (98 Stat. 1735), is amended by striking "in fiscal" and inserting in lieu thereof "effective fiscal".

SUBTITLE B—WATER SUPPLY PROJECTS

SEC. 851. (a) The Congress declares that there is a national interest in the conservation of existing water supplies and in the development of new water supplies, on an economical basis, for domestic, municipal, industrial, and other public purposes through Federal participation in the repair, rehabilitation, and improvement of water supply systems and through Federal construction of single and multiple purpose water supply projects.

(b) In carrying out a policy to encourage a more efficient use and adequate supply of water as a way to benefit municipal and industrial development, wetland preservation, fish and wildlife protection, and other national purposes, the Secretary is authorized and directed to survey, plan, and recommend to the Congress (1) projects for the repair, rehabilitation, expansion, and improvement of water supply systems (including, but not limited to, demand-reducing techniques), and (2) projects for the construction of single and multiple purpose water supply systems (including, but not limited to, storage, treatment, conveyance, and distribution facilities) needed to meet existing and anticipated future demand, consistent with the policies set forth in this section. No appropriation shall be made for any such survey if such appropriation has not been approved by resolution adopted by the Committee on Environment and Public Works of the Senate or the Committee on

Public Works and Transportation of the House of Representatives.

(c)(1) Except as provided in paragraph (2), the appropriate non-Federal interests shall provide the necessary lands, easements, and rights-of-way for any project carried out pursuant to a survey undertaken under subsection (b). If the value of the lands, easements, and rights-of-way so provided is less than 20 per centum of the cost of the project allocable to municipal and industrial water supply (including the value of such lands, easements, and rights-of-way), the non-Federal interests shall pay to the Secretary before construction of the project an amount equal to the excess of (A) the amount equal to 20 per centum of such cost, over (B) the value of such lands, easements, and rights-of-way.

(2) If the Secretary estimates before the beginning of construction of any project to which paragraph (1) applies that the value of all lands, easements, and rights-of-way required for such project will be a percentage of the cost of the project allocable to municipal and industrial water supply which is greater than 20 per centum, the Secretary shall, upon request by the non-Federal interests, acquire such lands, easements, and rights-of-way, except that the aggregate amount of the value of lands, easements, and rights-of-way acquired by the Secretary shall be limited to the amount by which such estimated sum exceeds an amount equal to 20 per centum of the estimated cost of the project allocable to municipal and industrial water supply.

(3) An amount equal to the cost of the project allocable to municipal and industrial water supply less the value of lands, easements, and rights-of-way provided and any amount paid to the Secretary under paragraph (1) by the non-Federal interests shall be repaid to the United States over a period not to exceed fifty years, with interest determined in accordance with section 301(b) of the Water Supply Act of 1958.

(4) The Secretary may reduce the amount required to be paid under paragraph (1), and the value of lands, easements, and rights-of-way required to be provided under paragraph (2), by non-Federal interests for any project to which paragraph (1) applies if the project will serve a remote rural area or if the Secretary determines that such reduction is appropriate for economic reasons.

SEC. 852. (a) Except as provided in subsection (b), the Secretary is authorized to provide technical assistance to operators of public water supply systems for the purpose of identifying water supply problems and developing measures for repair, rehabilitation, expansion, and improvement of public water supply systems.

(b) The authority of the Secretary to provide technical assistance under subsection (a) is limited to providing technical assistance for reconnaissance reports and prefeasibility studies except in any case in which the Secretary determines that the public water supply operator cannot utilize the services of the private sector for economic or other reasons.

SEC. 853. The Secretary shall study existing water resources projects under the jurisdiction of the Secretary to determine the feasibility of utilizing such projects for water supply on an interim or permanent basis. The Secretary shall transmit a report of the results of such study, along with recommendations for the utilization of such projects for water supply, not later than two years after the date of enactment of this Act.

SEC. 854. The Secretary is authorized to design and construct a treatment plant and a regional conveyance system of water from Lake Arcadia to Edmund, Oklahoma, at an estimated cost of $19,000,000. The Secretary shall acquire and provide to the non-Federal interests the necessary lands, easements, and rights-of-way for the project. The non-Federal interests shall pay to the Secretary, before construction of the project, an amount equal to 20 per centum of the cost of such project (including the value of such lands, easements, and rights-of-way). The non-Federal interests shall repay the remainder of the costs of the project to the Secretary in accordance with the Water Supply Act of 1958, except that the interest rate shall be the applicable rate under the existing water supply contract, signed by the Secretary on November 13, 1979, and numbered DACW 56-79-C-0072.

SEC. 855. The Secretary is authorized and directed to construct treatment facilities and conveyance facilities to treat and convey water from Parker Lake to municipalities and rural water systems within the jurisdiction of the RedArk Development Authority in the State of Oklahoma, at a cost not to exceed $88,636,000. Subsection (c) of section 851 shall apply to such project.

SEC. 856. (a) The project for the Caesar Creek, Ohio River Basin, Ohio, authorized by section 4 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved June 28, 1938 (52 Stat. 1217), is hereby modified to authorize and direct the Secretary to construct a public water supply system in accordance with the document entitled "Southwest Ohio Water Plan", prepared by the Ohio Department of Natural Resources (April 1976), with such modifications as the Chief of Engineers deems advisable, at an estimated cost of $66,000,000.

(b) Prior to the construction of the water supply system pursuant to subsection (a) of this section, the Secretary shall enter into an agreement with appropriate non-Federal interests which provides that (1) such non-Federal interests will provide the Secretary with the lands, easements, and rights-of-way necessary for the Secretary to construct such water supply system, (2) after such construction is completed, all right, title, and interest of the United States, in such water supply system shall be conveyed to such non-Federal interests who shall thereafter operate and maintain such water supply system, and (3) the costs of construction shall be repaid to the Federal Government over a period of fifty years after completion of construction of the water supply system. The first annual payment shall be a minimum of 0.1 per centum of the total amount to be repaid. The annual payments shall be increased by 0.1 per centum each year until the tenth year at which time the payment shall be 1 per centum of the total principal amount to be repaid. Subsequent annual payments for the balance of forty years shall be one-fortieth of the balance remaining after the tenth annual payment (including interest over such fifty-year period at the rate specified in section 301(b) of the Water Supply Act of 1958).

SEC. 857. The Secretary, in cooperation with the States and political subdivisions thereof, shall make a detailed estimate of needed repair, rehabilitation, and construction of water supply and distribution facilities for municipal and industrial uses and the costs thereof in all of the States and of needed repair, rehabilitation, and construction of water supply and distribution facilities for municipal and industrial uses and the costs thereof in each of the States. The Secretary shall not include in this estimate any needed repair, rehabilitation, and construction of water supply and distribution facilities constructed in accordance with the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory and supplementary thereto). In preparing such detailed estimate, the Secretary shall utilize information provided by the States. The Secretary shall transmit such detailed estimate to Congress not later than two years after the date of enactment of this Act.

The CHAIRMAN. Are there amendments to title VIII of the bill?

If not, the Clerk will designate title IX.

The text of title IX is as follows:

TITLE IX—NAMINGS

SEC. 901. The reservoir created by dam numbered 9 on the Arkansas River, Arkansas, constructed as part of the project for navigation on the Arkansas River and tributaries, shall hereafter be known and designated as the "Winthrop Rockefeller Reservoir". Any law, regulation, document, or record of the United States in which such reservoir is referred to shall be held to refer to such reservoir as the "Winthrop Rockefeller Reservoir".

SEC. 902. Lock and dam numbered 4 on the Arkansas River, Arkansas, constructed as part of the project for navigation on the Arkansas River and tributaries, shall hereafter be known and designated as the "Emmett Sanders Lock and Dam". Any law, regulation, document, or record of the United States in which such lock and dam are referred to shall be held to refer to such lock and dam as the "Emmett Sanders Lock and Dam".

SEC. 903. Lock and dam numbered 3 on the Arkansas River, Arkansas, constructed as part of the project for navigation on the Arkansas River and tributaries, shall hereafter be known and designated as the "Joe Hardin Lock and Dam". Any law, regulation, document, or record of the United States in which such lock and dam are referred to shall be held to refer to such lock and dam as the "Joe Hardin Lock and Dam".

SEC. 904. Lock and dam numbered 13 on the Arkansas River, Arkansas, constructed as part of the project for navigation on the Arkansas River and tributaries, shall hereafter be known and designated as the "James W. Trimble Lock and Dam". Any law, regulation, document, or record of the United States in which such lock and dam are referred to shall be held to refer to such lock and dam as the "James W. Trimble Lock and Dam".

SEC. 905. Lock and dam numbered 9 on the Arkansas River, Arkansas, constructed as part of the project for navigation on the Arkansas River and tributaries, shall hereafter be known and designated as the "Arthur V. Ormond Lock and Dam". Any law, regulation, document, or record of the United States in which such lock and dam are referred to shall be held to refer to such lock and dam as the "Arthur V. Ormond Lock and Dam".

SEC. 906. The harbor located in Elmwood Township, Leelanau County, Michigan, and authorized as the Grand Traverse Bay by section 101 of the River and Harbor Act of 1948 (62 Stat. 1173) shall hereafter be known and designated as the "Greilickville

Harbor". Any reference in a law, map, regulation, document, record, or other paper of the United States to that harbor shall be deemed to be a reference to the "Greilickville Harbor".

SEC. 907. The harbor of the Port of Hickman on the Mississippi River at Hickman, Kentucky, shall hereafter be known and designated as the "Elvis Stahr Harbor, Port of Hickman". Any law, regulation, document, or record of the United States in which such harbor is referred to shall be held to refer to such harbor as the "Elvis Stahr Harbor, Port of Hickman".

SEC. 908. Dam numbered 2 on the Arkansas River, Arkansas, constructed as part of the project for navigation on the Arkansas River and tributaries, shall hereafter be known and designated as the "Wilbur D. Mills Dam". Any law, regulation, document, or record of the United States in which such dam is referred to shall be held to refer to such dam as the "Wilbur D. Mills Dam".

SEC. 909. The China Bluff access area which is being constructed by the Army Corps of Engineers as part of the Gainesville lock and dam portion of the Tennessee-Tombigbee Waterway project and which is located near Warsaw in Sumter County, Alabama, shall hereafter be known as the "S. W. Taylor Memorial Park". Any reference in any law, map, regulation, document, or other record of the United States to the China Bluff access area shall be held to be a reference to the "S. W. Taylor Memorial Park".

SEC. 910. The main channel of the project for San Leandro Marina, California, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution adopted by the Committee on Public Works of the House of Representatives on June 22, 1971, and by the Committee on Public Works of the Senate on December 15, 1970, shall hereafter be known and designated as the "Jack D. Maltester Channel". Any law, regulation, document, or record of the United States in which such channel is referred to shall be held to refer to such channel as the "Jack D. Maltester Channel".

SEC. 911. The visitor center at the powerhouse at the Richard B. Russell Dam and Lake project, South Carolina and Georgia, shall hereafter be known and designated as the "Peyton S. Hawes Visitor Center". Any reference in any law, map, regulation, document, record, or other paper of the United States to such visitor center shall be deemed to be a reference to the "Peyton S. Hawes Visitor Center".

SEC. 912. Calion Lock and Dam located on the Ouachita River near Calion, Arkansas, shall hereafter be known and designated as the "H. K. Thatcher Lock and Dam". Any reference in a law, map, regulation, document, record, or other paper of the United States to such lock and dam shall be held to be a reference to the "H. K. Thatcher Lock and Dam".

SEC. 913. The lock and dam on the Tombigbee River in Pickensville, Alabama, commonly known as the Aliceville Lock and Dam, and the visitor center to be constructed for the Tennessee-Tombigbee waterway in Pickensville, Alabama, shall hereafter be known as the "Tom Bevill Lock and Dam" and the "Tom Bevill Visitor Center", respectively. Any reference in a law, map, regulation, document, or paper of the United States to such lock and dam and any reference in a law, map, regulation, document, or paper of the United States to such visitor center shall be held to be a reference to the "Tom Bevill Lock and Dam" and the "Tom Bevill Visitor Center", respectively.

SEC. 914. The Lowndesville Recreation Area, located within the Richard B. Russell Dam and Lake project, South Carolina and Georgia, shall hereafter be known and designated as the "Jim Rampey Recreation Area". Any reference in any law, map, regulation, document, record, or other paper of the United States to such recreation area shall be deemed to be a reference to such area as the "Jim Rampey Recreation Area".

SEC. 915. (a) The visitors center described in subsection (b) shall hereafter be known and designated as the "J. E. Carnahan Visitors Center". Any reference in a law, map, regulation, document, record, or other paper of the United States to such visitors center shall be held to be a reference to the "J. E. Carnahan Visitors Center".

(b) The visitors center referred to in subsection (a) is the visitors center that—

(1) is located on State Road 73 at Caesar Creek Lake in the State of Ohio; and

(2) was constructed and is maintained under the general authorization of section 4 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved June 28, 1938 (52 Stat. 1216).

The CHAIRMAN. Are there amendments to title IX?

If not, the Clerk will designate title X.

The text of title X is as follows:

TITLE X—PROJECT DEAUTHORIZATIONS

SEC. 1001. The following projects, with a total estimated authorized cost of $11.1 billion, are not authorized after the date of enactment of this Act, except with respect to any portion of such a project which portion has been completed before such date or is under construction on such date:

ALABAMA

The project for flood control, Alabama River, Montgomery, Alabama, authorized by the Flood Control Act of 1958.

The project for hydroelectric power, Alabama-Coosa River Basin, Big Wills Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Crooked Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Hatchet Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Little River Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Mill Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Terrapin Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Waxahatchee Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Weogufka Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Yellowleaf Creek, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Big Canoe Creek Lake, Alabama, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

ALASKA

The project for navigation, Myers Chuck Harbor, Alaska, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The jetty extension feature of the project for navigation, Nome Harbor, Alaska, authorized by the River and Harbor Act of August 30, 1935, Public Law 409, Seventy-fourth Congress.

The project for navigation, Skagway River, Alaska, authorized by the River and Harbor Act of June 20, 1938, Public Law 685, Seventy-fifth Congress, and section 10 of the Flood Control Act of 1946, except the 6,700 foot training dike and the 1,800-foot breakwater.

ARKANSAS

The project for flood control, Crooked Creek Lake Levee, Arkansas, authorized by the Flood Control Act of 1968.

The Gillette New Levee feature of the project for flood control, Lower Arkansas River, North Bank, Arkansas, authorized by the Flood Control Act of May 15, 1928, Public Law 391, Seventieth Congress; the Flood Control Act of June 22, 1936, Public Law 738, Seventh-fourth Congress; and the Flood Control Act of 1946.

The project for flood control, Murfreesboro Reservoir, Pike County, Arkansas, authorized by the Flood Control Act of 1950.

CALIFORNIA

The project for flood control, Alhambra Creek, California, authorized by the Flood Control Act of 1968.

The Aliso Creek Dam feature of the project for the Santa Ana River Basin, Orange County, California, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for flood control, Bear River, California, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works and Transportation of the House of Representatives, dated September 23, 1976, and resolution of the Committee on Environment and Public Works of the Senate, dated October 1, 1976.

The project for flood control, Butler Valley Dam, Mad River, California, authorized by the Flood Control Act of 1968.

The project for flood control, Eel River, California, authorized by the Flood Control Act of 1965, except for the completed levees on the right bank of the Eel River in the Sandy Prairie area.

The Sierra Madre Wash feature of the project for flood control, Los Angeles County Drain Area, California, authorized by the Flood Control Act of August 18, 1941, Public Law 228, Seventy-seventh Congress.

The barrier groin and sandtrap feature of the project for navigation, Monterey Harbor, California, authorized by the River

and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for flood control, Napa River Basin, California, authorized by the Flood Control Act of 1965.

The features of the project for navigation, Napa River, California, authorized by the River and Harbor Act of July 24, 1946, Public Law 525, Seventy-ninth Congress, which features consist of construction of dikes and revetments.

That portion of the project for navigation, Old River, San Joaquin County, California, authorized by the River and Harbor Act of August 26, 1937, Public Law 392, Seventy-fifth Congress, consisting of a side channel at Orwood and completion of the project channels from the mouth of Old River to Lammers Ferry road and from Crocker Cut to the Holly Sugar Factory.

The San Juan Dam feature of the project for the Santa Ana River Basin, Orange County, California, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The Trabuco Dam feature of the project for the Santa Ana River Basin, Orange County, California, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for flood control, University Wash and Spring Brook, California, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works of the House of Representatives, dated December 15, 1970, and resolution of the Committee on Public Works of the Senate, dated June 22, 1971.

The shallow-draft channel, Colusa to Red Bluff, feature of the project for navigation, Sacramento River, California, authorized by the River and Harbor Act of August 30, 1935, Public Law 409, Seventy-fourth Congress.

Those features of the project for navigation, San Joaquin River, Stockton Deepwater Ship Channel, California, authorized by the River and Harbor Act of 1950, which features consist of construction of a new turning basin near Rough and Ready Island; enlargement of Upper Stockton Channel; construction of a 30-foot depth Burns Cut-off Channel around Rough and Ready Island, including construction of a combination rail and highway bridge; and construction of a new settling basin on San Joaquin River upstream from its confluence with Stockton Channel.

COLORADO

The project for flood control, Boulder, Colorado, authorized by the Flood Control Act of 1950.

The project for flood control, Castlewood Lake, Douglas County, Colorado, authorized by the Flood Control Act of August 18, 1941, Public Law 228, Seventy-seventh Congress.

CONNECTICUT

The features of the project for navigation, Bridgeport Harbor-Black Rock Harbor, Connecticut, authorized by the River and Harbor Act of 1958, which features provide for construction of two rubble-mound breakwaters at the entrance to Black Rock Harbor and dredging a 28-acre anchorage 6 feet deep in Burr and Cedar Creeks at the head of Black Rock Harbor.

The project for navigation, Connecticut River below Hartford, Connecticut, authorized by the River and Harbor Act of 1950.

The feature of the project for navigation, Mystic River, New London County Channel, Connecticut, authorized by the River and Harbor Act of March 4, 1913, Public Law 429, Sixty-second Congress, which provides for the widening of the channel extending 4,700 feet from the United States Route 1 drawbridge to the Mystic Seaport site from its constructed width of 80 to 90 feet to a width of 100 feet.

The Walnut Beach and impermeable groins features of the project for beach erosion control, Silver Beach to Cedar Beach, Connecticut, authorized by the River and Harbor Act of 1954.

The six-foot anchorage at northeast end of Stonington Harbor feature of the project for navigation, Stonington Harbor, New London County, Connecticut, authorized by the River and Harbor Act of 1950.

The feature of the project for navigation, Thames River, New London County, Connecticut, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which provides for an increased channel width in the bend at Long Reach Upper Light (river mile 6.8).

The uncompleted portions of the project for navigation, New Haven Harbor, Connecticut, authorized by the River and Harbor Act of 1946, which portions consist of deepening the lower end of the Quinnipiac River Channel to 22 feet up to a point 1,000 feet above Ferry Street.

The project for navigation, New Haven Harbor, Connecticut, authorized by the River and Harbor Act of June 25, 1910, Public Law 264, Sixty-first Congress.

The uncompleted portions of the project for navigation, Milford Harbor, Connecticut, authorized by the River and Harbor Act of June 13, 1902, and the River and Harbor Act of August 26, 1937, Public Law 392, Seventy-fifth Congress, which portions consist of a 5-acre anchorage, 10 feet deep, behind the east jetty at the east side of such jetty.

DISTRICT OF COLUMBIA

The project for flood control, Washington, D.C., and vicinity, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

FLORIDA

The Cross Bank to Key West portion of the project for navigation, Atlantic Intracoastal Waterway, Miami to Key West, Florida, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for flood control, Biscayne Bay, Dade County, Florida, (Hurricane Barrier) authorized by the Act of June 15, 1955, Public Law 71, Eighty-fourth Congress.

That portion of the project for navigation, Cedar Keys Harbor, Levy County, Florida, authorized by the River and Harbor Act of July 5, 1884, consisting of the excavation of 1,500 cubic yards from an area known as the "middle ground" within the alignment of the main ship channel.

The Sebastian Channel feature of the project for navigation, Intracoastal Waterway, Jacksonville to Miami, Florida, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

Those portions of the project for navigation, Jacksonville Harbor Mooring Basin, Naval, Florida, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which portions consisting of a channel 28 feet deep by 590 feet wide extending from Laura Street to Saint Elmo W., Acosta Bridge; a channel and floodway along the south side of Commodore Point; and an approach and mooring basin at the Naval Reserve Armory near the Main Street bridge.

That portion of the project for navigation, Key West Harbor, Monroe County, Florida, authorized by the River and Harbor Act of September 19, 1890, consisting of two uncompleted jetties at the entrance to the northwest channel.

The uncompleted portions of the project for navigation, Miami Harbor, Miami River, Florida, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which portions consist of widening the mouth of the Miami River; providing a channel 8 feet by 20 feet from the mouth of the river to the Intracoastal Waterway, thence 100 feet wide to Government Cut; and providing a channel 12 feet by 100 feet from Miami to a harbor of refuge in Palmer Lake.

The Stuart turning basin feature of the project for navigation, Okeechobee Waterway, Martin County, Florida, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

That portion of the project for navigation, Oklawaha River, Florida, authorized by the River and Harbor Act of March 2, 1907, consisting of a channel 6 feet deep from the mouth of the river to the head of Silver Springs Run.

That portion of the project for navigation, Palm Beach Harbor, Florida, authorized by the River and Harbor Act of June 20, 1938, Public Law 685, Seventy-fifth Congress, consisting of a channel 16 feet deep and 150 feet wide from the Palm Beach Harbor Channel to an anchorage basin 16 feet deep, 750 feet wide, and 2,000 feet long in Lake Worth opposite Tangier Avenue.

The project for beach erosion control, Lake Worth Inlet to South Lake Worth Inlet, Palm Beach County, Florida, authorized by the River and Harbor Act of 1958, except the transfer plant.

The Carrabelle to St. Marks portion of the Gulf Intracoastal Waterway, Apalachicola Bay to Saint Marks River, Florida, authorized by the River and Harbor Act of August 26, 1937, Public Law 392, Seventy-fifth Congress; the Act of July 23, 1942 (Public Law 675, Seventy-seventh Congress); and the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The modification of the project for navigation, Pensacola Harbor, Florida, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

That portion of the project for navigation, Saint Augustine Harbor, Florida, authorized by the River and Harbor Act of 1950, which portion consists of the uncompleted future landward extension of the groin and jetty on the northside of the inlet.

That portion of the project for navigation, Tampa Harbor, Florida, authorized by the Flood Control Act of 1970, which portion consists of the last incremental one-foot depth for underkeel clearance.

GEORGIA

The project for hydroelectric power, Alabama-Coosa River Basin, Canton Lake, Georgia, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Cartecay Lake, Georgia, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Gilmer Lake, Georgia, authorized by the River and

Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Kingston Lake, Georgia, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for hydroelectric power, Lazer Creek Lake, Georgia, authorized by the Flood Control Act of 1965.

The project for hydroelectric power, Lower Auchumpkee Creek Lake, Georgia, authorized by the Act of December 30, 1963, Public Law 88-253.

The project for hydroelectric power, Spewrell Bluff Lake, Georgia, authorized by the Act of December 30, 1963, Public Law 88-253.

HAWAII

The project for navigation, Ala Wai Harbor, Oahu, Hawaii, authorized by the River and Harbor Act of 1968.

The project for beach erosion control, Hanapepe Bay Seawall, Kauai, Hawaii, authorized by the River and Harbor Act of 1958.

The project for navigation, Kaunakakai Deep Draft Harbor, Molokai, Hawaii, (modification) authorized by the River and Harbor Act of 1962.

The project for beach erosion control, Waimea Beach Seawall, Kauai, Hawaii, authorized by the River and Harbor Act of 1958.

IDAHO

The project for flood control, Mud Lake Area, Idaho, authorized by Flood Control Act of 1950.

The project for flood control, South Fork, Clearwater River, Idaho, authorized by Flood Control Act of 1950.

The project for flood control, Teton River, Idaho, authorized by Flood Control Act of 1950.

The project for flood control, Blackfoot Reservoir, Idaho, authorized by Flood Control Act of 1962.

The project for flood control, Boise Valley, Idaho, authorized by Flood Control Act of 1950.

The project for flood control, Cottonwood Creek Dam, Idaho, authorized by Flood Control Act of 1966.

The project for flood control, Heise-Roberts Levee Extension, Idaho, authorized by Flood Control Act of 1950, except for constructed levees along the left bank of the Snake River downstream from the mouth of Henry's Fork.

The project for flood control, Weiser River, Idaho, authorized by Flood Control Act of 1950.

The projcct for flood control, Whitebird Creek, Idaho, authorized by Flood Control Act of 1950.

ILLINOIS

The project for navigation, Chicago River, Cook County, Illinois, authorized by the River and Harbor Act of July 24, 1946, Public Law 525, Seventy-ninth Congress.

The improvements to the beartraps feature of the project for navigation, Dam 43, Ohio River, Illinois, authorized by the River and Harbor Act of March 3, 1909, Public Law 317, Sixtieth Congress.

The project for flood control, Farmers Drainage and Levee District, Illinois, authorized by Flood Control Act of 1962.

The project for flood control, Freeport, Illinois, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The feature of the Illinois Waterway Navigation project, Illinois, authorized by the River and Harbor Act of August 30, 1935, Public Law 409, Seventy-fourth Congress, which feature consists of straightening a curve in the channel in the vicinity of Pekin, Illinois.

That portion of the project for shore protection, Kenilworth, Illinois, Shore of Lake Michigan, Illinois, authorized by the River and Harbor Act of 1954, which portion consists of protection of the Mahoney Park 200-foot long beach frontage located at the extreme south end of the village limits by constructing a steel sheet piling impermeable groin, about 200 feet long near the south lines of Mahoney Park.

The project for flood control, Levee Unit 1, Wabash River, Gallatin County, Illinois, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for flood control, Levees District Numbered 21, Vandalia, Illinois, authorized by the Flood Control Act of 1958.

The project for flood control, Little Calumet River, Illinois, authorized by the Flood Control Act of 1954.

The project for flood control, Metropolis, Illinois, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

That portion of the project for navigation, Mississippi River between Missouri River and Minneapolis, Minnesota, authorized by the River and Harbor Act of July 3, 1930, Public Law 520, Seventy-first Congress, which portion consists of construction of about 600 feet of guidewall extensions each at locks numbered 4, 5, 5A, 7, 8, 9, and 10.

The project for navigation, Ohio River Open Channel, Louis District, Illinois, authorized by the River and Harbor Act of March 2, 1827.

The project for navigation, Ohio River Open Channel, Ice Pier, Illinois, authorized by the River and Harbor Act of January 21, 1927.

The project for navigation, Ohio River Open Channel, Illinois, authorized by the River and Harbor Act of July 3, 1930.

The project for flood control, Peoria, Peoria County Levees, Illinois, authorized by the Flood Control Act of 1962.

The project for flood control, Shawneetown, Gallatin County Levee Enlargement, Illinois, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Scott County Drainage and Levee District, Illinois, authorized by the Flood Control Act of 1962.

The project for flood control, South Beloit, Illinois, authorized by the Flood Control Act of 1948.

The project for navigation, Waukegan Harbor, Illinois, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works of the House of Representatives, dated December 17, 1970, and resolution of the Committee on Public Works of the Senate, dated December 8, 1970.

The project for flood control, William L. Springer Lake, Illinois, authorized by the Flood Control Act of 1962.

The project for navigation, Alton Commercial Harbor, Illinois, authorized by the River and Harbor Act of 1958.

The project for flood control, Keach Drainage and Levee District, Green County, Illinois, authorized by the Flood Control Act of 1962.

The project for flood control, Big Swan Drainage and Levee District, Illinois, authorized by the Flood Control Act of 1962.

The project for flood control, Fort Chartres and Ivy Landing Drainage District Numbered 5, Illinois, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works of the House of Representatives, dated December 15, 1970, and resolution of the Committee on Public Works of the Senate, dated December 17, 1970.

INDIANA

The project for flood control, Anderson, Madison County, Indiana, Earth Levee, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for navigation, Illinois Waterway, Cal-Sag Channel, Part 2, Indiana, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, and the River and Harbor Act of July 24, 1946, Public Law 525, Seventy-ninth Congress.

The project for flood control, Levees between Shelby Bridge & Baums Bridge, Indiana, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for flood control, Marion, Indiana, authorized by the Flood Control Act of 1968.

That portion of the project for flood control, Vincennes, Indiana, authorized by the Flood Control Act of 1946, which portion consists of the uncompleted downstream levee to connect with high ground southeast of the city.

IOWA

The project for flood control, Davids Creek Lake, Iowa, authorized by the Flood Control Act of 1968.

The project for navigation, Fort Madison Harbor, Iowa, authorized by the River and Harbor Act of 1968.

The project for navigation, Keokuk Small Boat Harbor, Iowa, authorized by the River and Harbor Act of 1962.

The project for flood control, Missouri Levee System (units L-753, L-747, L-739, L-733, L-729, L-728, L-715, L-700, L-691, L-670, L-651, L-650, L-643, L-637, L-528), Iowa, authorized by the Flood Control Act of August 18, 1941, Public Law 228, Seventy-seventh Congress.

KANSAS

The project for flood control, El Dorado, West Branch, Walnut River, Butler County, Kansas, authorized by the Flood Control Act of 1965.

The project for flood control, Garnett Lake, Pottawatomie Creek, Kansas, authorized by the Flood Control Act of 1954.

The project for flood control, Grove Lake, Kansas, authorized by the Flood Control Act of 1962.

The project for flood control, Indian Lake, Kansas, authorized by the Flood Control Act of 1970.

The project for navigation, Kansas River Navigation, Kansas, authorized by the River and Harbor Act of 1965.

The project for flood control, Missouri River Levee System, Kansas, (units R402 and R395-393) authorized by the Flood Control Act of August 18, 1941, Public Law 228, Seventy-seventh Congress.

The project for flood control, Neodesha Lake, Wilson County, Verdigris River, Kansas, authorized by the Flood Control

Act of August 18, 1941, Public Law 228, Seventy-seventh Congress.

The project for flood control, Tomahawk Lake, Blue River, Johnson County, Kansas, authorized by the Flood Control Act of 1970.

The project for flood control, Towanda Lake, Kansas, authorized by the Flood Control Act of 1965.

The modification to the project for flood control, Tuttle Creek Lake, Kansas, authorized by section 18 of the Water Resources Development Act of 1974, which modification consists of relocation of a portion of FAS 1208.

The project for flood control, Wolf-Coffee Lake, Kansas, authorized by the Flood Control Act of 1970.

The project for flood control, Cedar Point Lake, Kansas, authorized by the Flood Control Act of 1950.

The project for flood control, Cow Creek-Hutchison, Kansas, authorized by the Flood Control Act of 1962.

The project for flood control, Missouri River Levee System Levee R414, Kansas, authorized by the Flood Control Act of August 18, 1941, Public Law 228, Seventy-seventh Congress.

KENTUCKY

The project for flood control, Caseyville, Union County, Kentucky, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Cloverport, Kentucky, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Concordia, Meade County, Kentucky, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The section A-A portion of the floodwall of the project for flood control, Louisville, Kentucky, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Middlesboro, Yellow Creek, Bell County, Kentucky, authorized by the Flood Control Act of December 22, 1944, Public Law 534, Seventy-eighth Congress.

The project for flood control, Tolu, Crittenden County, Kentucky, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

LOUISIANA

The project for flood control, Black Bayou, Reservoir, Caddo Parish, Louisiana, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for navigation, Overton-Red River Waterway above Mile 31, Louisiana, authorized by the River and Harbor Act of July 24, 1946, Public Law 526, Seventy-ninth Congress.

A portion of the project for navigation, Bayou La Fourche, Louisiana, authorized by the River and Harbor Act of August 30, 1935, Public Law 409, Seventy-fourth Congress, which portion consists of a 6-foot deep by 60-foot wide channel, 22 miles in length from Thibodaux to Lockport, Louisiana.

MAINE

That portion of the project for navigation, Bar Harbor, Maine, authorized by the River and Harbor Act of August 11, 1888, and the River and Harbor Act of September 19, 1890, which portion consists of completing the breakwater to its fully authorized cross-section.

The Dickey-Lincoln School project, Saint John River, Maine, authorized by section 204 of the Flood Control Act of 1965.

That portion of the project for navigation, Kennebec River, Maine, authorized by the River and Harbor Act of June 13, 1902, which portion consists of the 27-foot channel above the bridge at Bath, Maine.

That portion of the project for navigation, Rockland Harbor, Maine, authorized by the Act of June 29, 1956, Public Law 630, Eighty-fourth Congress, which portion consists of an 18-foot access channel, 100 feet wide and 900 feet long to the shipyard along southern waterfront, and uncompleted portions of the outer limits of three branch channels along the central waterfront.

MARYLAND

The feature of the project for navigation, Baltimore Harbor and channels, Maryland, authorized by the River and Harbor Acts of August 8, 1917, January 21, 1927, July 3, 1930, October 17, 1940, March 2, 1945, July 3, 1958, and December 31, 1970, which feature consists of a navigation channel 150 feet wide to Ferry Bar and thence 27 feet deep and 150 feet wide to the Hanover Street Bridge.

MASSACHUSETTS

The project for navigation, Edgartown Harbor, Massachusetts, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution adopted by the Committee on Public Works of the House of Representatives on December 15, 1970, and by the Committee on Public Works of the Senate on December 19, 1970.

The feature of the project for navigation, Fall River Harbor Channel, Massachusetts, authorized by the Act of July 3, 1930, Public Law 520, Seventy-first Congress, which feature consists of rock removal to a depth of 30 feet at the lower end of Hog Island Shoal at the north side of the entrance to Mount Hope Bay.

The project for navigation, Ipswich River, Massachusetts, authorized by the Flood Control Act of 1968.

The feature of the project for navigation, Nantucket Harbor of Refuge Anchorage, Massachusetts, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which feature consists of 15-foot deep anchorage, 2,800 feet long by 300 to 1,100 feet wide near the west side of the inner harbor, and a 15-foot deep fairway 200 feet wide between the anchorage and the main waterfront.

The project for navigation, New Bedford and Fairhaven Harbor, Bristol County, Massachusetts, authorized by the River and Harbor Act of July 25, 1912, Public Law 241, Sixty-second Congress.

The feature of the project for navigation, Newburyport Harbor, Essex County, Massachusetts, authorized by the Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which feature consists of deepening the entrance channel from 12 to 15 feet and deepening the turning basin along the Newburyport waterfront from 9 to 12 feet.

The Nookagee Lake feature of the project for flood control, North Nashua River, Massachusetts, authorized by the Flood Control Act of 1968, which feature consists of a multiple-purpose earthfill dam and reservoir on the North Nashua River in Westminster, Massachusetts.

The project for navigation, Pleasant Bay, Massachusetts, authorized by the Flood Control Act of 1970.

The feature of the project for navigation, Salem Harbor, Essex County, Massachusetts, authorized by the Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which feature consists of deepening to 10 feet a channel from deep water in the central part of Salem Harbor to Pickering Wharf near the South River.

The uncompleted groin feature of the project for beach erosion control, Winthrop Beach, Massachusetts, authorized by the River and Harbor Act of 1950.

The feature of the project for navigation, Lynn Harbor, Massachusetts, authorized by the River and Harbor Act of 1954, which feature consists of enlarging the turning basin to include the easterly 300 feet of the municipal channel.

The feature of the project for navigation, Lynn Harbor, Massachusetts, authorized by the River and Harbor Act of August 30, 1935, Public Law 409, Seventy-fourth Congress, which feature consists of deepening from 22 to 25 feet a 2.7-mile channel from Bass Point to and including a turning basin at the head of Lynn Harbor.

The project for flood control, Monoosnoc Brook, Massachusetts, authorized by the River and Harbor Act of 1966.

The project for flood control, Monoosnoc Lake, Worcester County, Massachusetts, authorized by the River and Harbor Act of November 7, 1966.

The feature of the project for beach erosion control, Cape Cod Canal to Provincetown, Massachusetts (Town Neck Beach), authorized by the River and Harbor Act of 1960 which feature consists of widening approximately 6,500 feet of beach east of the eastern entrance to Cape Cod Canal to 125 feet and raising the inshore end of the existing east jetty at the east entrance to such Canal.

MICHIGAN

The project for navigation, Forestville Harbor, Michigan, authorized by the River and Harbor Act of 1968.

The project for navigation, Middle Channel, Saint Clair River, Michigan, authorized by the River and Harbor Act of July 24, 1946, Public Law 525, Seventy-ninth Congress.

The project for flood control, Red Run Drain, Lower Clinton River, Michigan, authorized by the Flood Control Act of 1970.

The uncompleted portion of the project for navigation, Grand Marais Harbor, Michigan, authorized by the River and Harbor Act of June 14, 1880, which portion consists of widening the inner portion of the channel from 250 to 300 feet.

The uncompleted portion of the project for navigation, Keweenaw Waterway, Houghton County, Michigan, authorized by the River and Harbor Act of August 30, 1935, Public Law 409, Seventy-third Congress, which portion consists of extending the lower entrance breakwater by 2,000 feet, including the necessary alteration or replacement of structures due to channel deepening.

The turning basin feature of the project for navigation, Ontonagon Harbor, Ontonagon County, Michigan, authorized by the River and Harbor Act of 1962.

The Sanilac Flats feature of the project for flood control, Saginaw River, Michigan, authorized by the Flood Control Act of 1958, which feature provides for major drainage improvements on Middle Branch and South Branch, Cross River, and a short reach of East Branch.

The Corunna feature of the project for flood control, Saginaw River, Michigan, authorized by the Flood Control Act of 1958,

which feature provides for flood protection by channel improvement, levee construction, and related work including construction of a 1,500 foot levee on the right bank; widening of two constrictive reaches of the Saginaw River at, and downstream of, the mill dam; enlargement of the spillway capacity of the mill dam; and removal of the remains of an abandoned railway bridge at the tile plant.

The Owosso feature of the project for flood control, Saginaw River, Michigan, authorized by the Flood Control Act of 1958, which feature provides flood protection by enlarging the river channel from the Ann Arbor Railroad Bridge to the city sewage treatment plant, removal of a portion of a building which encroaches on the river channel, removal of four dams and underpinning of the Main Street Bridge, and the provision of scour protection of four bridges.

The project for beach erosion control, Berrien County, Michigan (Saint Joseph Shore), authorized by the Flood Control Act of 1958.

The feature of the project for navigation, Alpena Harbor, Michigan, authorized by the River and Harbor Act of 1965, which feature consists of the proposed turning basin and breakwater reconfiguration.

MINNESOTA

The project for flood control, Warroad River and Bull Dog Creek, Minnesota, authorized by the Flood Control Act of 1962.

The feature of the navigation project for the Mississippi River between the Missouri River and Minneapolis, Minnesota, authorized by the River and Harbor Act of July 3, 1930, which feature consists of extension of the upper guidewall about 600 feet in length at lock numbered 3.

MISSISSIPPI

The project for navigation, Biloxi Harbor, Old Fort Bayou, Mississippi, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for flood control, Buffalo River, Mississippi, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for navigation, Pascagoula Harbor, Main Channel, Mississippi, authorized by the River and Harbor Act of March 2, 1827.

MISSOURI

The project for recreation, Angler Use Sites, Missouri, authorized by the Flood Control Act of 1966.

The project for flood control, Braymer Lake Shoal Creek, Missouri, authorized by the Flood Control Act of 1965.

The project for flood control, Brookfield Lake, Yellow Creek, Missouri, authorized by the Flood Control Act of 1965.

The project for flood control, East Muddy Creek, Missouri, authorized by the Flood Control Act of 1965.

The project for flood control, Mercer Lake, Missouri, authorized by the Flood Control Act of 1965.

The project for flood control, Mississippi River Agricultural Area 12, Missouri, authorized by the Flood Control Act of 1966.

The project for flood control, Pattonsburg Lake, Missouri, authorized by the Flood Control Act of 1965.

The project for hydroelectric power, Pomme de Terre Lake (Power Project), Missouri, authorized by the Flood Control Act of 1954.

The project for navigation, Sandy Slough Remedial Measures, Missouri, authorized by the River and Harbor Act of 1962.

The project for flood control, Trenton Lake, Missouri, authorized by the Flood Control Act of 1965.

The project for flood control, Upper Grand River, Missouri, authorized by the Flood Control Act of 1965.

The project for flood control, Mill Creek Lake, Missouri, authorized by the Flood Control Act of 1970.

NEBRASKA

The project for flood control, Little Nemaha River, Nemaha County, Nebraska, authorized by the Flood Control Act of 1965.

NEVADA

The project for flood control, Gleason Creek Dam, Nevada, authorized by the Flood Control Act of 1960.

The project for flood control, Humboldt River and Tributaries, Nevada, authorized by the Flood Control Act of 1950.

NEW JERSEY

The feature of the project for navigation, Newark Bay, Hackensack and Passaic Rivers, New Jersey, authorized by the River and Harbor Act of 1954 and by the River and Harbor Act of 1966 which feature consists of deepening of portions of the Hackensack River to 32 and 15 feet.

NEW YORK

The project for flood control, Allegany, New York, Unit 2, Five Mile Creek, authorized by the Flood Control Act of July 24, 1946, Public Law 526, Seventy-ninth Congress.

The project for flood control, Allegany, New York, Unit 1, Allegheny River, authorized by the Flood Control Act of July 24, 1946, Public Law 526, Seventy-ninth Congress.

The project for navigation, Hudson River, New York City to Albany (12-foot harbors), New York, authorized by the River and Harbor Act of June 25, 1910, Public Law 264, Sixty-first Congress.

The project for navigation, Hudson River, New York City to Albany (27-foot channel), New York, authorized by the Act of March 3, 1925, Public Law 585, Sixty-eighth Congress.

The project for navigation, Ogdensburg Harbor, New York, authorized by the River and Harbor Act of August 30, 1935, Public Law 409, Seventy-third Congress.

The project for flood control, Red Creek, New York, authorized by the Flood Control Act of 1966.

The uncompleted portion of the project for navigation, Ticonderoga River, Essex County, New York, authorized by the River and Harbor Act of March 3, 1881.

The project for navigation, Cape Vincent Harbor, New York, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for navigation, East Chester Creek, New York, authorized by the River and Harbor Act of 1950.

The project for hurricane protection, East Rockaway Inlet to Rockaway Inlet, Part 2, New York, authorized by the Flood Control Act of 1965.

The project for flood protection, Hammondsport, Glen Brook (Glen Brook Flume), New York, authorized by the Flood Control Act of August 18, 1941, Public Law 228, Seventy-seventh Congress.

NORTH CAROLINA

The feature of the project for navigation, Atlantic Intracoastal Waterway—Peltier Creek, Carteret County, North Carolina, authorized by the River and Harbor Act of 1954, which feature includes a 12-foot channel. Maintenance of the existing 6-foot deep by 50-foot wide channel shall remain authorized.

The project for navigation, Atlantic Intracoastal Waterway Tidal Lock in Snows Cut, North Carolina, authorized by the River and Harbor Act of January 21, 1927, Public Law 560, Seventieth Congress.

The unconstructed portion of the project for flood control, Carolina Beach and Vicinity, South Area, North Carolina, authorized by the Flood Control Act of 1962, which portion extends south of the town limits of Carolina Beach.

The feature of the project for beach erosion control, Fort Macon State Park, North Carolina, authorized by the River and Harbor Act of 1962 and the Flood Control Act of 1962, which feature includes placing of capstone and remaining portions of beach fill and replenishment thereof.

The feature of the project for navigation, Morehead City Harbor, North Carolina, authorized by the River and Harbor Act of August 26, 1937, Public Law 392, Seventy-fifth Congress.

The project for beach stabilization and hurricane protection, Ocracoke Island, North Carolina, authorized by the Flood Control Act of 1965.

The project for beach stabilization and hurricane protection, Ocracoke Island-Village Shore, North Carolina, authorized by the Flood Control Act of 1965.

The feature of the project for navigation, Ocracoke Inlet Jetty, Hyde County, North Carolina, authorized by the River and Harbor Act of 1960, which feature consists of a single jetty extending from Ocracoke Island to the 20-foot depth in the Atlantic Ocean.

The portion of the project for navigation, Roanoke River, Halifax County, North Carolina, authorized by the River and Harbor Act of June 20, 1938, Public Law 685, Seventy-fifth Congress, which portion consists of constructing a 50-mile-long channel above Palmyra Landing to Weldon, North Carolina, 5 feet deep and 50 feet wide by dredging, snagging, and regulating.

OHIO

The additional beartraps, guardwalls, and extension of guidewalls features of the project for navigation, Ohio River, Ohio, authorized by the Flood Control Act of 1937.

The project for flood control, Burlington, Ohio, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Chesapeake, Ohio, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Empire-Stratton, Ohio, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Martins Ferry, Belmont County, Ohio, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Powhatan Point, Belmont County, Ohio, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Proctorville, Ohio, authorized by the Flood Control Act

of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, South Point, Ohio, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Salt Creek Lake, Ohio, authorized by the Flood Control Act of 1962.

OREGON

The project for flood control, Columbia Drainage District No. 1, Oregon, authorized by the Flood Control Act of 1950.

The project for flood control, Deer Island Drainage District, Oregon, authorized by the Flood Control Act of 1950.

The project for flood control, Shelton Ditch, Marion County, Oregon, authorized by the Flood Control Act of 1950.

The project for flood control, Umpqua River-Scholfield River, Oregon, authorized by the Flood Control Act of September 22, 1922, Public Law 362, Sixty-seventh Congress, and the Flood Control Act of 1954.

The project for flood control, Cascadia Lake, Oregon, authorized by the Flood Control Act of 1962.

The project for flood control, Gate Creek Lake, Oregon, authorized by the Flood Control Act of 1962.

The project for flood control, Grande Ronde Lake, Oregon, authorized by the Flood Control Act of 1965.

The project for flood control, Grande Ronde Valley, Oregon, authorized by the Flood Control Act of 1950.

The project for flood control, Holley Lake, Oregon, authorized by the Flood Control Act of 1950.

The project for flood control, Pendleton Levees, Riverside Area, Oregon, authorized by the Flood Control Act of 1950.

The uncompleted portions of the project for navigation, Willamette River above Portland and Yamill River, Oregon, authorized by the River and Harbor Act of June 3, 1896, as modified by the River and Harbor Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for navigation, Willamette River at Willamette Falls, Oregon, authorized by the River and Harbor Act of June 25, 1910, Public Law 264, Sixty-first Congress, and the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

PENNSYLVANIA

The project for flood control, Brackenridge, Tarentum, and Natrona, Pennsylvania, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for navigation, Chester River, Delaware County (8-ft. channel), Pennsylvania, authorized by the River and Harbor Act of March 2, 1919, Public Law 323, Sixty-fifth Congress.

The project for flood control, Leetsdale, Allegheny County, Levee and Drainage Facility, Pennsylvania, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Muddy Creek Lake, Pennsylvania, authorized by the Flood Control Act of 1962.

The project for flood control, Neville Island, Pennsylvania, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, New Kensington and Parnassus, Pennsylvania, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Rochester, Beaver County, Pennsylvania, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Trexler Dam and Lake, Lehigh County, Pennsylvania, authorized as part of the Delaware River Basin project pursuant to section 203 of the Flood Control Act of 1962.

The project for navigation, Youghiogheny River Canalization, Pennsylvania, authorized by the River and Harbor Act of 1930, Public Law 395, Seventy-first Congress.

The project for flood control, Aquashicola Lake, Pennsylvania, authorized by the Flood Control Act of 1962.

The project for flood control, Maiden Creek Lake Earth Dam, Pennsylvania, authorized by the Flood Control Act of 1962.

PUERTO RICO

The project for navigation, Fajardo Harbor (28 foot Channel and Tidal Basin), Puerto Rico, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for navigation, Guayanes Harbor (23 foot channel and anchorage), Puerto Rico, authorized by the River and Harbor Act of August 26, 1937, Public Law 392, Seventy-fifth Congress.

RHODE ISLAND

The features of the project for navigation, Great Salt Pond, Newport County, Rhode Island, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which features include a 1,200-foot long north jetty at the entrance to Great Salt Pond and a 12-foot access channel and basin in the inner harbor (Trim Pond).

The features of the project for navigation, Harbor of Refuge, Block Island, Rhode Island, authorized by the River and Harbor Act of July 25, 1912, Public Law 241, Sixty-second Congress, which features include two 15-foot anchorages in the outer harbor.

The portions of the project for navigation, Pawcatuck River, Washington County, Rhode Island, authorized by the River and Harbor Act of June 3, 1896, which portions include widening the middle section of the Little Narraganset Bay channel by an additional 100 feet to 200 feet, widening a 5,000 foot section of the river channel at Avondale by an additional 100 feet to 200 feet, and by deepening a 2,000 foot section of the upper river channel by an additional 3 feet to 10 feet.

The portion of the project for navigation, Providence River and Harbor, Rhode Island, authorized by the River and Harbor Act of 1965, which portion consists of the branch channel along the India Point waterfront, 30 feet deep, 150 feet wide, and about 1,000 feet long.

The project for flood control, Westerly Hurricane Protection, Rhode Island, authorized by the Flood Control Act of 1965.

SOUTH CAROLINA

The project for navigation, Charleston Harbor, Ft. Moultrie Anchorage Area, South Carolina, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for navigation, Myrtle Beach, Anchorage Basin, South Carolina, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

The project for flood control, Reedy River, Greenville, South Carolina, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works of the House of Representatives, dated December 1970, and resolution of the Committee on Public Works of the Senate, dated December 1970.

TENNESSEE

The project for navigation, Cumberland River above Nashville, Tennessee, authorized by the River and Harbor Act of August 5, 1886.

The project for navigation, Hiwassee River, Polk and Bradley Counties, Tennessee, authorized by the River and Harbor Act of August 14, 1876.

The project for flood control, Rossview Lake, Tennessee and Kentucky, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for hydroelectric power, Alabama-Coosa River Basin, Jacks River Lake, Tennessee, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

TEXAS

The project for flood control, Alpine, Texas, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works of the House of Representatives, dated April 11, 1974, and resolution of the Committee on Public Works of the Senate, dated May 31, 1974.

The portion of the project for navigation, Brazos Island Habor, Texas, authorized by the River and Harbor Act of 1960, which portion consists of the north jetty extension.

The project for navigation, Brazos River, Velasco to Old Washington, Texas, authorized by the River and Harbor Act of June 13, 1902.

The project for navigation, Cedar Bayou (mile 3.0 to mile 11.0), Harris, Texas, authorized by the River and Harbor Act of September 19, 1890, as amended by the River and Harbor Act of July 3, 1930, Public Law 520, Seventy-first Congress.

The feature of the navigation project for the Channel to Port Bolivar, Texas, authorized by the River and Harbor Act of March 2, 1907, Public Law 168, Fifty-ninth Congress, as amended by the River and Harbor Act of June 25, 1910, Public Law 264, Sixty-first Congress, and the River and Harbor Act of March 2, 1919, which feature consists of a turning basin of 750 wide by 1,600 feet long and 30 feet deep.

The project for flood control, Duck Creek Channel Improvement, Texas, authorized by the Flood Control Act of 1965.

The portion of the project for navigation, Gulf Intracoastal Waterway Channel to Harlingen, Texas, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which portion consists of a channel from mile 25.8 to mile 31.0 on the Arroyo Colorado, upstream of the turning basin between Rio Hondo and Harlingen, Texas.

The feature of the project for navigation, Gulf Intracoastal Waterway-Chocolate Bayou, Texas, authorized by the River and Harbor Act of 1965, which feature consists of channel enlargement to 9 by 100 feet from channel mile 8.2 to channel mile 13.2 and construction of a turning basin 600 feet wide and 9 feet deep at channel mile 13.2 on Chocolate Bayou.

The portion of the project for navigation, Houston Ship Channel, Greens Bayou, Texas, authorized by the River and Harbor Act of 1965, which portion consists of the upper 1.1 mile increment of the project channel on Greens Bayou.

The portion of the project for navigation, Gulf Intracoastal Waterway, Texas, Channel Relocation in Matagorda Bay, authorized by the River and Harbor Act of June 25, 1910, Public Law 264, Sixty-first Congress, as amended by the River and Harbor Act of 1925, Public Law 585, Sixty-eighth Congress, the River and Harbor Act of January 21, 1927, Public Law 560, Sixty-ninth Congress, the River and Harbor Act of July 23, 1942, Public Law 675, Seventy-seventh Congress, and the River and Harbor Act of 1962, which portion consists of the relocation of a segment of the Gulf Intracoastal Waterway in Matagorda Bay between miles 454.3 and 471.3.

The project for flood control, Lake Brownwood, Texas, authorized by the Flood Control Act of 1968.

The project for flood control, Lake Fork Lake-Lake Fork Creek, Texas, authorized by the Flood Control Act of 1970.

The project for flood control, Navasota Lake, Texas, authorized by the Flood Control Act of 1968.

The project for flood control, Pecan Bayou Lake, Texas, authorized by the Flood Control Act of 1968.

The project for flood control, Peyton Creek, Matagorda County, Texas, authorized by section 201 of the Flood Control Act of 1965 and approved by resolutions of the Committee on Public Works of the House of Representatives and the Committee on Public Works of the Senate, dated October 12, 1972.

The project for flood control, Plainview, Texas, authorized by section 201 of the Flood Control Act of 1965 and approved by resolution of the Committee on Public Works of the House of Representatives, dated December 15, 1970, and the Committee on Public Works of the Senate, dated December 17, 1970.

The project for flood control, Roanoke Lake, Texas, authorized by the River and Harbor Act of 1965.

The portion of the project for navigation, Sabine Neches Waterway Channel to Echo, Texas, authorized by the River and Harbor Act of 1962, which portion consists of the unconstructed channel in the Sabine River between Orange and Echo, Texas.

The project for navigation, Sabine River, Echo to Morgan Bluff, Texas, authorized by the Flood Control Act of 1970.

The Dallas Floodway Extension feature of the Trinity River project for flood control, Trinity River and tributaries, Texas, authorized by the Flood Control Act of 1965.

The Liberty Local Protection feature of the project for flood control, Trinity River and tributaries, Texas, authorized by the Flood Control Act of 1965.

The portion of the project for Gulf Intracoastal Waterway-Channel to Port Mansfield, Texas, authorized by section 4 of Public Law 86-248, which consists of a small craft basin at Port Mansfield, Texas.

UTAH

The project for flood control, Weber River and Tributaries, Morgan County, Utah, authorized by section 206 of the River and Harbor Act of 1968.

VERMONT

The project for flood control, Bennington, Vermont, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress.

The project for navigation, Otter Creek, Addison County, Vermont, authorized by the River and Harbor Act of June 10, 1872.

The project for flood control, Rutland Otter Creek, Vermont, authorized by the Flood Control Act of June 22, 1936, Public Law 738, Seventy-fourth Congress, as amended by the Flood Control Act of July 31, 1947, Public Law 296, Eightieth Congress.

VIRGINIA

The project for navigation, Thimble Shoal Channel, Virginia, authorized by the River and Harbor Act of 1954 consisting of side channels 32 feet deep and 450 feet wide on both sides of the 1,000-foot channel.

The project for flood control, water quality control, recreation, fish and wildlife enhancement, and hydroelectric power generation, Moore's Ferry Lake, Virginia and North Carolina, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The feature of the project for navigation, Pamunkey River, Hanover and King Counties, Virginia, authorized by the River and Harbor Act of March 2, 1945, Public Law 14, Seventy-ninth Congress, which feature consists of a channel 5 feet deep and 50 feet wide between Bassett Ferry and Manquin Bridge.

VIRGIN ISLANDS

The uncompleted portion of the project for navigation, Christiansted Harbor-St. Croix, Virgin Islands, authorized by the River and Harbor Act of 1950, which portion consists of an approach channel 25 feet and 300 feet wide from the Caribbean Sea to and including a turning basin 25 feet deep, approximately 600 feet wide, and 900 feet long.

The portion of the project for navigation, St. Thomas Harbor, Virgin Islands, authorized by the River and Harbor Act of August 26, 1937, Public Law 392, Seventy-fifth Congress, which portion consists of construction of an entrance channel 36 feet deep and 600 feet wide, an anchorage area 33 feet deep, a breakwater 700 feet long between Rupert Rock and the mainland, and removal of Scorpion Rock to a depth of 36 feet.

WAKE ISLAND

The project for navigation, Wake Island Harbor, Wake Island, authorized by the River and Harbor Act of August 26, 1937, Public Law 392, Seventy-fifth Congress.

WASHINGTON

The project for flood control, Entiat River, Chelan County, Washington, authorized by the Flood Control Act of 1950.

The project for flood control, Lower Walla Walla River, Washington, authorized by the Flood Control Act of 1950.

The project for flood control, Methow River, Okanogan County, Washington, authorized by the Flood Control Act of 1950.

The uncompleted portion of the project for flood control, Okanogan River, Okanogan, Washington, authorized by the Flood Control Act of 1950.

The unconstructed groin feature of the project for navigation, Quillayute River, Clallam County, Washington, authorized by the Act of July 3, 1930, Public Law 520, Seventy-first Congress.

The feature of the project for navigation, Seattle Harbor, King County, Washington, authorized by the Act of July 3, 1930, Public Law 520, Seventy-first Congress, which feature consists of a settling basin located at the upper end of the existing Duwamish waterway navigation project about 1.4 miles above the 14th Avenue South Bridge.

The project for flood control, Spokane River, Spokane, Washington, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Yakima River at Ellensburg, Washington, authorized by the Flood Control Act of 1950.

The project for flood control, Palouse River, Whitman County, Washington, authorized by the Flood Control Act of 1950.

The project for flood control, Pullman Palouse River, Washington, authorized by the Flood Control Act of 1944.

The project for navigation, Stillaquamish River, Washington, authorized by the Act of March 2, 1945, Public Law 14, Seventy-ninth Congress.

WEST VIRGINIA

The project for flood control, Moundsville, Marshall County, Levees, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Panther Creek Lake, West Virginia, authorized by the Flood Control Act of 1965.

The project for flood control, Proctor, Wetzel County, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Ravenswood, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Rowlesburg Lake, West Virginia, authorized by the Flood Control Act of 1965.

The project for flood control, Warwood, Ohio County, Wall and Drainage, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, North Wheeling, Ohio County, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Wheeling, Ohio County, Levees, Walls and Pumping Plant, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Wheeling Island, Ohio County, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Birch Lake, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

The project for flood control, Woodlands, Marshall County, West Virginia, authorized by the Flood Control Act of June 28, 1938, Public Law 761, Seventy-fifth Congress.

WISCONSIN

The project for navigation, Hudson Small Boat Harbor, Wisconsin, authorized by the Flood Control Act of 1950.

The project for navigation, Cassville Small Boat Harbor, Grant County, Wisconsin, authorized by the River and Harbor Act of 1962.

WYOMING

The project for flood control, Buffalo, Johnson County, Diversion Channel, Wyoming, authorized by the Flood Control Act of 1950.

SEC. 1002. (a) The project for navigation at Eastport Harbor, Maine, authorized by section 101 of the River and Harbor Act of 1960 (74 Stat. 480), is not authorized after the date of enactment of this Act.

(b) The Secretary shall transfer without consideration to the city of Eastport, Maine, title to any facilities and improvements con-

structed by the United States as part of the project described in subsection (a) of this section. Such transfer shall be made as soon as practicable after the date of enactment of this Act. Nothing in this section shall require the conveyance of any interest in land underlying such project title to which is held by the State of Maine.

SEC. 1003. (a) The project for flood control, Lakeport Lake, California, authorized by the Flood Control Act of 1965, is not authorized after the date of enactment of this Act.

(b) Notwithstanding section 203 of the Federal Property and Administrative Services Act of 1949 and any other provision of law, the Secretary shall, during the five-year period beginning on the date of enactment of this Act, make all lands acquired by the United States for the Lakeport Lake project available for purchase by the Lake County Flood and Water Conservation District at the price at which such lands were acquired by the United States. Such District may waive the right to purchase any lands under the preceding sentence at any time during such period.

(c) Any conveyance of land under subsection (b) shall be made on the condition that the Lake County Flood and Water Conservation District administer such land for flood control and related purposes. If, at any time after such conveyance, such land is not so administered, all right, title, and interest in such land shall revert to the United States which shall have immediate right of reentry thereon.

SEC. 1004. (a) The Onaga Lake project, Vermillion Creek, Kansas, authorized by the Flood Control Act of 1962 (Public Law 87-874), is not authorized after the date of enactment of this Act.

(b) The Secretary shall expedite the current study under section 216 of the Flood Control Act of 1970 with respect to the addition of water supply storage at Tuttle Creek Lake, Kansas.

SEC. 1005. (a) The portion of the flood control project for the Illinois River and tributaries, Illinois, Wisconsin, and Indiana, authorized by section 203 of the Flood Control Act of 1962 (76 Stat. 1189) which is to be located on the Sangamon River, Illinois, about 1 mile upstream from Decatur, Illinois, and which is known as the William L. Springer Lake project is not authorized after the date of enactment of this Act.

(b) Notwithstanding section 203 of the Federal Property and Administrative Services Act of 1949 and any other provision of law, before any lands acquired by the United States for the William L. Springer Lake project referred to in subsection (a) of this section are sold or otherwise disposed of or used for any purpose other than to carry out such project, such lands shall first be made available for purchase by the city of Decatur, Illinois, at the price at which such lands were acquired by the United States.

AMENDMENT OFFERED BY MR. WEAVER

Mr. WEAVER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEAVER: Page 308, after line 23, insert the following:

SEC. 1006. The project for Elk Creek Lake, Rogue River Basin, Oregon, authorized by the Flood Control Act of 1962, is not authorized after the date of the enactment of this Act.

Mr. WEAVER. Mr. Chairman, I would like to rise in support of this amendment and tell my distinguished colleague, the chairman of the subcommittee, and the ranking minority member of the subcommittee, that I believe this amendment strengthens your bill. I support your bill. I think it is a good bill. There are extremely valuable projects in this bill that I believe will enhance the strength of this country, and I commend you for it. I believe my amendment further strengthens the bill. It does not touch any provision in the bill now. I want that understood.

The Elk Creek Dam is not in this bill. It was authorized in 1962, 23 years ago, and it was authorized as part of a three-dam project. Two of those dams, Lost Creek Dam, Apple Creek Dam, have been built. They are in operation now. The third dam, Elk Creek Dam, the Corps of Engineers now says is no longer necessary. The job is being done by the two dams up there.

I would like to tell my colleagues that, for instance, the flood control situation in the Rogue River Basin is taken care of by these two dams now in operation. So, therefore, we have here a $120 million dam that is not needed. The Corps of Engineers says, "We do not want to build it."

The Oregonian, the leading newspaper of Oregon, the statewide daily, a pro-public works newspaper, has said this is the kind of overvalued and irresponsible project that gives legitimate projects a bad name.

Sentiment in Oregon has turned against the dam. Even a newspaper in the Rogue Valley, the Ashland Daily Tidings, has said, "We don't want the dam."

And so in these days of serious budget cutting, here is $120 million we can save. Actually we can save $32 million cash today on the barrelhead by deauthorizing this dam.

I want to make two things very clear to the Members, and I think these are extremely important things. First, the damsite was wholly in my district for 40 years. In 1975 I prevailed on the House to kill this dam. It was wholly in my district. Reapportionment came along a couple of years ago and drew new boundaries. Now the dam lies along the boundary of the district. It is shared by another Member and myself. But its effects, flood control and irrigation, what there is of them, are in my district. The major irrigation area is entirely in my district. The people affected are in my district. The Rogue River—and this is a dam on the Rogue River system—the Rogue River flows 200 miles from the dam to the ocean, and lies mostly in my district, for over half the distance, entirely in my district. So this dam is, in effect, in my district, although the site itself lies along the boundary.

The second point I would like to make to my colleagues is that construction has not begun. That is very important. Construction has not begun. They have been building a road, $40 million for a road that goes nowhere to nowhere, and literally nowhere to nowhere, and is money that should also be rescinded. But we are talking now about the dam itself and the deauthorization of this dam. That is the issue.

And to make sure the construction of this dam had not begun, I went during Labor Day down, and I stood at the very site of the dam, right where the dam is going to be built. I stood there, and there is not a thing done, absolutely nothing. No construction of any kind has been done. As a matter of fact, when I say I stood in the dam site, I stood right in the stream. There is something you should know about Elk Creek itself, right where the dam is. I jumped over the stream. And I am not a particularly good jumper. This is a little, tiny creek. It has no power in it, no hydroelectric power, no nothing. The Corps of Engineers says it now really does not have flood control, the irrigation project is killed. The Corps has canceled any recreational developments. The corps says it is just simply not needed. So it seems to me that in this day of budget cutting—maybe some other day we could afford to spend $120 million on a dam that did nothing, but today it seems this is the place to cut the deficit.

So when I could stand and jump over this little stream right where the dam is going to be built, is there any wonder that the Corps of Engineers does not want to build this monument to waste? Remember, I emphasize, this dam is not in this bill. This dam was authorized in 1962.

The CHAIRMAN. The time of the gentleman from Oregon [Mr. WEAVER] has expired.

(By unanimous consent, Mr. WEAVER was allowed to proceed for 5 additional minutes.

Mr. WEAVER. I stood in the middle of this stream, actually jumped over it. It is a little creek. To dam it is inconceivable, and it is not in this bill. It was authorized in 1962 as part of a three-dam project. Two of the dams have been built. They take care of the flood control, the irrigation, the municipal water, good recreation facilities. And again I emphasize, I support this bill. This amendment strengthens an already good bill.

So we should not go ahead, mindlessly, as part of a three-dam project—and that is what has happened. It was part of a three-dam project planned 20 years ago, and we are just mindlessly going ahead and building it, if we do, without reevaluating it.

So I am going to conclude by asking my colleagues to consider themselves a board of directors of a company, and you are making products to sell, and are you going to make them at a profit? Consider the House as a board

of directors, and we are sitting as this board of directors. We have approved some very valuable projects that are going to be very helpful to us and our company, and now we have brought before us the Elk Creek Dam. So what do our accountants say? We asked our accountants to come in and give us an evaluation of the dam.

Well, the General Accounting Office has done a thorough study of Elk Creek Dam. The auditors will come in and testify to the board of directors that it is, they say, the worst project in the United States, the very worst that they have ever seen. It returns 20 cents on the dollar. It has got a cost-benefit ratio of one-fifth to one, according to the General Accounting Office auditors.

All right. Let us call in the construction division that are going to have to build it. What do they say about it? The Corps of Engineers comes in and talks to the board of directors, and they say, "We think the dam is a waste of money, we think it should not be built, we think the benefits are already there from the other two dams. We do not want it."

All rights, what about our customers, the people that this dam would serve? Sentiment has overwhelmingly changed against this dam. The newspapers in Oregon, the leading newspaper in Oregon, a newspaper in the Rogue Valley, say no, do not build the dam, it is irresponsible and overvalued. And we want to build other projects, they say. We want this money for other projects, not a waste, not a monument.

So as the board of directors, I ask my colleagues, let us not spend the money. I ask this House, vote yes on this amendment to deauthorize the Elk Creek Dam.

Mr. ROBERT F. SMITH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as the board of directors I want to appeal to you, as well, regarding this issue of Elk Creek Dam. And make no mistake about it, Elk Creek Dam is in my district. If there is any question about that, I just want to refer to a letter from the Jackson County assessor, when I ask him about this question: "Mr. Weaver must not be aware of the location of the district boundary or the location of Elk Creek."

This is an authorization bill. This is not a money bill. This bill does not appropriate any money, as we all know. And I must say that the gentleman from Oregon who has just spoken is the only public elected figure in Oregon who has been vocal against Elk Creek Dam.

Now, who is supporting it? I think that is fair to offer to the board. The support comes from the Governor of Oregon, from the two U.S. Senators from Oregon, from the county governments, which include one of this gentleman's counties, county governments affected, Jackson, Josephine, and Douglas, as well as this Member of Congress, where this particular dam is to be located, as well as the nonpartisan public water policy group in the State of Oregon, which has already identified its support for Elk Creek Dam. This is, as you have heard, a three-dam project, authorized in 1962. Two of the dams have been built, Lost Creek and Applegate, and this is the third part of that triangle of dams. And the fourth part, which has already, by the way, been built, is the mitigation against the destruction of salmon, which you may hear later. The Coe River hatchery is already in place, it is functioning at full capacity and, as a result, we have had the highest salmon runs on the Rogue River in history. So do not let anybody tell you a story about how this dam is going to injure the salmon runs on the Rogue River or the salmon runs in the Northwest.

An attempt to separate this dam from the complex would be, if done, the first time in history of this country that the Congress has pulled one leg of the triumvirate of this dam project apart. It is like cutting off the leg of your best halfback and asking him to go get you 100 yards in the game, or chopping off the arm of your tennis player and asking him to go out and win a tennis match.

This brings up the question of the cost-benefit ratio, which you have heard about, alleged. Let me say to you that the dam in the complex has a cost-benefit ratio of 1.24 to 1, without separating it out. And if you consider the sunk costs, in other words, what we have spent already on the Elk Creek Dam, you will find that the cost-benefit ratio is 1.62 to 1. This Congress has acted on this issue three times in the last 2 years. The Public Works Committee has looked at it, the Appropriations Committee, the Subcommittee on Energy and Water, has approved funding for this area, and now we are being asked to separate out from an appropriation bill this very important flood control project.

Let us get back to the question of salmon. As I mentioned, we have a mitigation program that protects the salmon runs on the Rogue River.

The two other dams, Lost Creek and Applegate, were also charged with the same kind of situation, where it would destroy the salmon run and would increase the turbidity of the river.

In the face of that, the two dams have been completed. As I mentioned, the largest salmon runs in the history of Oregon, twice their normal number, came up the Rogue, the salmon season was extended, even, for a period of time, because of the huge salmon runs in that area.

□ 1500

Turbidity is another issue charged against the other two dams; it will be charged here. Let me say to you that the Oregon Water Policy Review Commission, a nonpartisan commission, has made a study and they find that the Jackson Turbidity Unit, the unit used to measure turbidity, will be at five. Five is the legal, Federal requirement for drinking water. No turbidity.

Let us talk about the GAO study. The GAO study was conducted in 1982 based upon information gathered, pulled together numbers developed in the late seventies. It is old; it is antiquated, and the numbers that are used here should not be used in the argument on this issue.

The CHAIRMAN pro tempore. The time of the gentleman from Oregon [Mr. ROBERT F. SMITH] has expired.

(By unanimous consent, Mr. ROBERT F. SMITH was allowed to proceed for 3 additional minutes.)

Mr. ROBERT F. SMITH. I have asked the GAO to conduct a new study and they refused. There is a study involved in the bill as it is before you today, which is a good idea. But I suggest that using GAO numbers today is not proper and should not be used that way. What newspapers are approving this program?

The gentleman from Oregon noted that the leading newspaper in Oregon, the Oregonian, 300 miles to the north, by the way, this gentleman lives 200 miles to the north, 300 miles to the north, has made a statement about Elk Creek Dam. Now, if you want to side with somebody, why not side with the people who know about it in the localities and the counties. The Jackson County leading newspaper endorses it. The Josephine County leading newspaper endorses it as well as every other public official with the exception of one. I suggest if you are going to listen to the local opinion and who supports it and who does not, I think you should go to the local communities.

Members, the Public Works Committee on which I serve, was proud to serve for a period of 2 years, in this bill is authorizing a number of very, very important capital assets for the future of America. This ought to be one of them. The strength we have derived in this country is to be blessed with great natural resources and the ability and the ingenuity to harness them for the purpose of our people and for our future. Our only strength is in harnessing natural resources and providing for our future.

I ask the Members to retain this issue within this very fine bill. And I ask you to oppose the Weaver amendment which is supported by very, very few if none but one.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. ROBERT F. SMITH. I yield to the gentleman.

Mr. WEAVER. Well, the gentleman knows that a majority of Members of the Oregon delegation oppose this dam and are going to vote against it.

Mr. ROBERT F. SMITH. I question that. I think you are wrong about that. I would suggest a majority have voted for it, if you look at the last vote.

Mr. WEAVER. I have their word today that a majority of the Oregon delegation is opposed to this dam.

Mr. ROBERT F. SMITH. But see there are seven in the Oregon delegation; two in the U.S. Senate and two here; that is four out of seven who support it.

Mr. WEAVER. If the gentleman will yield further, the gentleman knows that a letter was sent to Senator MARK HATFIELD by Assistant Secretary of the Army for Civil Works, William R. Gianelli, in which he says:

> At my request, the Corps of Engineers reviewed the Elk Creek project to test its economic feasibility in light of current conditions. This review shows that the project does not have a benefit-cost ratio greater than one either as a last added element or as part of the reservoir system and thus lacks economic feasibility.

Mr. ROBERT F. SMITH. Reclaiming my time, if I may point out to the gentleman, Mr. Gianelli is in Calfornia.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of Congressman WEAVER's amendment to deauthorize the Elk Creek Dam project on the Rogue River in Oregon.

This project to construct a flood control and irrigation dam in Jackson County, OR, is unnecessary, potentially harmful to the environment, and economically unsound. The Corps of Engineers and the General Accounting Office both say that the dam isn't worth building. The Environmental Protection Agency has warned that releases from the dam would likely violate the Clean Water Act. And the administration opposes the project. At this time of concern about the budget deficit, we should stop this wasteful project and save around $100 million of Federal dollars.

The Elk Creek Dam is part of a three-dam project first authorized in 1962. The first two dams have already been built, but the third dam won't add appreciably to the system's benefits. The Portland Oregonian states that the project, "is not needed for flood control, not needed for power generation, not needed for irrigation and not needed for recreational enhancement." The project could severely damage the fishing and tourism industries along the Rogue River, part of the protected Wild and Scenic Rivers System. It could also harm the deer and elk populations in the area. Local business and environmental groups have joined forces in opposition to the project.

It is true that the dam itself would be inside of the district now represented by Representative BOB SMITH. But most of the negative impact on the Rogue River is in Representative WEAVER's district.

Since actual construction of the dam hasn't yet started, we should deauthorize the project and save millions of the taxpayers' oney. There is no reason to continue pouring millions of dollars into a project that has so little merit. The Portland Oregonian has stated, "Budget-minded national politicians have pointed to Elk Creek Dam over the years as an example of the worst kind of pork-barreling in the American West." I urge my colleagues to support the Weaver amendment and kill this wasteful, destructive, and unnecessary project.

It seems at a particularly appropriate time to do so when we are again going to be asked to vote on the Gramm-Rudman resolution. How on earth can we possibly, realistically get a handle on the Federal deficit if we are going to go on voting for turkeys like this. Here is an opportunity to strike about $100 million out of future deficits. It seems to me the gentleman from Oregon [Mr. WEAVER] ought to be given a merit badge for bringing it up instead of being opposed by Members of this House.

Mr. EMERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from Oregon [Mr. ROBERT F. SMITH].

Mr. ROBERT F. SMITH. I thank the gentleman for yielding to me.

Mr. Chairman, let me say as I stand here before you and as the existing condition occurs in the House of Representatives, one-half of Elk Creek Dam is now funded. One-half. Should the House of Representatives take action as recommended by Mr. WEAVER, it will be a step backward not only for my constituents in southern Oregon but for the whole idea of public works and what is proposed to be in this country.

Yes; we can sever contracts across this Nation if we want to save money. If we want to stop progress in America, we want to sever dams that are being constructed across the Nation then we will stop them all. We could save some money, but I submit to you, that even Gramm-Rudman would not be opposed to financing this dam simply because it is half funded, and the cost-benefit ratio to finish is 1.62 to 1.

Now the Appropriations Committee, as I mentioned, has acted. They took action through the Energy and Water Program as well as the supplemental and as well as the Public Works Committee has reviewed this program. The GAO report again is ancient. I want to see another report; I want to see another study. The GAO report does not apply to today's numbers.

□ 1510

The Corps of Engineers' report is what you make of it and what you may see of it; it is here, it is there. If you want Mr. WEAVER's cost-benefit ratio, use it. If you want my Corps of Engineers' cost-benefit ratio, you will come up with 1.24 to 1 in one case, and with the sunk cost you will come up with 1.62 to 1.

Now, the Corps of Engineers' decision is not one that is final. It is this House of Representatives that directs what occurs in this Nation, and I urge the Members to examine this project carefully because it is a good project. It is cost-beneficial, and it does what the rest of the public works dams do in this country, it stops people from being flooded away from their homes in southern Oregon.

Mr. WEAVER. Mr. Chairman, will the gentleman yield so I may respond to the things the gentleman has just said?

Mr. EMERSON. I yield to the gentleman from Oregon.

Mr. WEAVER. Mr. Chairman, I thank the gentleman for yielding.

I want to make just one point among the many things said that I could contest. That is that there is not one single contract let on this dam, not a one. Absolutely, the corps is waiting for this vote in the House.

Now, the gentleman from Oregon cannot have it both ways. He argued on the appropriation bill that the money was all for a road. True, $40 million has been spent on a road from nowhere to nowhere. I mean literally it is out in the woods in Oregon, and I agree that is kind of silly. But not a penny has been spent on the dam except for land acquisition, and not a single contract has been let.

Mr. ROBERT F. SMITH. Mr. Chairman, will the gentleman yield further?

Mr. EMERSON. I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. Mr. Chairman, let me make this clear to the Members of the House who may be somewhat confused by this argument. The facts are that there has been appropriated, passed by the House and Senate, and sent to the President and signed into law not only the supplemental appropriation bill but also the energy and water bill containing the money for Elk Creek Dam. It is the law of the land, so let us not have anybody mistake the fact and say that there has not been one dime expended. There has been $24 million sunk already and, as well, $33 million signed by the President into law. So again we

are going to take a step back and eliminate a project that is half completed, half funded.

Mr. EMERSON. Mr. Chairman, I yield back the balance of my time.

Mr. STANGELAND. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to the amendment offered by the gentleman from Oregon, Mr. WEAVER. There are many reasons why this amendment should be rejected.

The project which Mr. WEAVER wants to delete would allow for the construction of a dam, a gated concrete spillway and an intake tower to control water quality. As part of a three-dam system, Elk Creek would provide flood control, water supply, water quality control, fish and wildlife enhancement, recreation and irrigation.

Work on Elk Creek was stopped after the State of Oregon withdrew its support in 1975. It is important to note, however, that this position changed. After extensive review, evaluation, and a public hearing, the State water policy review board reversed its position and supported Elk Creek.

The gentleman from Oregon now wants to reverse this decision once again. He would also treat Elk Creek as a separate project. Let me remind Members that our water resources omnibus bill makes numerous changes in the program of water resources development policy. A key to this approach is that authorized projects, especially those already under construction—like Elk Creek—should be treated as they were initially and not reevaluated under constantly changing procedures.

We have already made substantial, justifiable investments in the Elk Creek project. Up to September 30, 1984, $11.9 million had been appropriated. For fiscal year 1985, the regular appropriation was $10 million. It is important to note that the fiscal year 1985 Energy and Water Development Appropriation Act provides specific appropriations and statutory directions for the corps to proceed with Elk Creek's construction. In addition, the fiscal year 1985 supplemental appropriation and the fiscal year 1986 regular appropriation provide $33 million for dam construction. The entire project is well under way. In fact, $18.2 million have already been spent. We should resist the temptation of stopping what we've already started.

Elk Creek is one portion of the overall Rogue River project. It should not be treated as a separate project because it is an integral part of the system. Attempts to piecemeal this or other projects are very harmful to the need for a comprehensive approach to solving water resources problems. We should respect this approach.

There is another important reason to reject this amendment. The Elk Creek project is in another Member's district. The gentleman offering the amendment may have represented this area in the past, but he does not do so now. Therefore, we should deal with this project as the Member representing the area desires. The provision in H.R. 6 is one which the other Member has recommended.

For these reasons, I urge all my colleagues to reject the amendment.

Mr. MILLER of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I would hope that this House would support the Weaver amendment.

So far the arguments against the Weaver amendment have been, first, that it was offered by a gentleman against this project which is outside his own district. We were then read a letter by the Assistant Secretary to the Army that said that this project had no economic feasibility, and we are told we should not consider that because the letter is signed by a gentleman from California.

We are told that we should not listen to the Oregonian newspaper because they are 300 miles to the north. But nobody has addressed the issue that has been raised by the Weaver amendment, and that is simply this: That we have billions of dollars in construction in this country waiting. There are hundreds of millions of dollars of construction that is immediately waiting, and at some point we have to pick and choose our priorities, whether it is in the Bureau of Reclamation or in the Corps of Engineers. And here we have a project seeking to come to the forefront, seeking to be funded by the appropriations process and be continued under this authorization process that simply does not merit our continued support.

The strongest argument that has been made on this floor is that somehow we should not stop what we started. I say to the Members that is how we end up spending hundreds of millions, if not billions of dollars, on boondoggles, and that is exactly what we have here. We have a project that started out to provide flood control M&I, water supply, irrigation water, all of which has been disavowed.

And let me tell the Members as the chairman of the authorization committee for the Bureau of Reclamation that it is a rare moment when the Bureau of Reclamation finds a project they do not want to sponsor. It is a rare moment when the Secretary of the Army and the Corps of Engineers find a project that they think has no economic feasibility. Do you know how bad a project has to be before the Corps of Engineers will disavow it? It has got to be horrible, because we have sat here during the 10 years that I have been in Congress and approved project after project where we had bad benefits, phony benefits, phony audits, and we continued them all.

Rarely in those instances will the corps come forward and say that this is a bad project, but that is exactly what they have done in this case when they have been asked to review this project. It is a rare moment when Members of this House can get up and stop a $120 million mistake in its tracks.

There has been planning money spent and design money spent, but there is not construction money. I happened to vote with the gentleman who is opposing this amendment during the appropriation process because there were suggestions that this project was well under way. In fact, that is not the case at all.

So we do no damage here. The damage we will do is to the public treasury should Members commit us on this course to build a $120 million project. For those Members who are afraid to look at other Members' projects lest their projects come under the same kind of scrutiny, let me just say that I think the Oregonian hit it on the head. It is these kinds of projects that give public works a bad name. It is these kinds of boondoggles that make it so difficult for those of us who are concerned about water development and about the development and enhancement of this resource in the West and elsewhere in this country. That is what destroys the credibility of public works because Congress apparently is unable to draw the distinctions between old dinosaurs and boondoggles and those which are relevant to today's setting and will enhance the infrastructure of this country.

Mr. Chairman, I would ask that the members of this committee support the Weaver amendment. It is good economics, it is good planning, it is very, very good policy, and it will mean that projects of greater merit will have an opportunity to be funded.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Chairman, I thank the gentleman for yielding.

I want to emphasize one point. The gentleman from Oregon who is seated here said that there were no contracts that had been let for this $32 million. The other gentleman from Oregon said that the $32 million has been appropriated. Both are accurate. The $32 million has been appropriated, but no contracts have yet obligated that $32 million, which means very simply that if we pass this amendment, we get the $32 million back.

The fact that it is appropriated does not automatically spend any of it. Had contracts been signed obligating the

$32 million, we would then be in a position where we could not get it back, but the fact that it has been appropriated does not in any way mean in this case that it is beyond salvage because no contracts have been signed.

□ 1520

I think the gentleman from California, who speaks with great expertise in the water field, ought to be listened to. We are in a position now whichever alternative passes in deficit reduction, $100 million here comes out of $100 million somewhere else. It is not necessarily that things are outrageous projects that have to be turned down. We are in, if we all take ourselves seriously, a new era in which we are giving a very tight limitation on money and we are checking one thing against another. This one seems clearly to me to fail the test.

But I want to emphasize that if we vote for this amendment, we save $32 million right away.

The CHAIRMAN. The time of the gentleman from California [Mr. MILLER] has expired.

(By unanimous consent, Mr. MILLER of California was allowed to proceed for 1 additional minute.)

Mr. MILLER of California. I would just like to respond to the gentleman from Massachusetts' remarks.

That is very clear. I sit on the Budget Committee. I know what happened when we went through this account on the Budget Committee. I am chairman of the authorizing committee on the Bureau of Reclamation, and I watched what happened in the Corps of Engineers, and I can tell you it is going to happen again if any of the scenarios we have laid out before us now come to pass in this Congress in the next few days.

We gave up hundreds of millions of dollars. There is not room in those budgets for these kinds of projects, because there are projects that are valid, that are necessary, that are urgently needed in different areas of this country, but what we have now is we have projects with a few politically powerful sponsors that crown out the ability of anything else to be funded. And we gave up in the Bureau budget and we gave up in the corps budget an awful lot of budget authority. We are going to go back to that and you are going to have this kind of project sitting there and using up resources when they cannot be justified in any way, shape or form.

The CHAIRMAN. The time of the gentleman from California [Mr. MILLER] has again expired.

(At the request of Mr. WEAVER, and by unanimous consent, Mr. MILLER of California was allowed to proceed for 1 additional minute.)

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman from Oregon.

Mr. WEAVER. Mr. Chairman, I thank the gentleman for yielding and for his good comments.

Mr. Chairman, I just want to conclude by saying to my chairman that I support his bill. It has extremely valuable projects in it. This amendment will strengthen the bill. It takes out a worthless project and gives the money to those things that are important.

And one final thing as to whether the dam is started or not. Only a few weeks ago I stood right on the dam site. Not a thing has been done.

Mr. MILLER. Did the gentleman get wet?

Mr. WEAVER. Not a contract has been let.

But I was about to jump over this little stream, jump over it, where the dam would be built. That is why the corps thinks it should not be built.

Mr. MILLER. Mr. Chairman, I would hope that the committee would support the Weaver amendment.

Mr. CALLAHAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, as a member of the Public Works Committee, I, too, was a part of deauthorizing some $11 billion of projects in this Nation and at the beginning of the work that is culminating here today on a very excellent H.R. 6 2 years ago. But not one time do I recall that there was ever a project deauthorized over the objection of the person in that particular district. It did not occur. It did not happen.

For the life of me, I cannot understand why one small district in America, in southern Oregon, is getting all the attention from California, Massachusetts, and Ohio to do the same things that public works projects do for the people in Massachusetts, Ohio, and California, and that is to protect their citizens against floods and disasters.

This is part of a three-dam program to provide flood control to stop disasters in southern Oregon. Why would all of these people suddenly find—and I guarantee you I suspect not one has been to southern Oregon, not one knows the exact whereabouts of this particular dam and not one knows the consequences of the drastic flooding that has occurred along the Rogue River in the past.

I am asking what we are going to give to Ohio, Massachusetts, and California for southern Oregon, no more and no less.

Mr. CALLAHAN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon [Mr. WEAVER].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. SNYDER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 200, noes 220, answered "present" 1, not voting 13, as follows:

[Roll No. 395]

ANSWERED "PRESENT"—1

Schulze

NOT VOTING—13

Addabbo	Eckert (NY)	Nelson
Clay	Evans (IA)	Panetta
Crane	Fowler	Staggers
Dannemeyer	Loeffler	
Dingell	Mavroules	

□ 1535

Mr. DASCHLE and Mr. SCHEUER changed their votes from "aye" to "no."

Messrs. CROCKETT, ARMEY, WEBER, DREIER of California, VOLKMER, WHITLEY, HEFNER, and GONZALEZ changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1545

Mr. ROE. Mr. Chairman, we find we have made a technical error in title I. I ask unanimous consent to revert back to title I so that I may offer a corrective amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDMENT OFFERED BY MR. ROE

Mr. ROE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROE: Page 12, after line 2, insert the following:

FRESH KILLS IN CARTERET, NEW JERSEY

The project for navigation, Fresh Kills in Carteret, New Jersey, which project consists of extending the Arthur Kill Channel at a depth of 40 feet to the Fresh Kills in Carteret, New Jersey, and easing of such bends as the Secretary determines are necessary to enhance navigation, at an estimated cost of $26,000,000. Except for funds appropriated to the Environmental Protection and Mitigation Fund under section 1104 of this Act, no appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, such project if such acquisition and actual construction have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate. Such project shall include any modifications that may be recommended by the Secretary with respect to such project under section 103 of this Act.

Mr. ROE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROE Mr. Chairman, this is a technical error. We struck out a section in the port title on a project in New Jersey and New York which was done in error, and that is really all it amounts to. We are reinstating that language. It was a technical error.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Minnesota.

Mr. STANGELAND. Mr. Chairman, we have reviewed the amendment on this side and we agree that it is a technical correction. We think it ought to be done and certainly support the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. ROE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. COLEMAN OF MISSOURI

Mr. COLEMAN of Missouri. Mr Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLEMAN of Missouri: Page 283, strike out lines 12 through 21.

Page 284, strike out lines 1 and 2.

Page 284, strike out lines 9 through 12.

Mr. COLEMAN of Missouri. Mr. Chairman, the thrust of this amendment is to retain the authorization for several water projects in the Grand River basin which I have asked the Chairman to reinstate.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN of Missouri. I certainly yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, we have reviewed this amendment in title X. The gentleman has three dam authorizations that were stricken, and we have no objection on this side.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN of Missouri. I yield to the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding. I, too, have reviewed the amendment. We had deauthorized projects that now Missouri and the gentleman wish to have reauthorized, and we approve of the gentleman's amendment.

Mr. COLEMAN of Missouri. I thank the gentleman and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. COLEMAN].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LEATH OF TEXAS

Mr. LEATH of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEATH of Texas: Page 299, strike out lines 3 and 4.

Mr. LEATH of Texas. Mr. Chairman, my amendment to title X is very simple, and I will not take much of the committee's time. It strikes existing language that would deauthorize the Pecan Bayou Lake flood control project originally authorized in 1968.

Mr. STENHOLM. Mr. Chairman, will the gentleman yield?

Mr. LEATH of Texas. I yield to the gentleman from Texas.

Mr. STENHOLM. Mr. Chairman, I rise in support of the gentleman's amendment and I urge its adoption.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. LEATH of Texas. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, the committee has reviewed the amendment on our side. It is a corrective amendment and we have no objection to it on our side.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. LEATH of Texas. I yield to the gentleman from Minnesota.

Mr. STANGELAND. Mr. Chairman, we have reviewed the amendment and we certainly support the amendment.

Mr. LEATH of Texas. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. LEATH].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title X?

If not, the Clerk will designate title XI.

The text of title XI is as follows:

TITLE XI—GENERAL PROVISIONS

SEC. 1101. (a) The objectives of enhancing regional economic development, the quality of the total environment (including its protection and improvement), the well-being of the people of the United States, the prevention of loss of life, preservation of cultural and historical values, and national economic development shall be the objectives to be included in water resources projects carried out by the Secretary, and the benefits and costs attributable to such objectives, both quantifiable and unquantifiable, shall be included in the evaluation of the benefits and costs of such projects.

(b) Notwithstanding any other provision of law, for purposes of analyzing in accordance with the first section of the Flood Control Act of June 22, 1936 (49 Stat. 1570; 33 U.S.C. 701a), the costs and benefits of a water resources project which includes any element which provides flood protection to any distressed low-income area, as determined by the Secretary, the benefits to be derived from carrying out such element shall be deemed to exceed the costs of carrying out such element.

SEC. 1102. (a) In the case of any water resources study authorized to be undertaken by the Secretary, the Secretary shall prepare a feasibility report. Such feasibility report shall describe, with reasonable certainty, the environmental benefits and detriments, the costs and benefits attributable to each of the objectives set forth in section 1101 of this title, the engineering features (including hydrologic and geologic information), the public acceptability, and the purposes, scope, and scale of the recommended plan. The feasibility report shall also include the views of other Federal agencies and non-Federal agencies with regard to the recommended plan, a description of a nonstructural alternative to the recommended plan when such plan does not have significant nonstructural features, and a description of the Federal and non-Federal participation in such plan, and shall demonstrate that States, other non-Federal interests, and Federal agencies have been consulted in the development of the recommended plan. This subsection shall not apply to (1) any study with respect to which a report has been submitted to Congress before the date of enactment of this Act, (2) any study for a project which project is authorized by this Act, and (3) any study for a project which is authorized under any of the following sections: section 205 of the Flood Control Act of 1948 (33 U.S.C. 701s), section 2 of the Flood Control Act of August 28, 1937 (33 U.S.C. 701g), section 14 of the Flood Control Act of 1946 (33 U.S.C. 701r), section 107 of the River and Harbor Act of 1960 (33 U.S.C. 577), section 3 of the Act entitled "An Act authorizing Federal participation in the cost of protecting the shores of publicly owned property", approved August 13, 1946 (33 U.S.C. 426g), and section 111 of the River and Harbor Act of 1968 (33 U.S.C. 426i).

(b) Before preparing any feasibility report under subsection (a), the Secretary shall first perform, at full Federal expense, a reconnaissance survey of the potential water resources project for the purpose of defining water resources problems and needs to be addressed by such project and identifying potential solutions to such problems in sufficient detail to enable the Secretary to determine whether or not planning of such project should proceed to the preparation of such feasibility report. Such survey shall include a preliminary analysis of the Federal interest, costs, benefits, and environmental impacts of such project and an estimate of the costs of preparing the feasibility report.

(c)(1) Non-Federal interests shall contribute 50 percent of the cost of any feasibility report for any water resources study prepared by the Secretary or the Secretary of the Interior during the period of such study. Not less than one-half of such non-Federal contribution shall be made by payments, and not more than one-half of such contribution may be made by the provision of services, materials, or supplies necessary to prepare the feasibility report. Any amount contributed by non-Federal interests under this paragraph shall be credited toward the non-Federal share, if any, of the cost of construction of the project for which such report is prepared.

(2) This subsection shall only apply to any water resources study for which no Federal funds have been obligated before the date of enactment of this Act. This subsection shall not apply to any water resources study for any navigation improvement to the inland waterway system.

SEC. 1103. In the evaluation by the Secretary of benefits and costs of a water resources project, the benefits attributable to measures included in a project for the purpose of environmental quality, including protection and improvement of the environment, mitigation of project-caused fish and wildlife losses (including habitat), and fish and wildlife enhancement shall be deemed to be at least equal to the costs of such measures.

SEC. 1104. There is established an Environmental Protection and Mitigation Fund. There is authorized to be appropriated to such fund $35,000,000 for fiscal years beginning after September 30, 1985. Amounts in the fund shall be available for undertaking, in advance of construction of any water resources project authorized to be constructed by the Secretary, such measures authorized as part of such project, including the acquisition of lands and interests therein, as may be necessary to ensure that project-induced losses to fish and wildlife production and habitat will be mitigated. The Secretary shall reimburse the Fund for any amounts expended under this section for a water resources project from the first appropriations made for construction, including planning and designing, of such project.

SEC. 1105. (a) The Secretary, in coordination with the Secretary of the Interior and in consultation with appropriate Federal, State, and local agencies, is authorized to study the water resources needs of river basins and regions of the United States. The Secretaries shall report the results of such study to Congress not later than October 1, 1987.

(b) In carrying out the studies authorized under subsection (a) of this section, the Secretaries shall consult with State, interstate, and local governmental entities.

SEC. 1106. (a) The Secretary may establish and develop separate campgrounds for individuals sixty-two years of age or older at any lake or reservoir under the jurisdiction of the Secretary where camping is permitted.

(b) The Secretary may prescribe regulations to control the use of and the access to any separate campground established and developed under subsection (a) of this section.

(c) There are authorized to be appropriated such sums as may be necessary for fiscal years beginning after September 30, 1985, to carry out subsection (a) of this section.

(d) The Secretary shall establish and develop the parcel of land (located in the State of Texas at the Sam Rayburn Dam and Reservoir) described in subsection (g) of this section as a separate campground for individuals sixty-two years of age or older.

(e) The Secretary shall prescribe regulations to control the use of and the access to the separate campground established and developed pursuant to subsection (d) of this section.

(f) There are authorized to be appropriated for fiscal years beginning after September 30, 1985, $600,000 to carry out subsection (d) of this section.

(g) The parcel of land to be established and developed as a separate campground pursuant to subsection (d) of this section is a tract of land of approximately 50 acres which is located in the county of Angelina in the State of Texas and which is part of the Thomas Hanks survey. The boundary of the parcel begins at a point at the corner furthest west of tract numbered 3420 of the Sam Rayburn Dam and Reservoir:

thence north 81 degrees 30 minutes east, approximately 2,800 feet to a point at the edge of the water;

thence south along the edge of the water approximately 2,600 feet;

thence north 80 degrees 30 minutes west, approximately 1,960 feet to a point at the reentrant corner of tract numbered 3419 of the Sam Rayburn Dam and Reservoir;

thence along the boundary line of tract numbered 3419 north 46 degrees 15 minutes west, 220 feet to a point at the center line of a road at the corner common to tract numbered 3419 and tract numbered 3420;

thence along the southwestern boundary line of tract numbered 3420 north 46 degrees 15 minutes west, 230 feet to a point at the corner furthest east of tract numbered 3424 of the Sam Rayburn Dam and Reservoir;

thence along the boundary line of tract numbered 3424 south 32 degrees 4 minutes west, 420 feet to a point;

thence along the boundary line of tract numbered 3424 north 28 degrees 34 minutes west, 170 feet to a point;

thence along the boundary line of tract numbered 3424 north 38 degrees 15 minutes east, 248 feet to a point;

thence along the boundary line of tract numbered 3424 north 32 degrees 44 minutes east, 120 feet to a point at the corner furthest north of tract numbered 3424;

thence along the southwestern boundary line of tract numbered 3420 north 46 degrees 15 minutes west, 460 feet to the beginning point.

SEC. 1107. Section 2(h) of the Act entitled "An Act to deauthorize several projects within the jurisdiction of the Army Corps of Engineers" (Public Law 97-128) is amended to read as follows:

"(h) The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to undertake, at full Federal expense, such structural and nonstructural measures as he determines to be economically and engineeringly feasible to prevent flood damage to communities along the route of the Meramec River and its tributaries in Saint Louis, Jefferson, and Franklin Counties (including the community of Pacific, Missouri), Missouri, at an estimated cost of $100,000,000. Such structural measures shall not include the construction of any dam or reservoir on the Meramec River.".

SEC. 1108. Section 111 of the River and Harbor Act of 1968 is amended by inserting after "construct projects" the following: "(both structural and nonstructural)".

SEC. 1109. (a) Section 4 of the Act entitled "An Act to authorize the Secretary of the Army to undertake a national program of inspection of dams", approved August 8, 1972 (Public Law 92-367; 33 U.S.C. 467c), is amended by inserting "(a)" immediately after "SEC. 4.", and by adding at the end thereof the following new subsection:

"(b)(1) In any case where the Secretary determines that a dam inspected under this Act or under the authority of any other Federal law which is owned by a State, a political subdivision thereof, or any other such public agency or instrumentality is in such a hazardous condition that it is a danger to human life or property, the Secretary is authorized to restore such dam to a safe condition if the State, political subdivision, or other public agency or instrumentality owning such dam agrees prior to any such restoration (A) to pay 20 percent of the costs of such restoration during the period such restoration is carried out, (B) to repay to the United States, over a period not to exceed 50 years from the date of completion of the restoration, the remaining costs of such restoration, together with interest, at a rate computed in accordance with section 301(b) of the Water Supply Act of 1958, and (C) to maintain such dam upon completion of such restoration in a safe condition.

"(2) The Secretary is not authorized to carry out any of the work described in this subsection unless the State in which the work is to be accomplished has in existence and is maintaining a dam safety program for non-Federal dams which insures that non-Federal dams are built in accordance with sound engineering practice, protect the safety of the public, and are maintained in safe condition.

"(3) There are authorized to be appropriated to carry out this subsection $30,000,000 for each fiscal year beginning after September 30, 1985.".

(b) Section 3 of such Act (33 U.S.C. 467b) is amended by adding after the first sentence thereof the following new sentence: "In any case in which any hazardous conditions are found during an inspection, upon request by the owner, the Secretary, acting through the Chief of Engineers, may perform detailed engineering studies to determine the structural integrity of the dam, subject to reimbursement of such expense.".

(c) The Secretary, in accordance with section 4 of such Act, as amended by subsection (a) of this section, shall repair the spillway and undertake such other measures as the Secretary determines are necessary to restore the safety of the dam used to supply water to Schuyler County Public Water Supply District Number 1, Missouri.

(d) The Secretary, in accordance with such section 4, shall make necessary repairs to the Milton Dam in Mahoning County, Ohio, in accordance with the remedial measures described in the report of the District Engineer, Pittsburgh District, entitled "Milton Dam, Mahoning County, Ohio, Investigation to Determine the Adequacy of Structural and Hydraulic Components", dated February 1980.

(e) Section 5 of such Act is amended by inserting "(a)" after "SEC. 5." and by adding at the end thereof the following new subsection:

"(b) The Secretary shall annually update the inventory of dams required to be prepared under subsection (a) and submit a report to the Congress on the results of such update. In conducting such update, the Secretary shall take into account any other review of dams which the Secretary has conducted under the authority of any other law.".

SEC. 1110. (a) Section 202(f) of the Water Resources Development Act of 1976 is amended to read as follows:

"(f) There is authorized to be appropriated to carry out this section such sums as may be necessary for fiscal years beginning after September 30, 1985.".

(b) The Secretary shall develop, implement, and maintain a project under section 202 of the Water Resources Development Act of 1976 for removal of drift and debris from Buffalo Harbor, New York, and removal of dilapidated structures from the adjacent shoreline.

SEC. 1111. Lake Pend Oreille, Idaho, is hereby declared to be not a navigable water of the United States for purposes of section 10 of the Act entitled "An Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved March 3, 1899 (33 U.S.C. 403).

SEC. 1112. Section 104(b) of the River and Harbor Act of 1958, as amended, is amended by striking out "$10,000,000" and inserting in lieu thereof "$12,000,000".

SEC. 1113. Upon request of the Governor of a State, or the appropriate official of local government, the Secretary is authorized to provide designs, plans, and specifications, and such other technical assistance as he deems advisable, at Federal expense, to such State or local government for its use in carrying out projects for removing accumulated snags and other debris, and clearing and straightening channels in navigable streams and tributaries thereof.

SEC. 1114. (a) The Secretary shall undertake a program to increase his capability to control river ice and harbor ice, and to assist communities in breaking up such ice that would otherwise be likely to cause or aggravate flood or other damage or severe streambank erosion.

(b) The Secretary is further authorized to provide technical assistance to units of local government to implement local plans to control or break up river ice and harbor ice. As part of such authority, the Secretary is authorized to purchase, utilize, and, if requested by units of local government, loan any necessary ice-control or ice-break equipment to such units of local government.

(c) The Secretary shall carry out this section on a priority basis with respect to the Kankakee River in the vicinity of Wilmington, Illinois. The Secretary shall report to Congress not later than one year after the date of enactment of this Act and annually thereafter on the effectiveness of the program under this section with respect to the Kankakee River in the vicinity of Wilmington, Illinois.

(d) The sum of $5,000,000 is authorized to be appropriated to the Secretary for each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, to implement this section.

SEC. 1115. The laws of the United States relating to the improvement of rivers and harbors, flood control, beach erosion, and other water resource development enacted after November 8, 1966, and before January 1, 1985, shall be compiled under the direction of the Secretary of the Army and the Chief of Engineers and printed for the use of the Department of the Army.

SEC. 1116. The Secretary is authorized to preserve, restore, interpret, and maintain those historic properties located on water resource development projects under the jurisdiction of the Department of the Army if such properties have been entered into the National Register of Historic Places.

SEC. 1117. Subsection (b) of section 120 of the Water Resources Development Act of 1976 is amended to read as follows:

"(b) There is authorized to be appropriated $10,000,000 per fiscal year for each fiscal year beginning after September 30, 1985, to carry out this section.".

SEC. 1118. (a) The Secretary shall, notwithstanding any other provision of law, convey to the Metropolitan Park District of Columbus and Franklin County, Ohio, all right, title, and interest of the United States in and to all or any part of the eight hundred thirty-four and nine one-hundredths acres of land which were acquired for the Big Darby Lake flood control project and which have been determined to be surplus property. The Secretary shall convey any such right, title, and interest for consideration in an amount equal to the consideration paid by the Secretary for acquisition of such right, title, and interest for such project.

(b) The conveyance of land under subsection (a) of this section shall be made on the condition that such Park District administer such land for park purposes. If, at any time after such conveyance, such land is not so administered, all right, title, and interest in such land shall revert to the United States which shall have immediate right of reentry thereon.

SEC. 1119. Section 16(b) of the Water Resources Development Act of 1974 is amended by striking out "$1,342,000" and all that follows through the period at the end of such section and inserting in lieu thereof "$1,700,000.".

SEC. 1120. The Secretary shall maintain the navigation project for the Delaware River, Philadelphia to the sea, and the navigation project for the Delaware River, Trenton to Philadelphia, to their authorized dimensions.

SEC. 1121. (a) Whitewater recreation on the Gauley River downstream of the Summersville Lake Project in West Virginia is a project purpose of that project.

(b) During the fall flood control drawdown period for the Summersville Lake Project, the Secretary shall provide releases from the Summersville Dam for whitewater recreation in the 26 mile tailwater segment of the Gauley River commencing at the base of such dam. Such releases shall be at levels (minimum 2,400 cubic feet per second) and at times, suitable for whitewater recreation. The releases shall commence on the first weekend after Labor Day of each year. In each year there shall be releases on at least 20 days during the 6-week period beginning on Labor Day. Additional releases may be provided at other times during the fall drawdown at the discretion of the Secretary.

(c) The Secretary may temporarily suspend (for such period as may be necessary) or modify any release required under subsection (b) when necessary for purposes of flood control or any other project purpose, or for reasons of public health and safety. Except in cases of emergency, no suspension or modification of such releases may be made solely for reasons associated with the generation of hydroelectric power at the Summersville Dam.

(d) Nothing in subsection (b) of this section shall be construed to affect the authority of the Secretary regarding releases of water from the Summersville Dam for any project purpose (including the purpose set forth in subsection (a)) at any time other than during the period specified in subsection (b).

SEC. 1122. (a) To ensure the coordinated development and enhancement of the Upper Mississippi River system, it is hereby declared to be the intent of Congress to recognize that system as a nationally significant ecosystem and a nationally significant commercial navigation system. Congress further recognizes that the system provides a diversity of opportunities and experiences. The system shall be administered and regulated in recognition of its several purposes.

(b) For purposes of this section—

(1) the terms "Upper Mississippi River system" and "system" mean those river reaches having commercial navigation channels on the Mississippi River main stem north of Cairo, Illinois; the Minnesota River, Minnesota; Black River, Wisconsin; Saint Croix River, Minnesota and Wisconsin; Illinois River and Waterway, Illinois; and Kaskaskia River, Illinois;

(2) the term "master plan" means the comprehensive master plan for the management of the Upper Mississippi River system dated January 1, 1982, prepared by the Upper Mississippi River Basin Commission and submitted to Congress pursuant to Public Law 95-502; and

(3) the term "GREAT I, GREAT II, and GRRM studies" means the studies entitled "GREAT River Environmental Action Team—GREAT I—A Study of the Upper Mississippi River", dated September 1980, "GREAT River Environmental Action Team—GREAT II—A Study of the Upper Mississippi River", dated December 1980, and "GREAT River Resource Management Study", dated September 1982.

(c)(1) Congress hereby approves the master plan as a guide for future water policy on the Upper Mississippi River system.

(2) Subsection (i) of section 101 of Public Law 95-502 is repealed. Section 101(b) of such Public Law is amended by striking out the parenthetical clause in the last sentence.

(d)(1) The consent of the Congress is hereby given to the States of Illinois, Iowa, Minnesota, Missouri, and Wisconsin, or any two or more of such States, to enter into negotiations for agreements, not in conflict with any law of the United States, for cooperative effort and mutual assistance in the comprehensive planning for the use, protection, growth, and development of the Upper Mississippi River system, and to establish such agencies, joint or otherwise, or designate an existing multi-State entity, as they may deem desirable for making effective such agreements. Such agreements shall become final only after ratification by an Act of Congress.

(2) The Secretary is authorized to enter into cooperative agreements with the Upper Mississippi River Basin Association or any other agency established under paragraph (1) of this subsection to promote and facilitate active State government participation in the river system management, development, and protection.

(3) The Upper Mississippi River Basin Association or any other agency established under paragraph (1) of this subsection is hereby designated by Congress as the caretaker of the master plan. Any changes to the master plan recommended by the Secretary shall be submitted to such association or agency for review. Such agency or association may make such comments with respect to such recommendations as such agency or association deems appropriate and shall transmit such comments to the Secretary. The Secretary shall transmit such recommendations along with the comments of such agency or association to the Congress for approval.

(e)(1) The Secretary, in consultation with the States of Illinois, Iowa, Minnesota, Missouri, and Wisconsin, is authorized to undertake, as identified in the master plan—

(A) a program for the planning, construction, and evaluation of measures for fish and wildlife habitat rehabilitation and enhancement;

(B) implementation of a long-term resource monitoring program; and

(C) implementation of a computerized inventory and analysis system.

(2) Each program referred to in paragraph (1) shall be carried out over a ten-year period beginning on the date of enactment of this Act. Before the last day of such ten-year period, the Secretary, in consultation with the States of Illinois, Iowa, Minnesota, Missouri, and Wisconsin, shall conduct an evaluation of such programs and submit a report on the results of such evaluation to Congress. Such evaluation shall determine each such program's effectiveness, strengths, and weaknesses and contain recommendations for the modification and continuance or termination of such program.

(3) For purposes of carrying out paragraph (1)(A) of this subsection, there is authorized to be appropriated to the Secretary not to exceed $8,200,000 for the first fiscal year beginning after the date of enactment of this Act, not to exceed $12,400,000 for the second fiscal year beginning after the date of enactment of this Act, and not to exceed $13,000,000 per fiscal year for each of the succeeding eight fiscal years.

(4) For purposes of carrying out paragraph (1)(B) of this subsection, there is authorized to be appropriated to the Secretary not to exceed $7,680,000 for the first fiscal year beginning after the date of enactment of this Act and not to exceed $5,080,000 per fiscal year for each of the succeeding nine fiscal years.

(5) For purposes of carrying out paragraph (1)(C) of this subsection, there is authorized to be appropriated to the Secretary not to exceed $40,000 for the first fiscal year beginning after the date of enactment of this Act, not to exceed $280,000 for the second fiscal year beginning after the date of enactment of this Act, not to exceed $1,220,000 for the third fiscal year beginning after the date of enactment of this Act, and not to exceed $975,000 per fiscal year for each of the succeeding seven fiscal years.

(6) The Secretary shall determine if the States of Illinois, Iowa, Minnesota, Missouri, and Wisconsin are adequately participating in the planning, construction, evaluation, and implementation of those programs authorized by paragraph (1) of this subsection during the third fiscal year after the first appropriation of funds to carry out such paragraph. If participation of the States is not adequate to allow the Secretary to carry out such paragraph, the Secretary shall submit a report to Congress asking for termination of the program's funding.

(7) None of the funds appropriated pursuant to any authorization contained in this subsection shall be considered to be chargeable to navigation.

(f)(1) The Secretary, in consultation with any agency established under subsection (d)(1) of this section, is authorized to implement a program of recreational projects for the system substantially in accordance with the recommendations of the GREAT I, GREAT II, and GRRM studies and the master plan reports. In addition, the Secretary shall conduct an assessment of the economic benefits generated by recreational activities in the system.

(2) For purposes of carrying out the program of recreational projects authorized in paragraph (1) of this subsection, there is authorized to be appropriated to the Secretary not to exceed $500,000 per fiscal year for each of the first ten fiscal years beginning after the effective date of this Act and, for purposes of carrying out the assessment of the economic benefits of recreational activities as authorized in paragraph (1) of this subsection, there is authorized to be appropriated to the Secretary not to exceed $300,000 per fiscal year for the first and second of such fiscal years and $150,000 for the third of such fiscal years.

(g) The Secretary, in consultation with any agency established under subsection (d)(1) of this section, shall submit to Congress annual recommendations to be undertaken to increase the capacity of specific locks throughout the system by employing nonstructural measures and making minor structural improvements.

(h)(1) The Secretary, in consultation with any agency established under subsection (d)(1) of this section, shall monitor traffic movements on the system for the purpose of verifying lock capacity, updating traffic projections, and refining the economic evaluation so as to verify the need for future capacity expansion of the system.

(2) The Secretary, in consultation with the States of Illinois, Iowa, Minnesota, Missouri, and Wisconsin, shall determine the need for river rehabilitation and environmental enhancement based on the condition of the environment, project developments, and projected environmental impacts from implementing any proposals resulting from recommendations made under subsection (g) and paragraph (1) of this subsection.

(3) There is authorized to be appropriated to the Secretary for each of the ten fiscal years beginning after the date of the enactment of this Act such sums as may be necessary to carry out this subsection.

(i)(1) The Secretary shall, as he determines feasible, dispose of dredged material from the system pursuant to the recommendations of the GREAT I, GREAT II, and GRRM studies.

(2) The Secretary shall establish and request appropriate Federal funding for a program to facilitate productive uses of dredged material. The Secretary shall work with the States which have, within their boundaries, any part of the system to identify potential users of dredged material.

(j)(1) Notwithstanding another provision of this section, the Secretary shall enter into an interagency agreement with the Sec-

retary of the Interior, with respect to projects and programs in the master plan for which the Department of the Interior (or any agency or bureau of the Department) is designated in the plan as the lead agency, under which the Secretary of the Interior will carry out all functions that the Secretary, but for this subsection, would carry out regarding those projects and programs.

(2) For purposes of carrying out the functions set forth in the agreement under paragraph (1) of this subsection, there is authorized to be appropriated such sums as may be necessary to the Secretary of the Interior for each of the first ten fiscal years beginning after the date of enactment of this Act. Amounts appropriated for any fiscal year under this paragraph shall be in lieu of, and shall not be in addition to, amounts authorized to be appropriated to the Secretary of the Army, acting through the Chief of Engineers, under this section for such fiscal year.

SEC. 1123. (a) To ensure the coordinated economic revitalization and environmental enhancement of the Great Lakes and their connecting channels and the Saint Lawrence Seaway (hereinafter in this section referred to as the "Great Lakes"), known as the "Fourth Seacoast" of the United States, it is hereby declared to be the intent of Congress to recognize the importance of the economic vitality of the Great Lakes region, the importance of exports from the region in the United States balance of trade, and the need to assure an environmentally and socially responsible navigation system for the Great Lakes. Congress finds that the Great Lakes provide a diversity of agricultural, commercial, environmental, recreational, and related opportunities based on their extensive water resources and water transportation systems.

(b)(1) There is hereby established a Board to be known as the Great Lakes Commodities Marketing Board (hereinafter in this subsection referred to as the "Board").

(2)(A) The Board shall develop a strategy to improve the capacity of the Great Lakes region to produce, market, and transport commodities in a timely manner and to maximize the efficiency and benefits of marketing products produced in the Great Lakes region and products shipped through the Great Lakes.

(B) The strategy shall address, among other things, environmental issues relating to transportation on the Great Lakes and marketing difficulties experienced due to late harvest seasons in the Great Lakes region. The strategy shall include, as appropriate alternative storage, sales, marketing, multimodal transportation systems, and other systems, to assure optimal economic benefits to the region from agricultural and other commercial activities. The strategy shall develop—

(i) methods to improve and promote both bulk and general cargo trade through Great Lakes ports;

(ii) methods to accelerate the movement of grains and other agricultural commodities through the Great Lakes;

(iii) methods to provide needed flexibility to farmers in the Great Lakes region to market grains and other agricultural commodities; and

(iv) methods and materials to promote trade from the Great Lakes region and through Great Lakes ports, particularly with European, Mediterranean, African, Caribbean, Central American, and South American nations.

(C) In developing the strategy, the Board shall conduct and consider the results of—

(i) an analysis of the feasibility and costs of using iron ore vessels which are not being utilized to move grain and other agricultural commodities on the Great Lakes;

(ii) an economic analysis of transshipping such commodities through Montreal, Canada, and other ports;

(iii) an analysis of the economic feasibility of storing such commodities during the nonnavigation season of the Great Lakes and the feasibility of and need for construction of new storage facilities for such commodities;

(iv) an analysis of the constraints on the flexibility of farmers in the Great Lakes region to market grains and other agricultural commodities, including harvest dates for such commodities and the availability of transport and storage facilities for such commodities; and

(v) an analysis of the amount of grain and other agricultural commodities produced in the United States which are being diverted to Canada by rail but which could be shipped on the Great Lakes if vessels were available for shipping such products during the navigation season.

(D) In developing the strategy, the Board shall consider weather problems and related costs and marketing problems resulting from the late harvest of agricultural commodities (including wheat and sunflower seeds) in the Great Lakes region.

(E) In developing the strategy, the Board shall consult United States ports on the Great Lakes and their users, including farm organizations (such as wheat growers and soybean growers), port authorities, water carrier organizations, and other interested persons.

(3) The Board shall be composed of seven members as follows:

(A) the chairman of the Great Lakes Commission or his or her delegate,

(B) the Secretary or his or her delegate,

(C) the Secretary of Transportation or his or her delegate,

(D) the Secretary of Commerce or his or her delegate,

(E) the Administrator of the Saint Lawrence Seaway Development Corporation or his or her delegate,

(F) the Secretary of Agriculture or his or her delegate, and

(G) the Administrator of the Environmental Protection Agency or his or her delegate.

(4)(A) Members of the Board shall serve for the life of the Board.

(B) Members of the Board shall serve without pay and those members who are full time officers or employees of the United States shall receive no additional pay by reason of their service on the Board, except that members of the Board shall be allowed travel or transportation expenses under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business and engaged in the actual performance of duties vested in the Board.

(C) Four members of the Board shall constitute a quorum but a lesser number may hold hearings.

(D) The cochairmen of the Board shall be the Secretary or his or her delegate and the Administrator of the Saint Lawrence Seaway Development Corporation or his or her delegate.

(E) The Board shall meet at the call of the co-chairmen or a majority of its members.

(5)(A) The Board shall, without regard to section 5311(b) of title 5, United States Code, have a Director, who shall be appointed by the Board and shall be paid at a rate which the Board considers appropriate.

(B) Subject to such rules as may be prescribed by the Board, without regard to 5311(b) of title 5, United States Code, the Board may appoint and fix the pay of such additional personnel as the Board considers appropriate.

(C) Upon request of the Board, the head of any Federal agency is authorized to detail, on a reimburseable basis, any of the personnel of such agency to the Board to assist the Board in carrying out its duties under this subsection.

(6)(A) The Board may, for purposes of carrying out this subsection, hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Board considers appropriate.

(B) Any member or agent of the Board may, if so authorized by the Board, take any action which the Board is authorized to take by this paragraph.

(C) The Board may secure directly from any department or agency of the United States any information necessary to enable it to carry out this subsection. Upon request of the co-chairmen of the Board, the head of such department or agency shall furnish such information to the Board.

(D) The Board may use the United States mail in the same manner and under the same conditions as other departments and agencies of the United States.

(E) The Administrator of General Services shall provide to the Board on a reimbursable basis such administrative support services as the Board may request.

(7) Not later than September 30, 1988, the Board shall transmit to the President and to each House of the Congress a report stating the strategy developed under this subsection and the results of each analysis conducted under this subsection. Such report shall contain a detailed statement of the findings and conclusions of the Board together with its recommendations for such legislative and administrative actions as it considers appropriate to carry out such strategy and to assure maximum economic benefits to the users of the Great Lakes and to the Great Lakes region.

(8) The Board shall cease to exist 180 days after submitting its report pursuant to this subsection.

(9) There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subsection for fiscal years beginning after September 30, 1985, and ending before October 1, 1989.

(c)(1) The President shall invite the Government of Canada to join in the formation of an international advisory group whose duty it shall be (A) to develop a bilateral program for improving navigation, through a coordinated strategy, on the Great Lakes, and (B) to conduct investigations on a continuing basis and make recommendations for a system-wide navigation improvement program to facilitate optimum use of the Great Lakes. The advisory group shall be composed of five members representing the United States, five members representing Canada, and two members from the International Joint Commission established by the treaty between the United States and Great Britain relating to boundary waters between the United States and Canada, signed at Washington, January 11, 1909 (36 Stat. 2448). The five members representing the United States shall include the Secretary of State, one member of the Great

Lakes Commodities Marketing Board (as designated by the Board), and three individuals appointed by the President representing commercial, shipping, and environmental interests, respectively.

(2) The United States representatives to the international advisory group shall serve without pay and the United States representatives to the advisory group who are full time officers or employees of the United States shall receive no additional pay by reason of their service on the advisory group, except that the United States representatives shall be allowed travel or transportation expenses under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular place of business and engaged in the actual performance of duties vested in the advisory group.

(3) The international advisory group established by this subsection shall report to Congress and to the Canadian Parliament on its progress in carrying out the duties set forth in this subsection not later than one year after the formation of such group and biennially thereafter.

(d) The Secretary and the Administrator of the Environmental Protection Agency, in cooperation with the Secretary of the Interior, the Administrator of the National Oceanic and Atmospheric Administration, and other appropriate Federal and non-Federal entities, shall carry out a review of the environmental, economic, and social impacts of navigation in the United States portion of the Great Lakes. In carrying out such review, the Secretary and the Administrator shall use existing research, studies, and investigations relating to such impacts to the maximum extent possible. Special emphasis shall be made in such review of the impacts of navigation on the shoreline and on fish and wildlife habitat, including, but not limited to, impacts associated with resuspension of bottom sediment. The Secretary and the Administrator shall submit to Congress an interim report of such review not later than September 30, 1987, and a final report of such review along with recommendations not later than September 30, 1989.

SEC. 1124. In the case of any water resources project which is authorized to be constructed by the Secretary before, on, or after the date of enactment of this Act, construction of which has not commenced before such date of enactment, and which involves the acquisition of lands or interests in lands for the mitigation of fish and wildlife losses attributable to the project or for fish and wildlife enhancement, such lands or interests (1) shall be acquired before any construction of the project (other than such acquisition) commences, or (2) shall be acquired along with the acquisition of lands and interests in lands for project purposes (other than mitigation of fish and wildlife losses or enhancement of fish and wildlife), whichever the Secretary determines is appropriate.

SEC. 1125. In the case of any water resources project which is authorized to be constructed by the Secretary before, on, or after the date of enactment of this Act, construction of which has not commenced before such date of enactment, and which involves the acquisition of lands or interests in lands for recreation purposes, such lands or interests shall be acquired along with the acquisition of lands and interests in lands for other project purposes.

SEC. 1126. The Secretary shall not require, under section 4 of the Flood Control Act of December 22, 1944 (58 Stat. 889), and the Federal Water Project Recreation Act, non-Federal interests to assume operation and maintenance of any recreational facility operated by the Secretary at any water resources project as a condition to the construction of new recreational facilities at such project or any other water resources project.

SEC. 1127. The Secretary shall establish in the Directorate of Civil Works of the Office of the Chief of Engineers an Office of Environmental Policy. Such Office shall be responsible for the formulation, coordination, and implementation of all matters concerning environmental quality and policy as they relate to the water resources program of the United States Army Corps of Engineers. Such Office shall, among other things, develop, and monitor compliance with, guidelines for the consideration of environmental quality in formulation and planning of water resources projects carried out by the Secretary, the preparation and coordination of environmental impact statements for such projects, and the coordination with Federal, State, and local agencies of environmental aspects of such projects and regulatory responsibilities of the Secretary.

SEC. 1128. (a) Section 4 of the Act entitled "An Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved March 4, 1915 (38 Stat. 1053; 33 U.S.C. 560), is amended by adding at the end thereof the following: "No funds may be accepted or expended under this section unless such acceptance and expenditure has been specifically authorized for that project by law.".

(b) The proviso in section 5 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes" approved June 22, 1936 (33 U.S.C. 701h), is amended by inserting after "as advantageous in the public interest," the following: "except that no such funds may be accepted or expended unless such acceptance and expenditure has been specifically authorized for that project by law,".

SEC. 1129. In addition to amounts authorized to be appropriated to carry out agreements entered into with the State of Illinois pursuant to section 110 of the River and Harbor Act of 1958 relating to the repair and modification of the Illinois and Mississippi Canal, there is authorized to be appropriated to the Secretary not to exceed $15,000,000 to carry out such agreements.

SEC. 1130. For purposes of analyzing the costs and benefits of any project recommended by the Secretary as a result of any study on the Pearl River Basin, Mississippi and Louisiana, authorized by resolution of the Committee on Environment and Public Works of the Senate, or the Committee on Public Works and Transportation of the House of Representatives, adopted before the date of enactment of this Act, the Secretary shall take into account the costs and benefits of any measures undertaken by the Secretary pursuant to any provision of law (other than any provision of this Act) enacted after July 1, 1983, and before December 31, 1986, in the interest of preventing flood damages along the Pearl River in the vicinity of Jackson, Mississippi.

SEC. 1131. The prohibitions and provisions for review and approval of activities in waters of the United States as set forth in sections 9, 10, and 13 of the Act of March 3, 1899 (30 Stat. 1151), the first section of the Act of June 13, 1902 (32 Stat. 371), and section 404 of the Federal Water Pollution Control Act shall not apply to any works or improvements constructed or maintained now or in the future in the Great Miami River Basin, the Great Miami River, and the tributaries of the Great Miami River above river mile 7.5, by any political subdivision established pursuant to chapter 6101, Ohio Revised Code, as in effect on July 1, 1983.

SEC. 1132. Any project authorized for construction by this Act shall not be authorized after the last day of the five-year period beginning on the date of enactment of this Act unless during such period funds have been obligated for construction, including planning and designing, of such project.

SEC. 1133. (a) On and after December 31, 1989, the Secretary shall continue in effect any lease or assignment thereof to which this section applies, until such time as such lease is terminated by the leaseholder, any successors or assigns of the leaseholder, or by the Secretary under subsection (b) of this section. Any such continuation beyond the date of expiration of such lease as in effect on December 31, 1989, shall be at fair market rentals and on such other reasonable terms and conditions not inconsistent with this section as the Secretary deems necessary. No continuation shall be made beyond such date unless the leaseholder agrees to hold the United States harmless from any claim for damages or injury to persons or property arising from occupancy of or through the use of the property subject to such lease.

(b)(1) On and after December 31, 1989, the Secretary and any other officer or employee of the United States shall not terminate a lease to which this section applies, except as provided in paragraph (2) of this subsection.

(2) On and after December 31, 1989, the Secretary may terminate a lease to which this section applies only if—

(A) the property covered by the lease is needed for immediate use for public park purposes or other higher public use or for a navigation or flood control project; or

(B) the leaseholder substantially violates a provision of such lease.

(c) Subsections (a) and (b) of this section apply to (1) any cottage site lease of property, which lease was entered into by the Secretary of the Army pursuant to section 4 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved December 22, 1944 (58 Stat. 889; 16 U.S.C. 460d), and is in effect on December 31, 1989, and (2) any assignment of such a lease.

(d) On and after December 31, 1989, no houseboat, floating cabin, marina (including any with sleeping facilities), or lawfully installed dock or cabin and appurtenant structures shall be required to be removed from any Federal water resources reservoir or lake project administered by the Secretary on which it was located on the date of enactment of this Act, if such property is maintained in usable condition, and, in the judgment of the Secretary, does not occasion a threat to life or property, except where necessary for immediate use for public purposes or other higher public use or for a navigation of flood control project.

SEC. 1134. In the construction of any water resources project, the Secretary is authorized to make only such modifications—

(1) as reflect changes in construction costs (including costs of real property acquisitions, preconstruction studies, planning, and

engineering and design), as are indicated by engineering and other appropriate cost indexes;

(2) as do not materially alter the scope or functions of the project; or

(3) as are the result of additional studies, modifications, or other actions (including mitigation and other environmental actions) authorized by this Act or any other law enacted before, on, or after the date of enactment of this Act.

SEC. 1134. (a) The Secretary is authorized to review the operation of water resources projects constructed by the Secretary before the date of enactment of this Act to determine the need for modifications in the structures and operations of such projects for the purpose of improving the quality of the environment in the public interest.

(b) The Secretary is authorized to carry out a demonstration program in the two-year period beginning on the date of enactment of this Act for the purpose of making such modifications in the structures and operations of water resources projects constructed by the Secretary before the date of enactment of this Act which the Secretary determines (1) are feasible and consistent with the authorized project purposes, and (2) will improve the quality of the environment in the public interest.

(c) The Secretary shall coordinate any actions taken pursuant to this section with appropriate Federal, State, and local agencies.

(d) Not later than two years after the date of enactment of this Act, the Secretary shall transmit to Congress a report on the results of the review conducted under subsection (a) and on the demonstration program conducted under subsection (b). Such report shall contain any recommendations of the Secretary concerning modification and extension of such program.

(e) There is authorized to be appropriated not to exceed $25,000,000 to carry out this section.

SEC. 1136. (a)(1) The Secretary is authorized to reimburse the State of New York for 50 percent of the costs of maintaining and operating the New York State Barge Canal, if the work involved is in accordance with an agreement between the Secretary and the State of New York. The State of New York shall continue to own and operate such canal.

(2) The Secretary is authorized to reimburse the State of New York for 50 percent of the cost of reconstructing and rehabilitating the New York State Barge Canal for navigation, flood control, water supply, irrigation, power, recreational, historic, and environmental purposes in accordance with the recommendations of the Secretary in the report transmitted under subsection (b) and in accordance with an agreement between the Secretary and the State of New York.

(b) The Secretary shall, in cooperation with the State of New York, study the need for reconstruction and rehabilitation of the New York State Barge Canal for navigation, flood control, water supply, irrigation, power, recreational, historic, and environmental purposes. Not later than two years after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report of such study, along with recommendations of the Secretary for reconstruction and rehabilitation of such canal. No appropriation shall be made for any rehabilitation and reconstruction authorized by subsection (a), if such reconstruction and rehabilitation have not been approved by resolution adopted by each such committee.

(c) For purposes of this section, the term "New York State Barge Canal" means—

(1) the Erie Canal, which connects the Hudson River at Waterford with the Niagara River at Tonawanda;

(2) the Oswego Canal, which connects the Erie Canal at Three Rivers with Lake Ontario at Oswego;

(3) the Champlain Canal, which connects the easterly end of the Erie Canal at Waterford with Lake Champlain at Whitehall; and

(4) the Cayuga and Seneca Canals, which connect the Erie Canal at a point near Montezuma with Cayuga and Seneca Lakes and through Cayuga Lake and Ithaca and through Seneca Lake with Montour Falls.

SEC. 1137. (a) The Secretary is hereby authorized to develop and implement a flood warning system for the Whitewater River, San Bernadino and Riverside Counties, California, at an estimated cost of $300,000.

(b) Prior to installation, local interest shall agree to operate and maintain the system authorized by subsection (a), and develop, maintain, and implement emergency evacuation plans satisfactory to the Secretary.

SEC. 1138. (a) In constructing any water resources project in a labor market area which has a high unemployment rate, the Secretary shall, to the extent he determines feasible, provide for the employment of residents of such labor market area.

(b) Not later than ninety days after the President or any other official of the executive branch requests the appropriation of initial funds for any water resources project, the Secretary shall transmit to Congress current information on the potential benefits of the project which are attributable to the employment of unemployed residents of the labor market area in which the project is located.

(c) For purposes of this section—

(1) The term "labor market area" shall have the meaning given such term by the Secretary of Labor.

(2) A labor market area has a high rate of unemployment if the average rate of unemployment for such area, as determined by the Secretary of Labor, over the most recent twelve-month period for which statistics are available is higher than the national average rate of unemployment, as determined by the Secretary of Labor, over such twelve-month period.

SEC. 1139. Notwithstanding section 5901(a) of title 5, United States Code, the uniform allowance for uniformed civilian employees of the United States Army Corps of Engineers may be up to $400 annually.

SEC. 1140. Section 145 of the Water Resources Development Act of 1976 is amended by inserting "by such State of 50 percent" after "upon payment".

SEC. 1141. The Secretary shall amend the contract between the State of Illinois and the United States for use of storage space for water supply in Rend Lake on the Big Muddy River in Illinois to relieve the State of Illinois of the requirement to make annual payments for that portion of the maintenance and operation costs applicable to future water supply storage as is consistent with the Water Supply Act of 1958 (Public Law 85-500), until such time and in such proportion as the storage is used for water supply purposes.

SEC. 1142. After an agreement for the sale by the Southern California Water Company to the city of Hawaiian Gardens, California, of the water supply system which serves such city is entered into, the Secretary shall make a loan to such city to pay the cost of acquisition and rehabilitation of such system at an estimated cost of $8,500,000. Such city shall repay the cost of such acquisition and rehabilitation to the Secretary in accordance with the Water Supply Act of 1958.

SEC. 1143. The Secretary shall procure by contract not less than 30 percent of architectural and engineering services required for the design and construction of water resources projects undertaken by the Secretary.

SEC. 1144. Any surveying or mapping services to be performed in connection with a water resources project which is or has been authorized to be undertaken by the Secretary shall be procured in accordance with title IX of the Federal Property and Administrative Services Act of 1949.

SEC. 1145. (a) The California Debris Commission established by the first section of the Act of March 1, 1893 (33 U.S.C. 661) is hereby abolished.

(b) All authorities, powers, functions, and duties of the California Debris Commission are hereby transferred to the Secretary.

(c) The assets, liabilities, contracts, property, records, and the unexpended balance of appropriations, authorizations, allocations, and other funds employed, held, used arising from, available to, or to be made available in connection with the authorities, powers, functions, and duties transferred by this section, subject to section 202 of the Budget and Accounting Procedure Act of 1950, are hereby transferred to the Secretary for appropriate allocation. Unexpended funds transferred pursuant to this subsection shall be used only for the purposes for which the funds were originally authorized and appropriated.

(d) All acquired lands, and other interests therein presently under the jurisdiction of the California Debris Commission are hereby authorized to be retained, and shall be administered under the direction of the Secretary, who is hereby authorized to take such actions as are necessary to consolidate and perfect title; to exchange for other lands or interests therein which may be required for recreation or for existing or proposed projects of the United States; to transfer to other Federal agencies or dispose of as surplus property; and to release to the coextensive fee owners any easements no longer required by the United States, under such conditions or for such consideration as the Secretary shall determine to be fair and reasonable. Except as specifically provided herein all transactions will be in accordance with existing laws and procedures.

SEC. 1146. Section 5(a) of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved August 18, 1941 (33 U.S.C. 701n), is amended by striking out "drinking" each place it appears in the second sentence and by inserting after the first sentence the following new sentence: "In any case in which the Chief of Engineers is otherwise performing work under this section in an area for which the Governor of the affected State has requested a determination that an emergency exists or a declaration that a major disaster exists under the Disaster Relief Act of 1974, the Chief of Engineers is further authorized to perform on public and private lands and waters for a period of ten

days following the Governor's request any emergency work made necessary by such emergency or disaster which is essential for the preservation of life and property, including, but not limited to, channel clearance, emergency shore protection, clearance and removal of debris and wreckage endangering public health and safety, and temporary restoration of essential public facilities and services.".

SEC. 1147. Section 156 of the Water Resources Development Act of 1976 (90 Stat. 2933) is amended by striking out "fifteenth" and inserting in lieu thereof "fiftieth".

SEC. 1148. (a) Section 205 of the Flood Control Act of 1948 (33 U.S.C. 701s) is amended by striking out "$30,000,000" in the first sentence and inserting in lieu thereof "$50,000,000" and by striking out "$4,000,000" in the third sentence and inserting in lieu thereof "$7,500,000". Such section is further amended by adding at the end thereof the following new sentence: "Section 302 of the Water Resources, Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985, relating to non-Federal share, acquisition of lands, easements, and rights-of-way, and relocations of utilities, structures, and other improvements, shall apply to projects under this section.".

(b) Section 2 of the Flood Control Act of August 28, 1937 (33 U.S.C. 701g) is amended by striking out "$5,000,000" and inserting in lieu thereof "$10,000,000" and by striking out "$250,000" and inserting in lieu thereof "$750,000".

(c) Section 14 of the Flood Control Act of 1946 (33 U.S.C. 701r) is amended by striking out "$10,000,000" and inserting in lieu thereof "$15,000,000" and by striking out "$250,000" and inserting in lieu thereof "$750,000".

(d) Subsection (a) of section 107 of the River and Harbor Act of 1960 (33 U.S.C. 577) is amended by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000". Subsection (b) of such section is amended by striking out "$2,000,000" and inserting in lieu thereof "$4,000,000".

(e) Section 3 of the Act entitled "An Act authorizing Federal participation in the cost of protecting the shores of publicly owned property", approved August 13, 1946 (33 U.S.C. 426g), is amended (1) by striking out "$25,000,000" and inserting in lieu thereof "$30,000,000", and (2) by striking out "$1,000,000" and inserting in lieu thereof "$3,000,000".

(f) Section 111 of the River and Harbor Act of 1968 (33 U.S.C. 426i) is amended by striking out "$1,000,000" and inserting in lieu thereof "$3,000,000".

(g) Section 3 of the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works or rivers and harbors, and for other purposes", approved March 2, 1945 (33 U.S.C. 603a), is amended by striking out "$300,000" and inserting in lieu thereof "$4,000,000".

(h) The Secretary is authorized to use the authority contained in section 205 of the Flood Control Act of 1948 (33 U.S.C. 701s), section 2 of the Flood Control Act of August 28, 1937 (33 U.S.C. 701g), section 14 of the Flood Control Act of 1946 (33 U.S.C. 701r), section 107 of the River and Harbor Act of 1960 (33 U.S.C. 577), section 3 of the Act entitled "An Act authorizing Federal participation in the cost of protecting the shores of publicly owned property", approved August 13, 1946 (33 U.S.C. 426g), and section 111 of the River and Harbor At of 1968 (33 U.S.C. 426i) in the Trust Territory of the Pacific Islands.

(i) The amendments made by this section shall not apply to any project under contract for construction on the date of enactment of this Act.

SEC. 1149. The Secretary shall expedite completion of the study of a new lock parallel to the existing Poe Lock being undertaken as part of the study of additional locks on the Saint Lawrence Seaway and shall submit to the Congress a report on such additional lock not later than September 30, 1986.

SEC. 1150. (a) After the Chief of Engineers transmits his recommendations for a water resources development project to the Secretary of the Army for transmittal to the Congress, as authorized in the first section of the Act of December 22, 1944, and before authorization for construction of such project, the Chief of Engineers is authorized to undertake continued planning and engineering (other than preparation of plans and specifications) for such project if the Chief of Engineers finds that the project is without substantial controversy and justifies further engineering, economic, and environmental investigations and the Chief of Engineers transmits to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a statement of such findings. In the two-year period after authorization for construction of such project, the Chief of Engineers is authorized to undertake planning, engineering, and design for such project.

(b) Not later than January 15, 1986, and each January 15 thereafter, the Secretary shall prepare and transmit a report on the activities undertaken under this section in the preceding fiscal year to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(c) There is authorized to carry out this section not to exceed $20,000,000 per fiscal year for each of the fiscal years 1986 and 1987.

(d) The authorizations made by this section shall be in addition to any other authorizations for planning, engineering, and design of water resources development projects and shall not be construed as a limitation on any such other authorization.

SEC. 1151. The Secretary shall reevaluate the feasibility of the Elk Creek Lake feature of the project for the Rogue River, Oregon and California, authorized by the Flood Control Act of 1962 (76 Stat. 1192), including an evaluation of the feasibility of adding hydroelectric power as a project purpose. The evaluation and justification of the Elk Creek Lake feature shall be based on the benefits and costs of all features of the project for the Rogue River. Hydroelectric power shall be added as a project purpose if the Secretary determines that such addition will increase the amount by which total economic benefits of the project exceed total economic costs. In reviewing the economic feasibility of such project, the Secretary shall use the rate of interest that applied at the time such project was authorized.

SEC. 1152. In recommending funding for construction of water resources projects, the Secretary shall not give priority to any project for which the non-Federal interests agree to provide a greater non-Federal share than is required by the law authorizing such project.

SEC. 1153. The Secretary shall study and evaluate the measures necessary to increase the capabilities of the United States Army Corps of Engineers to undertake the planning and construction of water resources projects on an expedited basis and to adequately comply with all requirements of law applicable to the water resources program of the Corps of Engineers. The Secretary shall implement such measures as may be necessary to improve such capabilities, including the establishment of increased levels of personnel, changes in project planning and construction procedures designed to lessen the time required for such planning and construction, and procedures for expediting the coordination of water resources projects with Federal, State, and local agencies.

SEC. 1154. Not later than January 15, 1987, and each January 15 thereafter, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report which—

(1) specifies the amount of electricity generated by each water resource project constructed by the Secretary which generated electricity in the preceding fiscal year;

(2) specifies the revenues received by the United States from the sale of electricity generated by such project; and

(3) specifies the costs of construction, operation, and maintenance of such project allocated to the generation of electricity.

The first report submitted under this section shall specify the amounts of electricity generated, the revenues received, and the costs allocated for each such project before October 1, 1985, on a fiscal year basis. Each report thereafter shall specify the amounts of electricity generated, the revenues received, and the costs allocated for each such project for the preceding fiscal year.

SEC. 1155. Notwithstanding any other provision of law, Federal assistance made available by the Farmers Home Administration to any political subdivision of a State may be used to provide the non-Federal share of the cost of any construction project carried out under section 201 of the Federal Water Pollution Control Act.

SEC. 1156. (a) The President may appoint a regular officer of any of the Armed Forces who is serving on active duty as the Federal Commissioner of the Red River Compact Commission.

(b) Notwithstanding any other provision of law, acceptance by a regular officer of any of the Armed Forces of an appointment as the Federal Commissioner of the Red River Compact Commission, or the exercise of the functions of the Federal Commissioner and chairman of such Commission, by such officer shall not terminate or otherwise affect such officer's appointment as a military officer.

SEC. 1157. The Secretary shall undertake such measures as are necessary to ensure that standard and uniform procedures and practices are followed by each district office (and each division office for any area in which there is no district office) of the United States Army Corps of Engineers in the preparation of feasibility reports on water resources projects.

SEC. 1158. The first proviso of section 4 of the River and Harbor Act approved July 5, 1884 (23 Stat. 147), as amended by section 6 of the River and Harbor Act, approved March 3, 1909 (33 U.S.C. 5), is amended to read as follows: "*Provided*, That whenever, as determined by the Secretary, the condition of any of the aforesaid works is such

that its reconstruction is essential to its efficient and economical maintenance and operation, the reconstruction thereof may include such modifications in plan and location as may be necessary to provide adequate facilities for navigation. No appropriation shall be made for the acquisition of any interest in real property for, or the actual construction of, any such reconstruction if such acquisition and actual construction have not been approved by resolution of the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives:".

SEC. 1159. (a) In the preparation of feasibility reports for projects for flood damage prevention in urban and rural areas, the Secretary shall consider and evaluate measures to reduce or eliminate damages from flooding without regard to frequency of flooding, drainage area, and amount of runoff.

(b) The provisions of section 302 of this Act shall apply to all measures authorized after the date of enactment of this Act to reduce or eliminate damages from flooding in urban and rural areas.

SEC. 1160. The Secretary is authorized to construct and improve facilities at the Niagara Frontier Transportation Authority, Port of Buffalo, including the construction of covered bulk storage facilities, additional paved wharf area, bulkheading up to a total length of 1,000 feet sufficient to facilitate a 1,000-foot class X vessel or a 730-foot class VII vessel, and other projects consistent with implementation of the master plan for the Port of Buffalo, at an estimated cost of $7,000,000.

SEC. 1161. The Secretary is authorized to construct and maintain a navigation channel 9 feet deep and 100 feet wide from the mouth of the Beaver River at Bridgewater, Pennsylvania, a distance of approximately three miles upriver, to the dam at New Brighton, at an estimated cost of $700,000. Prior to initiation of construction of the project, non-Federal interests shall agree to pay one-half of the costs of construction of the project attributable to recreational boating.

SEC. 1162. Section 1114 of title 18, United States Code, is amended by inserting "or any uniformed civilian official or uniformed civilian employee of the Corps of Engineers of the Department of the Army assigned to perform investigations, inspections, or law or regulatory enforcement functions in connection with civil activities of the Department of the Army," immediately after "Foreign Service,".

SEC. 1163. The Secretary, in consultation with appropriate Federal, State, and local agencies, is authorized to plan, design, and construct a demonstration project for the recharge of groundwater in the drainage basin of the Tucson, Arizona, metropolitan area, at an estimated cost of $2,500,000.

SEC. 1164. (a) The Secretary is authorized, for the period ending January 1, 1989, with the concurrence of the Director of the National Park Service and the South Florida Water Management District, to modify the schedule for delivery of water from the central and southern Florida project to the Everglades National Park required by section 2 of the River Basin Monetary Authorization and Miscellaneous Civil Works Amendments Act of 1970 (Public Law 91-282) and to conduct an experimental program for the delivery of water to the Everglades National Park from such project for the purpose of determining an improved schedule for such delivery.

(b) The Secretary is further authorized to acquire such interests in lands currently in agricultural production which are adversely affected by any modification of the schedule for water delivery to Everglades National Park under subsection (a). The Secretary shall acquire any interest in land at the fair market value of such interest based on conditions existing after the construction of the project described in subsection (a) and before any modification of such delivery schedule. The Secretary is also authorized to construct necessary flood protection measures for protection of homes in the area affected by any modification of such delivery schedule, at an estimated cost of $10,000,000.

SEC. 1165. The Secretary is authorized and directed to undertake such emergency bank stabilization measures as are necessary to protect bridges on Elm Creek in the vicinity of Decatur, Nebraska, at an estimated cost of $500,000.

SEC. 1166. Section 221(a) of the Flood Control Act of 1970 is amended by adding at the end thereof the following: "In any such agreement entered into by a State, such State may make the furnishing of all or any portion of its required cooperation contingent upon the appropriation by the State of necessary funds for that purpose.".

SEC. 1167. The Secretary is authorized and directed to improve public access to, and lessen a health and safety hazard at, Pearson-Skubitz Big Hill Lake, Kansas, by upgrading existing roads to the extent feasible and acquiring additional rights-of-way and constructing new roads as required, at an estimated cost of $4,780,000.

SEC. 1168. The Secretary is authorized to contract with existing, nonprofit economic development organizations to assist in the preparation of projects as provided in sections 804(a) and 851(b) and to undertake such actions as may be necessary to identify and stimulate the long-term economic development envisioned as the result of projects which serve remote rural areas or in areas where such are justified because of economic reasons.

SEC. 1169. (a) The first sentence of the paragraph under the center heading "ARKANSAS AND RED RIVERS" in section 203 of the Flood Control Act of 1966, as amended, is amended by striking out "$46,400,000" and inserting in lieu thereof "$177,600,000".

(b) Section 201 of the Flood Control Act of 1970, as amended by section 153 of the Water Resources Development Act of 1976, is amended by striking out the last sentence under the center heading "ARKANSAS-RED RIVER BASIN" and adding the following: "No funds shall be appropriated or expended under authority granted in the Flood Control Act of 1966, as amended, for construction of chloride control projects within the Arkansas River Basin. The chloride control projects for the Red River Basin and the Arkansas River Basin shall be considered to be separate projects, with separate authority.".

(c) The Secretary is authorized to conduct a restudy of the Arkansas River chloride control project to determine its economic feasibility and report the findings of such study to Congress.

SEC. 1170. In order to assure the most economical and cost-saving construction of water resources projects authorized before, on, or after the date of enactment of this Act, the Secretary shall require a value engineering review during design for each water resources project authorized before, on, or after such date of enactment which has an estimated cost in excess of $10,000,000. For purposes of this section, the term "value engineering review" means a specialized cost control technique which uses a systematic and creative approach to identify and to focus on unnecessarily high costs in a project in order to arrive at a cost saving without sacrificing the reliability or efficiency of the project.

SEC. 1171. (a) Except as provided in subsection (b), the appropriate non-Federal interests shall provide the necessary lands, easements, and rights-of-way for any water resources demonstration project authorized by this Act or by any Act enacted after the date of enactment of this Act. If the value of the lands, easements, and rights-of-way so provided is less than 10 percent of the cost of the project (including the value of such lands, easements, and rights-of-way), the non-Federal interests shall pay to the Secretary over a 15-year period an amount equal to the excess of (1) the amount equal to 10 percent of such cost, over (2) the value of such lands, easements, and rights-of-way.

(b) If the Secretary estimates before the beginning of construction of any project to which subsection (a) applies that the value of all lands, easements, and rights-of-way required for such project will be a percentage of the cost of the project which is greater than 10 percent, the Secretary shall, upon request by the non-Federal interests, acquire such lands, easements, and rights-of-way, except that the aggregate amount of the value of lands, easements, and rights-of-way acquired by the Secretary shall be limited to the amount by which such estimated value exceeds 10 percent of the estimated cost of the project.

SEC. 1172. (a) Beginning October 1, 1985, the Secretary, in cooperation with the State of Illinois, shall carry out measurements and make necessary computations required by the decree of the United States Supreme Court (388 U.S. 426) relating to the diversion of water from Lake Michigan and shall coordinate the results with downstate interests. The measurements and computations shall consist of all flow measurements, gauge records, hydraulic and hydrologic computations, including periodic field investigations and measuring device calibrations, necessary to compute the amount of water diverted from Lake Michigan by the State of Illinois and its municipalities, political subdivisions, agencies, and instrumentalities, not including water diverted or used by Federal installations.

(b) There are authorized to be appropriated such sums as may be necessary for fiscal years beginning after September 30, 1985, to carry out this section, including those funds necessary to maintain the measurements and computations, as well as necessary capital construction costs associated with the installation of new flow measurement devices or structures declared necessary and appropriate by the Secretary.

SEC. 1173. Notwithstanding any other provision of this Act and any other provision of law, the total amount which may be appropriated from the general fund of the Treasury for construction of water resources projects by the Secretary shall not exceed $1,500,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, and September 30, 1987, and $1,600,000,000 per fiscal year for each of the fiscal years ending September 30, 1988, September 30, 1989, and September 30, 1990.

SEC. 1174. Section 22(b) of the Water Resources Development Act of 1974 is amended—

(1) by striking out "$4,000,000" and inserting in lieu thereof "$10,000,000"; and

(2) by striking out "$200,000" and inserting in lieu thereof "$500,000".

SEC. 1175. The Secretary is authorized and directed to remove the Berkeley Pier, which extends into San Francisco Bay, California, approximately 12,000 feet, at an estimated cost of $1,050,000.

SEC. 1176. (a) The Secretary is authorized to implement a program of research in order to demonstrate the cropland irrigation and conservation techniques described in the report issued by the New England Division Engineer, dated May 1980, for the Saint John River Basin, Maine.

(b) For the purposes of this section, there is authorized to be appropriated to the Secretary the sums of $1,825,000 for the fiscal year ending September 30, 1986, $820,000 for the fiscal year ending September 30, 1987, and $785,000 for the fiscal year ending September 30, 1988, such sums to remain available until expended.

SEC. 1177. The Secretary is authorized to construct a seawall from the canneries in the village of Atu'u, Ma'oputasi County, to Breakers Point near the village of Tafananai, Sua County, Western Tutuila Island, American Samoa, at an estimated cost of $1,200,000.

SEC. 1178. The Secretary is authorized to rehabilitate the fuel dock adjacent to the Rainmaker Hotel between the villages of Utulei and Fagatogo in Ma'oputasi County, Eastern Tutuila Island, American Samoa, at an estimated cost of $350,000.

SEC. 1179. Section 215(a) of the Flood Control Act of 1968 is amended by striking out "$1,000,000" and inserting in lieu thereof "$5,000,000".

SEC. 1180. Notwithstanding any other provision of law, in any case in which the use of fill material for beach erosion and beach nourishment is authorized as a purpose of an authorized water resources project, the Secretary is authorized to acquire by purchase, exchange, or otherwise from nondomestic sources and utilize such material for such purposes if such materials are not available from domestic sources for environmental or economic reasons.

SEC. 1181. The Secretary, the Director of the Federal Emergency Management Agency, and the Administrator of the Soil Conservation Service shall take necessary actions, including the posting and distribution of information and the preparation and distribution of educational materials and programs, to ensure that information relating to flood hazard areas is generally available to the public.

SEC. 1182. The Secretary is authorized to accept funds from any entity, public or private, in accordance with the Pacific Northwest Electric Power Planning and Conservation Act to be used to protect, mitigate, and enhance fish and wildlife in connection with projects constructed or operated by the Secretary. The Secretary may accept and use funds for such purposes without regard to any limitation established under any other provision of law or rule of law.

SEC. 1183. (a) The Secretary may require compliance with any requirements pertaining to cooperation by non-Federal interests in carrying out any water resources project authorized before, on, or after the date of enactment of this Act.

(b) Whenever on the basis of any information available to the Secretary, the Secretary finds that any non-Federal interest is not providing any cooperation required under subsection (a), the Secretary shall issue an order requiring such non-Federal interest to provide such cooperation. After notice and opportunity for a hearing, if the Secretary finds that any person is violating an order issued under this section, such person shall be subject to a civil penalty not to exceed $10,000 per day of such violation, except that the total amount of civil penalties for any violation shall not exceed $50,000.

(c) The Secretary may request the Attorney General to bring a civil action for appropriate relief, including permanent or temporary injunction, for any violation of an order issued under this section, to collect a civil penalty imposed under this section, or to recover any cost incurred by the Secretary in undertaking performance of any item of cooperation under section 221(d) of the Flood Control Act of 1970. Any action under this subsection may be brought in the district court of the United States for the district in which the defendant is located or resides, or is doing business, and such court shall have jurisdiction to restrain such violation, to require compliance, to require payment of any civil penalty imposed under this section, and to require payment of any costs incurred by the Secretary in undertaking performance of any such item.

SEC. 1184. (a) In recognition of the serious impacts that are expected to occur to the Great Lakes environment as a result of a projected fivefold increase in consumption of Great Lakes water, including loss of wetlands and reduction of fish spawning and habitat areas, as well as serious economic losses to vital Great Lakes industries, and in recognition of the national goal to provide environmental protection and preservation of our natural resources while allowing for continued economic growth, the Administrator of the Environmental Protection Agency, in cooperation with other interested departments, agencies, and instrumentalities of the United States and the eight Great Lakes States and their political subdivisions, is authorized to conduct a study of control measures which can be implemented to reduce the quantity of Great Lakes water consumed without adversely affecting projected economic growth of the Great Lakes region.

(b) The study authorized by this section shall include an analysis of both existing and new technology which is likely to be feasible in the foreseeable future and shall at a minimum include the following:

(1) a review of the methodologies used to forecast Great Lakes consumptive uses, including an analysis of the sensitivity of key variables affecting such uses;

(2) an analysis of the effect that enforcement of provisions of the Federal Water Pollution Control Act relating to thermal discharges has had on consumption of Great Lakes water;

(3) an analysis of the effect of laws, regulations, and national policy objectives on consumptive uses of Great Lakes water used in manufacturing;

(4) an analysis of the economic effects on a consuming industry and other Great Lakes interests associated with a particular consumptive use control strategy;

(5) an analysis of associated environmental impacts, both singularly and in combination with other consumptive use control strategies; and

(6) a summary discussion containing recommendations for methods of controlling consumptive uses which methods maximize benefits to the Great Lakes ecosystem and also provide for continued full economic growth for consuming industries as well as other industries which depend on the use of Great Lakes water.

(c) There is authorized to be appropriated for fiscal years beginning after September 30, 1985, $4,500,000 to carry out this section. Sums appropriated under this section shall remain available until expended.

(d) For purposes of this section, the term "Great Lakes States" means Minnesota, Wisconsin, Illinois, Ohio, Michigan, Indiana, Pennsylvania, and New York.

SEC. 1185. (a) The Congress finds and declares that—

(1) the Great Lakes are a most important natural resource to the eight Great Lakes States and two Canadian provinces, providing water supply for domestic and industrial use, clean energy through hydropower production, an efficient transportation mode for moving products into and out of the Great Lakes region, and recreational uses for millions of United States and Canadian citizens;

(2) the Great Lakes need to be carefully managed and protected to meet current and future needs within the Great Lakes States and Canadian provinces;

(3) any new diversions of Great Lakes water for use outside of a Great Lakes State will have significant economic and environmental impacts, adversely affecting the use of this resource by the Great Lakes States and Canadian provinces; and

(4) four of the Great Lakes are international waters and are defined as boundary waters in the Boundary Waters Treaty of 1909 between the United States and Canada, and as such any new diversion of Great Lakes water in the United States would affect the relations of the Government of the United States with the Government of Canada.

(b) It is therefore declared to be the purpose and policy of the Congress in this section—

(1) to take immediate action to protect the limited quantity of water available from the Great Lakes system for use by the Great Lakes States and in accordance with the Boundary Waters Treaty of 1909;

(2) to prohibit any diversion of Great Lakes water by any State, Federal agency, or private entity for use outside of a Great Lakes State unless such diversion is approved by the Governor of each of the Great Lakes States; and

(3) to prohibit any Federal agency from undertaking any studies that would involve the transfer of Great Lakes water for any purpose for use outside of a Great Lakes State.

(c) As used in this section, the term "Great Lakes State" means each of the States of Illinois, Indiana, Michigan, Minnesota, Ohio, Pennsylvania, New York, and Wisconsin.

(d) No water shall be diverted from any portion of the Great Lakes within the United States, or from any tributary within the United States of any of the Great Lakes, for use outside of a Great Lakes State unless such diversion is approved by the Governor of each of the Great Lake States.

(e) No Federal agency may undertake any study, or expend any Federal funds to contract for any study, of the feasibility of diverting water from any portion of the Great Lakes within the United States, or from any tributary within the United States of any of the Great Lakes, for use outside of a Great Lakes State, unless such study or expenditure is approved by the Governor of each of

the Great Lakes States. The prohibition of the preceding sentence shall not apply to any study or data collection effort performed by the Corps of Engineers or other Federal agency under the direction of the International Joint Commission in accordance with the Boundary Waters Treaty of 1909.

SEC. 1186. (a) Subject to the provisions of this section, the Secretary, in consultation with the Administrator of the Environmental Protection Agency, is authorized to take such action as may be necessary to remove and dispose of toxic pollutants from areas of the Buffalo River, New York, which contain high levels of such pollutants.

(b) No appropriation shall be made for the removal and disposal of toxic pollutants from the Buffalo River, New York, under this section if such removal and disposal have not been approved by resolution adopted by the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(c)(1) The Secretary, in consultation with the Administrator of the Environmental Protection Agency, shall conduct a study of the Buffalo River to determine which areas of such river contain high levels of toxic pollutants, to determine whether or not removal and disposal of such pollutants from such areas is economically and environmentally feasible, and to determine the most efficient and effective methods of removing such pollutants from such areas and of disposing of such pollutants after their removal.

(2) Not later than one year after the date of enactment of this Act, the Secretary shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of the study conducted under this subsection (including a list of areas identified as containing high levels of toxic pollutants), along with recommendations concerning whether or not removal and disposal of toxic pollutants from identified areas is economically and environmentally feasible and concerning methods of removing and disposing of such pollutants.

(3) There is authorized to be appropriated such sums as may be necessary to conduct the study under this subsection of this section for fiscal years beginning after September 30, 1985.

SEC. 1187. (a) Bayou Lafourche, in the State of Louisiana, between Canal Boulevard, city of Thibodaux, Parish of Lafourche, and the Southern Pacific Railroad bridge crossing the bayou, city of Thibodaux, Parish of Lafourche, is hereby declared to be a nonnavigable waterway of the United States within the meaning of the laws of the United States relating to the construction of bridges across navigable waters.

(b) The right to alter, amend, or repeal this section is hereby expressly reserved.

SEC. 1188. Section 14 of the Act of March 3, 1899 (33 U.S.C. 408), is amended by inserting "(1)" after "grant permission for" and by striking out the period at the end thereof and inserting in lieu thereof ", and (2) the alteration or permanent occupation or use of any of the aforementioned public works when in his judgment such occupation or use will not be injurious to the public interest and will not impair the usefulness of such works.".

SEC. 1189. The Secretary is authorized to acquire from willing sellers lands on which residential structures are located, which lands are subject to frequent and recurring flood damage, within the area being studied pursuant to the Passaic River Basin flood control study authorized by section 101 of the Water Resources Development Act of 1976. Lands acquired by the Secretary under this section shall be retained by the Secretary for future use in conjunction with flood protection and flood management in the Passaic River Basin. There is authorized to be appropriated $50,000,000 to carry out this section.

SEC. 1190. (a) In order to assure a fair and reasonable distribution of civil works contracts set aside for small and disadvantaged business, the Secretary shall, on a quarterly basis, transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate, a report describing the number and dollar amount of contracts awarded in each industry category or subcategory broken down by Engineer District of the Army Corps of Engineers. Such report shall include the number and dollar amount of contracts (1) set aside for small business concerns; (2) awarded to small business or small disadvantaged business concerns; (3) available for competition by qualified firms of all sizes; and (4) awarded to other than small business or small disadvantaged business concerns.

(b) For purposes of this section, the term—

(1) "contract" means any contract, or any subcontract in connection with a subcontracting plan entered into pursuant to section 8(d) of the Small Business Act, as amended (15 U.S.C. 637(d)), which is funded through appropriations made available to the Corps of Engineers-Civil; and

(2) "industry category or subcategory" means the four digit SIC category or subcategory defined by the Small Business Administration.

SEC. 1191. Notwithstanding any other provision of law, the Secretary may dispose of any vessel, and any related equipment, which is under the control of the Corps of Engineers and is used for dredging, through sale or lease to a non-domestic government as part of a Corps of Engineers technical assistance program or to a Federal or State maritime academy for training purposes, or through sale solely for scrap to non-domestic or domestic interests. Any such vessel shall not be disposed of under this section or any other provision of law for use within the United States for the purpose of dredging. Amounts collected from the sale or lease of any such vessel or equipment shall be deposited into the revolving fund authorized pursuant to the Civil Functions Appropriations Act, 1954 (33 U.S.C. 576), to be available, as provided in appropriations Acts, for the operation and maintenance of vessels under the control of the Corps of Engineers.

SEC. 1192. The Secretary is authorized and directed to construct a second lock 1,294 feet in length, 115 feet in width, and 32 feet in depth, adjacent to the existing lock at Sault Sainte Marie, Michigan, at full Federal expense and at an estimated cost of $240,000,000, in accordance with the Report of the District Engineer, dated .

SEC. 1193. (a) Notwithstanding any other provision of law, the State of California or any political subdivision thereof, or any non-Federal public body organized under the laws of the State of California, which is operating the William G. Stone Lock in Yolo County, California, under lease agreement with the Secretary may levy and collect tolls or other user fees from vessels using such lock. Such tolls or fees shall be in amounts not exceeding amounts necessary to recover the costs of operating and maintaining the William G. Stone Lock by such State, political subdivision, or public body under such lease agreement.

(b) Any lease for the operation of the William G. Stone Lock entered into by the Secretary after the date of enactment of this Act shall require the lessee to develop a plan of operation for such lock acceptable to Yolo County, California.

SEC. 1194. The Secretary is authorized to construct a water transmission line in Bristol, Tennessee, in order to provide a safe supply of water to such town, at an estimated cost of $5,000,000.

SEC. 1195. The Secretary shall—

(1) undertake a demonstration project consisting of the placement of earthen plugs at Noyes and Bull Whirl Cuts on the Umbrella Creek-Dover Creek system in the Satilla River Basin in Camden County, Georgia, for the purpose of reducing shoaling; and

(2) monitor the effect of such plugs on the estuarine tidal system for a ten-year period.

at an estimated cost of $500,000. The Secretary shall use the results of such monitoring to verify a hydrodynamic model which will allow the Secretary to reasonably predict the effects of cuts and closures in tidally-influenced estuarine systems.

SEC. 1196. The first sentence of section 108(k) of the Water Resources Development Act of 1974 is amended to read as follows: "There are authorized to be appropriated $156,600,000 to carry out the provision of this section, other than subsection (j) of this section.".

SEC. 1197. (a) The Secretary, on the recommendation of the Chief of Engineers, is authorized to permit the delivery of water from the District of Columbia water system at the Dalecarlia filtration plant, or at other points on the system, to any competent State or local authority in the Washington, District of Columbia, metropolitan area in Maryland. All of the expense of installing the connection or connections and appurtenances between the water supply systems and any subsequent changes therein shall be paid by the requesting entity, which shall also pay such charges for the use of the water as the Secretary may, from time to time in advance of delivery, determine to be reasonable. Payments shall be made at such time, and pursuant to such regulations, as the Secretary prescribes. The Secretary may revoke any permit for the use of water at any time.

(b) The Secretary is authorized to purchase water from any competent State or local authority in Maryland or Virginia that has, at the time of purchase, completed a connection with the District of Columbia water system. The Secretary is authorized to pay such charges for the use of the water as the Secretary has agreed upon in advance of delivery.

SEC. 1198. The Secretary is authorized to study measures to prevent flooding in the Thurman to Hamburg area of the Missouri River in western Fremont County, Iowa. Not later than two years after the date of the enactment of this Act, the Secretary shall submit to Congress a report on the results of such study along with recommendations for measures to prevent such flooding. Pending completion of the study the Secre-

tary shall install pumping facilities in such area, at an estimated cost of $800,000.

SEC. 1199. (a) The Secretary is authorized to design, construct, operate, and maintain a Federal project for reduction of both flood damage and navigation maintenance on the Toutle, Cowlitz, and Columbia Rivers, Washington. Specifically, the Secretary is authorized to construct a single stage retention structure near the confluence of the Toutle and Green Rivers with such design features as the Secretary determines to be advisable, including justified measures to mitigate adverse environmental impacts associated with the project; except that, based on the results of Continuation of Planning and Engineering studies, the Secretary may select and implement a staged sediment retention structure at the confluence of the Toutle and Green Rivers or dredging alternative on the Toutle, Cowlitz, and Columbia Rivers if he determines that continuing monitoring of sedimentation and further analysis of benefits and costs provide compelling and convincing new evidence to justify selection of a staged retention structure or dredging alternative.

(b) Prior to initiation of measures authorized by this section, non-Federal interests shall agree to—

(1) convey or otherwise provide to the United States, all lands, easements, and rights-of-way which the Secretary determines to be necessary for project construction and maintenance, including borrow sites for the removal of material needed for retaining works and disposal sites for the disposal of excavated material;

(2) accomplish any alteration or relocation of buildings, roads, bridges, or other structures or utilities which the Secretary determines to be necessary in connection with implementation of the project;

(3) in the event local interests are unable to comply with paragraph (1) or (2) in a timely manner, provide a cash contribution to the United States, at such times and in such amounts as the Secretary determines to be necessary to allow acquisition of the property by the United States in accordance with project construction schedules;

(4) hold and save the United States free from damage due to design, construction, operation, and maintenance of the project except damages due to the fault or negligence of the United States or its contractors;

(5) operate and maintain any federally undertaken mitigation project which the Secretary determines to be justified; and

(6) maintain all dredged material disposal sites.

(c) All items of local cooperation shall be provided at the time needed, as determined by the Secretary, and without cost to the United States; except that in the event the Secretary selects a staged sediment retention structure or dredging alternative rather than the single stage sediment retention structure, any increase this selection causes in the cost of local cooperation requirements, as determined by the Secretary, shall be reimbursed by the Federal Government.

(d) Any goods and services purchased by the United States in connection with the project authorized pursuant to this section shall not be subject to the tax imposed by Chapters 82.04, 82.08, and 82.14 of the Revised Code of Washington and made applicable to contractors of the United States pursuant to Section 82.04.190(6) of the Revised Code of Washington.

SEC. 1199A. (a) The Secretary shall disclose petroleum product information to any State taxing agency making a request under subsection (b). Such information shall be disclosed for the purpose of, and only to the extent necessary in, the administration of State tax laws.

(b) Disclosure of information under this section shall be permitted only upon written request by the head of the State taxing agency and only to the representatives of such agency designated in such written request as the individuals who are to inspect or to receive the information on behalf of such agency. Any such representative shall be an employee or legal representative of such agency.

(c)(1) Requests for the disclosure of information under this section, and such disclosure, shall be made in such manner and at such time and place as shall be prescribed by the Secretary.

(2) Information disclosed to any person under this section may be provided in the form of written documents or reproductions of such documents, or by any other mode or means which the Secretary determines necessary or appropriate. A reasonable fee may be prescribed for furnishing such information.

(3) Any reproduction of any document or other matter made in accordance with this subsection shall have the same legal status as the original, and any such reproduction shall, if properly authenticated, be admissible in evidence in any judicial or administrative proceeding as if it were the original, whether or not the original is in existence.

(d) The Secretary shall not disclose information to a State taxing agency of a State under this section unless such State has in effect provisions of law which—

(1) exempt such information from disclosure under a State law requiring agencies of the State to make information available to the public, or

(2) otherwise protect the confidentiality of the information.

Nothing in the preceding sentence shall be construed to prohibit the disclosure by an officer or employee of a State of information to another officer or employer of such State (or political subdivision of such State) to the extent necessary in the administration of State tax laws.

(e) For purposes of this section, the term—

(1) "petroleum product information" means information relating to petroleum products transported by vessel which is received by the Secretary (A) under section 11 of the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved September 22, 1922 (42 Stat. 1043; 33 U.S.C. 555), or (B) under any other legal authority; and

(2) "State taxing agency" means any State agency, body, or commission, or its legal representative, which is charged under the laws of such State with responsibility for the administration of State tax laws.

(f) Section 11 of the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved September 22, 1922 (42 Stat. 1043; 33 U.S.C. 555) is amended by striking out "$100" and inserting in lieu thereof "$500".

SEC. 1199B. (a) For any survey, planning, or design of any water resources project for the Upper St. John's River Basin, Florida, the Secretary shall give equal consideration to structural, nonstructural, and primarily nonstructural alternatives including, but not limited to, floodproofing of structures; flood plain regulation; acquisition of flood plain lands for recreational, fish and wildlife, and other public purposes; relocation; reductions in water demand; water-borne traffic scheduling; and vessel modification with a view toward formulating the most economically, socially, and environmentally acceptable means of solving the water resources problem.

(b) Subject to the provisions of subsection (c) of this section, if a nonstructural or primarily nonstructural alternative is recommended for a water resources project, non-Federal participation shall be equal to the non-Federal participation which would have been required if the most cost effective structural alternative had been recommended.

(c) Notwithstanding any other provision of law, except as provided in subsection (d) of this section, the non-Federal share of the costs for any water resources project on the Upper Saint John's River Basin shall not exceed 25 percent.

(d) Notwithstanding any other provision of law, a nonstructural or primarily nonstructural alternative shall be recommended by the Secretary for the Upper Saint John's River Basin if, in the survey, planning, or design of the water resouces project, the Secretary determines that the benefits of such alternative do not exceed its costs and if the non-Federal participant agrees to increase its share of the project costs by an amount equal to the difference between the costs and benefits of such alternative.

SEC. 1199C. The Secretary shall conduct mitigation activities recommended in the 1982 Environmental Protection Agency diagnostic feasibility study for Gorton's Pond in Warwick, Rhode Island, including the installation of retention basins, necessary dredging, disposal of dredged material, and weed harvesting and nutrient inactivation. There is authorized to be appropriated to the Secretary to carry out this section for fiscal years beginning after September 30, 1985, $730,000, to remain available until expended.

SEC. 1199D. The Secretary is authorized to construct a set of emergency gates in the conduit of the Abiquiu Dam, New Mexico, to increase the safety and enhance flood and sediment control, at full Federal expense and an estimated cost of $2,500,000.

SEC. 1199E. In order to restore and preserve the Acequia irrigation ditch systems in New Mexico and their cultural and historic values, the Secretary shall (1) undertake such measures as may be necessary to protect and restore the river diversion structures and associated canals attendant to the operations of such systems, at a Federal share of 80 percent of the cost of such measures; and, (2) study the feasibility of constructing flood storage reservoirs to enhance the overall effectiveness of the acequia water delivery system in San Miguel, Taos, Colfax, and Mora Counties in New Mexico. There are authorized to be appropriated to carry out the purposes of this section $40,000,000.

SEC. 1199F. The Secretary of Agriculture, acting through the Administrator of the Soil Conservation Service and in coordination with the Secretary, may study and conduct feasibility studies on authorizing any water resources development project—

(1) for flood prevention;

(2) for conservation, development, utilization, and disposal of water; or

(3) for conservation and proper utilization of land;

in excess of the size restrictions specified in section 2 of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1002) if the benefits of such project accrue primarily to agricultural areas. The Secretary of Agriculture shall transmit to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives a report on the results of any study conducted under the preceding sentence.

SEC. 1199G. In planning and implementing any navigation project (including maintenance thereof) on the Great Lakes and adjacent waters, the Secretary shall consult and cooperate with concerned States in selecting disposal areas for dredged material which is suitable for beach nourishment.

SEC. 1199H. (a)(1) For the multiple purposes of preserving, enhancing, interpreting, and managing the water and related land resources of an area containing unique cultural, fish and wildlife, scenic and recreational values and for the benefit and enjoyment of present and future generations and the development of healthful outdoor recreation, there is hereby established the Cross Florida National Conservation Area (hereinafter in this section referred to as the "Conservation Area").

(2) The Conservation Area shall consist of all lands and interests in lands held by the Secretary for the barge canal project referred to in subsection (b) of this section, all lands and interests in lands held by the State of Florida or the Canal Authority of such State for such project, and all lands and interests in lands held by such State or such Canal Authority and acquired pursuant to section 104 of the River and Harbor Act of 1960.

(3) Subject to the provisions of subsection (c), the State of Florida shall retain jurisdiction and responsibility over water resources planning, development, and control of the surface and ground waters pertaining to the Conservation Area, except to the extent that any uses of such water resources would be inconsistent with the purposes of this section.

(b) In order to further the purposes set forth in subsection (a)(1), the portion of the high-level lock barge canal from the Saint Johns River across Florida to the Gulf of Mexico, authorized by the Act of July 23, 1942 (56 Stat. 703), which is located between the Eureka Dam and the Inglis Dam (exclusive of such dams) is not authorized after the date this subsection becomes effective and shall not be authorized without a further Act of Congress enacted after the date this subsection becomes effective.

(c) Those portions of the barge canal project referred to in subsection (a) which are located between the Gulf of Mexico and the Inglis Dam and between the Atlantic Ocean and the Eureka Dam shall be operated and maintained by the Secretary for the purposes of navigation, recreation, fish and wildlife enhancement, and for the benefit of the economy of the region.

(d)(1) Not later than one year after the date of the enactment of this Act, the Secretary, in consultation with the United States Forest Service, the United States Fish and Wildlife Service, and the State of Florida, shall develop, transmit to Congress, and begin implementation of a comprehensive management plan with respect to lands (including water areas) located in the Conservation Area.

(2) Such plan shall, at a minimum, provide for—

(A) enhancement of the environment;

(B) conservation and development of natural resources;

(C) conservation and preservation of fish and wildlife;

(D) scenic and recreational values;

(E) establishment of a procedure for the prompt consideration of applications for easements across conservation area lands, when such easements are requested by local or State governmental jurisdictions for a public purpose; and

(F) preservation and enhancement of water resources and water quality, including ground water.

(3) Such plan shall establish, among the Secretary, the Forest Service, the Fish and Wildlife Service, and the State of Florida, responsibility for its implementation.

(4) The Secretary shall transmit recommendations for protecting and enhancing the values of the Conservation Area to Congress together with such plan.

(5) Until transmittal of such plan to Congress, the Secretary shall operate, maintain, and manage the lands and facilities held by the Secretary for the barge canal project referred to in subsection (b), other than those lands described in subsection (c).

(6) The Secretary shall consult and cooperate with other departments and agencies of the United States and the State of Florida in the development of measures and programs to protect and enhance water resources and water quality with the Conservation Area.

(e) The Secretary shall operate the Rodman Dam, authorized by the Act of July 23, 1942 (56 Stat. 703), in a manner which will assure the continuation of the reservoir known as Lake Ocklawaha. The Secretary shall not operate the Eureka Lock and Dam in a manner which would create a reservoir on lands not flooded on January 1, 1984.

(f)(1) The Secretary shall acquire all lands and interests in lands held on the date of the enactment of this Act by the Canal Authority of the State of Florida for the barge canal project referred to in subsection (b). For acquisition of such lands and interests in lands, the Secretary shall pay the purchase price paid by the Canal Authority plus interest compounded annually at the average rate at which the Canal Authority borrowed funds for project purposes over the total period of financial commitment by the Canal Authority. In addition, the Secretary shall reimburse the Canal Authority for the purchase price paid by the Canal Authority for any lands and interests in lands for such project which lands and interests were transferred to the Secretary before the date of the enactment of this Act. The Secretary shall operate, maintain, and manage the lands and facilities acquired under this subsection.

(2) From amounts received under paragraph (1) of this subsection, the Canal Authority shall make payments to the counties of Duval, Clay, Putnam, Marion, Levy, and Citrus. Such payments shall, in the aggregate, be equal to $32,000,000. The amount of payment under this paragraph to each such county shall be determined by multiplying such aggregate amount by the amount of ad valorem taxes paid to the Cross Florida Canal Navigation District by such county and dividing such product by the amount of such taxes paid by all such counties.

(g) Subsection (b) shall not become effective until—

(1) the State of Florida enacts a law which assures that, on and after the date on which construction of the portion of the barge canal project referred to in subsection (b) is no longer authorized, all lands and interests in lands held by the State of Florida or the Canal Authority of such State and acquired pursuant to section 104 of the River and Harbor Act of 1960 will continue to be held by such State or Canal Authority, as the case may be, to carry out the objectives of this section;

(2) the State of Florida enacts a law which assures that, on and after such date, the State of Florida will never transfer to any person (except the Federal Government) any lands owned by such State and contained within the expanded boundary of the Ocala National Forest as proposed and shown on the map dated July 1978, on file with the Chief of the Forest Service, Department of Agriculture, Washington, District of Columbia; and

(3) the State of Florida enacts a law which assures that, on and after such date, the interests in the lands described in paragraph (1) held by the State of Florida is sufficient to carry out the purposes of this section.

SEC. 1199I. The Secretary, in consultation with the Secretary of the Interior and the Secretary of Commerce and appropriate State agencies, shall develop and implement projects for the creation, protection, restoration, and enhancement of wetlands in conjunction with authorized projects for navigation and flood control in the lower Mississippi Valley.

SEC. 1199J. (a) The Secretary shall waive local cost-sharing requirements up to $200,000 for all studies and projects in American Samoa, Guam, the Northern Mariana Islands, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(b) The Secretary may approve the construction of projects in American Samoa, Guam, and the Northern Mariana Islands, the Virgin Islands, and the Trust Territory of the Pacific Islands which may have a benefit to cost ratio of less than 1.0 if the chief executive of the government involved states in writing that the intangible benefits may be significant to the economic and social development of the insular area concerned.

AMENDMENT OFFERED BY MR. WEAVER

Mr. WEAVER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEAVER: Page 371, line 13, insert "(a)" after "1182.".

Page 371, after line 20, insert the following:

(b) The construction of any hydroelectric facility at a water resources development project of the Secretary within the Pacific Northwest (as defined in section 3(14) of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839a(14)) shall be conditioned upon a determination by the Administrator of the Bonneville Power Administration at the time construction is to proceed that the project—

(1) will produce power that is necessary to satisfy the Administrator's statutory requirements, and

(2) will produce power at least cost and consistent with sound business principles.

Mr. WEAVER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. WEAVER. Mr. Chairman, 5 years ago, the House passed and enacted into law the Northwest Power Act. What the Northwest Power Act did was set up a planning council in the Northwest, together with the Bonneville Power Administration to plan power projects in the Northwest. They stipulated that the power projects should be cost-effective and meet sound business principles.

All this amendment does is say any hydroelectric project in the Northwest, and only in the Northwest, should be brought under the umbrella of that Northwest Power Act, because newly authorized Corps of Engineers projects are outside of the act.

It stands to reason if we are going to plan our power needs in the Northwest that we need to have in the Power Planning Council the complete ability to consider all power planning projects. All this amendment does is bring newly authorized Corps of Engineers projects under the aegis of the Power Planning Council. It gives the Bonneville Power Administration the right to condition the determination of any hydroelectric facility on the basis that it produces power that is necessary to satisfy the administrative and statutory requirements, and that will produce power at the least cost and consistent with sound business principles.

So as I say, this is a housekeeping amendment simply to bring all projects in the Northwest under the aegis of the Northwest Power Act. It would simply give to the Bonneville Power Administrator, the Federal agency now marketing all power in the Northwest from the Columbia River system, the authority to determine whether a new project met the terms of the Northwest Power Act.

That is all the amendment does, and I ask the House to accept it.

I yield back the balance of my time.

Mr. CRAIG. Mr. Chairman, I move to strike the last word.

Mr. Chairman, my colleague from Oregon has told us that this is a simple housekeeping measure consistent with the Northwest Power Act. I have to take opposition with that approach toward describing what is a precedent move in who has the authority in the determination of certain types of projects that currently come under the responsibility of the Congress.

Under existing law and procedures, the Corps of Engineers are required to consult with the marketing agent or the Bonneville Power Administration in this case on particular corps projects. This does, in fact, happen and take the form of marketability determinations by BPA on individual projects.

When the Army Corps of Engineers was before our committee, this question was directly asked of them if they did consult with the other agencies involved, and they said, of course they did, and where there was a question of marketability and there was a recommendation on the part of the Bonneville Power Administrator or other agency that this was not an appropriate type of project, that advice or recommendation was taken under major consideration in the ultimate decision-making process.

But the bottom line is, where does the decision on projects rest? It certainly rests with the appropriate authorizing committee and with the Congress. For the first time, we are suggesting, or my colleague from Oregon is suggesting, by this amendment that we are going to allow a regional group, in this case the Bonneville Power Administration Administrator, to have veto power, veto power by his act of simply saying no, that is not consistent with what he believe to be necessary for the region.

I think this is a precedent-setting move that takes the ultimate authority and the responsibility to make these kinds of determinations away from the appropriate authorizing committee, and, more importantly, the Congress of the United States.

For that reason, I would have to stand clearly in opposition to this amendment. I think it is sweeping in nature, and I think the Members of this body have to ask themselves, are they willing to give up their own authority and grant it to an appointed official who happens to be director of a power marketing system, or in this case, the Bonneville Power Administration in a region where the decisions we make are very critical to the entirety of the region and the well-being of its people.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. CRAIG. I am happy to yield to the gentleman from Oregon.

Mr. WEAVER. Mr. Chairman, it appears to me that the Members from the Northwest have not had time to examine this amendment. I want universality from the Northwest on this amendment because I am doing this for the Bonneville Power Administration.

Therefore, Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The CHAIRMAN. Are there further amendments to title XI?

Mr. ANDERSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, when the conference committee convenes on this legislation, I hope that careful consideration will be given to the bill's local user fee section.

Many U.S. ports—including the Ports of Los Angeles and Long Beach in my area—are deeply concerned that they will not be able to finance the costs associated with their projects due to restrictions in section 109 of the bill.

Language reported by the Merchant Marine and Fisheries Committee on the local fee issue could provide a good compromise between shippers and port interests.

I hope the chairman will further examine this section of the bill.

Mr. Chairman, that is my inquiry.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, if I may respond to the gentleman from California, we are alerted to the gentleman's deep concern about this, which we do share, and I assure the gentleman that we will be reviewing this as we proceed in the process.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman, and I yield back the balance of my time.

AMENDMENT OFFERED BY MR. WISE

Mr. WISE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WISE: Page 399, after line 5, insert the following:

SEC. 1199K. The Secretary shall carry out emergency flood recovery measures in the 33-county area of West Virginia for which the Governor of West Virginia requested a declaration of emergency or major disaster under the Disaster Relief Act of 1974 with respect to the flooding occurring on and after October 31, 1985. The State of West Virginia shall not be required to reimburse the United States for any emergency flood recovery work carried out by the Secretary in such area as a result of such flooding.

Mr. WISE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

□ 1600

Mr. WISE. Mr. Chairman, this amendment is offered by myself and the other members of the West Virginia delegation; Congressman RAHALL, Congressman STAGGERS, and Congressman MOLLOHAN.

During the last 2 days, massive flooding has ravaged 33 counties in West Virginia, the worst flooding in at least 100 years. Yesterday, I spent most of the afternoon in a boat floating through the streets of Weston. Thousands homeless; roads and bridges destroyed; the State's entire National Guard was activated.

West Virginians are tough, Mr. Chairman, we will dig out and we will be stronger than before. We appreci-

ate the committee's assistance in looking at our situation. What the amendment does is simply permit the Army Corps of Engineers to perform the necessary flood recovery work, the emergency flood recovery work, without requiring reimbursements in the State of West Virginia.

Mr. ROE. Will the gentleman yield?

Mr. WISE. I yield to the gentleman.

Mr. ROE. Mr. Chairman, we have examined this amendment on our side and we find it to be completely in order, and we understand what the emergency situation is in West Virginia. So we accept the amendment.

Mr. STANGELAND. Will the gentleman yield?

Mr. WISE. I yield to the gentleman.

Mr. STANGELAND. I thank the gentleman for yielding. We have reviewed the amendment on this side, Mr. Chairman. In light of the emergency situation, this is a very appropriate amendment and we support it.

Mr. WISE. We in West Virginia thank you very much.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from West Virginia [Mr. WISE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PETRI

Mr. PETRI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PETRI: Page 399, after line 5, add the following new section:

SEC. 1199K. Notwithstanding any other provision of law, the unpaid balance of principal allocated to power for facilities constructed by the Secretary, including that portion of the unpaid balance of principal for such irrigation facilities to be repaid from power revenues, shall be repaid annually beginning in fiscal year 1988 at a level not less than would be required under straight-line amortization schedule, as applied separately to each investment placed in service: *Provided*, That this amortization schedule may be phased in over several years, starting in 1988, if necessary to limit to five percent per year the annual increase in revenue requirement that is solely attributable to the increase in scheduled repayments required by this section, compared to the most recent repayment schedule approved by the Federal Energy Regulatory Commission; *Provided further*, That principal repayments may be deferred in years with low hydro-electric generation, subject to the same terms and conditions applicable to deferred payments of interest.

Mr. PETRI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. PETRI. Mr. Chairman, this amendment would require straight line amortization of the remaining principal balance on all Corps of Engineers hydropower projects. This would be a small step toward sounder financial practice. It would put the repayments for these projects on the same basis as a standard home mortgage.

This change has been recommended by the Grace Commission and many other organizations through the years, including the Chief of Engineers of the Corps of Engineers, the Federal Energy Regulatory Commission, the Inspector General of the Department of Energy, the General Accounting Office, and the Energy and Water Subcommittee, House Appropriations Committee. In fact, I have here a whole stack of reports recommending it.

Let me explain what is going on. It has been longstanding Federal policy to recover 100 percent of the cost of hydropower facilities through the sale of power. Unfortunately, various stratagems have been used to undermine that policy. The worst of these, which I am not challenging today, is the assigning of artificially low interest rates to these projects. For example, the second powerhouse at Bonneville Dam was placed in service from 1981 to 1983, at a time when short-term Treasury rates were in the high teens and long-term Treasury rates were in the mid teens. And do you want to guess what interest rate was assigned to this $639 million project? It was 3¼ percent. That's right. At a time when our Nation's taxpayers were paying 15 to 18 percent to borrow money, they were turning around and loaning it out to the Bonneville Power Administration and its customers at 3¼ percent. That represents a tremendous subsidy to the consumers of this power. In fact, the range of interest rates on corps projects under the Bonneville Power Administration is from a low of 2½ percent to a high of 6⅞ percent.

Now as I said before, I am not challenging these interest rates today. But Bonneville and its customers are not satisfied with these subsidies. They have a further stratagem to increase their subsidies, which I am challenging today in this amendment. They apply all principal repayments to those projects carrying the highest interest rates. In this way they reduce future interest payments on the high interest projects and achieve a cross-subsidy from the lower interest projects to the higher interest projects. It's as if you had an older home mortgage at 6 percent and a vacation home mortgage at 12 percent, and you asked your friendly neighborhood banker if you could apply all the principal repayments from both mortgages to the vacation home, thereby retiring that debt early and lowering your total interest payments. You wouldn't get very far, and neither should Federal bureaucrats with the same practice.

This amendment would simply make the repayments for corps hydro projects as businesslike as your home mortgage payments, with a phasein starting in 1988, and with a provision to lower payments in low water years with low power generation. It is an extremely modest step toward actually recovering the full taxpayer investment in hydroelectric power facilities.

OMB estimates that this amendment would increase repayments to the Treasury by $170 million per year when fully phased in by 1990. Four-fifths of that, or $138 million, would come from the Bonneville Power Administration in the Nothwest. If the entire burden of that increase were placed on residential customers so as not to threaten in any way the viability of any business, residential electric rates in the Northwest would rise at most from 46 percent of the national average to about 49 percent of the national average. In other regions the effects would be almost negligible. In areas served by the Southeastern Power Administration, retail rates could rise by about one-half of 1 percent. In areas served by the Southwestern Power Administration, retail rates could rise by 1.7 percent. In areas of the Great Plains served by the Pick Sloan Project, there would be no impact at all, because repayments there are already ahead of what straight line amortization would require.

This amendment is supported by the administration, the National Taxpayers Union, and most of the major environmental organizations. It is one modest step toward sounder financial management. It does not challenge the tremendously subsidized interest rates on hydropower facility debts. It just requires those debts to be repaid in a businesslike way.

Mr. Chairman, we hear a lot of talk around here about the need to cut the deficit. Here's a chance to take a responsible step to cut the deficit by $170 million with virtually no pain to anyone. I can understand why members from the Northwest will oppose this, because no one likes increases in electric rates no matter how favored he or she might be already. But if the rest of my colleagues can't support this step, what measures can they support to deal with our No. 1 domestic problem? We have here in this little amendment an easy test of our willingness to do something about those terrible deficits we all posture against.

I hope we pass this test.

I urge all my colleagues to vote for this amendment.

Mr. STANGELAND. Mr. Chairman, I rise in strong opposition to the amendment offered by the gentleman from Wisconsin [Mr. PETRI]. There are many reasons why this amendment should be rejected.

The Petri amendment would unilaterally and unjustifiably change the current power repayment schedules. Under the existing repayment system, power customers must repay the total Federal investment over a 50-year period. The Petri amendment would ignore market conditions and the lessons of past experience to require levelized annual payments by the power marketing agencies.

Why should we change something that already works? We must remember that power revenues face unpredictable fluctuations. The current pay back system takes into account the continually changing market conditions and gives power marketing agencies the flexibility to vary the amount of repayment from year to year. For example, in high water years when more revenues are generated, power marketing agencies pay larger amounts on the debt. In low water years, when less energy is produced and revenues decrease, the power marketing agencies may wait until the following year to make their scheduled repayments. Even then, they would be subject to substantial interest penalties. The Petri amendment, which requires straightline amortization, would throw this whole system into disarray. It would ignore the practical realities of hydropower.

Perhaps the most disturbing aspect of the amendment is that it would impose a massive rate increase on power consumers. Conservative estimates indicate that the Petri amendment would cost Bonneville Power Administration ratepayers $70 million in additional rates for hydropower and $15 million for irrigation. Similarly, in the midwest, power is derived from the Pick-Sloan system, which would also be adversely impacted. Most Pick-Sloan power users are farmers, ranchers, and other persons dependent upon the agricultural economy. We all know how critical and perilous the agricultural conditions are in the Great Plains region. Mr. PETRI's amendment would add to these problems by creating unnecessary and unreasonable rate increases.

Mr. Chairman, a similar proposal emanating from the Office of Management and Budget last February, was soundly rejected by both the House and Senate Appropriations Committees. I think these were wise decisions. We should follow them.

Mr. Chairman, I would also like to read into the RECORD a letter from a former, very distinguished Member of this body, my predecessor, Bob Bergland, who also was Secretary of Agriculture.

He says, and I quote:

The proposed Petri amendment would change the long established accounting methodology for Federal hydroelectric projects, and would thereby substantially raise the wholesale cost of electricity purchased from these projects by some 650 rural electric cooperatives. As the national association representing more than 1,000 such electric cooperatives which serve about 25 million people in 46 states, we express our strongest opposition to the Petri amendment and urge its defeat.

Under present practice, Federal power marketing administrations set their wholesale rates to recover the full Federal investment in power facilities over a 50 year period and defray all operation and maintenance costs. All of the Federal power marketing administrations are current in their repayment obligations.

For all of these fundamental reasons, I urge my colleagues to reject this far-reaching amendment.

□ 1610

I think this is good advice from a respected former colleague.

Mr. Chairman, I urge that the Petri amendment be defeated.

Mr. ROBERT F. SMITH. Mr. Chairman, will the gentleman yield?

Mr. STANGELAND. I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the amendment offered by Mr. PETRI.

This action would, if approved, require Federal power marketing administrations like the Bonneville Power Administration which provides power to more than 100 utility companies in Oregon, many in my own Second Congressional District, to use a fixed-year straightline amortization system for repayment of Federal investments.

Of the total $170 million new Federal income which Mr. PETRI anticipates from this amendment, fully four-fifths, more than 80 percent, would come from the BPA alone. Obviously, I have a critical interest in this measure.

Mr. PETRI's amendment simply should not be under consideration today. Though the change in repayment systems was suggested by the administration, it has already been rejected by both House and Senate Appropriations Committees. And even though it seeks to accomplish a complicated and highly controversial change, it has never been explored in any kind of congressional hearing.

Simply stated, this is not the kind of issue that should be decided in a few minutes of general debate on the floor of the House.

The sad fact, however, is that the amendment is here. As such, you should know something about it.

On the most basic level, the Petri amendment is a question of fair play. It amounts to changing the rules in the middle of the game. Federal power marketing administrations like BPA contracted under specific and well-defined terms for the use of Federal construction capital. Rates were established to meet those terms.

Now, in a period of particularly high need for new Federal revenue, Mr. PETRI's amendment suggests that original agreements don't count.

Without even considering the economic impact on my constituents, I just don't think anyone can justify this kind of change of the rules. It would be like suggesting in the last inning of the sixth game of the World Series that the underdog team can have four outs instead of three.

I realize that many, in this House, in the administration and in the power production business around the country, believe that the Pacific Northwest is sitting on top of the world with cheap hydroelectric power. And many, privately covet what they consider to be a grand advantage, harboring the notion that cheap power would settle all of the industrial and economic development problems in their own area.

Well, I want to tell you, not so.

Allow me to share just a little insight on the economic problems this would cause in my own district, my home State, and the entire Northwest region.

The Pacific Northwest, and Oregon in particular, has yet to reach the stage of economic recovery that most other regions of the United States have already reached. Our timber industry is still in the dumps and double-digit unemployment lingers in far too many Oregon timber-producing communities.

Things are no better in the high-energy usage businesses of aluminum production and irrigated farming. In those, any increase in BPA rates threatens to not just hurt, but kill the remaining businesses which are today just barely holding their heads above water.

This amendment would dramatically increase power rates from BPA by forcing them to charge bloated power rates for the sake of meeting a fixed-rate repayment schedule in the bad years as well as the good.

This year, BPA faithfully paid $682 million in interest, principal and operating costs exactly as they would be paid under this plan. Indeed, we were fortunate that this year it could be done.

But to remove the flexibility of the original repayment schedule, which allows an occasional repayment year below full principle, would be to balloon an unbearable mandate on the Pacific Northwest.

It would mean loss of an estimated 50,000 jobs—about 10 years of normal economic growth in the Northwest. I don't need to tell the Members of this Congress—most of whom have watched the cycle of economic stagnation in the industrialized Northeast—what happens when you break the backbone of a State's industrial base.

Mr. Chairman, colleagues, I urge you to oppose the Petri amendment. It is ill-advised, inadequately studied, often-rejected, unfairly created, economic poison for the Pacific Northwest and Oregon. It must be defeated.

Mrs. SMITH of Nebraska. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I oppose any amendment that would revive the infamous plan of last year put forth by the

Office of Management and Budget that would have immediately more than doubled the bills for electric power to dozens of the cities and towns in my district dependent for all or part of their needs upon hydroelectrically generated power from Federal facilities.

This sharp additional cost would have been passed on immediately to the desperately financial troubled farmers, ranchers, businessmen, and all consumers generally in rural Nebraska.

Testimony before my Appropriations Subcommittee on Energy and Water Develpment earlier this year revealed that the cost to Nebraska's municipalities alone would have jumped to more than $6.7 million this fiscal year from only about $3.7 million in the previous 12-month period.

It is my understanding this amendment by the gentleman from Wisconsin will be aimed at making these towns and their power customers begin paying higher bills by requiring a straight-line amortization, including interest at current rates.

This would break agriculture—pure and simple, if imposed too quickly. Even if the proposed cap of an annual increase of 5 percent were adopted, it would still be an unwarranted burden on people who already are in deep trouble.

Last year, Congress rejected the idea out of hand. I ask my colleagues to reject it again—as it should be, at least until prosperity again smiles on our agricultural sector.

Mr. SWIFT. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, there are a lot of reasons why the Petri amendment should be rejected, but the major one is that this amendment is patently unfair and discriminatory. Public works projects by the hundreds have been funded directly and completely by the Federal Government. We have all benefited from them. The entire Nation has benefited from public works projects that were virtually paid in toto by the Federal Government. That is not the kind of project we are talking about here. We are talking about projects, the full cost, every penny of the principal is being repaid by the ratepayers of those power marketing areas, with interest.

The irony is that had this been one of those projects that was paid for fully by the Federal Government, there would not be any repayment schedule on which to attach this amendment.

The fact that we are paying for these projects out of the rates of the people who benefit most directly is what sets up the mechanism to harass people in the power marketing areas.

Let me make another point. It is charged that somehow we are getting some special deal, and yet in any business you would amortize something over the useful life of that capital expense.

We are repaying over 50 years. Virtually every one of these dams has a useful life of 35 years. We have given up 35 years of amortization in an agreement with the Federal Government in which we repay every penny of the principal with interest.

That is a good deal for the Federal Government, it is a good deal for the people as well.

One last point: The gentleman made an analogy with regard to your home loans. Consider this: Who would let their banker unilaterally renegotiate their home loan contract half-way through that contract? Which is precisely what this amendment would do. It is patently and directly unfair, it does not take into consideration the deal that the ratepayers have given the Federal Government, and it is unilaterally renegotiating a contract that was made in good faith years ago.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I will be happy to yield to the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

Mr. Chairman, I want to compliment my colleague from Washington for having made a very correct statement. Just so that our colleagues again understand it, the gentleman made a very important point: It is the ratepayers of the Pacific Northwest who are paying back the money for these dams. It is not the rest of the country. That is No. 1.

Second, on September 30 of this year, Bonneville made a payment of $682 million to the Treasury. Of this amount, $226 million was principal, $374 million was interest, and $82 million was for O&M costs.

Now, they have made a Herculean effort to get back on their payment schedule, and yesterday the Administrator of BPA said we are now back on our payment schedule.

So I would hope that the House would reject this amendment. I do not think it is necessary. We are back on our schedule. We are paying because we want to pay back the money that was used for these facilities. Again, it is the people of the Northwest who are paying those bills.

Mr. Chairman, I would like to join my colleagues in expressing my strongest opposition to this amendment, and I urge the House to reject it convincingly. While I believe that Mr. PETRI may have had the best of intentions in offering the amendment, what he has actually done is to offer a proposal that will have a major and dramatic adverse impact on large sections of our country. While it is true that the greatest impact will be on the Pacific Northwest, both Southeast and the Southwest have projects which would be included under the repayment provisions. This proposal has never undergone hearings or any formal consideration by any committee or subcommittee in this Congress, and did not even exist on paper just 3 days ago. It has already gone through numerous changes since its original draft, and still contains technical problems which clearly indicate a lack of understanding of power marketing operations which will make its application extremely difficult.

First of all, let me try to explain, in the simplest terms, how the Bonneville Power Administrative finances its construction program. BPA takes out loans, just like you and I do when we're purchasing a house, and then repays these loans over a 50-year time period. During the early years, the payments are mainly made up of interest, with very little principal, and these proportions shift over as the payments are made. During the latter years of each loan it is largely principal with very little interest. This shift takes place even though the total amount paid by BPA each year remains constant.

Many of us have home loan payments that operate in this same manner, as does most of the business world. The alternative is a balloon payment program, during which annual principal payments are low with a large final payment when the loan is finally due. But no one, to my knowledge, would take out a loan which requires a balloon payment during the first years, and then tapers off during the last years of the loan—which is effectively how this amendment would force BPA to operate.

On September 30 of this year, Bonneville made a payment of $682 million to the Treasury. Of this amount, $226 million was principal, $374 million was interest, and $82 million was O&M costs. Because the Petri amendment is so new we have not had the opportunity to determine exactly what its impact will be, but according to OMB, during 1988, which is the first year the amendment would go into effect, BPA would have an increase of $112 million in payment of principal, and this would go up to $136 million by 1989. This is a 50-percent increase in the payment of principal, a 50-percent increase which this amendment would sanction without even a hearing on its potential impact. So don't let anyone tell you that this is a minor change in repayment that won't really affect anyone, it is simply not the case.

The second point that I would make is that, presumably, the entire reason for this amendment is to make sure that power marketing administrations such as Bonneville make timely and regular payments to the U.S. Treasury. If this is the case, it is unnecessary because BPA is operating on a sound fiscal basis, and is completely up to date in its payments to the Federal Treasury of both principal and interest. In all, BPA has made a total payment to the Treasury of $5.5 billion; $865 million of this amount has been repayment of principal.

I would like to draw your attention to the fact that this amendment is offered to H.R. 6, the omnibus water resources bill. I find a certain degree of irony in this fact, because the Bonneville projects this amendment affects are already unique in one respect from any other project included in this bill—their costs are already being paid entirely by the regional ratepayers. Yes; that's right, the only case of 100 percent local cost sharing you will find in this bill. There are a number of projects included in H.R. 6 which are being paid for entirely by the Federal Government—obviously there is no issue of repayment schedules here because there is no repayment being made. Period. The remainder of the projects are paid for jointly by the Federal Government and local governments—again, no one is even considering having the Federal contribution repaid.

Yet in the BPA projects we have a unique situation in which local ratepayers have agreed to repay the Federal Government the entire cost of building the projects, plus interest, and now we stab them in the back for their efforts and try to make them pay back the loans faster, against all concepts of good business practice or logic. It can hardly escape the ratepayers of the Northwest that if they had not agreed to repay the Federal Government in the first place, they would not be faced with this amendmemt today.

I would also point out to ratepayers all over the country that may enjoy the benefits of projects included in this bill that the amendment being offered today is a retroactive change in existing schedules. The only example I can find to compare this to is to imagine that we pass this bill, and the projects it authorizes are built, and years down the line some Congress, with no hearings or any other type of review, decides that the cost-sharing provisions should actually have been 50 percent and retroactively imposes the new requirements. You can well imagine the effect such a proposal would have on everyone already paying the original local share on the projects.

The Federal Government made a commitment to the ratepayers of the Pacific Northwest years ago, that has been confirmed regularly until today, that repayment of Federal loans would be in the lowest cost manner consistent with prudent business practices. That is how BPA has operated during this time period, and the entire Northwest economy has been built upon this presumption. Our entire region is still reeling from the effects of the recession that crippled the rest of the Nation just a few years ago. We have not yet seen the economic recovery that this administration promised every region of the country.

Unemployment in our most fundamental industries such as timber and aluminum still hovers around 30 percent. In many counties, one in every three citizens is still unemployed. Many of those businesses which remain are tottering on the brink of bankruptcy. Rate increases which were necessitated by the WPPSS debacle easily exceeded 700 percent, and have only recently stabilized to about the rate of inflation. Our ratepayers, both commercial and residential, have clearly shown they cannot absorb yet another increase in rates. The last rate increase of 5 percent which was approved in 1983 resulted in an overall decrease in load utilized by BPA customers.

Obviously, those most affected are the poorest of our citizens, who cannot afford even a small increase in their power rates. Unfortunately, in the Pacific Northwest, no one customer class has recovered from the recession, so there is nowhere to shift the burden of the increase. If you try to protect small businesses, you incease the impact on direct service industries and consumers. If you protect consumers, thousands of marginal businesses could go under. No matter where you look, the results are increased unemployment and decreasing revenues to Bonneville.

I will conclude my comments by again strongly urging my colleagues to oppose this amendment. If Congress is to impose such a dramatic change in repayment methodologies for power marketing administrations we should do it in a logical, coherent manner with the introduction of a bill on the issue and hearings in the authorizing committees. It should not be the result of a quickly drafted amendment that is only offered 1 day before a vote, which no one can clearly interpret or analyze. If we're going to do this, let's do it correctly, so we can really say to our constitutents that we knew what we were doing.

Thank you Mr. Chairman.

Mr. SWIFT. I thank the gentleman for those remarks.

Mr. Chairman, I would add and point out it is not only the Pacific Northwest affected by this amendment, because it also deals with the Western Area Power Administration, the western Missouri River basin, the intermountain States, Texas, Oklahoma, California, the Southeastern area, Southwestern area as well.

Mr. CHANDLER. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from Washington.

Mr. CHANDLER. I thank the gentleman for yielding.

Mr. Chairman, I compliment the gentleman for his leadership on this issue. I simply would like to add that this is no time to hit the Pacific Northwest with an economic broadside. We are having enough trouble in our agricultural sector, our forest products sector, our aluminum smelting sector. This would simply add to the economic woes that have already crippled many of the areas in our State.

I thank the gentleman for yielding. Again, my compliments to the leadership of the gentleman on this issue.

Mr. SWIFT. I thank the gentleman for his contribution.

Mr. FAZIO. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman.

Mr. FAZIO. I thank the gentleman for yielding.

I would like to compliment the gentleman on the leadership he played on this occasion and on so many other occasions when this particular attack has been made.

My constituents at SMUD in Sacramento have had a 28-percent increase in their rates this year. This very ill-considered amendment would increase the rates they pay by another $10 million within this calendar year. I want to associate myself with the remarks of the gentleman.

Mr. Chairman, there are many good things in this bill which we are debating and amending today. These things extend from special provisions enabling a local takeover of operating costs for the William G. Stone lock in my own district, to the largest coal exporting ports on the east coast. The bill's main achievement, however, is that it breaks a drought which has persisted since 1970 on the development of new port, flood control, and environmental enhancement projects which this Nation has very badly needed.

Before I turn to a discussion of these, however, I would like to applaud the bill for one thing it does not include. That is an overturning of the established formula for the repayment of hydropower obligations by Federal power customers. An amendment to impose a so-called straight line amortization schedule on these customers may be offered today. It should fail, because it presumes several things which are not true:

It is not true that Federal customers are paying their debt back more slowly than current 50-year shedules call for

Nor is it true that the current schedules fail to recompense the Government quickly enough.

And it is not true that the customers can simply regularize their debt payments regardless of the amount of hydropower the Government provides them, because that amount is dependent on the weather.

The amendment should also be defeated because it confers upon the Federal Energy Regulatory Commission powers over the Energy Secretary which it does not now have and which it should not be given. Last, the amendment seeks to impose on Federal customers higher interest rates for the shortfalls in their payments during times when hydropower is not plentiful. On such occasions Federal customers pay less to the Government to reflect the smaller amount of power they receive. To hold the customers to a higher repayment for power that they are not getting, or to consider the forgone payment a loan to be paid back at higher interest rates, is unfair.

The amendment to be offered by my colleague from Wisconsin echoes back to broader proposals made by the administration at the onset of the fiscal year 1986 budget debate. Rate increases imposed unilaterally and in violation of existing contract provisions between the Federal Government and its customers would have

caused substantial dislocation among these customers, who include my own constituents served by the Sacramento Municipal Utility District. This amendment seems more narrowly crafted, to affect only corps dams and thus not the central valley project facilities which serve us. Nevertheless, as a matter of principle, retroactively changing the arrangements between the Government and its customers is not right.

Further, we can safely assume that if this policy were adopted to affect corps dams, it would be inconsistent for the Congress to fail to extend it to affect all Federal dams, including the Bureau of Reclamation's. The total affect of such a move on the Western Area Power Administration within 4 years from today would be $54 million a year, almost $30 million of it attibutable to boosted rates charged by recipients of power from the existing Pacific Northwest intertie and the Central Valley project. My SMUD constituents have already suffered a 28-percent rate increases in the past year; since they pay roughly one-third of the Federal bill, this single ill-considered amendment would cost them $10 million.

We have an infrastructure in this Nation which was planned and built essentially in the forties, fifties, and sixties. The national and world economies have changed drastically since then. Trade patterns have altered with the changing fortunes of individual nations. We need larger ports in new locations to handle new commodities between different destinations in larger, modern vessels. Urban and suburban development has exploded all over the Nation, establishing new requirements for flood protection and water supply. Our encroachments on the environment have created new pressures for mitigation above and beyond those attributable to a new sensitivity to environmental values.

Moreover systems we developed in the post World War II era, and in many cases well before that, have deteriorated even where their designs may not have become obsolete. Particularly in the older regions of the Nation need is intense for rehabilitated or better integrated water supply systems. This Nation has devoted many decades to the development of water supply systems for cities and agriculture in the West. It is appropriate now that we turn greater attention to the problems in the East, where so much capital was raised in past years to invest in the West.
